(g) Passing a telegraphy receiving examination is adequate proof of an examinee's ability to both send and receive telegraphy. The administering VEs, however, may also include a sending segment in a telegraphy examination.
(h) Upon completion of each examination element, the administering VEs must immediately grade the examinee's answers. The administering VEs are responsible for determining the correctness of the examinee's answers.
(i) When the examinee is credited for all examination elements required for the operator license sought, 3 VEs must certify on the examinee's application document that the applicant is qualified for the license and that they have complied with these administering VE requirements. The certifying VEs are jointly and individually accountable for the proper administration of each examination element reported on the examinee's application FCC Form 610. The certifying VEs may delegate to other qualified VEs their authority, but not their accountability, to administer individual elements of an examination.
(j) When the examinee does not score a passing grade on an examination element, the administering VEs must return the application

document to the examinee and inform the examinee of the grade.
(k) The administering VEs must accommodate an examinee whose physical disabilities require a special examination procedure. The administering VEs may require a physician's certification indicating the nature of the disability before determining which, if any, special procedures must be used.
(l) The administering VEs must issue a CSCE to an examinee who scores a

[[Page 613]]

passsing grade on an examination element.
(m) Within 10 days of the administration of a successful examination for an amateur operator license, the administering VEs must submit the

application document to the coordinating VEC.

[59 FR 54834, Nov. 2, 1994, as amended at 61 FR 9953, Mar. 12, 1996; 62 FR 17567, Apr. 10, 1997]

Sec. 97.511 Examinee conduct.

Each examinee must comply with the instructions given by the administering VEs.

[59 FR 54835, Nov. 2, 1994]

Sec. 97.513 VE session manager requirements.

(a) A VE session manager may be selected by the VE team for each examination session. The VE session manager must be accredited as a VE

by the same VEC that coordinates the examination session. The VE session manager may serve concurrently as an administering VE.
(b) The VE session manager may carry on liaison between the VE team and the coordinating VEC.
(c) The VE session manager may organize activities at an examination session.

[62 FR 17567, Apr. 10, 1997]

Sec. 97.515-97.517 [Reserved]

Sec. 97.519 Coordinating examination sessions.

(a) A VEC must coordinate the efforts of VEs in preparing and administering examinations.
(b) At the completion of each examination session, the coordinating VEC must collect the FCC Form 610 documents and test results from the

administering VEs. Within 10 days of collecting the FCC Form 610 documents, the coordinating VEC must:
(1) Screen each FCC Form 610 document;
(2) Resolve all discrepancies appearing on the FCC Form 610 documents and verify that the VEs' certifications are properly completed; and
(3) For qualified examinees, forward electronically the data contained on the FCC Form 610 documents, or forward the FCC Form 610 documents to: FCC, 1270 Fairfield Road, Gettysburg, PA 17325-7245. When the data is forwarded electronically, the coordinating VEC must retain

the FCC Form 610 documents for at least 15 months and make them available to the FCC upon request.
(c) Each VEC must make any examination records available to the FCC, upon request
(d) The FCC may:
(1) Administer any examination element itself;
(2) Readminister any examination element previously administered by VEs, either itself or under the supervision of a VEC or VEs designated

by the FCC; or
(3) Cancel the operator/primary station license of any licensee who fails to appear for readministration of an examination when directed by the FCC, or who does not successfully complete any required element that is readministered. In an instancce of such cancellation, the person will be granted an operator/primary station license consistent with completed examination elements that have not been invalidated by not appearing for, or by failing, the examination upon readministration.

[54 FR 25857, June 20, 1989, as amended at 59 FR 54835, Nov. 2, 1994; 62 FR 17567, Apr. 10, 1997]

Sec. 97.521 VEC qualifications.

No organization may serve as a VEC unless it has entered into a written agreement with the FCC. The VEC must abide by the terms of the

agreement. In order to be eligible to be a VEC, the entity must:
(a) Be an organization that exists for the purpose of furthering the amateur service;
(b) Be capable of serving as a VEC in at least the VEC region (see

appendix 2) proposed;
(c) Agree to coordinate examinations for any class of amateur operator license;
(d) Agree to assure that, for any examination, every examinee qualified under these rules is registered without regard to race, sex,

religion, national

[[Page 614]]

origin or membership (or lack thereof) in any amateur service organization;

[54 FR 25857, June 20, 1989, as amended at 58 FR 29127, May 19, 1993; 61
FR 9953, Mar. 12, 1996]

Sec. 97.523 Question pools.

All VECs must cooperate in maintaining one question pool for each written examination element. Each question pool must contain at least 10
times the number of questions required for a single examination. Each question pool must be published and made available to the public prior

to its use for making a question set. Each question on each VEC question
pool must be prepared by a VE holding the required FCC-issued operator

license. See Sec. 97.507(a) of this part.

Sec. 97.525 Accrediting VEs.

(a) No VEC may accredit a person as a VE if:
(1) The person does not meet minimum VE statutory qualifications or
minimum qualifications as prescribed by this part;
(2) The FCC does not accept the voluntary and uncompensated services
of the person;
(3) The VEC determines that the person is not competent to perform

the VE functions; or
(4) The VEC determines that questions of the person's integrity or

honesty could compromise the examinations.
(b) Each VEC must seek a broad representation of amateur operators

to be VEs. No VEC may discriminate in accrediting VEs on the basis of race, sex, religion or national origin; nor on the basis of membership

(or lack thereof) in an amateur service organization; nor on the basis

of the person accepting or declining to accept reimbursement.

Sec. 97.527 Reimbursement for expenses.

(a) VEs and VECs may be reimbursed by examinees for out-of-pocket expenses incurred in preparing, processing, administering, or coordinating an examination for an amateur operator license.
(b) The maximum amount of reimbursement from any one examinee for any one examination at a particular session regardless of the number of examination elements taken must not exceed that announced by the FCC in a Public Notice. (The basis for the maximum fee is $4.00 for 1984, adjusted annually each January 1 thereafter for changes in the Department of Labor Consumer Price Index.)

[54 FR 25857, June 20, 1989, as amended at 58 FR 29127, May 19, 1993; 61 FR 9953, Mar. 12, 1996]

Appendix 1 to Part 97--Places Where the Amateur Service is Regulated by the FCC

In ITU Region 2, the amateur service is regulated by the FCC within the territorial limits of the 50 United States, District of Columbia, Caribbean Insular areas [Commonwealth of Puerto Rico, United States Virgin Islands (50 islets and cays) and Navassa Island], and Johnston Island (Islets East, Johnston, North and Sand) and Midway Island (Islets Eastern and Sand) in the Pacific Insular areas.
In ITU Region 3, the amateur service is regulated by the FCC within the Pacific Insular territorial limits of American Samoa (seven islands), Baker Island, Commonwealth of Northern Mariana Islands, Guam

Island, Howland Island, Jarvis Island, Kingman Reef, Palmyra Island (more than 50 islets) and Wake Island (Islets Peale, Wake and Wilkes).

Appendix 2 to Part 97--VEC Regions

1. Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont.
2. New Jersey and New York.
3. Delaware, District of Columbia, Maryland and Pennsylvania.
4. Alabama, Florida, Georgia, Kentucky, North Carolina, South Carolina, Tennessee and Virginia.
5. Arkansas, Louisiana, Mississippi, New Mexico, Oklahoma and Texas.
6. California.
7. Arizona, Idaho, Montana, Nevada, Oregon, Utah, Washington and Wyoming.
8. Michigan, Ohio and West Virginia.
9. Illinois, Indiana and Wisconsin.
10. Colorado, Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota

and South Dakota.
11. Alaska.
12. Caribbean Insular areas.
13. Hawaii and Pacific Insular areas.

Poor, poor autistic "Lloyd Asswipe Davies" <n0vfp@aol.com>
shows his lack of intelligence by drooling:

>That's right Roger Wideman.

Oh, a name LAME, whatever shall I do???
Given the LIMP nature of your resonses to my posts, it leaves me to come to the conclusion that you are the type of person to pick a fight, get the crap beat of yourself, then run to the police.
I _know_you don't have the cajoles to call me that in person.
I may be 40-something, but even my grandmother could beat the crap out of a limp-wristed geek named Lloyd.
Hell, you probably were the type that was picked LAST when teams were chosen in p.e.

>Remember you got your ass kicked off AOL last
>year! HA HA. Watch us do it again!

Poor, poor Lloyd. He blatantly declares in public his ineptitude for countering an argument. So when you can't beat somebody in public, you sneak around and complain to his isp. One might as well stick a tail on you LLoyd and call you a WEASEL.

>You must be attracted to "Big Al",

But, Polly, it's _you_who are one of his followers. Looks like you're trying to project your innate feelings of attraction for another male to somebody else. Your lover Billy Jack won't like that, he tells us that he just loves to grab a hold of your ears from behind.

>Both you and Dan have been
>unidentified on his frequency qrming him on the ham bands for years,

Hmmm.. funny, I have never heard Dan go unidentified, and I id as per part 97, so I suppose you are just talking out of your ass.

>just common qrmers that is all you are.. qrm this.....Rileygotcha no
>qrm here ho ho

Just like when you (I hate to say it, because you certainly have NO MUSICAL TALENT whatsoever) "play" your harmonica over the air, Polly? I bet the monitoring station has your coordinates at the top of their hit list.
And the only reason you can't get to the top musically, is because you lack three things: talent, ambition, and initative.

Roger L Wiseman, KC8JBO
Class: General
Previous Class: Technician Plus
Issue Date: 06-11-1999 Expires: 01-05-2008

I know you're mentally challenged, Polly, but how in the HELL could I
have been qrming for years when I was first licensed 01-05-1998?
I was initally a Technician (like poor, poor dumbass Lloyd) and only on 2
meters until I upgraded to Tech Plus earlier this year. Unlike Lloyd and
yourself, polly, I don't have mental disabilities preventing any
upgrading and I upgraded to General on 06-11-99. Previously I only had a
Kenwood R-5000 RECEIVER, now I know it's very taxing for you, but think,
how can somebody qrm with just a receiver?
Or are you just jealous because I have a brand new FT-920???? Poor, poor
polly, has to use those old hallicrafters or some cheap brand of rig.
Stupidass polly.........

See, what it is, Lloyd idolizes KT4TR, the public, (er, private) "dick",
"inspector clueless" of Vero Beach. Neither one has an education, even
though youngblood's is in "marketing", which is nothing more than SALES.
I guess Babbling Bob wanted to be a used car salesman early in life. Ol'
LLLLL..lloyd here lacks the intellect to even hold a job at McDonald's.
But I do have to give him some credit in one area; He's a real
nature-lover, he goes into the woods at night without a girl.
Of course, this is no surprise, since he had to take his sister to the
prom.

3304. Re: N0VFP to tear Roger Wiseman a new ass!

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-03 00:00:00 UTC
From: "Roger L. Wiseman" <kc8jbo@juno.com>
Message-ID: <19990803.200131.9598.14.kc8jbo@juno.com>
Source record: 134974

Using his moonshine-addled, mutated brain stem, "rileygotcha"
<rileygotcha@my-deja.com> the ex washing machine repair helper babbles:

>Roger Wideman AKA Wiseman,

A name lame, how original!

> is a known (BY US) unidentified qrmer who
^^^^^^^^^^^
"Known by United States?" "Known by??" Try it in English next time, DOLT.

>has been active for the last eight years just like Charles Eartzbard,
>AF2Y, AKA Swartzbard, on the twenty and seventy five meter bands.

Explain how I have been active without a transciever, DUMBASS!

>AF2Y had to stop his NAZI archives tape playing and jamming after
>hearing from Mr R. Hollingsworth.

Don't you mean Walter Miller?

>Roger Wideman aka Wiseman is the jammer
>called "Blabber Mouth" very active to this date.

Prove it. I sure do hope you send in some false reports, Polly. I can get
them under the FOIA, and when the FCC can find no wrongdoing, you'd
better prepare to change all of your meager assets to my name, and plan
on spending the rest of your golden years collecting aluminum cans on the
side of the road.

>He has not been caught because of failure to I. D.

Or maybe, I haven't been caught because I don't engage in that activity.
Unlike a moron who gets on teh radio and shows his complete lack of
musical TALENT on the harmonica. Huh, Polly?

>But we are on the case....Rileygotcha

Now there's a comforting thought. At least I can sleep at night knowing
that the "investigation" will be performed by a bungeler.
Or is that bunghole? Same difference.

>just keep it up

I don't have any problems in that area, Polly. Having any side effects
from the Viagra and anti-erectile dysfunction medicine?

Try Yost and Co. The advertise in most of the ham pubs. I just found
their ad on page 64 of the August CQ magazine. There are other battery
suppliers also. If you're handy, you can try to break open the pack and
put in new nicads. Freeze it first and use a small ball-peen hammer
(gently grasshopper, gently!) on the seam. Buy tabbed cells and replace
all of them at once. I've done both for my Kenwood TH-77A. Worked both
ways.

Clint,

Are you doing tech support in addition to your "Public
Relations" duties? I'm so impressed.

Mark don't pay a lot of attention to Clint he doesn't
really know anything but he does make a lot of noise.
Several posters have noted problems with Version E
check a Deja.com doing a search on ADMS.

For starters use the software to program a UHF simplex
frequency then try that frequency with the VX-5 and
listening on the FT-51. If you are not locking up you
will soon know.

There is an alternative programming software on the
"Unofficial VX-1r" page. It is called EVE and I have
heard some complimentarty things about it. I have it
loaded for my VX-1 but I do not have a VX-5 so can't
tell you anything specific about that box.

[...]

I have two comments.

First, it is odd that someone who castigates another for an ethnic remark makes one himself -- "trailer park trash" being an insulting term for poor White Americans.

(It is also interesting that so many on the political Left, who often pose as being ever so concerned for the "workers," use this same insulting term which applies to the White working class! It's fully equivalent to calling lower-class Blacks "ghetto trash.")

As for AF2Y, I know that he doesn't deny being a Jew, and he probably would admit that he has a loud mouth -- so where is the argument?

With all good wishes,

Kevin, WB4AIO.

Hey, Gerry, baby - where ya been?

I was waiting for your reply to the public lies you invented a little
while back here:

Let's quote you directly on those six "points" you alleged in one thread
alone:

1. "A public statement by RT that Bradford etal do not
represent their firm would go a long way toward repairing
the public relations damage he has done."

CITE your source at RT Systems who believes I have caused P.R. damage.

2. "Your bullshit leaves such a bad impression that it
is actually hurting RT Systems."

CITE your course at RT Systems who believes this.

3. "I had a nice chat with RT Systems apparently you are
a bit of an embarassments to them but there is little
they can do about you."

CITE your source.

4. "The other things I learned gave me a lot more insight
into your real motives. It is certainly strange that
someone so supportive of RT Systems and the ADMS software
would want the command codes for the Yaesu radios. That
looks more like someone who intends to produce a knockoff
rather than someone who supports RT Systems and the ADMS
software."

CITATIONS???

5. "It is apparent that what you really want to do is to
produce your own product it was all quite interesting.
You sir are a liar and a fraud and are simply trying to
divert attention from this."

CITE the alleged "project" you refer to.

6. "...that it was obvious you wanted to develop a
competitor to ADMS. Or perhaps you just want the Yaesu
command codes to be a big shot. Why don't you just
figure them out like Goran did. Perhaps you're just
too lazy and unmotivated as we have previously
discussed."

CITE any evidence you have that I wanted to product any product on this subject.

You cannot use Karen nor Rod at RT as your "source" for your accusations. As a matter of fact, you cannot provide the name of ANY principal at RT Systems who will back you up on any of the above.

If you could - you would have by now...

You cannot provide legitimate copies of anything I have stated or written asking for "codes" for anything. Nor can you demonstrate any interest of mine to get involved in any such project in ANY forum/medium.

If you could, you would have by now...

I do not know why you invent such silliness, Gerry. But it's quite boring, actually.

And now you're back, telling all that I might mislead them.

C'mon, Gerry. There's room enough on the Internet for the both of us. I'll drop my insistence that you apologize for your lies of the past, if you simply start addressing ISSUES as they come up, and stop your psychotic "anti-Clint" behavior.

OK?

its usual frequency -- W1WCR has QSYed, dozens of times at least.

W1AW and K1MAN have never relinquished a frequency, to my knowledge.
They simply begin transmitting, with no indication that they have
been listening beforehand.

==========

Yes, Kevin. You're right. While I can't vouch for EVERY LN, I have not
heard him start up without asking first and have witnessed a QSY or two.

And W1AW and K1MAN expect US to know THEIR broadcast schedule (and THAT'S
EXACTLY WHAT IT IS), or else they cry interference, even if we were there
first.

Double standards make me puke, and I will not renew my membership after a
decade due to :

1.this ridiculous assertion by Bloom, over "copyrighted" bulletins

2.product reviews that portray ALL rigs as GOOD when I know many stink,
as I've followed their so-called "reviews" into a hole

3.their double standards in allowing and promoting contest interference,
while regular day to day "interference" is misjudged with agressors
becoming victims

4.being overly obsequious with Hollingsworth, a Democratically promoted
bureacrat and getting him into the ARRL party-line (contests are OK,
politics isn't) fold

5.snide commentary on impeachment "subtracting" from Congress doing its job vis-a-vis ham "legislation" (clearly, this implies ARRL doesn't care for a Republican majority); ARRL is staffed by political scientists such as myself now, as well as general know-it-alls ?

>Message-ID: <5id9j1$arb3@ns2.hgo.net>
>Organization: HGO.Net
>Newsgroups: alt.flame,alt.evil,alt.fan.karl-malden.nose
>
>Fuck you, kike! They must've cut everything off at the bar mitzvah.
>The're always room for cyclon-B. Perhaps I can let some Palistainian
>acquantances know your address...that would be funny.

(This is what happens when you grep dejanews for your name.) Roger Wiseman is the epitome of hypocrisy. He is a petty little excuse for a human being, and probably should be ignored.

To be fair, he may have changed over the past two years. Still, anyone who gets expelled from the Hell Flame Wars (HFW) is a pretty sad case.

I have been informed that AF2Y has signed on the notorious internet criminal, "SLOPS" Wiseman. This man has been kicked off of many servers for his boorish behavior. I have been told that his family moved early to Moundsville, West Virginia to be near the state prison the "Big house " . They made this move to be close to their many "relatives" incarcerated there. This source also said that "SLOPS" Dykeish ugly mother a cook in the state prison, brokered a hankey pankey" with a "lifer"prisoner. the result of this commercial deal was the internet criminal "SLOPS". She paid the prisoner off for his "service" with a extra cup of "SLOP" from the kitchen. Nine months later the born 'criminal "SLOPS" Wiseman was hatched to start his life of crime. Beware of "Slops" and his stench.

I dunno how I let the above statement slip by.

Unfortunately many people from the USA think that they can do
anything in Mexico...including things that they can't do in the USA. I
agree that Mexico may not always have the same laws, enforcement,
customs, etc. that we expect in the USA...
BUT
I don't think that any Americanos del Norte would like winding up in a
Mexican jail. Many have...you know...and it is sometimes hard to get
them out...even with lots of money!

Source record: 134809
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.equipment

As I said Mark, ignore Clint, but that should be obvious from
the tirade below.

I caught him in a couple of fibs some time back and he has
gotten a bit carried away with personal attacks on me.
These attacks are not relevant to your problem and so will
not be addressed.

As I said program the VX-5 with the ADMS software and try it
against the FT-51 if you have additional problems there are
several experienced users who post to the rec.radio.amateur.
equipment newsgroup.

There have been several posts and other information sources
I have seen recently that indicate there are some problems
with the new version of the ADMS software. There is a very
good web page dedicated to the VX-1 VX-5 family of radios
called the "Unofficial VX-1 Page" or something like that.
If you do a web search on VX-1 you should find it. There is
a lot more information and a lot less causticness there.
The fellow who authors the page is quite nice and helpful.

Let me know if I can help you further.

KK7HO vomited:

> Coming to Lloyd's defense now huh kkkevin? My that's mighty white of you.
> As long as you want to drag him down with the liberty NITS, I guess it would be
> your responsibility to defend his racial slurs until he graduates to spin
> meister.

Once again, we have Tim Volz (aka KK7HO), agitating,
and harassing other amateur radio operators here on
this newsgroup. Every time Volz's actions are exposed
he calls them "lies" and promptly threatens to sue
everyone around him.

Tim Reminds me of Andy Kaufman.
(Kaufman is the comedian that got into a 'bad guy'
professional wrestling character. When he became
so obsessed, that he couldn't get out of character, his
'villin' role, he blew his brains out!)

Because Volz is a an obsessed socialist and doesn't
agree with the political content of what is said at times
on 3.950. He attempts to block the regular and legal
transmissions that occur there. He uses a variety
of methods to harass the other amateur radio operators
on 3.950 as they try to communicate with one another.

His favorite method is to mislead other amateur radio
operators into thinking that it is their civic duty to
jam and harass the conversations that are taking place
on 3.950. He continues to tell outrageous lies, about
the participants on the this frequency.

Week by week, and month by month Volz continues to move
further from reality. Recently, when confronted by
Liberty Net members about a "pornographic" mass email
message that was sent out from his home computer, he
actually accused his minor daughter of the deed. A
new low - even for KK7HO.

Finally, Volz has found a 'left leaning professor's web
page that lists 100's of organizations that socialists
disagree with. Buried deep within the page is an entry
for the Liberty Net. It is this insignificant enrty
that Volz promotes as proof that the Liberty Net is a
bad thing.

Volz has gone as far as to threaten the lives of other amateur radio operators. One of his threats can be heard on the web page: http://members.xoom.com/frg9600/500.wav

So the next time you see a "newsgroup rant" from Volz or one of his imaginary personalities here on the newsgroups, don't encourage him. As unstable as Volz has become, and in light of his death threats, It's best to just ignore him and his 'spin', after all - his incompetence only serves to further the 'other side'!

Further info on KK7HO is at:

Message-ID: <37A8BD73.C0D61447@please.net>
Source record: 134813

KK7HO admitted:

> >Further, when 3950 has been in use -- even by cretinous career
> >jammers who park there for the specific purpose of denying the net
> >its usual frequency -- W1WCR has QSYed, dozens of times at least.
>
> AS OF LATE he has been. That's how it should have been for the past 6 years and
> this probably wouldn't even be an issue now. He has not always done that and
> there are LOTS of tape to show it.

So now Tim Volz finally admits he has been
"denying the net it's usual frequency". And only
regrets that he hasn't been able to "deny" the Liberty
Net it's frequency for the past 6 years.

KK7HO's shining example of an amateur radio
operator. I guess we shouldn't be surprised. This is
the same guy that bames his daughter for his email
harassment of other amateurs.

Tim Reminds us of Andy Kaufman.

Kaufman is the comedian that got into a 'bad guy'
professional wrestling character. When he became
so obsessed, that he couldn't get out of character
(his 'villain' role) he blew his brains out!

That is true, from what I have studied, Hitler regarded the United States as
a
"mongrel" country, because of the racial diversity. See, they are making the
same mistakes, assuming people with a name like Wiseman, is automatically
Jewish. I have researched it genologically, and the British Isles is where
my
ancestors hail from. Many people died needlessly because trheir name was
similar to what the Nazis thought were "Jewish names." Those that fail to
learn
the lessons of history, are condemned to repeat them.

,,On 10/18/99. Herbie's lawyer. Lauren Bacall..oops..I mean Colby will present anal...oops I mean oral arguments in D.C. Appellate Court in a last ditch effort at overturning the FCC's decision to revoke KV4FZ for good. As you know, his call hasn't been in the FCC data base for years and his appearances on the air have been and gracious offerings by the FCC since his appeals have been in the frivolous but active state since Grant took Richmond. On Oct.18th, the court will rule in favor of the FCC thereby gonging Herbie off ham radio. My best guess is that he'll be gone for good within 30-60 days of the final court decree.PRAISE THE LORD and CLAP YOUR HANDS BROTHERS.

Mr. White:

Assuming that you are for real and not some sort of troll, I congratulate
you on obtaining your amateur radio license.

I have been licensed since 1958, have gone through periods of high activity
and no activity but have always been proud of being a ham. Have met some
good folks on the bands, at hamfest, and in the ham clubs.

Of course, amateur radio draws its members from the general public so we
have our share of jackasses. Many of these will bray at you because you
have a no-code license. Ignore them and enjoy your new-found hobby.

And learn the code.

Once again, we have Tim Volz (aka KK7HO), agitating, and harassing other amateur radio operators here on this newsgroup. Every time Volz's actions are exposed he calls them "lies" and promptly threatens to sue everyone around him.

Tim Reminds me of Andy Kaufman.
(Kaufman is the comedian that got into a 'bad guy' professional wrestling character. When he became so obsessed, that he couldn't get out of character, his 'villin' role, he blew his brains out!)

Because Volz is a an obsessed socialist and doesn't agree with the political content of what is said at times on 3.950. He attempts to block the regular and legal transmissions that occur there. He uses a variety of methods to harass the other amateur radio operators on 3.950 as they try to communicate with one another.

His favorite method is to mislead other amateur radio operators into thinking that it is their civic duty to jam and harass the conversations that are taking place on 3.950. He continues to tell outrageous lies, about the participants on the this frequency.

Week by week, and month by month Volz continues to move further from reality. Recently, when confronted by Liberty Net members about a "pornographic" mass email message that was sent out from his home computer, he actually accused his minor daughter of the deed. A new low - even for KK7HO.

Finally, Volz has found a 'left leaning professor's web page that lists 100's of organizations that socialists disagree with. Buried deep within the page is an entry for the Liberty Net. It is this insignificant enrty that Volz promotes as proof that the Liberty Net is a bad thing.

Volz has gone as far as to threaten the lives of other amateur radio operators. One of his threats can be heard on the web page: http://members.xoom.com/frg9600/500.wav

So the next time you see a "newsgroup rant" from Volz or one of his imaginary personalities here on the newsgroups, don't encourage him. As unstable as Volz has become, and in light

of his death threats, It's best to just ignore him and his 'spin', after all - his incompetence only serves to further the 'other side'!

Further info on KK7HO is at:

>Need for my archives.

You might want to ask Mr. Hollingsworth for copies. I'm sure he has all these tapes in his possession and has been reviewing them carefully.

Remember what I said a few months ago on this forum? Riley Hollingsworth is serious as a heart attack about eliminating illegal operators from the ham bands. Many of you "pooh-poohed" my remarks. Judging from the multitude of fines and license suspensions being handed out recently, I would say my prediction has proven correct.

Many more to come, I'm sure. Stay tuned.

Note: this address does not accept unsolicited e-mail. Please contain all discussion regarding USENET posts to the appropriate newsgroup thread.

On Tue, 08 Apr 1997 11:27:19 GMT, raven@hgo.net (Raven) spake thusly:

:Fuck you, kike! They must've cut everything off at the bar mitzvah.
:The're always room for cyclon-B. Perhaps I can let some Palistainian
:acquantances know your address...that would be funny.
:

Yeah, about as funny as the napalm enema I would give you in return.

Roger, if you want to attempt to claw your way back into the flame
groups, racial lames are *not* the way to go about it. Furthermore,
with a name like "Wiseman," I wouldn't be quoting anti-semetic nazi
bullshit like that.

I can't believe I actually defended you in rec.music.beatles . I
don't blame Neuron for trying to frame you for flooding. You are a
spineless little asshole whose only claim to fame was clinging for a
short time to the wankers formerly known as HFW. But not even they
could stand to have you around.

Go away.

That is true, from what I have studied, Hitler regarded the United States as
a
"mongrel" country, because of the racial diversity. See, they are making the
same mistakes, assuming people with a name like Wiseman, is automatically
Jewish. I have researched it genologically, and the British Isles is where
my
ancestors hail from. Many people died needlessly because trheir name was
similar to what the Nazis thought were "Jewish names." Those that fail to
learn
the lessons of history, are condemned to repeat them.

WANTED!! Original cuts from threats to kill taped off of amateur radio transmissions by W4nti. Most threats were made on 3894.5-3901-3965-14313-14300 mh . If you have any of these these tapes , post availability on this forum. especially want times, Dates, and people that this amateur threatened to kill. Looking for the many threats to Al, Billy Jack, Polly, Jimo, and many other innocent amateurs. All information will be held strictley confidential. also want original "Threat" That Fred UM made on David KC1ZQ. If you have any more interesting bigoted tapes from AF2Y or ex WB2otk, will consider those. Need for my archives.

POST TO "OPERATION CLEAN HOUSE" on this forum

I have to agree with that. W4NTI and I have had some repartee. He has always
been civil, direct and respectful and uses his call. He's not ashamed to be
identified with his remarks because they are above board, unlike a lot or
others in this NG.

Try a 1/2 wave dipole across the wings by putting a 1/4 wave wire on each wing
fed in center. You can also use copper foil as the conductor. Remember the
dipole will be a shorter length than a dipole in free space. You will need to
trim for lowest swr, best signal.

Welcome to the Auxiliary Communications Service Newsletter, developed by the ACS Training Unit of the State of California Governor's Office of Emergency Services. Please visit our ACS Home Page at http://acs.oes.ca.gov

The purpose of this weekly newsletter is to bring those of us in emergency communications closer together by sharing common ideas, and by introducing new technology into the emergency services community. All individuals with an interest in emergency communications, disaster preparedness or helping the community at large are encouraged to participate here in an open forum.

You will find a virtual community here, with representatives from many different organizations with the same common goal: emergency response. We encourage everyone, from whatever organization you represent (or just yourself!) to bring us your ideas, suggestions, concerns, manuals, handbooks, or opinions so that we may share them with the group. To those of you who have just joined us, welcome aboard! .....

For those of you in Northern California, set aside October 16-17th for Pacificon '99 in Concord! More to follow....

We have a couple of Y2k items for you this week, and a new Weather Network site for you to visit!

Stay safe, everybody -- see you next week! Dave Larton, Editor

.....

Please Welcome:

Bob Peterson, USCGAux, NF11DE <bob@peterson.org>
Hayward, CA
I'm the District Operations Officer for the 11th District, U.S. Coast Guard Auxiliary. Although our primary SAR activity is on the water aboard boats, we operate SAR aircraft and land-mobile facilities.

Jason Waddell KF6BOP <saremt@aol.com>
Los Osos
I am with ARES RACES And I volunteer with The San Luis Obispo County Sheriff Search and Rescue as a Dispatcher and as a medic.

L. E. ` bud' Thompson N0IA <budt@n-jcenter.com>
Deltona, FL
Setting up Amateur participation for city of Deltona EOC.

LORRAINE S. MATTHEW / N4ZCF <lorimatt@aol.com>
KINGMAN, AZ
I have been a subscriber, I think, from the beginning of your newsletter circulation.

My interest in emergency communications is practiced on several levels, which include local and county via ARES, national via Army MARS, and state via Broadway Consumer.

I am best known for my work with Army MARS under the call sign of AAA9PR. I am the public relations coordinator for Army MARS worldwide. Anything written about Army MARS in such publications as WORLDRADIO, QST, CYBERSKIP DIGEST, and others which are wid ely circulated are written by me. You can also enjoy THE MARS CORNER which is distributed via e-mail and posted to various MARS Web pages and posted on the Ham Radio Message Center on AOL. With very active years in Florida, I have a strong background in emergency communications. Arizona just doesn't have all the hurricanes and floods that Florida "enjoys".

I like the ACS Newsletter very much.

.....

>From the Mailbag:

Hello there,

My name is Bruce Willette and I am a Communications Supervisor with the Niagara Regional Police Service in southern Ontario, in Canada. I am looking for someone who works within the communications group for the NSW Police Service who may be able to provide me with some information concerning operations, equipment, policy, etc dealing with emergency service communications. I have been to visit VKG Sydney very briefly in November of 98 and was quite impressed with the plans you had for future expansion and would be interested in finding out how that is proceeding. Would it be possible to be put in touch with someone, via email, who would be willing to exchange such information? Any assistance in this matter would be greatly appreciated. Thank you.

Y2K:

Year 2000 Watch Is Planned White House to Coordinate Round-the-Clock Monitoring

By Stephen Barr Washington Post Staff Writer Friday, July 30, 1999; Page A27

The Y2K watch in the federal government will start on New Year's Eve, at 7 a.m. EST, when New Zealand moves from 1999 to 2000.

On that holiday Friday, a special White House coordination center will start round-the-clock operations to gather massive amounts of information about the Year 2000 computer problem here and abroad.

The center will not act as a command bunker but will send assessments to top-level government officials responsible for responding to Y2K problems in their areas of responsibility, officials said. Also, the center will alert the "help desks" run by major industries and the public about any worrisome electronic disruptions.

In cooperation with other federal technology centers, officials also will watch for what they called "malicious activity around Y2K," ranging from outside cyber attacks on systems to internal malfunctions created through "trap doors" secretly installed by Y2K programmers who had repaired software that might have interpreted "00" in date fields as 1900, not 2000.

"Y2K-related difficulties, however minor, may be happening more or less simultaneously and in multiple locations," said John A. Koskinen, the president's top Y2K troubleshooter. "Much like the computer problem itself, gathering information about systems operations during the date rollover presents the federal

government, and the nation, with yet another unprecedented challenge."

Koskinen and other administration officials testified yesterday at a hearing held by the Senate Special Committee on the Year 2000 Technology Problem, chaired by Sens. Robert F. Bennett (R-Utah) and Christopher J. Dodd (D-Conn.). Neither senator objected to the creation of the White House Y2K center, expected to cost at least $40 million, but they urged the officials to use the one-time event to help others learn how to combat future high-tech threats to public and private computer systems.

Koskinen said the Y2K center, called the Information Coordination Center, will initially operate with a core staff of about 40 employees. In the last week of December, as the center gears up for 24-hour monitoring, it will draw on the expertise of about 200 staffers, on loan from several federal agencies, to analyze the data pouring in over the New Year's holiday and the following two weeks.

Koskinen said the center will collect information over the holiday period in five major areas:

* Federal agencies. The agencies will report on the status of 40 safety and health programs considered vital to many Americans. States, meanwhile, have asked for status updates on federal computer systems involving aviation, satellites, the weather and criminal record checks, as well as the U.S. Postal Service and navigable waterways.

* States and localities. The Federal Emergency Management Agency will relay reports from the states, including data on power, telecommunications and health care.

* Private sector. Industry groups will send reports to their appropriate federal emergency operations center, which will analyze, summarize and forward them to the White House center. The electric power industry, for example, will provide data to the Energy Department.

* International. The departments of Defense, State and Transportation will provide information collected from U.S. embassies and other posts overseas.

* Cyber incidents. The National Infrastructure Protection Center at the FBI, the Critical Infrastructure Assurance Office--an interagency group housed at the Commerce Department--and other agencies will be on alert for attacks aimed at compromising systems.

ERRI Announces 24 Hour Y2K Watch Desk

By Tom Lorinczi, EmergencyNet News Technical Services Director

In an effort to monitor and report in real time all consequential events that take place during the transition to the year 2000, the Emergency Response & Research Institute (ERRI) has announced that it will make a "Y2K Watch Desk" available on-line on its popular emergency service/national security website (http://www.emergency.com).

According to Clark Staten, ERRI Executive Director, the concept was first announced at the Association of Public Communications Officers (APCO) Y2K Readiness Symposium, held at the Galvin Center/Motorola Center, in Schaumburg, Illinois, on May 21, 1999. During that meeting of government officials from all over the country, Staten announced that ERRI, in association with EmergencyNet News correspondents throughout the world, would be monitoring and reporting on all important or emerging events during the period of December 31, 1999 to January 1, 2000.

Staten said that a special "password protected" webpage would be created and used to post all Y2K relevant events -- as they occur -- in real-time. Correspondents and computer technical specialists will provide analysis of any significant events and post their commentary to the special page. ERRI experts will also be paying particular attention to reported computer intrusions, computer viruses, service disruptions and other problems believed to have been caused by the so-called Y2K bug. Additionally, Staten said that ERRI counterterrorist and law enforcement analysts would be monitoring any public disturbances or other "millennium madness" occurring concurrently with the Year 2000 transition. It is believed that both corporate and government officials will want to access the Emergency.com Y2K Watch Desk in order to spot emerging trends and attempt to anticipate potential problems as they occur in other parts of the world.

Steve Macko, EmergencyNet News managing editor, said that the ERRI/Emergencynet News coverage would begin in Australia and cover all events from the international dateline into and through Asia. Then, Macko said, EmergencyNet Mid-East and European correspondents and analysts will take up the watch desk coverage and provide constant updates to the webpage. Finally, as midnight and the new century approaches in the United States, the Watch desk will transition to the EmergencyNet News main watch desk in Chicago. In order to off-set the cost of the extensive coverage, Macko said that it is probable that there will be a registration process and a need for payment of a small fee in order to gain access to the Y2K Watch Desk page.

Current Events:

Nebraska hams aid in fire response:

Hams in Buffalo County, Nebraska, helped local authorities the evening of July 12 when a fire broke out at a lumber yard in Kearney. EC Danny Baer, KA0DBK--who's also a fireman--put out a call for additional ARES volunteers, then assisted the Kearney Police Department by directing traffic. Other ARES members were put to work on traffic and crowd control details. A Salvation Army team provided food and water to the emergency workers on the scene. Five ARES members spent more than five hours at the scene. The lumber yard was destroyed along with three other businesses. Baer recommends planning ahead and training for emergencies, then remaining prepared. "Have your emergency bag ready and extra batteries charged, and your H-T ready," he concludes. "You never know when an emergency might happen." (The ARRL Letter)

Pocono Amateur Radio Klub's (W3PRK)
FIRST SPECIAL EVENT STATION

The Viet Nam Moving Wall Memorial will be in Tannersville at the Pocono Mountain Elementary School for only one day, Saturday the 21st of August. While the memorial is in our area, the members of PARK will sponsor their first Special Event Station. They will operate between 12:00 noon and 4:00 PM EDST on 14.255 (+/-5 KHz), and for the local amateurs on 146.580 simplex. The call will be W3PRK.

The Moving Wall is a Memorial to those who gave their lives in service to our Country during the Viet Nam Conflict. This memorial is one of three touring the country to honor their memory. Many of you know, or know of someone, who gave his or her life during that terrible time in our nation's history.

It is an honor for the Pocono Amateur Radio Klub to devote their first special event station to their memory.

This is an appeal to all Radio Amateurs to become involved with this project as an operator, logger, set up and/or tear down crew, or any of the many other aspects that comprise this

meaningful opportunity. To obtain a beautiful certificate of the Special Event you will need to make contact on air with either the 20-meter or the 2-meter station, then send us a SASE 9x12 envelope to PARK Special Event RD 1 Box 1250 Stroudsburg, PA 18360 . Involvement at the site will provide a memory of great satisfaction. You will be a part an event that will live long after the Memorial Wall has moved on.

If you have a question about becoming a part of this unique experience, please contact any of the committee members, Dave, W3SJ e- mailto:w3sj@sunlink.net, Byron, W3WKR e- mailto:w3wkr@ptd.net or Rob, WX3ROB e- mailto:wx3rob@wx3rob.net. Alternatively, if you prefer, you may call our president, Bill, W3MJ @ 424 0845.

This week's EMCOMM Bulletin:

EMC195 Double Bass
To: Emergency Communications Units - Information Bulletin
To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

EMC195 Double Bass For release 8/2/99

Recently, a presentation of a small chamber orchestra got me to thinking how much it is like an EMCOMM unit. What started that chain of thought was the double bass musician. He sat through most of the performance before the music was such that he could contribute. But when he did, those were the softest and most profound notes of the entire event for me. Wow! The last piece the orchestra played called for lots of double bass along with

deep throated notes from the cellos. It was indeed a moving performance.

As I reflected on the "sit and wait" necessity for the double bass musician I recalled that EMCOMM unit participants "sit and wait" and how very frustrated some of us get. In contrast, for three hours the musician enjoyed the music that proceeded his participation. I marveled at his having driven many miles to the performance, then dragging in a huge instrument, almost 7 feet long, for such a short usage. Yet, at every performance he was there and his vital contribution made the event worthwhile for those who love deep bass music.

Afterwards I remarked to him on the massive size of the double bass by saying "that instrument would never fit in a VW", to which he replied "the first few years I did this, that's what I used by removing a seat." Which just goes to prove things may be different than what we perceive as possibilities.

The more I observed the musician the stronger the thought about EMCOMM unit participants whose special skills may be needed only occasionally, or very briefly. They are just as vital to the work of the EMCOMM unit as that musician was to that orchestra. Without either there is not the 'wholeness' of a cohesive effort.

As State ACS officer of a large state, I often hear about the lack of use of EMCOMM unit participants in almost all type units. So, this is offered as a comparison. Perhaps we need to think of the EMCOMM units like a small orchestra. Maybe we are like those specialists on those musical instruments of strings, reeds, French horn and harp. Maybe, like the orchestra, our work needs may range from one or two to 22 players depending on the score (score = music piece = an EMCOMM unit assignment.)

Maybe we should stop expecting a callout of the entire unit and concentrate on situations (or performances) where one or two, or a small group, may be just as effective; in effect the same as the chamber orchestra with different instruments and size groups for each of their performances.

No analogy is perfect, so there are other aspects of course. But the point of this is that the chamber orchestra can serve as a model for ideas and opportunities to provide "soothing music" to the agencies we serve. There are times the 80 piece orchestra is out of place when a clarinet, cello and double bass can provide a better rendition.

> a
> "mongrel" country, because of the racial diversity.

I regard Hitler as a "loser," not to mention "dead."

> See, they are making the
> same mistakes, assuming people with a name like Wiseman, is
automatically
> Jewish. I have researched it genologically, and the British Isles is
> where
> my
> ancestors hail from.

ZZZZZZZZZZZZZZZZZZZZZZZZZZZ

> Many people died needlessly because trheir name was
> similar to what the Nazis thought were "Jewish names."

Many more people died needlessly because the Nazis guessed right about
their "Jewish names" and EXTERMINATED THEM over crackpot racial
theories.

> Those that fail to
> learn
> the lessons of history, are condemned to repeat them.

You got that (almost) right. And that's why I'm bothering to respond
to your post.

I'm welcome ???? Are you for real ??? You have no say in that matter,
once it spews from that broadcasting station.

You also ignored the FACT that MY GROUP gave you the info on FCC ULS,
especially the telephone issue. ARRL generated a stream of feel good
garbage with that info, after we did the leg work. You're talking to ME
about CREDIT ???

Jon, are you on vacation again ? You pull this pompous party-line crap
every few months with someone new.

EVERY article from ARRL MO I reposted here has been a bulletin from W1AW
and in the Letter later in the week. Things from QST are obviously not
like this and I don't repost them. Once again, you people are showing how
full of crap you are.

EVERY article to date I've reposted has been VERBATIM in bulletins from
W1AW and in the Letter later in the week.

This is a moot argument as the case you're describing is post hoc propter hoc.

If it doesn't come out verbatim until later in the week, who gives ? It still came out verbatim.

BTW, all you people did was embargo the bulletins you used to release on W1AW to ALL amateurs, thus proving ARRL is now a business, favoring its members over the community. It's a neat trick, but manmy hams aren't senile yet and recognized froom day one. And if you don't serve ALL hams, those W1AW bulletins are as out of line as K1MAN and W1WCR comandeering a frequency.

In full size aircraft, we use a shallow horizontal vee dipole... It helps to fill in the dead zone off the end of a straight dipole...

For those of us that deal in english - here is a link that gives you the programming schematic for the ribs - tower electronics does have the 4 conductor plugs available for 8 bucks + shipping - they are molded plugs with molded cord attached - strip the wire for whatever conductor you want and you are in business -

http://www.icongrp.com/~sllewd/pcware.htm

also on this web site is free software that programs most yaesu radios- including vx-5 it works great - even better than the yaesu crap software full of bugs - and it is free -

http://www.icongrp.com/~sllewd/download.htm

I just got a VX-5 and I am waiting for my plugs in the mail- then i can pc program the radio - instead of waiting for yaesu to get off thier duff-I also ordered a few extra 4 cond plugs for wiring to external speakers - etc.

reply to : jam_herNOSPAM@excite.com (remove NOSPAM)

AF2Y;

You say you are against bigots and anti-semites. Yet you support Roger "SLOPS" Wiseman. He is a proven bigot, anti-semite and internet thug. The very person he issued the bigoted statement to has made a statement on this forum that testified to the fact. Are you against bigots and anti-semites or do you only wish to hurt people. Isn't it a fact that you don't care one bit about the bigotry, just that it is a means to hurt people. I believe you are a sadist and a psychopath.

73 de KC8JBO

Roger
**The fact remains that censorship is not wanted on the Internet and I myself would have no intention of sending AOL anything the fool posts because of that belief. However it's imperative that Riley be made aware of the main source of irritation on ham radio which is directly related to a person like N0VFP. It was KV4FZ who made a silly argument over phone patching which is perfectly lawful into a religious war which in turn precipitated retaliation beyond belief. As long as KV4FZ followers are ready to continue his formulated intolerance, then they, the perpetrators should be prepared to take flack and Riley should be made aware of the right to defend against intolerance on ham radio. Keep in mind that Riley has no jurisdiction whatsoever on the Internet and nothing written here will influence his decisions in ham radio, however things will never resort to normalcy until bigoted mental midgets like N0VFP are stopped from creating ther type of problem on the Internet which then becomes intensified on another medium.

Ummm...partly right. He did do the wrestling thing, but he died of lung
cancer, not suicide.

Hey...I like that. Might as well get some milage out of this crap.
Hey, a question....Will this low price spread be KOSHER?? Can't leave
the Jewish folk's out of this. Course since they "never pay retail" we
will have to cut them a deal.

All of this is queer shit. Why is this trash even worth talking about? Mackey don't you have anything better to do? You jump like a hungry fish to the smallest bit of bait. You are an unbelieveable sucker bro! And why in the hell did you crosspost this garbage to a bunch of other newsgroups? Is it becuase you just want to piss people off? Is your life so pathetic that this is the best that it gets for you? I really feel pity for you. You must not have any friends or people who care about you.

Hello Tom & Dave,
Just a line to say THANKS for your comments re
my MFJ QRP CW Rig question. Ive written to my hospital asking for
permission to operate from there.
There will shortly be a decent size radio rally next month not too far
from my qth so hopefully I'll be able to go and check out the MFJ Qrp
stuff on the british suppliers Stand. So hopefully I'll be on 40 m QRP
CW soon !
Anyhow thanks for taking the trouble to reply. Maybe catch you on 20m
sometime ?

Take the mic cable and all to a computer cabling outfit, a 2 way radio shop, or anyone who installs telephone equipment and ask them to please crimp on a new connector.

Why are you so interested in names and callsigns, Doc? So you can call up their employer, make up a few scathing lies, and get them fired? Isn't that what you REALLY want to do??

The internet is a microcosm of the world as a whole. And that world is full of fruits and nuts, just like yourself, Doc. Using your name and callsign on Usenet is like putting a classified ad in the paper, with your name, address, and the dates you'll be on vacation. A robbers dream come true!

Those pesky plugs are the industry standard in the commercial radio business and have rarely been a problem -
If it is an RJ11 - 6 pin conductor you can buy a 6 pin crimper for about 20 -30 bucks (buy a nice one) and you can get the plastic pieces fir about 2 cents each.
You make note of the wire sequence (1-6) and cut the old one off - insert the line into the stripper into the deisgnated stripper - measures length - and strip - insert the wires into the plastic plug - crimp it and you have a new plug-

I would never want to go back to the old mic plugs - they take way too long when broken - i can recrimp a new plug in under a minute -
if they are an 8 pin plug - get an 8 pin crimper - most mics are standard at 6 pins

THE WB2OTK SAGA CONTINUES; WHITEN CLAIMS EMAIL SENT IN ERROR

Yet another chapter in the WB2OTK saga ... Now Richard Whiten, WB2OTK, claims that an email was sent to the FCC in error, which requested the cancellation of Whiten's amateur radio license.

The FCC says that Whiten "categorically denied" sending the email, and claimed that it was the work of "computer hackers."

Riley Hollingsworth, of the FCC, has requested Whiten to complete affidavits, explaining the situation, and any circumstances that he is familiar with, and the FCC will take them into consideration. Until that time, however, he has been told to stay off the air.

Growing complaints against Whiten originally led the FCC to modify his license, and suspend his HF privileges for 120 days.

Complaints against Whiten had included failing to properly identify his station, using vulgar and offensive language on the air, broadcasting racial slurs, and intentionally interfering with other stations.

-- W8MMQ / KC8KFZ

THE LAST SAREX MISSION IS A SUCCESS

Shuttle Columbia mission STS-93 was an Amateur Radio success story. During the short mission, crew members completed Space Amateur Radio EXperiment contacts with five schools plus a contact with the cosmonauts aboard the Russian Mir space station. STS-93 returned to Earth July 27.

Launched July 23, STS-93 marked the 25th time the SAREX payload has flown on a shuttle mission. It also likely will be the last SAREX shuttle mission as future ham radio efforts in space will focus on the Amateur Radio on the International Space Station -- or ARISS -- project.

Lucky students at schools in Virginia, California, Texas and Florida had officially-scheduled QSOs with the STS-93 astronauts. All contacts eventually were successful, but not without a few glitches. The ham gear was deployed early in the mission, and during a pass over Houston, the SAREX Team -- using the Johnson Space Center Amateur Radio Club's call sign, W5RRR -- attempted a test pass that failed. Throughout the mission, John Nickel, WD5EEV; Karen Nickel, WD5EEU; and Gil Carman, WA5NOM, led the SAREX volunteers at the Johnson Space Center.

After troubleshooting during several Houston passes with STS-93 Commander Eileen Collins, KD5EDS, an orbiter power receptacle was found to be faulty. Meanwhile, the first scheduled school QSO with Buzz Aldrin Elementary School in Reston, Virginia, had audio on only one end of the contact, so the SAREX Team negotiated a new time slot for the school sked.

The next scheduled school QSO, with Harbor View Elementary in Corona Del Mar, California, was much more successful. Eight students interviewed the astronauts. One thing the kids wanted to know about was the food aboard the shuttle. "The food is quite good -- really!," Collins replied. "Today I had rice and there are plenty of food items to choose from, including snacks."

The orbiter then maneuvered its attitude to accommodate another payload, the Southwest Ultraviolet Imaging System. The resulting tail-down, nose-up attitude is not conducive to QSOs, as the SAREX window antenna can't radiate the signal toward Earth. A scheduled QSO with Awty International School in Houston, Texas, failed, but a new schedule was negotiated. Prior to the next two schools QSOs, the SAREX Team worked with NASA to get the orbiter returned to a favorable attitude just for the SAREX activities.

Students were rewarded with excellent results. "I would like to take this opportunity to publicly thank all of the individuals that made it possible for PSJA-Memorial Middle School to have a successful SAREX contact with STS-93," said Joe Kertesz, KC5RFW, of Memorial Middle School in Pharr, Texas. "Hats off to everyone, and a heartfelt thank you from me and my school. It was truly a memorable occasion." Then, Kertesz added, "Now, when does ARISS go on line?!"

Murphy almost took his toll on yet another school. Not long before the Osceola (Florida) Elementary School's QSO, SAREX relay station operator Gordon Williams, VK6IU, in Australia, discovered he had a problem with his gear. "Unbelievably, some Australia birds had pecked through Gordon's coax!" John Nickel related after speaking with Williams via telephone. VK6IU wound up climbing his tower in the rain early Monday, changing out the cable just in time to handle the SAREX relay.

On Monday evening, the Buzz Aldrin and Awty schools were rewarded for their patience with completed QSOs, and the students were thrilled. For more information about the school contacts, visit the STS-93 information page at http://garc.gsfc.nasa.gov/~kc6rol/sts93.html.

The mission garnered some good PR for Amateur Radio. The Los Angeles Times ran an article about the Harbor View Elementary School contact. The official July 24 STS-93 Status Report released by NASA included two references to SAREX activities by astronauts. Two on-line newspapers carried .wav files and details on the schools' SAREX educational events.

The Columbia-Mir QSO also was a huge success and in three languages -- English, Russian and French, and the parties on both sides enjoyed their time on the air. "You could hear it in their voices -- they were smiling ear-to-ear," John Nickel said.

AMSAT's Pat Kilroy, WD8LAQ, reported that the Columbia-Mir QSO was "tricky" to complete, because of the timing. "Both crews had to be awake, and Mir had

to pass over the horizon in Houston, where SAREX team member Brian Zemba, N1WSO, was waiting at Johnson Space Center Amateur Radio Club's station, W5RRR," he said. "Shuttle Columbia was almost half a world away, traveling over Indonesia."

Zemba successfully linked with French cosmonaut Jean-Pierre Haignere, FX0STB, who radioed, "This is Mir space station speaking, this is Jean-Pierre." Columbia astronaut Michel Tognini, KD5EJZ, then spoke with Jean-Pierre in their native French. Next they turned over their mikes to the two space commanders. Mir's Viktor Afanasyev, then congratulated Eileen Collins on being the first woman commander of a shuttle crew.

To listen to the exchange, click on NASA's .wav file at http://shuttle.nasa.gov/gallery/audio/shuttle/sts-93/wave/congrats.wav.

Tognini also exchanged greetings in Russian with cosmonaut Sergei Avdeyev. Tognini and Avdeyev flew to Mir together in 1992.

HAM RADIO NUMBERS INCREASE IN THE US

The drought may be over. Ham radio appears to be growing again in the United States. At least in the area of codefree Technician class licensees. Our business reporter Don Wilbanks, KC5MFA has this report:

It's generally recognized that the best keeper of ham radio statistics is Fred Maia and the July 15th edition of his W5YI Report graphically tells the story. In this case using graphs and charts to dramatically illustrate any increase or decrease in the number of hams holding a given class of license.

The graphics show that while most classes of license requiring a knowledge of the Morse code have shown a signifigant decline over the past thirty months, the number of codefree Tech's continue to rise. Up past 192,000 at the beginning of May. Contrast that with the decrease in the number of Technician Plus license holders. There were almost 140,000 of them in January of 1997. Today its a bit over 134,000 -- down by 6,000. In the same time period the number of General's dropped by about 5500 and the number of Advanced class license holders dropped by about 2500. Of the licenses requiring knowledge of Morse, only the Extra class showed any increase, albeit a very modest one. There were about 73,500 Extra's in January of 1997. Today there are just about 75,000.

When you take all the license classes together and adjust for attricion you find that there were some 678,000 hams at the beginning of 1997. The numbers continued to decline and bottomed out at about 673,000 last fall. Since then there has been a slow but steady increase.

-- From Amateur Radio Newsline, July 30, 1999

THE WEEKLY DX REPORT

Kunio, JA8VE/3W6KS, and Hiro, JF1OCQ/3W6HM, will be active from Phu Quoc until the 4th of August. For the RSGB Islands on the Air Awards programme this counts as AS-128, which is a fairly rare IOTA number. QSL via home calls or through the JARL bureau.

FK8GM, JA1BK, OH2BE and OH2BH will be active as FW8ZZ from Wallis Island until the 3rd of August. This counts as OC-054 for IOTA. A special effort will be made on the WARC bands. The DXpedition is dedicated to, and in memory of, Charles N Swain, K7LMU, and Edmond M Thorpe, ZL2AWJ, who were lost at sea in January 1966, aboard the ketch Marinero, when returning from their DXpedition to Wallis Island as FW8ZZ. QSL via OH2BN.

Operators from the Han Yang University Wave Research Club will be active as HL0C/4 from Mara Island between the 3rd and the 9th of August. This counts as AS-026 for IOTA. QSL to HL0C.

A group of operators from the JARL Kyoto Club will be active from Saipan until the 2nd of August. This counts as OC-086 for IOTA. QSL via home calls.

Uwe, DJ9HX, will be active as P29VHX from Papua New Guinea from Loloata from the 7th to the 9th of August. This counts as OC-153, which is another fairly rare IOTA number. QSL via DJ9HX, preferably through the bureau.

DX Report information is taken each week from the Radio Society of Great Britain.

AMATEUR RADIO CONTESTS AND EVENTS

Visit the ARRL Contest Calendar at http://www.arrl.org/contests/ for the latest on upcoming amateur radio contests. For information on upcoming hamfests and events, visit http://www.arrl.org/hamfests.html.

The ARRL UHF Contest will be held on August 7 through 8. Operate 220-MHz and above, on all modes. The contest begins 1800-UTC on Saturday and runs through 1800-UTC on Sunday. Visit http://www2.arrl.org/contests/announcements/rules-uhf.html for complete contest rules and information.

The CW portion of the North American QSO Party, sponsored by the National Contest Journal, will run from 1800-Z on August 7 through 0600-Z August 8. The phone portion of the contest will run on August 21 and 22.

The Ten-Ten International Net Summer Phone Contest, sponsored by Ten-Ten International, will run from 0000-Z August 7 to 2400-Z August 8. Operate single op, phone only, 10 meters only.

Finally, the Amateur Radio Club Kid's Day contest runs from 1700 to 2300-Z on August 7. Operate 40, 20, and 10 meters. Exchange name, QTH, RST and club name.

From the Ohio/Penn DX Bulletin ... The Florida DXpedition Group (W4DXP) will be operational for the International Lighthouse Day, August 21-22nd, from the Amelia Island Lighthouse which is located on IOTA NA-138. The special callsign will be W4A and QSLs will go to N5VL. This is the first and possibly the only operation to take place from this location as the

lighthouse and its property are for sale by the U.S. Government.

If you know of an upcoming amateur radio contest or event, submit it to w8mmq@email.com, and we will include it in this section. Let us know at least a week in advance. Thanks!

AND ... IN CLOSING

Thank you for reading this issue of The Amateur Radio Times. This newsletter is distributed each week by W8MMQ and the Radio Society of Central Michigan. We encourage the free distribution of this newsletter to others.

Be sure to visit http://www.qsl.net/w8mmq/ to read The Amateur Radio Times online.

Information from the following sources was used in the production of this newsletter: Amateur Radio Newsline, the ARRL Letter, the RSGB web site, and other published reports.

Body handling: Binary attachment payload not displayed: Alex.Hartley.vcf

I have a Kenwood TS-520s and I just got a Kenwood MC-50 mic for it.
Does anybody have the pinouts for that microphone?

If you want to fax me a picture use: (909)924-6293.

Other wise I would appreciate email with the information.

Thanks!

73,

Alex

Only problem, the Technician class will lose one usuable band that can be used for worldwide
communications.

Check the URL below to see leaders of the National Alliance, a white supremacist group whose ideology mirrors Hitler's Nazis, lauding Kevin Strom for his web page construction work on their behalf:

http://www3.ca.nizkor.org/hweb/people/i/irving-david/the-alpert-tape/irving-and-natl-alliance.html

Check out Strom being listed as one of the more influential white nationalists and force behind National Alliance Radio on the internet by a Canadian Aryan Nationalist at:

http://www.freedomsite.org/cpn/interv1.html

Check out Strom's intricate web of connections with other Nazi groups at:

http://www.freedomsite.org/cpn/metro_report.html

My superiors are right. I am putting myself in deliberate danger by taking on this fruit of nutcase. Why? Nazis took over Germany because no one had the guts to say enough is enough. Well, enough is enough. It's time for people of all races and classes to stand up to vermin like Strom and say "No." And what's more, NEVER!

> Information that you have requested can be obtained from KT4TR. I have personally heard his collection of tapes and they are very impressive. Threats from AF2Y and W4NTI are in exellent condition and can be obtained from Bob. He has forwarded to me several hours of tapes and some of them are superb. Ask him for the one of the Intercon net taking over the freq. WA0IVY and others are captured in their finest moments. Bob also has OTK spewing more racial hate, that tape would be the OTK and WB3HGW refering to DR. King as a "nigger".

I will see Bob in Nov during our return to Fla. for winter and will be glad to pick up a copy for you.

3460. WHY IS ASF2Y SUPPORTING ANTI SEMITE "SLOPS " Wiseman

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-05 00:00:00 UTC
From: getback <getback@my-deja.com>
Message-ID: <7oaudffdq1@nnrp1.deja.com>
Source record: 134744

The whole forum is wondering why AF2Y , who says he hates anti-
semites and bigots,is supporting "SLOPS Wiseman , a internet thug
Proven to be a anti-semite on this forum by the very one he sent a anti-
semetic message, It has been said, and I believe it, that Charles
Swartzbarg could give a hoot about anti-semitic activity and bigotry.
He only wants to deal out hurt and pain to people. A real sadist. Now,
the question is, will he turn his back on Roger "SLOPS" Wiseman "Pan
handler" from the seedy part of West Virginia, the anti-semite internet
thug, or will he still embrace him with open arms. I think he will
embrace "SLOPS"

Threats from AF2Y and W4NTI are in exellent condition and can be obtained from Bob. He has forwarded to me several hours of tapes and some of them are superb. Ask him for the one of the Intercon net taking over the freq. WA0IVY and others are captured in their finest moments. Bob also has OTK spewing more racial hate, that tape would be the OTK and WB3HGW refering to DR. King as a "nigger".

Glenn, when asked EXACTLY what years your amateur radio license(s)
were valid & under what callsigns, you NEVER answered the question.

In the 1970's, a novice license was valid for 1 year & NOT renewable.
Even though you may feel you had a 10 year novice license issued to you,
the truth is that the 10 year license did not come until the middle (or
late 1980's??)!!!!!!!

BTW - I have NEVER been booted from an ISP, & have had this current ISP
for nearly a year. You on the other had have been booted from YOUR
ISP for trolling for young boys on newsgroups & attempting to harass myself
and others.

Glenn wrote:

Hi all:

I'm thinking about buying a used Yaesu Ft-5100. Is this a good radio, and what is a decent price for one.

Also, with a full duplex rig of this type, can I, for example, have one VFO on a simplex UHF freq (that I would have my HT tuned to), and the other on a 2m repeater? Or do both VFOs have to be on simplex?

Bob

<mf_luder@my-deja.com> wrote:

> thus proving ARRL is now a business,

Well of course the League is a business. On January 29, 1915, the Connecticut Secretary of State recorded the incorporation of the League under the following three articles:

"Article 1. The name of said corporation shall be The American Radio Relay League Incorporated.
"Article 2. The purposes for which said corporation is formed are the following to wit: The promotion of amateur radio, the organization of amateur radio stations, the promotion and regulation of amateur radio inter-communication, and the relaying of messages from station to station, and the printing and publishing of documents, books and pamphlets necessary to any of the above purposes.
"Article 3. The said corporation is located in the town of Hartford and the State of Connecticut."

Lucky for us that second article includes printing and publishing: We participate in a self-taught technical hobby/service; not a day should go by without us gaining new knowledge with respect to electronics. The only publications I have always been able to turn to when questions arose which needed immediate answers were the League's pubs.

For some 85 years the ARRL has produced a handbook written so that even a novice can learn and understand from it. The government thought so highly of the Handbook that it was used to train military communicators during WWII. For the longest period, the Handbook was the greatest selling technical book ever published, in and out of ham radio.

During the 50s when SSB was finding its way into ham radio, there was no pub one could turn to to learn about this new mode except the League's SSB Manual. Also during that decade the FCC relaxed the regs regarding mobile operation - no one else published a mobile manual except the League.

To whom could you turn to for the great ideas and techniques that appear in the Hints and Kinks booklets? Propagation and antennas: The Antenna Manual. Who else in the 60s produced a VHF Manual? And when that VHF crowd began exploring FM: The FM and Repeater Manual. The very first book in the 80s devoted to amateur digital comms was the League's Get Connected.

Publishing affordable technical books was one of the original goals in the League's charter; for 85 years they've made information available to the layman that was nearly impossible to find elsewhere. How in the world

could you possibly find fault with this business side of the League?

Every ham shack I've ever visited in the last 30 years has had many League pubs on its bookshelves. We are (or at least were) a group with a voracious appetite for reading and learning. Luckily, the League has been able to feed us what we most desired.

Ham radio and reading are inseparable; and it takes a business to do what the League has accomplished. That you've only now realized that they are a business is amazing.

Speaking of Kenwood Mics, does ANYONE have any idea how to repair that stupid modular, punched on connector that Kenwood so brilliantly chose to use on the mic for the TM-261A and similar VHF rigs?

The silly punched on clear plastic connector looks like something on a throw-away telephone, but no, THEY used it on the $75.00 microphone!

Now of course after a few months of use, mine is falling apart.

Is there some tool to replace that punched on connector or does anyone have any tips on repairing it?

If I have to buy a $75-79 replacement mic for this $199 radio after 6 months I will say "NEVER AGAIN" to Kenmore!

Nursing his many wounds, On Wed, 04 Aug 1999 04:20:56 GMT "rileygotcha" <rileygotcha@my-deja.com> whines:

>Lloyd has exposed you for the bigoted antisemite you are.

Opinions vary.

>And you are a professional computer forum flamer. The computer is >your only life.

It sounds like you're envious, Polly, of anybody who's a "professional." The blue-collar angst getting to you? I thought I had stuff sent to my "employer" <snicker> and got kicked off of AOL. Geese, can't you rumphumpers get your lies straight?

>You have no friends, just a pimple faced fatso pinging on a keyboard.

Yeah, right. If I just had one friend, it would still outmatch you, Polly. All you have are the kids you promote with your child pornography sideline.
And keep guessing about my physical appearance, it just proves how litle you know.

>shame shame heh heh...Rileygotcha..put that in your nerd pack boy

Polly was hurt while taking a milk bath. The cow slipped and fell on his cantaloupe head.

AF2Y;

You say you are against bigots and anti-semites. Yet you support Roger "SLOPS" Wiseman. He is a proven bigot, anti-semite and internet thug. The very person he issued the bigoted statement to has made a statement on this forum that testified to the fact. Are you against bigots and anti-semites or do you only wish to hurt people. Isn't it a fact that you don't care one bit about the bigotry, just that it is a means to hurt people. I believe you are a sadist and a psychopath.

Message-id: <19990804203818.18159.00005309@ng-fn1.aol.com>

Check the URL below to see leaders of the National Alliance, a white supremacist group whose ideology mirrors Hitler's Nazis, lauding Kevin Strom for his web page construction work on their behalf:

http://www3.ca.nizkor.org/hweb/people/i/irving-david/the-alpert-tape/irving-and-natl-alliance.html

Check out Strom being listed as one of the more influential white nationalists and force behind National Alliance Radio on the internet by a Canadian Aryan Nationalist at:

http://www.freedomsite.org/cpn/interv1.html

Check out Strom's intricate web of connections with other Nazi groups at:

http://www.freedomsite.org/cpn/metro_report.html

My superiors are right. I am putting myself in deliberate danger by taking on this fruit of nutcase. Why? Nazis took over Germany because no one had the guts to say enough is enough. Well, enough is enough. It's time for people of all races and classes to stand up to vermin like Strom and say "No." And what's more, NEVER!

<<Tim, you have that s.o.b pegged right. Simply send as much info as possible to the FBI's e-mail address. I think it's listed on their website. SMASH STROM and his cronies!

with a Dual band Radio You can have the UHF on a Simplex frequency and
the VHF side on a repeater.. Also with the 5100 you can cross band
repeat it. that way you can extend the range of your hand held. $250 -
$300.00 is what your looking for.

What nut does this tool work on? Please, there was no pun intended. I
have a Kenwood 850S/at, do I need one?

THE ARRL LETTER [excerpt]
Vol. 18, No. 31
August 6, 1999

FCC TAKES NORTH CAROLINA HAM OFF HF FOR SIX MONTHS

The FCC says that John Abernethy, K4OKA, of Hickory, North Carolina, will have to restrict his hamming to the VHF and UHF bands for the next six months. Unless he appeals the action, Abernethy may not get back on HF until January 22, 2000.

As a follow-up to a station visit in January and alleged malicious interference earlier this summer, FCC Attorney Riley Hollingsworth, K4ZDH,notified Abernethy July 27 that the Commission was modifying his license to prohibit operation below 30 MHz for 180 days, effective immediately.

The FCC letter included a copy of a tape recording--supplied by complainants--of transmissions said to be of Abernethy's station on July 16.
Hollingsworth's letter described the tape as "consisting of deliberate interference on 3.965 MHz" and noted that Abernethy had been warned about deliberate interference at the time his station was inspected.

Abernethy has 30 days to protest the sanction.

FCC personnel inspected Abernethy's station January 21 and 22 in the wake of what Hollingsworth called "longstanding complaints from other amateurs and from our field offices." In particular, he said, the FCC had received "numerous complaints" about profanity, obscenity, deliberate interference, and failure to properly identify.

Other complaints to the FCC alleged that Abernethy had aired something called the "Porkbutt Song," the letter said, "for the purpose of harassment or deliberate interference." The FCC's High Frequency Direction Finding Center in Maryland tracked the transmissions of the "Porkbutt Song" to K4OKA, Hollingsworth said in his letter.

The FCC letter also said the Commission had received complaints that Abernethy had used AM and upper sideband on 75 "for the purpose of interference to communications on or near 3894.5 kHz.

The FCC has no plans to start revocation proceedings against Abernethy, Hollingsworth said, "unless we have evidence of continued violations" of the type described in the July 27 letter.

HO-HO.....LOL!

You need one to remove the retaining nut from the large round 8 pin mic jacks. On the TS-850S the front cover will come off without the tool (if I remember correctly) but you have to remove the mic jack nut to get the front panel off most of the mobile rigs.

You can use a pair of the bent-type long nose pliers (mine are Xcellite) with fair results, but some are so tight that you have to have the tool.

I normally don't bother reading your posts "snake", however to let you
know the facts; Jim is up in 2 land, on family business. He told the
FCC he would not be available to retest. And we all know the only
reason he was retested was because he got ole K3QAM's goat on 20.
Course I understand ole quenny has stopped running SSTV these days.
Wonder why?

Source record: 134552

I am a professional software engineer and a long time short wave
listener. I have developed a Windows program that allows you to filter
audio in real time.

Connect the "Line Out" on your short wave radio to the "Line In" on your
PC's sound card. Use the Windows "Volume Control" program to assign
inputs and outputs and set levels.

The program takes the digitized audio, filters it and plays it out
through your PC's speakers! No special hardware or modifications needed.

It does require a fast PC - 200 Mhz or better.

For more information and a free trial Shareware copy of the program
visit my web site:

http://www.winternet.com/~swezeyt/dsp.htm

I hope you will consider purchasing it.

Thanks a lot,
Tom Swezey

PS: I have just created a special version of the program that outputs
the audio in simulated Stereo! You do need a faster PC than 200 Mhz
though, it does a lot of calculations to do it.

Once again, we have Tim Volz (AKA KK7HO), agitating,
and harassing other amateur radio operators here on
this newsgroup. Every time Volz's actions are exposed
he calls them "lies" and promptly threatens to sue
everyone around him.

Tim Reminds me of Andy Kaufman.
Kaufman is the comedian that got into professional
wrestling as a stunt. He developed a 'bad guy' character
and became so obsessed, that he couldn't get out of character.
Realizing he had lost control, he blew his brains out!

Volz has become obsessed with hatred for the Liberty Net
and some of it's participants. He doesn't agree with the
political content of what is said at on 3.950 and attempts
to block the regular and legal transmissions that occur there.
He uses a variety of methods to harass the other amateur radio
operators on 3.950 as they try to communicate with one another.

His favorite method is to mislead other amateur radio
operators into thinking that it is their civic duty to
jam and harass the conversations that are taking place
on 3.950. He continues to tell outrageous lies, about
the participants on the this frequency.

Week by week, and month by month Volz continues to move
further from reality. Recently, when confronted by
Liberty Net members about a "pornographic" mass email
message that was sent out from his home computer, he
actually accused his minor daughter of the deed. A
new low - even for KK7HO.

Finally, Volz has found a 'left leaning professor's web
page that lists 100's of organizations that socialists
disagree with. Buried deep within the page is an entry
for the Liberty Net. It is this insignificant entry
that Volz promotes as proof that the Liberty Net is a
bad thing.

Volz has gone as far as to threaten the lives of other
amateur radio operators. One of his threats can be heard
on the web page: http://members.xoom.com/frg9600/500.wav

So the next time you see a "newsgroup rant" from Volz or one
of his imaginary personalities here on the newsgroups, don't
encourage him. As unstable as Volz has become, and in light

of his death threats, It's best to just ignore him and his 'spin', after all - his incompetence only serves to further the 'other side'!

Once again, we have Tim Volz (AKA KK7HO), agitating,
and harassing other amateur radio operators here on
this newsgroup. Every time Volz's actions are exposed
he calls them "lies" and promptly threatens to sue
everyone around him.

Tim Reminds me of Andy Kaufman.
Kaufman is the comedian that got into professional
wrestling as a stunt. He developed a 'bad guy' character
and became so obsessed, that he couldn't get out of character.
Realizing he had lost control, Kaufman blew his brains out!

Week by week, and month by month Volz continues to move
further from reality. Much as Kaufman did just before
he committed suicide.

Volz has gone as far as to threaten the lives of other
amateur radio operators. One of his threats can be heard
on the web page: http://members.xoom.com/frg9600/500.wav

So the next time you see a "newsgroup rant" from Volz or one
of his imaginary personalities ("Act Right on 3950", etc),
don't encourage him, 'cause he's close to the edge.

Don't bet that the cable isn't the problem. I struggled with this one for nearly a year - finally, was able to compare programming failures with my original cable to NONE with a new cable. By flexing the cable, I found the ground lead was a cold solder joint. Fixed it in a motel room with a hastily-acquired RS soldering iron at Dayton.

Three mos later, smae cable failed again! This time, the RED conductor parted about a foot from the quad plug. Cut out the damaged section and found the break upon dissecting the cable. Works perfectly now everytime.

I must have had a bad cable - it had never been handled roughly or pinched. Looks brand new today, except for the splice!

Arthur Shulman.

I assume that you mean White as in the European race, and not white as a color. When speaking of races and peoples, I prefer to capitalize as a form of respect; when speaking of mere colors, I don't. Race and color aren't the same thing. Imagine the physiognomy of "Whoopi Goldberg" with fair skin. Heads would turn, and no one would mistake her for a member of the White race.

Since this is a very politically "sensitive" and non-radio topic, I've set the followups appropriately. We can continue this in the other groups or via email or not at all; whatever your pleasure.

Races are subspecies, and the European or White race is the variety that arose in Europe since the dawn of the Cro-Magnon, with results ranging from the Parthenon to the Saturn V rocket. Linnaeus, Darwin, Baker, Coon, and other eminent scientists all gave it full subspecies status -- _homo sapiens europaeus_ in Linnaeus' case. To be fair, of course, if the same standards were used for featherless bipeds as for other varieties of animals, there would be a very good argument for full species status.

Of course human varieties, like bodies of water, do not have hard-edged boundaries, but this no more means that races do not exist than it means that the Pacific Ocean does not exist.

To a large extent, races of men, like varieties of any other kind of animal, are self-defining entities. After all, subspecies were forming and diverging and ultimately speciating for aeons before anyone was around to study or classify the phenomena. That's how evolution works. If members of the race feel that, looking upon you and interacting with you, that you are one of their kind -- then you are. If they don't, you aren't.

The real question is not precisely where we draw the species and subspecies boundaries -- though very useful, these are line-like human conceptions drawn upon what is really a continuum.

The real question is this: Will the divergence and speciation of the human races be allowed to continue toward its ultimate destiny -- or will the process be aborted by the multiracial program of the billionaire media elites and the false "equality" religion they promote, and thereby set back our journey to the stars by hundreds of thousands of years, or possibly forever?

With all good wishes,

--

Kevin Alfred Strom.

There's his first error: The RF spectrum should be thought of as a highway; the privilege (not "right") to operate a transmitter on that highway can be revoked at any time.

<anonymous babble deleted>

>I felt threatened that my hobby was in jeopardy of being sold down the

There's his second error: No where in CFR Title 47 Part 95 is "hobby" mentioned. The FCC repeatedly says "service." Our charter is quite clear:

97.1 Basis and purpose.
The rules and regulations in this Part are designed to provide an amateur radio service having a fundamental purpose as expressed in the following principles:
(a) Recognition and enhancement of the value of the amateur service to the public as a voluntary noncommercial communication service, particularly with respect to providing emergency communications.
(b) Continuation and extension of the amateur's proven ability to contribute to the advancement of the radio art.
(c) Encouragement and improvement of the amateur service through rules which provide for advancing skills in both the communications and technical phases of the art.
(d) Expansion of the existing reservoir within the amateur radio service of trained operators, technicians, and electronics experts.
(e) Continuation and extension of the amateur's unique ability to enhance international goodwill.

3549. Kenwood Nuts Revisited

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-06 00:00:00 UTC
From: DontDoIt@ImNotHere.com
Message-ID: <37aad2b0.8467479@news.mv.com>

Cross-posted to: rec.radio.swap,rec.radio.amateur.antenna,rec.radio.amateur.boatanchors,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.misc

Well, it's very interesting...

No-one wants to rent the nut tool, but everyone wants to buy one, so here goes nothing:

(For those who've missed this "lively" thread, please see below for my description)

I know I offered to tell you where to buy the tool, but the guy I get them from doesn't really want to sell them onesy, so I'll act as middle man.

For $34 (money order or cashier's check, no cash please) I'll ship you your very own nut tool, to keep, to cherish, TO SHARE!!! If you don't like it, return it unharmed and I'll refund your money, less freight.

That's the best deal I got, and I ain't gonna get rich on this one, I do it simply to stick-it to the "establishment" that wants to charge upwards of $90 to loosen a nut.

If you're interested you can contact me via mail, email, or phone:

Neil Rosenberg, N1DMA
NeilR@innermedia.com
60 Plain Road
Hollis, NH 03049
(603) 465-2788

The supply is limited, so act soon. Be sure to check with me before sending any money, to make sure I haven't run out!
==========
The fine print:

I have in my posession a tool that is positively brilliant at loosening/removing/tightening those annoying circular "nuts" that you'll find on various Kenwood rigs. Yes, you know the ones I mean, the ones that no amount of coaxing with the tip of a screwdriver will budge. I've been told (but haven't confirmed) that the same nuts are found on many Icom, Yaesu and other rigs.

Why on earth would you want to remove this nut, you ask? Well for most of the affected Kenwood rigs, it's the ONLY way to get to things like digital front panels, lithium batteries, and so on.

You can see a photo of the tool at:

http://www.mv.com/ipusers/innermedia/kenwood/spanner.jpg

Disclaimer:

I make absolutely NO warranty as to the applicability, performance, or safety involved in using the tool I send to you. If you damage your rig, or yourself, that is totally your responsibility. If you void your warranty, that's also your problem. THINK BEFORE YOU ACT!

If the tool is not as I described it, if you chicken out, or if it doesn't fit your rig, contact me, and I'll refund your entire price (less my UPS cost) as soon as the tool is returned to me undamaged. In other words, treat me fairly, and I'll return the same.

Neil, N1DMA

3553. Vernon balloon experiment launch. Listeners requested

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-06 00:00:00 UTC
From: William Mastop <wmastop@home.com>
Message-ID: <7GBq3.15098$B5.130415@news1.rdc1.bc.home.com>
Source record: 134653

The ham club I'm associated with, being the North Okanagan Radio amateurs club situated in the north end of the Okanagan Valley, Vernon, British Columbia, Canada has, as an offshoot the Vernon Balloon Experimenters club (VBX).
The VBX will be launching a weather balloon (actually three of them) carrying a two meter repeater, as well as a gps system, and a sstv setup. The last launch went to some 60,000 feet, and could be heard a very considerable distance. As part of the project, those with two meter equipment are asked to monitor a particular frequency and report if they hear anything. The report can be sent by email.
This is an interesting project. Here's the most recently issued bulletin about it:

VBX-3 Bulletin
Issued July 26, 1999

Vernon's third balloon experiment is nearing the August 7th launch date. VBX-3's payload will consist of;

1) Crossband repeater - input 446.00Mhz, out 146.52 MHz.

2) APRS beacon - 144.39

3) SSTV transmitter - 146.52MHz

Note: Crossband repeater operation will be disabled for 38 seconds every 3 minutes when the SSTV image is sent.

Callsign used will be VE7VBX

The control station will be located at the Interior Space & Science Center and the call will be VE7ISS.

On August 7th if you can hear VBX-3, please send an email to ve7vbx@rac.ca. (Please limit message length to less than 120 characters)

Porkbutt:

I know a CBer in need of a powerful amp. Will you be set up at the usual truck stop with your assortment of 8877 linears. He needs that "SUPERPAPA" model with the four 8877 tubes. He is using the amp you sold him at the last hamfest. The one you ripped off from David, KC1ZQ. He wants to trade that one in for a "SUPERPAPA". If you don"t have one of those, he might consider the "N WORD SPECIAL", the one with the three 8877 pumpkins. Please bring your entire inventory of linears for high power CB use. OH yes, he need some more of those PORKBUTT RF Filters to push on the street, They are just empty boxes, but he gets outta Dodge quick before the suckers find out they are no good. I know that you are no longer a amateur due to your criminal behavior, but that gives you more time to build "SUPERPAPAS" and "N WORD SPECIALS. My friend and I will see you at the truck stop. I hope the other CBers don't clean you out of amps before I get there. My friend will pay cash of course. I know you love that for "The TAX man" . Will you still have the bumper sticker on the bumper of the seventy five model Mercury that says "RILEY SUCKS"? If so, I can identify you by that, HEH HEH

Get back

I think hams would lose everything above 2 meters if this idea is
followed. Outside of a few large cities, how many hams would notice if
all UHF and above went away?

If you would have bothered to read the related earlier posts, you would have seen there were other costs incurred in the shipping besides just the FedEx charges. You would have also seen in the original posting you replied to that Roland Geter AGREED to the costs involved before the package was shipped. Roland Geter is a creep, he has ripped off more people on these newsgroups then you could imagine. Be thankful this guy is warning the rest of us so we don't get ripped off. Why don't you get into a business agreement with Roland Geter and find out for your self.

ULS ARRIVES

The U-L-S is about to arrive in the new world of Amateur Radio. U-L-S stands for Universal Licensing System and
its implementation will forever change the way that you deal with the F-C-C and the way the agency deals with
you. Rick Lindquist of the A-Double-R-L Audio News has the details:

The FCC begins phasing in the Universal Licensing System for the Amateur Service August 8 at 4 PM Eastern Time.
That's when the FCC stops accepting
new or upgraded licensee data from Volunteer Examiner Coordinators under the
current amateur licensing system.

The ULS ushers in an era of electronic, interactive filing and handling of
Amateur Radio applications. Being phased out under ULS is the familiar paper
FCC Form 610 series. A "universal" Form 605--primarily designed for
electronic use but also available on paper--will take its place.

A July 23 FCC Public Notice says the Wireless Telecommunications Bureau will
begin using the ULS for the Amateur Service on August 16. Existing Amateur
Radio licensing data will be transferred into the ULS database during a
weeklong phase-in period. During the phase-in period, the FCC will not
process new or upgraded licenses.

Electronic filing of Amateur Radio license renewals using FCC Form 900 ends
August 9 at 9 AM Eastern Time. Electronic filing of vanity call sign
application Form 610V terminates August 13 at 5:30 PM Eastern Time. Hams
should not attempt to file renewal or vanity applications until the ULS
comes up August 16.

Starting August 16, hams registered in the ULS may file the new FCC Form 605
electronically at any time of day, seven days a week. FCC Form 605 will be

used for license renewals, modifications, cancellations, vanity call sign application, application withdrawals and amendments, as well as requests for duplicate licenses and administrative updates such as a change of address or other clerical license modification. Applications for new or upgraded licenses will continue to be filed through a Volunteer Examiner Coordinator.

Automated processing of electronically filed applications will occur nightly each business day, but five days a week instead of seven. There will be no weekend processing under the ULS. The FCC has warned that applicants should anticipate processing delays during the first couple of weeks the ULS is in effect.

The FCC will stop accepting most Form 610 applications next February 16, but club station Form 610B will continue to be valid beyond the six-month transition window to allow time for the FCC to implement new handling procedures.

Among the advantages of the ULS, the FCC says, are fast and easy electronic filing, improved data accuracy through automated checking of applications, and better electronic access to licensing information. One feature of the new ULS is a renewal reminder sent 90 days prior to a license's expiration date. ULS also will simplify the process of submitting fees to the FCC, and the FCC said it anticipates that the ULS will be capable of accepting credit card payments on-line in the near future.

Registration in the ULS is required. Applicants should use FCC Form 606 for both electronic or manual filing. To register online, visit http://www.fcc.gov/wtb/uls/ and click on "TIN/Call Sign Registration." A paper FCC Form 606 is available at http://www.fcc.gov/formpage.html or from the FCC's Forms Distribution Center, 800-418-3676.

The FCC will not process future license grants, upgrades, modifications or renewals for any applicant not registered in the ULS. Individuals eligible to hold a Social Security Number must provide this number to the FCC in order to be registered in the ULS.

A copy of the July 23, 1999 Public Notice is available at http://www.fcc.gov/wtb/uls. Additional information on ULS will appear in the Washington Mailbox column in the September issue of QST.

Don't worry if you missed those internet addresses. We have them at our website in the printed edition of this
weeks Newsline report. (FCC, ARRL)

*****

SWISS HF NOCODE REDUX

It still appears as if Switzerland may be the first nation to unilaterally end Morse code testing of candidates for
Amateur Radio licenses and give codefree access to the high frequency bands. This despite protests from

neighboring hams in Germany. Our business reporter Don Wilbanks, KC5MFA, has more:

Earlier this year Newsline reported that the Swiss national society -- known as the U-S-K-A had been
contemplating backing a Swiss government plan aimed abolishing all Morse code testing for Amateur Radio licensing
in thatnation. The support was put on hold when official objections were lodged by the neighboring German
national ham radio society known as the D-A-R-C. While its unclear if U-S-K-A and D-A-R-C have settled their
differences on this matter, it is aparant that the Swiss are getting ready to proceed.

The August 1st edition of the W5YI Report quotes the words of Claude Georges, HB9RS. Georges is one of the
directors of the U-S-K-A. He says Morse testing will be abolished far sooner in Switzerland than origionally
anticipated.

The Swiss Telecommunications agency which licenses hams in Switzerland appears to agree. I has already advised
that it supports a plan to replace Morse testing with written exam questions dealing with interference. In his
article, HB9RSO says that electromagnetic interference issues are far more important in this day and age than is
the ability to copy Morse code.

> From New Orleans, I'm Don Wilbanks, KC5MFA, reporting for Newsline.

The only question seems to be when Morse testing will disappear in Switzerland. While nobody is willing to
comment officially, everything points to it happing very soon. (W5YI Report)

*****

SOUTH AFRICA SLOW CODE

While the Swiss appear ready to opt for No-Code it is Slow-code access to the high frequency bands that appears
to be a far more popular alternative for some nations. Slow code is the United States ham radio nickname for
telecommunications regulatory authorities that opt to give hams high frequency access if they can pass a 5 word
per minute code test rather than the customary 10, 12 or 15 word per minute exams.

And now it looks as if South Africa may be the next nation to adopt slow-code. Following closely on the heels of
Great Britain's introduction of a 5 word per minute ham license that grants the holder access to the high frequency
bands, South African telecommunications regulators may be getting ready to do the same. Ian Paperdorf, ZR5ABR
of Durban writes that the South African Radio League has formally requested that the South

African
Telecommunications Regulatory Authority reduce its present twelve word per minute Morse speed requirement
down to five words per minute. A decision from the regulatory agency is expected shortly. (Q-News)

FCC HANDS NC HAM 6 MONTHS OFF HF

The FCC says that John Abernethy, K4OKA, will have to restrict his Amateur Radio activities to the world above 50
Mhz for the next six months. This, after the regulatory agency slaps a 180 day license modification on the
Hickory, North Carolina ham. Bill Burnett, KT4SB, has been following developments in the rules enforcement arena
and reports from Miami:

The FCC says that its punitive action against John Abernathy, K4OKA is a follow-up to a station visit in January
and alleged malicious interference earlier in July. FCC Attorney Riley Hollingsworth, K4ZDH, notified Abernethy on
July 27 that the Commission was modifying his license to prohibit operation below 30 MHz for 180 days, effective
immediately.

The FCC letter to Abernathy included a copy of a tape recording of alleged transmissions said to be of Abernethy's
station made this past July 16th. Hollingsworth's letter described the tape as consisting of deliberate interference
on 3.965 MHz and noted that Abernethy had been warned about this kind of interference at the time his station
was inspected.

By way of background, FCC personnel inspected Abernethy's station back on January 21st and 22nd. This, in the
wake of what Hollingsworth called longstanding complaints from other amateurs and from FCC field offices regarding
the operation of K4OKA's station.

Hollingsworth said that the FCC has received numerous complaints about profanity, obscenity, deliberate
interference, and failure to properly identify. Other complaints alleged that Abernethy had aired something called

the Porkbutt Song for the purpose of harassment or deliberate interference. During the January station inspection,
FCC personnel found a cassette tape installed in a player in Abernethy's ham shack. At that time Abernethy
voluntarily destroyed the tape recording while FCC personnel looked on.

The FCC letter also said the Commission had received complaints that Abernethy had used A-M and upper sideband
on 75 meters for the purpose of interference to communications on or near 3894.5 kHz. Hollingsworth's letter also
spends also four paragraphs outlining the FCC's position on what constitutes obscene and indecent transmissions.
It tells Abernathy that baeed on FCC monitoring, and from conversations with him, that it is apparent that
Abernathy is seriously misinformed about the Commission's enforcement of the prohibition against obscene or
indecent Amateur Radio transmissions.

Hollingsworth says the station inspection found Abernethy's station to be technically in order, but noted that
personnel had serious concerns about a linear power amplifier that they found in K4OKA's hamshack . An amplifier
that the FCC says to be capable of operationat substantially high power limits than allowed in the Amateur
Service. Abernethy was warned in the letter about over-power operation.

The FCC's High Frequency Direction Finding Center in Maryland tracked the transmissions of the Porkbutt Song to
K4OKA. Right now the Commission says that it has no plans to start revocation proceedings against Abernethy.
That could change if the agency gets new evidence of continued violations of the type described in the July 27th
letter to K4OKA.

> From Miami, I'm Bill Burnett, KT4SB reporting for Newsline.

Abernethy was given the usual thirty days to protest the FCC enforcement action. Unless he appeals promptly, he
is barred from operating any band below 30 MHz until January 22, 2000. (FCC, ARRL, Newsline)

**

THREE LICENSE CANCELLATIONS

Three hams who failed to appear for re-examination have been stripped of their Amateur Radio licenses. Back on
June 18th, Ronald Coursey, N6UUM, of Sacramento California, William Estrada II, KD6VEG of New Almaden California
and James Dale, KE4TEW, of Tampa Florida were ordered to sit for re-examination. It appears as if each decided

to simply forfeit their Amateur Radio licenses instead. All three former hams have been warned that continued
operation of their station transmitters is forbidden under federal law. (FCC)

**
FCC TO IARN FOUNDER: CLARIFY YOUR RESPONSE

The FCC has given International Amateur Radio Network founder Glenn Baxter, K1MAN, an additional twenty days
to clarify his response to a previous information request from the government regulatory agency.

As previously reported, the FCC's Riley Hollingsworth had written to Baxter on June 25th asking K1MAN to supply
detailed information regarding the way in which his station was operated. A new August 4th letter from
Hollingsworth tells Baxter his July 25th response failed to provide the information requested by the FCC. Baxter
was told he has until August 24th to provide a full and complete response to the information request.

The letter also warns that the Commission has the right to revoke the license of any licensee who willfully fails to
provide requested information or who provides what the government deems as a false or misleading response.
(FCC)

**

$7000 CB FINE

The FCC has also approved a $7,000 fine against a Little Rock Arkansas Citizens Radio service operator identified
as Steven Craig Burseof. This for violation of Section 95.426 of Commission Rules. Rule 95.426 states that a C-B
radio operator must make his station and its records available for inspection anytime that request is made by a
representative of the FCC. (FCC)

**

A BREAK FOR N6NHG

A California state computer fraud charge lingering against hacker Kevin David Mitnick, N6NHG, since 1993 will be
dismissed. But only if a judge goes along with the prosecution's recommendation.

California prosecutors filed the motion to dismiss the charge against Mitnick for allegedly hacking into the
Department of Motor Vehicles computer on Christmas Eve 1992. A spokesperson says that the state is taking this
action because Mitnick is already going to prison for a longer term than he could get if convicted in state court.

Mitnick has pleaded guilty in federal court to computer and wire fraud, stemming from a cross-country hacking
spree that cost several companies about one and one half million dollars. On August 9th, he is scheduled to be
sentenced to forty-six months in federal prison. He also must make restitution and is barred from ever again using
a computer. (Published news reports)

**

WEAK SIGNAL INTERLOPERS

More problems for the weak signal community. Mark Mc Millian, N7EI-, of Rathdrum Idaho reports over the V-H-F
Reflector of some new unidentified F-M stations being heard regularly in the weak signal portion of two meters.
Mark says that hams living along Interstate 90 should keep an ear open for a pair of F-M operators speaking
Chinese on 144.200 Mhz. According to Mark, the signal of both stations are very strong but no callsigns have
been heard. (VHF Reflector)

**

EMPIRE STATE GAMES

New Yorks' Empire State Games ended with a bang thanks to a quick-moving storm that caused postponements at
many events. The lightning, high winds, and rain stopped play at the softball, baseball, and field hockey venues in
Suffolk County as well as causing power outages at the ice hockey rinks where men's and women's hockey finals
were being played.

During the emergency, as well as throughout four days of record high temperatures and humidity, Amateur Radio
operators stationed at each event were able to maintain communications. Over ninety hams provided a constant
network of information from early morning until late evening from Thursday, July 21, until Sunday, July 25. (Hudson
Loop, ARRL)

**

CONTEST CHANGES AT THE ARRL

The A-Double-R-L Awards Committee has considered and accepted several recommendations from the Contest
Advisory Committee which will affect the annual November Sweepstakes.

Effective with the 1999 running of this event a single operator unlimited category has been added. This
classification allows for single operators to use packet spotting networks during the contest. There is no power
differentiation in this category.

Also, the multi-operator category, while still limited to one transmitted signal at any time, is allowed unlimited band
changes. These changes will affect the exchange participants send and receive during the contest.

The complete rules are at www.arrl.org/contests on the World Wide Web. (ARRL)

**

AMSAT UK COLLOQUIUM FOLLOW-UP

Turning to international news. From England comes word that some eighty people from eighteen countries
representing five continents attended the recent AMSAT U-K Space Colloquium held at the University of Surry.
According to Program Organizer Richard Limebear, G3RWL, no majorn news came out of the event but there are a
few snippets. Among these is that no launch date was announced for the Phase 3 D satellite but whispers
suggested an announcement real soon. Hopefully the bird should definitely be up, tested, and operational by this
time next year.

Also, the highest frequency downlink on Phase 3 D is not 24 Ghz transmitter as most hams think. Richard says
that there is also a laser transmitter on board. This is a one half a watt unit on 834 nM range. It is intended to
be modulated at 400 bits per second of data or by standard C-W. (AMSAT-UK)

**

RSGB LEADERSHIP CHANGE

Some leadership changes at the Radio Society of Great Britain. Jeramy Booth, G4NJH, has the details from
Nottingham in the U-K.

PKG Here

By the way. Jeramy is now supplying the full weekly R-S-G-B news bulletin in Real audio on the World Wide Web.
His website can be found at http://www.innotts.co.uk/~asperges/mmenu.html and is well worth dropping by.

(G4NJH)

SPECIAL EVENT STATION

Those of you who are planning to go to Australia next September for the Olympics might like to know that the V-K
2 division o the Wireless Institute of Australia will be hosting a special event station for the games. It will be on
the air around the clock for the duration of the games. Richard Murnane, VK2SKY, advises those of you who would
like to operate the station, please contact the Wireless Institute of Australia V-K-2 Division by e-mail email to
vk2wi@ozemail.com.au. (Q-News)

**

CANADIAN 6 METER GRIDSQUARE ROVER

Meantime, to the North, Bryan Rhyason, VE6NA, will be activating some rather rare grids on 6 meters over the
next two weeks. These are located in the northern Alberta and British Columbia provinces as well as the Yukon
Territory. According to John Kirk, VE6XT, Bryan is not on a set schedule, and will not accept scheduled contacts.
But he does keep an ear on 50.125 Mhz all day. To monitor VE6NA's progress, check the coordination frequency
of 3 point 740 MHz at around 0030 U-T-C. Q-S-L as directed on the air. (VHF Reflector, VE6XT))

**

DX

In D-X, an operation from Mauritus is now slated for September 23rd to October 10th by four P-A prefix amateurs.
They plan to operate all of the High Frequency bands on CW, SSB and RTTY. The group may also operate 2 meter
E-M-E as well. QSL via the bureau or direct to each operators home call sign address. (Modern DX)

And the DX News Letter reports that JE9IKG is now to be active from Uganda on SSB signing 5X1JA from Uganda.
QSL via his home address. Meanwhile 5X1P has been on 18 point 070 MHz around 04:30 U-T-C. QSL via G3MRC
(OPDX)

Also, to help commemorate the 60th anniversary of World War Two, a number of stations from Poland's Gdansk
Coast will use special 3 Zed prefix callsigns from September 1st through October 2nd. Activity will be on all H-F,
VHF and UHF bands. (Via e-mail)

**

THE 30 KV CLUB - ONE ORGANIZATION TO AVOID!

And finally, get well wishes go out to Charlie Carpenter, who is a transmitter engineer for KQCA and KCRA-TV in
Sacramento California. On Wednesday, July 21, Charlie joined an exclusive club whose membership is comprised of
those few lucky people who have come into contact with voltages near 30 kV and who have lived to talk about it.

According to Kent Randles writing in the C-G-C Communicator, as of July 28th, Carpenter was still in the Intensive
Care Unit of UC-Davis Medical Center undergoing extensive repairs to his arm. Luckily, there were two people on
duty and Emergency Life-Flight was called immediately. No details of how the accident occurred have been
released. (CGC Communicator)

**

I will bring my friend to check on your amps, it looks like they are
the kind he is looking for. OK on no trade ins. I get your point, there
is no use takeing a trade in because you are so crafty at lifting them
off of amateurs. I will try to steer him away from your lot lizard. My
friend is kinda like Bill Clinton and his wife can't keep the old dog
on the porch. So I hope she is busy working the "sleepers".
Do you have any more of the "AF2Y sux cheap" bumper stickers. I want
one of those to put on "Gremlin".

I think my friend has changed his mind and wants the "Riley Special"
with the 12 jugs, the "N" WORD Special" is not big enough with the
lesser amount of "jugs" . In any event Porkkbutt, we will see you
Saturday and deal for the "Porkbutt Filters" and the "Riley Special".

One more thing, are you handling the disposal sale of "Jail Dale"
Ke4TEWs rigs. You know, the cancelled amateur like you. If so, I would
like to deal on those, I realize they have no serial numbers, and you
know why, but in keeping with your felonious background I don't think
you really care.

Thanks for everything, see you Saturday at the truck stop.
Getback

I've just recieved a report, on George "Polly" Ashley which elaborates in detail why he was such a poor student, even when he and his father were attending the same grade school. Apparently, the closest "polly" will come to a brainstorm is a light drizzle. In fact, they branded Polly the most likely to end up on skid row. Polyp doesn't dare get lost in thought, he'd be a stranger there. Polyp's lack of research about the "Moundsville pen" is obvious. How could I live in two places at the same time, polly? They closed the WV State Penitentiary in Moundsville two or three months of my move back to WV after a 34 year absence.
How could my mom work there when she's been retired from self-employment (a concept you never acheived, huh, loser?) since 1976. Over 6000 posts, huh, polyp, er, polly, make you envious that somebody else can read and write, right, Polyp?
George Ashley :DUNCE.

Hola y gracias por leer este mensaje.
No se utilizar bien este programa ya que es la primera vez que me pongo con el y tengo dos dudas.
La primera es al respecto del "TEMPLATE" que tal como lo explica en el menu de ayuda, no lo tengo claro, pues me manda gravarlo como "rdf" con un mombre cualquiera, pero yo creo que deberia se gravado con extension "tlp" ¿o no?.
Muy bien hago un template y despues hice una copia de lo que tengo en al talky un FT-51R como "rdf". Pero cuando cargo este rdf me da el siguiente mensaje: "Frecuency synthesizer values corrupted by previous sotware version have been corrected".
¿Que quiere decir esto? ¿Es normal?.

This e-mail was sent to me recently:

I'm an occasional listener to the Liberty Net, and do support OUR right to maintain open discussion on the "RF sidewalk", without interference from government supported jammers. It may be interesting for you to know that Mr. Hollingsworth has a
controversial history during his tenure in the Land Mobile Radio Service(Part 90), which later spun off as Specialized Mobile Radio(SMR) in the New World Order Telecommunication Act. During the 80's, a new technology called "trunked radio" came in to
existence. Subscribers to repeater service now enjoyed computer controlled signal steering to many repeaters, without waiting for a conversation to end so they could have access to an open channel. The traffic handling efficiency was phenomenal, and revenues soared. The radio spectrum of 810-865MHz became the focal point of deployment of this technology, and private Specialized Mobile Radio Shops were making incredible income from systems that were built by entrepreneurial spirited small business owners across the country. Two lawyers employed by the FCC got a secret lead from the industry that Motorola had developed a digital protocol especially for wireless networking of audio channels, but they needed RF spectrum to deploy this technology. The 800Mhz spectrum provided the best propagation characteristics, and already had a well entrenched customer base operating on private analog trunked systems. These lawyers quit the FCC and formed a company called Fleetcall, which primary purpose was to aquire 800MHz spectrum by buying private radio shops whole, for the 800 licenses and the promise to pay 7 years revenue of
the 800 system. Many, many, caved in to the quick money offer, and the conspiracy to plunder the 800 spectrum was now underway. Incidentally, this is the turning point for the FCC being accepted now as a spectrum marketing clearing house, rather than an institution of engineers and technicians that once represented the people. In just a few years time, these ex-FCC employees were nearing the day they could hand Motorola the spectrum on a silver plate, in return for access
to it's digital technology.

During this time, Mr. Hollingsworth's name plastered the trade magazines as the mouthpiece for the FCC, spewing
regulatory changes which were conveniently parallel with the needs of a now full-fledged national company renamed now as "Nextel". The leverage of this company had got to the point that the FCC declared a freeze on 800MHz applications from private radio shops. I am proud to this day to say that my company still owns it's 800MHz license's, and did not sell out to Riley's co-conspirators. I sat at the Drake forum at Dayton this year, and Mr. Hollingsworth spoke. He advised the group that "this amateur radio, and not Nextel". Not many in the 125 person assembly understood the real meaning of

what he said,
but the moment those words were emitted from his phony mouth, I felt threatened that my hobby was in jeopardy of being sold down the pike, like the 800MHz land mobile spectrum was sold out to special interest. He admitted during the 80's, the amateur service received little or no FCC enforcement. That was because they were pre-occupied bastardizing Part 90,by selling the Specialized Mobile Radio Service to special interest. With all the successes of his career with the FCC during the 80's, he
did not disclose why he was re-assigned to Part 97 as a romotion, or demerit...I did not ask. In fact, none of the questions that came to mind were pertinent to Amateur Radio. Nextel continues to lose money on the Nasdaq, and to this day operates
in the red. Yet, nobody wants to talk about the many profitable small businesses that were destroyed by this greed. Greed which was induced by trusted employees of the United States government. Greed by which government employees in powerful positions conveniently turned their backs. Investors are walking away by the minute. Many hams were overwhelmed by his presence, yielding standing ovation, and Joe Six-pack's invite him to their frequency for rag-chews and jokingly dare participants to get out of line. That to me is like inviting the IRS over to your house, while you fill out 1040 forms for the bastards. His phony presence at Dayton, and the situation which has developed with 3950 has prompted me to refer to trade journals of the 80's, to get actual account of the activities on this guy throughout his career. It may not be as shiny as many are being led to believe, and assignment to Part 97 may not have been by choice. I eagerly await the address of your publicized communication with this
gentleman.

Sincerely from my compound to yours,

FCC Lays Out Arguments for Dismissal of KV4FZ AppealWASHINGTON, DC, Aug 5, 1999--When the fight by Herbert L. Schoenbohm, KV4FZ, to retain his Amateur Radio license reaches federal court this fall, the FCC will argue for an outright dismissal. In its brief in the case--now scheduled for oral arguments before the US Court of Appeals for the District of Columbia Circuit on October 18--the FCC maintains that Schoenbohm is asking the court to review an order that's not subject to review.

Following Schoenbohm's 1992 conviction for fraudulently procuring long distance telephone service by using illicitly obtained access codes, the FCC in 1994 designated his Amateur Radio license renewal application for hearing. An Administrative Law Judge denied his renewal application saying that Schoenbohm's felony conviction "reflects adversely on his propensity to obey the law."

The FCC also says that Schoenbohm, now 59, solicited others, using Amateur Radio, to make ex parte presentations on his behalf, in violation of FCC rules and that he subsequently "engaged in misrepresentation and lacked candor" in testifying about his felony fraud conviction and his solicitation of ex parte presentations. The FCC said his behavior, in combination with his fraud conviction, justifies denying his amateur renewal application.

Schoenbohm appealed every step of the administrative process. Last summer, the FCC upheld the supplemental initial decision of an administrative law judge denying Schoenbohm's renewal application. The FCC affirmed that finding last October 6. Schoenbohm has moved the matter into the courts by appealing the FCC order denying his reconsideration petition.

The FCC argues, however, that Schoenbohm--of Kingshill, Virgin Islands--is asking the court "to review an order that is unreviewable." The FCC says the courts have held "that an appeal from an agency order denying reconsideration is not reviewable unless the appeal rests on new evidence or changed circumstances."

In its brief, the FCC contends that Schoenbohm's appeal is not based on either, so "his claims are unreviewable."

Following his conviction, Schoenbohm served two months house arrest plus two years of probation and paid a $5000 fine. He maintains that the FCC should renew his license because his conviction was several years ago, his sentence light, and he's had a spotless record and been fully rehabilitated. The FCC disagrees. "Schoenbohm's record since his conviction has not been 'spotless,' but includes testimony before the Commission that was false and lacking in candor," the FCC argues in its appeal brief.

The FCC also turns away arguments by Schoenbohm that the FCC should have reopened the proceeding to look into Schoenbohm's claims that the Administrative Law Judge in the case may have received improper ex parte presentations by parties opposing Schoenbohm's license renewal. Those claims, the Commission argues, not only were untimely but "based entirely on hearsay, rumor, and innuendo."

A brief filed May 10 on Schoenbohm's behalf by his attorney Lauren A. Colby contends that the Commission's actions to deny Schoenbohm's license renewal were "arbitrary and capricious and inconsistent with well-established precedents." Among other things, Colby argues in his pleading that Schoenbohm's criminal conviction does not merit denial of his license renewal and that the FCC has "previously renewed the licenses of convicted murders and marijuana distributors," that Schoenbohm did not violate FCC ex parte rules, and that he did not lie to the Commission. Colby asks the court to remand the case to the FCC with instructions to grant the renewal.

Schoenbohm's Amateur Radio license expired in 1995, and his call sign no longer appears in the FCC database. However, he has been allowed to continue operating as KV4FZ until his administrative and judicial appeals are exhausted.

3584. ARRL Spins: "Look, FCC, Documented 'Use'"

Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

An ARRL Product Review from September 1999 states:

"the
DR-M06, Alinco's 6-meter FM-only mo-bile
transceiver... Being FM only, this unit is fairly re-stricted
in its applications for the American
amateur. For the 6-meter model this might
not be considered a major limitation. The
6-meter band is 4 MHz wide and FM activity
is common on a significant portion of it."

ARRL is trying to maintain its tenuous grasp on a dead band that would be better used for wireless services that would use it 24 hours a day, 7.

Why keep a band that's a dead clone of 10 meters, and is only used by a few during openings. Now some LOSERS will declare it "sounds like 20 during a contest." When ? On 10 days from June through August ?

Please. If we don't use it, we should lose it, and focus on defending those bands we do use EVERY day.

Sorry but six meters is NOT a DEAD CLONE OF 10 Meters. The band has
very different properties than 10. It is a borderline band between HF
and VHF. As for it's not being used. I will admit it is not being
used to it's full potential. DX activity is concentrated on the low
end. FM on the high. With a LOT of wasted space in between. However
that was a similar situation on 2 meters back in the mid 60's. In fact
Wayne Green wanted to give away the top 2 mhz for that very reason.

3587. ARRL Contesters Working to "off" KV4FZ (R-VI)

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-06 00:00:00 UTC
From: mf_luder@my-deja.com
Message-ID: <7odjvo$d6b$1@nnrp1.deja.com>
Source record: 134726

Remember folks, never go from contester to truth sayer and call nets as you see them, or say you're a Republican to Dave Sumner, and the now clearly Democrat affiliated ARRL.

This organization should be apolitical as far as things that don't involve ham radio.

You think I'm wrong ?

Check the dictator-for-life (yup 15 more years of him, I'm sure) K1ZZ, who declared that impeachment, a far more serious matter than ham radio whiney bills, was getting in the way of ham radio legislation.

What bunk. They have been trying for ten years to pass their impotent resolutions. Do you know how easy it is to pass a resolution ?

If you had any respect in Washington, not hard. It's not a law. It's a feel-good statement.

It isn't because the members are all bought by businesses; it's because ARRL is impotent and botches up everything it has touched in the past two decades (or more).

An 850 needs it if you are going to replace the mike jack, otherwise no.

HAve had both, as well as Standard C-508a,resulting in a certain experience in such matters.... I like the C-508 very well.... nice RX, decent audio (for it's size), and AA battery convenience.... I like the Q7a for all of the above, Plus 30-50 MHz coverage RX (fire depts here are Low band still). I had a VX1-r approximately two weeks....performance was good, nice audio, Lithium Ion batteries work well,but with this size rig,I do like the convienence of picking up spare power at the corner drugstore if you run out in a bind.....the BIG fault with the VX-1 is the inability to scan frequencies at VHF and UHF at the same time, unless they are programmed by computer...this omission makes the VX1r totally unsuitable for my needs....as you can tell I use my mini ht as a scanner as much as a transciever-the Q7 is ideal for this due to the frequency coverage.... they do act like a wireless Mike in conjunction with a nearby crossband radio....and that works very well... but 300 Mw is only gonna go so far..... 73 and as always, your mileage may vary....

Why don't you KIDDIES turn off your radio's, log off the internet call for your mommies to tuck you into your bed and shut the crap up......that is all I am reading on this group is BITCH BITCH BITCH.....

Now I remember why I don't want to upgrade......thanks to you fools, Ham radio has died to a certain extent.

Would someone care to play TAPS?

HAve had both, as well as Standard C-508a,resulting in a certain experience in such matters.... I like the C-508 very well.... nice RX, decent audio (for it's size), and AA battery convenience.... I like the Q7a for all of the above, Plus 30-50 MHz coverage RX (fire depts here are Low band still). I had a VX1-r approximately two weeks....performance was good, nice audio, Lithium Ion batteries work well,but with this size rig,I do like the convienence of picking up spare power at the corner drugstore if you run out in a bind.....the BIG fault with the VX-1 is the inability to scan frequencies at VHF and UHF at the same time, unless they are programmed by computer...this omission makes the VX1r totally unsuitable for my needs....as you can tell I use my mini ht as a scanner as much as a transciever-the Q7 is ideal for this due to the frequency coverage.... they do act like a wireless Mike in conjunction with a nearby crossband radio....and that works very well... but 300 Mw is only gonna go so far..... 73 and as always, your mileage may vary....

Hey Jeff, I dont see you posting information on the Ham newsgroups every time a licensed Amateur gets busted.....what gives. More Hams than CBers have gotten busted since Riley got hired. Why aren't you posting than little tidbit of information?

It seems that the only time you post to the CB newsgroup is when a fine is levied against a CBer (which is rare) or when you feel CBers should be reading the Part 95 Rule and Regulations, which you place a FAQ in front of the posting. Were you hired by the U. S. government as the official FCC media spokes person?

Please enlighten us.

Was it the word "idiot" that attracted you ? Just curious. But, since
you brought it up about my activities. Your correct, I can't argue
with your statements about my on the air activities during the radio
wars. I'm not acting the "goody two shoes", Im ashamed of what I did
on the air. There is NO EXCUSE, but there were REASONS.

As for jamming anyone, I will dispute that. If you are refering to the
3901 situation, then I'd say you should direct the "jamming" comment
towards Polly, Billy Jack, and several others. Who, at the behest of
Al Abernathy, would jam on-going qso's on that frequency every single
night for several years. But enough of that. Hopefully that is over.

If your refering to any of my activities on 3894.5, I would have to say
it is what is known as "retalitory jamming". Also VERY WRONG, and OVER
from this station for a very LONG WHILE.

Now here is something for you to think about, and if you notice I'm
writting this on a public forum. I think a MAJOR part of the problems
on 3901 were a DIRECT RESULT of Rich, WB2OTK, jamming 3894.5.

I also know that K4OKA and some of his group members did the same to
3901. BOTH SIDES WERE WRONG. The reasons for all of this on the air
warfare in unimportant. What is important is that it STOPS.

It is time for us ALL to bury the hatchet. It is time for us all to
end this silly war. On the air and on the internet. It is your choice
to elect peace or continued unproductive warfare here on the internet.
I chose PEACE. AND I APOLOGIZE TO ALL AMATEUR OPERATORS, AND ANYONE
WHO HEARD SUCH, FOR MY ON THE AIR CONDUCT IN THE PAST.

That is the best I can do. As a man that is willing to admit he was
wrong.

Yes, but can't you get the front panel off without it?

If so, you can use a regular pair of pliers to remove the retaining nut once the face is off.

>W1AW and K1MAN have never relinquished a frequency, to my knowledge.
>They simply begin transmitting, with no indication that they have
>been listening beforehand.

Many years ago, W1AW operators would listen before transmitting.
I was even once asked to yield the frequency so that they could send
their bulletins (which I did). W1AW was a model of courtesy and good
practice. But that hasn't been the case for a long time.

Now those Harris commercial broadcast transmitters (or whatever they
have now) fire up on the clock and clobber any and every one who might
be using the frequency without so much as a by your leave. AFAIK they
don't even *have* receivers monitoring the frequencies on which they
broadcast.

I suspect that K1MAN operates the same way (and if we believe news
reports, Hollingsworth suspects that too), though I have actually heard
K1MAN in QSO on occasion during "live" segments of his program, so
he must at least *have* a receiver associated with his broadcast plant.

It does make one wonder why Riley is sniffing around K1MAN's station
when he has to *know* that W1AW operates the same way. There was
even an article in QST about W1AW's automated broadcast station
setup when they installed those Harris transmitters, so it is no big
secret.

IMHO W1AW needs to be held to the same standard as any other amateur
station with respect to adhering to good operating practices. If they want to
bang on regardless, they should get a broadcast license and an assigned
broadcast frequency, just like any other SW broadcaster. (The same goes
for K1MAN and the other broadcasters operating under the guise of amateur
radio.) But I'm not going to hold my breath waiting for Riley to send a letter
to W1AW wanting to know why it fired up over an existing QSO. There's
a double standard operating, and everyone knows it.

Abolition possibly, but not thru subversive illegal acts or by driving a wedge between races of people. Condemning the government on facts is one thing. Doing so thru supposition, conspiracy or propaganda is certainly another.
I wonder how you consider a listed racist Hate Group on amateur radio to be anything other than a subversive group.
Unless of course you subscibe to their philosophies.

RadioPIG squealed:

[...]

> Show your hatred
>for those who hate our nation. Keep our FBI informed.
>

LOL!! As if the FBI is supposed to clamp down on U.S. citizens who are
exercising
their CONSTITUTIONALLY PROTECTED
RIGHT OF FREE SPEECH??? LOL!!

As hilarious and ridiculous as it seems,
AF2Y's campaign to persecute patriots
by trying to get the government to shut
them up reveals much about AF2Y's
beliefs. It would seem that AF2Y wishes
this were the Soviet Union, where government KGB-types kick in doors and
haul away anyone who critisizes the
government. But then again, since Jews
were largely responsible for communism and specifically the Bolshevik
Revolution in
Russia, I guess it stands to reason that one of their descendants (AF2Y) would
still have some of that Bolshevik blood in him.

AF2Y ... How DARE you subvert our nation and our beloved Constitution?
Perhaps it it YOU who should be reported
to the FBI.

"Havin' a blast kickin' commie ass"

You raise a good point. You've convinced me. But the original
post was comparing a person (kaufman) that was lost 'in character'
to KK7HO, who is clearly obsessed with attacking other amateur
radio operators both here and on the air. I'd be interested in
your take on that situation.

This was on the original message:

> Or is that more spin from Hollywood?

Huh? What's 'dialup hosts' got to do with with Kaufman's suicide?
Are you just trying to change the subject here? I guess that's
just the new way, in post Clinton America...

> Kaufman appeared on Saturday Night Live for a final appearance after his
> cancer diagnosis became public. I say that's pretty tough for a suicide case
> to pull off- even with the help of your unnamed "Hollywood Types". Especially,
> "Live From New York"

hmm, could it be that once that an already unstable Kaufman was handed
a death sentence, in the form of a terminal diagnosis, he decided to
'end it all'? Could this ever happen? I suppose not....

One thing that is not clear, is who is more unstable, KK7HO, or Kaufman
before his suspicious death. KK7HO works these newsgroups like a job,
attacking day and night any politically incorrect utterance or post.

He has discussed a contract killing of another amateur radio operator.
KK7HO actively disrupts shortwave communication between like minded
'politically incorrect' amateurs, and types fantastic lies about them
here in the newsgroups.

This is the topic of the original post, so please, let's not try
to divert the topic to other issues.

Further info on KK7HO is at:

Actually, I think the original post was an anti-ARRL rant, about which I
have zero interest. Much of the rest of the thread is did too/did not
name calling nonsense which interests me even less.

I merely observed the posting of a factual error and attempted to set
it right.

Tim,

I gotta hand it to ya, This is the best suggestion you've made since
you've been vomiting all over the newsgroups. Thank you for the
suggestion.

I don't know why I never thought of this. I can hardly wait
until Monday morning, so that I can contact the FBI and provide
them the online evidence of the crimes that are committed via
shortwave radio. Let me refresh your memory!

Your discussion of a planned contract Killing:
http://members.xoom.com/frg9600/500.wav

We all know that it's illegal to conspire to commit or
cause a murder to be committed. Since your discussion was
via the federally regulated airwaves, this will bring this
matter into the federal juristiction. (why didn't I ever think
of this before?)

Milicious interference and jamming public airwaves:
http://members.xoom.com/_XOOM/kevin_strom/volz.wav

KK7HO wrote:

Thanks again for your wonderful suggestion Tim. If any other hams care
to contact the office in parallel, I'm sure it'd have more impact if there were
a groundswell Monday morning, reporting the shortwave criminals to the
field office of the FBI!

Honor Bright.

You don't have 75 cents? That's about what the parts cost would be
to convert any CW transmitter to BPSK, which is what NASA used
for deep space missions like Pioneer and Voyager. In the very early
1970s when probes like Pioneer and Voyager were launched, coding
the information was a bit hard since the microprocessor didn't yet exist.
So they had to do it with SSI on brass boards using rad hard space
qualified parts. That was expensive. But we have PCs, so we're in
business with just 75 cents worth of parts and some free software
(download from Karn's webpage).

>Tell you what -- let's have a contest: You homebrew gear for your favorite
>NASA mode, and I'll homebrew a CW station, and let's see who:
>1. Finishes first

I'm done. Actually, I cheated just a bit. I just dropped
back from QPSK to BPSK on my little homebrew rig.
I'll flip it back now, so I'm back up to what NASA uses
today instead of 25 years ago.

>2. Has completed the most QSOs after one month.

I don't chase postal cards. Lets see who can exchange the
most text in a month instead. No cookie cutter stuff now,
real information. Error free of course. I have a leg up there
too, running 10 bps (12 WPM) 24 hours a day, 7 days a
week as I have been with the two other identical stations
I've been working with, I already have an enormous amount
of text passed.

Anybody can do this. Few do, but it only takes one other
station. NASA never tried to win a contest for the most
contacts (getting the postal cards from beyond Saturn
would have been tough). There's just the probe, and the
DSN. But the information passed has been enormous
both in quantity and in scientific significance.

For me it has just been fun, and a way to study the ways
HF propagation affects the BER with various codings.
Can't do that at UHF with its constant benign gaussian
noise and vast bandwidth. That's where fast, not weak,
is most interesting. Pushing a weak signal through the
harsh HF enviroment is where superior modulations
and codings are really tested to the limit.

>Now you've done it:

There are literally millions of hams in the world. If I can only
exchange views with a tiny fraction of them, that's a lifetime
of activity (for anyone). I have no need to share modes with
each and every amateur, no matter what godforsaken rock
they might be running a Dxpedition from at the moment.
There is no shortage of opportunities to make contacts
using modes other than CW.

Wildcat <wildcat@tp.net> wrote:
>Hey Jeff, I dont see you posting information on the Ham newsgroups every
>time a licensed Amateur gets busted.............what gives.

That would be redundant; there are others already posting such information
(and I'm glad such postings appear).

>More Hams than CBers have gotten busted since Riley got hired.

I believe the FCC is targeting hams over CBers for a variety of reasons:

*The trouble-makers are an embarrassment to the US and jeopardize US
spectrum allocation within the ITU;

*Amateurs are entrusted to be self-policing -- when that trust is
violated, it hurts all hams and casts a shadow over our 100-year history;

*Amateurs have been tested on regulations and are supposed to meet
(minimal) international standards, thus we're held to a higher standard
of operation than CBers; the trouble-makers are fully aware that they're
in violation of the law, yet flaunt that fact -- the interference they
cause is intentional which makes them an inviting target for the FCC;

*In many cases the trouble-makers have been fingered by law-abiding
amateurs, so the FCC already knows their identities and locations.

>Why aren't you posting than little tidbit of information?

Again, anytime a ham gets busted, there are more than enough notices
posted on here (usually in the form of an illegally reproduced ARRL
bulletin). But it looks like Newsline is back, so that will be an
additional source of FCC activity against trouble-makers on the ham
bands.

>It seems that the only time you post to the CB newsgroup is when a fine is
>levied against a CBer (which is rare) or when you feel CBers should be
>reading the Part 95 Rule and Regulations, which you place a FAQ in front of
>the posting.

That's part of my monthly FAQ posting sequence. Glad to see you're reading
that stuff. Emails regarding the posting of the CB rules have been
favorable.

>Were you hired by the U. S. government as the official FCC
>media spokes person?

Nope. Just one of the rec.radio Usenet FAQ volunteers, trying to make these NGs a valuable source of information. Want to join us?

>Please enlighten us.

I hope you're enlightened now.

But you're correct -- I don't hang out on rec.radio.cb, for most of what I hear on the CB band is embarrassing. Many of the operators talk in such a strange manner, screaming into their mics saying all sorts of weird things. I do have a CB on my sailboat (along with a VHF marine band radio) -- we have a large fishing fleet here in the islands (operating on Channels 22 and 23). There's always a fishing boat within hailing distance in case assistance is needed (and fishermen don't scream and say weird things on the air -- their conversations are of a normal manner).
(At the same time, if a fishing boat goes aground on a reef, you can be sure pleasure boaters who are able to assist will respond; these waters can be dangerous so everyone helps everyone else.)

WRONGO !

There's PLENTY of activity on 2 and 440 FM and satellites !

6- usually dead
220- low activity
900- we oughtta SELL this to the FCC ! What a waste !
1.2- dead

Thanks Getback. We will be ready to do the amp deal, as well as work with you on the stolen I mean recently acquired gear from Jail-Dale. Now about that lot lizard discount. He'll have to pay cash for the Riley Special and a full set of bumper stickers to get the discount.

Don't tell Radiosigs but Oris may stop by for a visit. If he does, I will steal his Clipperton L. I'll treat you right on it, too.

Tell all your friends, Get-Back. Bring Snake-Man if he's not busy Saturday. I bet I can steal from him I mean sell him some filters too. See you there.

Yes indeed. This is enough to get the Liberty Netnuts and all their dormant brained Lloyd Davies type turds jealous and aggravated beyond belief. An example of Jewish initiative. Eat your hearts out, white bigoted trash.
AF2Y,Doc

Arthur Ochs Sulzberger, Owner of New York Times
Hoover's New York Times Company Profile on March 26, 1998
COMPANY NAME
The New York Times Company
OVERVIEW
"All the News That's Fit to Print, Broadcast, and Post Online" would be a more accurate motto for this New York City-based media titan. The New York Times Company publishes "The New York Times" (#3 in circulation after "USA TODAY" and "The Wall Street Journal"), "The Boston Globe," and 21 other newspapers in six states. It also has a one-half interest in the "International Herald Tribune" (with rival Washington Post Company). The firm owns three magazines (including "Golf Digest"), eight television stations, and two radio stations, and publishes online.
The company gets some of its newsprint from mills it partially owns. At the other end of the production spectrum, the New York Times News Service licenses its articles, graphics, and photographs to about 650 newspapers and magazines in the US and 50 countries worldwide, and to online computer database firms (such as Dow Jones Business Information Services) and archiving companies (such as UMI) to create and sell microform and CD-ROM copies.
"The New York Times" has completed a 10-year capital investment program that has the venerable paper hitting the streets with later-breaking news and more sections, but the biggest change is the addition of color to its daily editions. While the company has been able to raise advertising rates and circulation prices to cover a surge in newsprint costs, its readership has continued to decline. So it continues to seek other avenues to widen its audience, such as its Web site, where it now has more than one million registered users.
The Sulzberger family controls the company.
HISTORY
In 1851 George Jones and Henry Raymond, two former "New York Tribune" staffers, started "The New York Times." The paper began a long tradition of political coverage during the Civil War and of investigative reporting with the Tammany Hall scandals, but by the late 1800s it had lost popularity to the yellow journalism of the Hearst and Pulitzer papers.
In 1896 Adolph Ochs, a newspaperman from Chattanooga, Tennessee, bought "The Times." Continuing hard news and business coverage and eschewing diversification,
Ochs added the newspaper's now-famous slogan, "All the News That's Fit to Print." Ochs's son-in-law Arthur Hays Sulzberger, who ran the paper

from 1935 to 1961, diversified the company with the purchase of two New York City radio stations (1944). Sulzberger's son-in-law Orvil Dryfoos was publisher until his death in 1963, leaving Ochs's grandson Arthur Ochs "Punch" Sulzberger in charge.

In the 1960s declining ad revenues and a newspaper strike sent the company into the red. To regain strength, Punch built the largest news-gathering staff of any newspaper. "The Times"' coverage of the Vietnam War helped change public sentiment, and the newspaper won a Pulitzer Prize in 1972 for publishing the Pentagon Papers.

In the meantime Punch had taken the company public (1967), though the family retained solid control through ownership of most of the Class B stock. In the 1970s the Times Co. bought magazines, publishing houses, television stations, smaller newspapers, and cable TV systems, and began co-publishing the "International Herald Tribune." To contain costs, the company invested in three pulp and paper firms.

In the 1980s "The Times" added feature sections to compete with suburban papers. The company bought "Golf World" in 1988, and in 1989 it bought women's magazine "McCall's" and sold its cable systems. The next year the company started TimesFax, a summary of "The Times" sent to subscribers' fax machines.

Arthur Ochs Sulzberger Jr. succeeded his father as "Times" publisher in 1992. The next year the Times Co. bought Affiliated Publications, owner of "The Boston Globe," for $1.1 billion; in 1994 it sold the one-third interest in BPI Communications (specialty magazines) that had come with the Affiliated purchase.

That year the company also sold its women's magazines and three UK golf publications. In 1995 it acquired a majority stake in Video News International, a news-gathering business, launched two cable news channels in Arkansas, and invested in OVATION, a performance arts cable TV network that premiered the following year. The company continued to sell off holdings, including seven smaller papers.

In 1996 the firm bought two TV stations in Des Moines, Iowa, and Oklahoma City from Palmer Communications for $226 million, and "The Times" launched a Web site. Company president Lance Primis resigned that year as it became clear he would fail in his effort to become the first person from outside the Ochs or Sulzberger families to run the company. In 1997 the Times Co. agreed to sell six of its tennis, sailing, and skiing magazines to Miller Publishing Group. Later that year, after 146 years in Manhattan, the company transferred its printing operations to its new, color-producing plant in College Point, Queens. Also that year, Chairman and CEO Punch Sulzberger retired, choosing his son as chairman and nonfamily member Russell Lewis as CEO.

OFFICERS

Chairman Emeritus: Arthur Ochs "Punch" Sulzberger, age 71, $1,397,200 pay (prior to title change)

Dear Newswatch Magazine Listeners/Readers:

In the March 1 and April 15, 1999 Newswatch, we took an overview of the plan for world government thus far. We gave the history of the founding of the Illuminati on May 1, 1776, and their avowed purpose for a Novus Ordo Seclorum - New World Order.

Albert Pike of Little Rock, Arkansas, had reached the head of all the lodges of the Ancient and Accepted Scottish Rite of Freemasonry when he worked with Mazzinni of Italy to layout the final program to achieve world government toward the end of the 20th Century or shortly thereafter.

Pike stated there had to be many revolutionary wars and three world wars. The third world war would destroy atheism, which they would establish as a seen enemy of the western world of Christianity [Russia], and Christianity at the same time. The horror would be so extensive that the world would finally lay down their will to remain as sovereign nations and would accept their world government.

Once Russia had been overthrown during Pike's predicted first world war, V. I. Lenin added to the program to achieve world government by the close of the 20th Century. FIRST, they would take Eastern Europe. That was achieved out of the ashes of the second world war. After each world war, an international organization was attempted to be set up for world government. After World War 1, the League of Nations was attempted unsuccessfully. After World War 11, the United Nations was successfully established by Communists who had infiltrated into the Departments of State and Treasury.

Albert Pike's two of three world wars had now been achieved by 1945. As Lenin said: Eastern Europe was taken as the first step of three in establishing world government. SECONDLY, Lenin said they would take the masse of Asia. High infiltrators in government set up the strategy to supply

Mao Tse-tung's Communist insurgents with Lend-Lease military equipment through Russia to Mao. The State Department then cut off all military aid to U.S. ally Chiang Kai-shek of free Nationalist China. With no part replacements, ammunition and new equipment, Chiang retreated to Formosa. The SECOND step of Lenin's plan was underway. During the 60s and 70s, Vietnam, Laos, and Cambodia along with other smaller nation-states fell to Communism.

The THIRD step was to surround the United States and cause it to fall: 1) From infiltration from within; and 2) Disarm the U.S. and Communism's military might from without.

Cuba fell to Fidel Castro with aid from the U.S. State Department and the mass media - newspapers and TV. The following years have seen Central and South American nations embroiled in government overthrow or guerilla warfare with

Communists. Someone has forgotten to tell them and their African counterparts that Communism is supposed to be dead, and the cold war is supposed to be over. Was there a PLAN by which the United States would fall into a deep sleep militarily, so Communism could eventually SMASH us with a clinched fist?

Did V. I. Lenin say that "treaties are like pie crust, to be broken?" Is that one of numerous reasons WHY you cannot TRUST Communism to be dead, dying, decaying, and now acceptable to be friends with the modern world? What if THEY have infiltrated as Fabian Socialists to gradually legislate Socialism/Communism upon the American people? Would any President do so? We showed clearly the Republican President's Reagan and Bush records to determine an answer! Would a Democratic President prepare America for its fall and collapse into a one-world-government with United Nations military occupying our nation? Read on and judge the facts as to where truth lies!

Sincerely,

David J. Smith

P.S. We now have our new building!

The man is going crazy listening and believing the radical phony evengelists on shortwave. Lloyd the Toid is too stupid to see through them and buys into their nonsense because he, like they, are anti-Semitic. "Father, forgive Lloyd the Toid. He knows not what he writes." AF2Y,Doc

Dear Newswatch Magazine Listeners/Readers:
In the March 1 and April 15, 1999 Newswatch, we took an overview of the plan for world government thus far. We gave the history of the founding of the Illuminati on May 1, 1776, and their avowed purpose for a Novus Ordo Seclorum - New World Order.

Albert Pike of Little Rock, Arkansas, had reached the head of all the lodges of the Ancient and Accepted Scottish Rite of Freemasonry when he worked with Mazzinni of Italy to layout the final program to achieve world government toward the end of the 20th Century or shortly thereafter.

Pike stated there had to be many revolutionary wars and three world wars. The third world war would destroy atheism, which they would establish as a seen enemy of the western world of Christianity [Russia], and Christianity at the same time. The horror would be so extensive that the world would finally lay down their will to remain as sovereign nations and would accept their world government.

Once Russia had been overthrown during Pike's predicted first world war, V. I. Lenin added to the program to achieve world government by the close of the 20th Century. FIRST, they would take Eastern Europe. That was achieved out of the ashes of the second world war. After each world war, an international organization was attempted to be set up for world government. After World War 1, the League of Nations was attempted unsuccessfully. After World War 11, the United Nations was successfully established by Communists who had infiltrated into the Departments of State and Treasury.

Albert Pike's two of three world wars had now been achieved by 1945. As Lenin said: Eastern Europe was taken as the first step of three in establishing world government. SECONDLY, Lenin said they would take the masse of Asia. High infiltrators in government set up the strategy to supply

Mao Tse-tung's Communist insurgents with Lend-Lease military equipment through Russia to Mao. The State Department then cut off all military aid to U.S. ally Chiang Kai-shek of free Nationalist China. With no part replacements, ammunition and new equipment, Chiang retreated to Formosa. The SECOND step of Lenin's plan was underway. During the 60s and 70s, Vietnam, Laos, and Cambodia along with other smaller nation-states fell to Communism.

The THIRD step was to surround the United States and cause it to fall: 1) From infiltration from within; and 2) Disarm the U.S. and Communism's military might

from without.

Cuba fell to Fidel Castro with aid from the U.S. State Department and the mass media - newspapers and TV. The following years have seen Central and South American nations embroiled in government overthrow or guerilla warfare with Communists. Someone has forgotten to tell them and their African counterparts that Communism is supposed to be dead, and the cold war is supposed to be over. Was there a PLAN by which the United States would fall into a deep sleep militarily, so Communism could eventually SMASH us with a clinched fist?

Did V. I. Lenin say that "treaties are like pie crust, to be broken?" Is that one of numerous reasons WHY you cannot TRUST Communism to be dead, dying, decaying, and now acceptable to be friends with the modern world? What if THEY have infiltrated as Fabian Socialists to gradually legislate Socialism/Communism upon the American people? Would any President do so? We showed clearly the Republican President's Reagan and Bush records to determine an answer! Would a Democratic President prepare America for its fall and collapse into a one-world-government with United Nations military occupying our nation? Read on and judge the facts as to where truth lies!

Sincerely,

David J. Smith

>AF2Y***

Ooooohh! He's a FEDERAL OFFICIAL!
Ooooooohh! He must be BETTER THAN
US! All bow down and worship our holy
federal government!

The federal government belongs to US,
we own it. Therefore all federal "officials"
answer to US. Or at least that's the way
it is supposed to work. Please don't make the situation any worse than it
already is by deifying these egotistical clowns in the
federal government.

3676. AF2Y Has Known KK7HO for 30 years?

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-07 00:00:00 UTC

Recently, Timmy emailed me and stated, with reference to AF2Y:

"show me where he claimed that he's known me 30 years."

I am happy to oblige. See the attached message, from this newsgroup
last Monday, wherein AF2Y makes that claim.

But, Timmy, it really shouldn't have been necessary for you to ask
for proof of what AF2Y said in order to answer my simple question:

Has AF2Y known you for thirty years, since you were a small child?

With good wishes to all,

Kevin, WB4AIO.

<< Subject: Re: "Liberty Net" on 7/31/99
From: James McKitric JamesMck@ourdomain.net
Date: Sun, 01 August 1999 10:38 PM EDT
Message-id: <37A504A4.C81AA3E1@ourdomain.net>

Once again, we have Tim Volz aka KK7HO, playing the
victim, when it is Volz that is the criminal. For
those that may have tuned in late, a brief treatment
of Volz's past will be illustrative.

Volz disagrees with the patriotic views***WHAT PATRIOTIC VIEWS? SINCE WHEN DID
RACISM BECOME PATRIOTISM?**** sometimes
expressed on the amateur radio frequency 3.950 mHz.

This frequency is a well known gathering spot for
patriotic minded Americans. ***HUH? IT'S A WATERING HOLE FOR THE UGLIEST
ELEMENTS IN AMERICAN SOCIETY*** It is host to a weekly
shortwave amateur radio net known as the Liberty Net.***WHICH IS DEDICATED TO
UNDOING LIBERTY IN THE U.S.A.***
It is one of 1000's of weekly amateur radio nets that
are a long standing tradition.**TRADITION OF WHAT?****

Because Volz is a socialist,***HEY NAZI SCHWEINHUND, HAVE YOU PROOF OF VOLZ'S
SOCIALISM?***and liberal, he doesn't
like the content of what is said at times on 3.950.
He attempts to block the regular and legal
transmissions that occur there. He uses a variety

of methods to harass the other amateur radio operators
on 3.950 as they try to communicate with one another.***YOU ARE OUT TO
OVERTHROW THIS GOVERNMENT. YOU ARE SUBVERSIVES AND YOU WILL BE STOPPED DEAD IN
YOUR TRACKS***

His favorite method is to encourage and mislead other
amateur radio operators into thinking that it is their
civic duty to jam and harass the conversations that are
taking place on 3.950. ***IT IS MY CIVIC DUTY TO SOUND THE CLARION AGAINST YOU
ROTTEN BASTARDS WHO HAVE NO USE FOR THIS WONDERFUL COUNTRY>*** He continues to
tell outrageous
lies, stating that there are "Nazis" and "Faggots" on
the this frequency.***YOU ARE AS NAZI AS HITLER HIMSELF WAS*** Volz is able to
convince some of
the more gullable amateurs into his twisted world view
of what happens on 3.950. Volz also beleives there is
a grand conspiracy operating on 3.950, and this is part
of the reason that he is loosing touch with reality.***THE SPELLING OF THE WORD
IS "LOSING," NOT LOOSING, YOU MORON>****

Week by week, and month by month Volz continues to move
further from reality. Recently, when confronted by
Liberty Net members about a "pornographic" mass email
message that was sent out from his home computer, he
actually accused his minor daughter of the deed. A
new low even for KK7HO.***YOU HAVE A VIVID IMAGINATION***

Finally, Volz litters the newsgroups with his delusion of
how he is the victim of the Liberty Net members. He uses
a variety of 'screen names' to do this, so that he can
shore up his outregeous lies, and futher play the victim.

Volz has gone as far as to threaten the lives of other
amateur radio operators.***YOU'RE A LIAR. I KNOW TIM FOR 30 YEARS AND HE
WOULDN'T HURT A FLY*** One of his threats can be heard
on the web page: http://members.xoom.com/frg9600/500.wav

So the next time you see a "newsgroup rant" from Volz or one
of his imaginary personalities here on the newsgroups, don't
encourage him. As unstable as Volz has become, and in light
of his death threats, It's bese ***BESE IS THE IMPERATIVE MOOD OF "KISS" IN
SPANISH***to just ignore him and his
lies.

Further info on KK7HO is at:
http://www.angelfire.com/ky/libertynet/KK7HO.html

HEY-HEY
AND-GOOD-BYE >>

HERE IS AF2Y's REPLY.....
FCC Lays Out Arguments for Dismissal of KV4FZ Appeal

WASHINGTON, DC, Aug 5, 1999--When the fight by Herbert L. Schoenbohm, KV4FZ, to retain his Amateur Radio license reaches federal court this fall, the FCC will argue for an outright dismissal. In its brief in the case--now scheduled for oral arguments before the US Court of Appeals for the District of Columbia Circuit on October 18--the FCC maintains that Schoenbohm is asking the court to review an order that's not subject to review.
Following Schoenbohm's 1992 conviction for fraudulently procuring long distance telephone service by using illicitly obtained access codes, the FCC in 1994 designated his Amateur Radio license renewal application for hearing. An Administrative Law Judge denied his renewal application saying that Schoenbohm's felony conviction "reflects adversely on his propensity to obey the law."
The FCC also says that Schoenbohm, now 59, solicited others, using Amateur Radio, to make ex parte presentations on his behalf, in violation of FCC rules and that he subsequently "engaged in misrepresentation and lacked candor" in testifying about his felony fraud conviction and his solicitation of ex parte presentations. The FCC said his behavior, in combination with his fraud conviction, justifies denying his amateur renewal application.
Schoenbohm appealed every step of the administrative process. Last summer, the FCC upheld the supplemental initial decision of an administrative law judge denying Schoenbohm's renewal application. The FCC affirmed that finding last October 6. Schoenbohm has moved the matter into the courts by appealing the FCC order denying his reconsideration petition.
The FCC argues, however, that Schoenbohm--of Kingshill, Virgin Islands--is asking the court "to review an order that is unreviewable." The FCC says the courts have held "that an appeal from an agency order denying reconsideration is not reviewable unless the appeal rests on new evidence or changed circumstances."
In its brief, the FCC contends that Schoenbohm's appeal is not based on either, so "his claims are unreviewable."
Following his conviction, Schoenbohm served two months house arrest plus two

years of probation and paid a $5000 fine. He maintains that the FCC should renew his license because his conviction was several years ago, his sentence light, and he's had a spotless record and been fully rehabilitated. The FCC disagrees. "Schoenbohm's record since his conviction has not been 'spotless,' but includes testimony before the Commission that was false and lacking in candor," the FCC argues in its appeal brief.

The FCC also turns away arguments by Schoenbohm that the FCC should have reopened the proceeding to look into Schoenbohm's claims that the Administrative Law Judge in the case may have received improper ex parte presentations by parties opposing Schoenbohm's license renewal. Those claims, the Commission argues, not only were untimely but "based entirely on hearsay, rumor, and innuendo."

A brief filed May 10 on Schoenbohm's behalf by his attorney Lauren A. Colby contends that the Commission's actions to deny Schoenbohm's license renewal were "arbitrary and capricious and inconsistent with well-established precedents." Among other things, Colby argues in his pleading that Schoenbohm's criminal conviction does not merit denial of his license renewal and that the FCC has "previously renewed the licenses of convicted murders and marijuana distributors," that Schoenbohm did not violate FCC ex parte rules, and that he did not lie to the Commission. Colby asks the court to remand the case to the FCC with instructions to grant the renewal.

Schoenbohm's Amateur Radio license expired in 1995, and his call sign no longer appears in the FCC database. However, he has been allowed to continue operating as KV4FZ until his administrative and judicial appeals are exhausted.

OK the deal is set, I will tell my friend that he will have to spend some money with you to be entertained by the Blonde "LOT LIZARD" I think it should be a "freebee" but you need the money to get a ring job on Ole Smokie ie the 75 Big "M", I hear it will smoke you out. So I don't blame you for trying to get a few sheckels together, any way, and I mean anyway you can. So put a sold sign on the "Riley Special Amp" and we will be there to do business with you and you and the strumpet in the sleeper.

Save us some of those "AF2Y sux cheap" bumper stickers and the complete assortment of others. Also the stolen er preused serial number removed rigs of "Jail Dales " KE4TEW rigs will be very interesting.

See you tomorrow, I don't know if I can bring Snake Man as he has a POLO match tomorrow and will be busy at the club with his string of horses. and instructing his employees that clean up after them.

See Ya

>EVERY article from ARRL MO I reposted here has been a bulletin from W1AW
>and in the Letter later in the week.

With no credit given given to the copyright holder, a violation of the
law.

>Things from QST are obviously not like this and I don't repost them.

No matter what medium is used to disseminate the information, the material
is protected under copyright laws.

>EVERY article to date I've reposted has been VERBATIM in bulletins from
>W1AW and in the Letter later in the week.

With no credit give to the copyright holder.

>If it doesn't come out verbatim until later in the week, who gives ? It
>still came out verbatim.

So your defense is the time element involved between the two mediums?
Weak.

>BTW, all you people did was embargo the bulletins you used to release on
>W1AW to ALL amateurs, thus proving ARRL is now a business, favoring its
>members over the community. It's a neat trick, but manmy hams aren't
>senile yet and recognized froom day one. And if you don't serve ALL hams,
>those W1AW bulletins are as out of line as K1MAN and W1WCR comandeering a
>frequency.

The material is of interest to all hams, and all hams are able to access
the information; a time priority is given to members. Probably no one but
you could find fault in that.

And of course the League is a business (here we go again): On January 29,
1915, the Connecticut Secretary of State recorded that incorporation of

the League under the following three articles:

"Article 1. The name of said corporation shall be The American Radio Relay League Incorporated.
"Article 2. The purposes for which said corporation is formed are the following to wit: The promotion of amateur radio, the organization of amateur radio stations, the promotion and regulation of amateur radio inter-communication, and the relaying of messages from station to station, and the printing and publishing of documents, books and pamphlets necessary to any of the above purposes.
"Article 3. The said corporation is located in the town of Hartford and the State of Connecticut."

Lucky for us that second article includes printing and publishing:
We participate in a self-taught technical hobby/service; not a day should go by without us gaining new knowledge WRT to electronics. The only publications I have always been able to turn to when questions arose which needed immediate answers were the League's pubs.

For some 85 years the ARRL has produced a handbook written so that even a novice can learn and understand from it. The government thought so highly of the Handbook that it was used to train military communicators during WWII. For the longest period, the Handbook was the greatest selling technical book ever published, in and out of ham radio.

During the 50s when SSB was finding its way into ham radio, there was no pub one could turn to to learn about this new mode except the League's SSB Manual. Also during that decade the FCC relaxed the regs regarding mobile operation - no one else published a mobile manual except the League.

To whom could you turn to for the great ideas and techniques that appear in the Hints and Kinks booklets? Propagation and antennas: The Antenna Manual. Who else in the 60s produced a VHF Manual? And when that VHF crowd began exploring FM: The FM and Repeater Manual. The very first book in the 80s devoted to amateur digital comms was the League's Get Connected.

Publishing affordable technical books was one of the original goals in the League's charter; for 85 years they've made information available to the layman that was nearly impossible to find elsewhere. How in the world could you possibly find fault with this business side of the League?

Every ham shack I've ever visited in the last 30 years has had many League pubs on its bookshelves. We are (or at least were) a group with a voracious appetite for reading and learning. Luckily, the League has been able to feed us what we most desired.

Ham radio and reading are inseparable; and it takes a business to do what the League has accomplished.

73, Jeff KH6O

Done deal Getback. The Liz is ready to take care of things for your friend to get him all loosened up to - as Radiosigs would say - "pay re-tail". Tail - get it ??

Sold sign is already on Riley Special, serial no - oops - never mind the serial no. Sorry Snake-Man is off to the races tomorrow. He's quite the socialite lately. Too bad I have a Siltronics 1011 with "slider" he might like to have. It comes to us from - shall we say - an estate sale. Yeah - that's the ticket - estate sale. (Wink - snicker - smirk) It's just what you need to drive the Riley Special to full output. The combo is nice and wide too. You will be heard from 26.750 to 32.950 mHz. Oh yes, filters. Not to worry.

Be first in line and we'll steal your rig I mean tune your mobile antenna. See you there.

Really, Timmy, I fail to see why you are so agitated.

All I did was note AF2Y's statement that he had known you for thirty years, and ask you to simply confirm or deny it. A "yes" or "no" would have sufficed.

I can only assume, after all your blustering and huffing and puffing, that the answer must be "no" and that AF2Y lied. If the answer was yes, you would simply have said so.

Honor bright,

Kevin, WB4AIO.

Good lord, you're logic is not only well-documented, but actually embraced by true (read non-elitist) liberals.

The references to you as a fascist by certain neo-Marxist members of this group is clearly an exaggeration.

Kudos to you sir. Let them reason with cool-headed logic and fact why you have been subjected to such claims by the blind and ignorant followers of the Democratic-Republican party. A party founded by Jefferson, who embraced the legitimacy of repeated revolutionary cycles.

Of course, as revolution means only to go back from where one came, the modern use of the word is corrupted by those entrenched in their elected offices, who define it as an evil, rarely employed.

Please spend time on http://thomas.loc.gov, reviewing the whitewashed historical archive presented there.

Only ten references to "liberty" may be found in those writings of Jefferson; why, I'll bet the propagandists think he never owned slaves.

To both parties I inquire, are "media elites" married to other "races" ?
No. Ted Turner married a caucasian. This marks the end of their
credibility to expound.

Extra: FCC Lays Out Arguments for D</A>
FCC Lays Out Arguments for Dismissal of KV4FZ Appeal

WASHINGTON, DC, Aug 5, 1999--When the fight by Herbert L. Schoenbohm, KV4FZ, to
retain his Amateur Radio license reaches federal court this fall, the FCC will
argue for an outright dismissal. In its brief in the case--now scheduled for
oral arguments before the US Court of Appeals for the District of Columbia
Circuit on October 18--the FCC maintains that Schoenbohm is asking the court to
review an order that's not subject to review.

Following Schoenbohm's 1992 conviction for fraudulently procuring long distance telephone service by using illicitly obtained access codes, the FCC in 1994 designated his Amateur Radio license renewal application for hearing. An Administrative Law Judge denied his renewal application saying that Schoenbohm's felony conviction "reflects adversely on his propensity to obey the law."

The FCC also says that Schoenbohm, now 59, solicited others, using Amateur Radio, to make ex parte presentations on his behalf, in violation of FCC rules and that he subsequently "engaged in misrepresentation and lacked candor" in testifying about his felony fraud conviction and his solicitation of ex parte presentations. The FCC said his behavior, in combination with his fraud conviction, justifies denying his amateur renewal application.

Schoenbohm appealed every step of the administrative process. Last summer, the FCC upheld the supplemental initial decision of an administrative law judge denying Schoenbohm's renewal application. The FCC affirmed that finding last October 6. Schoenbohm has moved the matter into the courts by appealing the FCC order denying his reconsideration petition.

The FCC argues, however, that Schoenbohm--of Kingshill, Virgin Islands--is asking the court "to review an order that is unreviewable." The FCC says the courts have held "that an appeal from an agency order denying reconsideration is not reviewable unless the appeal rests on new evidence or changed circumstances."

In its brief, the FCC contends that Schoenbohm's appeal is not based on either, so "his claims are unreviewable."

Following his conviction, Schoenbohm served two months house arrest plus two years of probation and paid a $5000 fine. He maintains that the FCC should renew his license because his conviction was several years ago, his sentence light, and he's had a spotless record and been fully rehabilitated. The FCC disagrees. "Schoenbohm's record since his conviction has not been 'spotless,' but includes testimony before the Commission that was false and lacking in candor," the FCC argues in its appeal brief.

The FCC also turns away arguments by Schoenbohm that the FCC should have reopened the proceeding to look into Schoenbohm's claims that the Administrative Law Judge in the case may have received improper ex parte presentations by parties opposing Schoenbohm's license renewal. Those claims, the Commission argues, not only were untimely but "based entirely on hearsay, rumor, and innuendo."

A brief filed May 10 on Schoenbohm's behalf by his attorney Lauren A. Colby contends that the Commission's actions to deny Schoenbohm's license renewal were "arbitrary and capricious and inconsistent with well-established precedents." Among other things, Colby argues in his pleading that Schoenbohm's criminal conviction does not merit denial of his license renewal and that the FCC has "previously renewed the licenses of convicted murders and marijuana distributors," that Schoenbohm did not violate FCC ex parte rules, and that he did not lie to the Commission. Colby asks the court to remand the case to the FCC with instructions to grant the renewal.

Schoenbohm's Amateur Radio license expired in 1995, and his call sign no longer appears in the FCC database. However, he has been allowed to continue operating as KV4FZ until his administrative and judicial appeals are exhausted.

I am up bright and early this morning to head out to the truck stop so
look for me. I got in touch with Snake man, he said he will be busy at
the "PLUSH HILLS" Polo club. He is playin in a match there today with
the Emir of some Islamic country. You know how Snake is, the real
western play boy! He will be with his millionaire friends, but he said
to say hello to his favorite miscreant. My other friend is hot to trot
on that lot lizard meeting with the blonde numbskull. He said he is
"going to make that sleeper rock" what ever that means. Got to run,
long long way to the truckstop and I don't want anyone to talk you out
of that Porkkbutt built "Riley Special" with the 12 Jars in it for max
power on his beloved citizens band. Save some of the sets of "Riley
Sux" Bumper stickers. Hope "OLE SMOKEY", your 75 mercury made it to the
truck stop. You really need that ring job. May the "Blond" can swap a
b*** job for a "ring job". See ya

Don't team up with "Turd Head" Swartzbard. He is as shady as Porkbutt.
Anyway he has no lyric talent, "Big Al" wrote and created the
"PORKBUTT SONG" words and music. "Turd Head" is a copy cat. Never had a
original thought in his life. Never created anything but a long brown
one.

Notice what this wacho keeps saying, "Its all Herbies
fault" and he must be crucified to purify amateur
radio for the Philistines.

***For a supposedly intelligent man, you write like a child. The word is "wacko," not "wacho" but perhaps you were thinking of your idol David Koresh of Waco? No one wants you crucified to purify anything-I just want you out of ham radio to help it remain viable. If your lawyer Lauren Bacall goes before the court on Oct.18th, will he plead your case by saying,"The FCC wants to crucify my client to allow the Philistines to run amateur radio?" If so, the "sarge at arms" will grab him by the back of the neck and toss him out on the street and that's exactly what the FCC should have done to you 25 years ago. I say you're no more than a cornball egomaniacal thief. A blowhard of the first magnitude. You suffer from illusions of grandeur especially with this "shtick" about equating yourself with Christ. You a Christlike figure according to your bible? I don't remember your raising KA4MUJ from the dead? Your problem Herbie is simply this: you are an expatriate from the States who went to the V.I. to make a BIG name for yourself; to run away from the mess you and your sons created in the midwest and all of you FAILED miserably. You envisioned yourself as a top flight Republican who would amass a Rush Limbaugh type fortune by also spewing your venom from the VI down to Aruba. You thought you'd eventually see yourself sitting in the halls of Congress. And what happened? Three of four sons land in jail and you yourself become a convicted felon and your claim to fame down there is to have had a section of the pentitentiary named The Schoenbohm Wing. It amazes me that ANYONE on amateur radio ever bought into your craziness which is indeed a testament to human ignorance. Had EVERYONE way back when seen through you as I, Rich and several others did, you would have become a footnote to ham radio a hell of a lot faster than its taking. However I do have much patience and firmly believe that it's now much sooner than later before you become ham radio history. You lied yourself into RF extinction, "Jesus Schoenbohm." Goodbye Herbie!

3707. CW QSO's Using PSK32SBW

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-07 00:00:00 UTC
From: "Andrew J. O'Brien" <obrienaj@netsync.net>
Message-ID: <7oh95q$5qh$1@mica.netsync.net>
Source record: 134610
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.misc

Yeah, maybe it was because I had nothing to do last night, but I have found a nice way to work CW using PSK31SBW and another program called CWGET

My CW key has a missing spring but I wanted to get on CW last night. I looked around for WINDOWS based SoundBlaster receive AND transmit software but could not find any. CWGET, a product by UA9OSV , works well as a received only program, but it's companion CWTYPE does not xmit via the soundcard (at least as far as I could figure out) So, I thought what about PSK31SBW?

I was able to have several CW QSO's last night transmitting CW with PSK31SBW (go to MODE and set to SEND CW) and receiving with CWGET. Both worked simultaneously and along side each other in resized windows. Of course, I was in either LSB or USB mode on my rig because PSK31SBW will not transmit if your rig is in CW mode.

PSK31SBW does not have a way to change the transmitted speed of the CW but I was able to work some folks in the novice bands by simply typing the characters at a slower pace. For the faster CW guys on 20M, I just typed away and they kept up without any apparent problems.

I did this years ago using my PK232 and realized it was a bad practice if I was ever going to upgrade to 13WPM CW and the General. So, don't do this if you hope to upgrade your license and/ or maintain good CW skills. However it was fun last night. Of course receive CW software is at the mercy of "bad fists" and static crashes that produce letters but CWGET worked quite well in the auto-threshold mode. It helps if you have some CW skills, that way your ears may do a better job of detecting that the NT your screen just produced was actually a poorly sent K. If you have NO CW skills at all, CWGET will print out about 70% good copy of a strong signal and that is enough to have enjoyable CW QSO's.

Other that a few comments that I had a good fist , no one noticed anything odd about my transmitted CW via PSK31SBW.

You can find CWGET at http://ua9osv.virtualave.net/english.htm

and PSK31SBW at http://aintel.bi.ehu.es/psk31.html

Jim and Mrs. Dale have been in Long Island for the summer and I got a call from him about a month ago. He said that it would be impossible for him to retest until he returned home and that's exactly what he'll do. Jim will start over and pass the General in one shot. In the meantime, let's hope this year unlike last, both KT4TR and Queenie the Weenie do not have advanced warning of a robbery which still looks highly suspicious. I think had the Tampa police looked deeply into the situation, they would have found a link between KT4TR's and K3QAM's prediction of a "big surprise upon returning" and the actual robbery. How did Queenie and his weenie Youngblood know in advance of something dire? Who can blame Jim for having contacted the Tampa police to offer the names of those two weirdos? I still say that the weirdos' hands are not clean. In conclusion I hope Jim's XYL fully recovers from her health woes and that he gets back on the air a.s.a.p. since he has proven himself to be one of the finest hams to ever hold a ticket.

Although I've only spoken to Martin, whose callsign you persist in
getting wrong, a couple of times, my impression is that he is a
reasonable, reasoning man who doesn't pre-judge anyone.
```

Perhaps, after reviewing the evidence, he changed his mind on certain things. That's the mark of a mature individual; and it is the polar opposite of a bigot, to whom evidence means nothing.

As far as anti-Jewish sentiments are concerned, all I can say is that the worst thing possible for the reputation of the Jews would be for examples like you to speak for them, which you are in fact doing in this forum.

With all good wishes,

Kevin, WB4AIO.

I doubt it. Kaufman wasn't particularly well liked, especially toward the end. But since they didn't put any "happy spin" on Freddie Prinze or Kurt Cobain blowing their brains out, I don't think the "Hollywood conspiracy" theory is going to wash. In fact, the reverse is more often the case. Witness the hype of "drug overdose" surrounding Mary Frann's (Bob Newhart's TV wife in the Vermont inn series) death last year. Turned out to be nothing of the sort.

Ok Getback. Took us longer than usual to get all loaded up but we should be to the truck stop by noon eastern. I gotta get the Liz busy asap or we won't have bean money this week. Hope Snake-Man wins the polo match. You're right, he's a real play boy lately. All that money he has, I bet the Liz could give him the deluxe package.

Good idea on swapping some Liz time for a ring job. I'll call the mechanic at the Mercury place and try to cut a deal. Till then, 5 quarts of STP should keep it running ok. Good enough to get to the truck stop anyway. The Liz says if your friend really rocks the sleeper, it's half price.

Before I forget, I will have some extra stuff at the truck stop. One of my trainees I mean associates just walked in with a Dentron Clipperton L. Nope, it's not Orises. I promise. And you know I don't lie. Now I need to get off of here and scrape the serial number off of it and head to the truck stop. See you there. Don't keep the Liz waiting. Saturday at the truck stop is what she lives for.

Now come on out and see

Toothless, talentless "getback" <getback@my-deja.com> wipes his
smegma-encrusted horse lips and drools:
>My good man, and I am glad to have you as a friend, also

"My good man," what a pompous ass.....

>swL002 is one fine gentleman. I don't read "SLOPS" Weaselmans post,
That's because you are a functional illiterate, POLLY!

>know what he is going to say anyway, the same old s***. He went to
>Charles Swartzbarg University of Hate. So the moron is programmed
^^^^^
Only a MORON would type "I don't read "SLOPS" Weaselmans (no apostrophe)
post (singular tense).
It sounds like to me you're jealous of anyone who has surpassed you
educationally. Of course, most middle schoolers achieve this, so you have
a lot of people to be envious of, Polly.

>to
>Hate hate hate. Why bother with him? Just pass his posts by. We >have
you and all the other white hat goodboys to have fine >conversations with
on our forum.

Translation: Polly KNOWS he's outmatched, and has yet to score an
attopoint. Hey, Polly, if you think you can hack it, post a few threads
down on alt.flame. They are always looking for some fresh, new meat to
dissect.

>Keep up the good work, and Herbie is still queer, as we
>all know!!

Boy, Polly, how will your Fueher Herpie take this revelation?
"WE" know how he usually takes it, but just because he takes meat in the
back door, it still doesn't make him a butcher.

3731. Re: Just SOME of the evidence of illegal activity by the liberty net gang

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-08 00:00:00 UTC
From: Kevin Alfred Strom <kevin.strom@innocent.com>
Message-ID: <37ADCF65.37F94A66@innocent.com>
Source record: 134334
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

Dear Timmy:

A sincere question:

Why do you repost exactly the same content in multiple messages numerous times daily, and, further, why do you multi-post it to multiple newsgroups?

It's possible, I suppose, that AOL have asked you, or compelled you, to stop cross-posting, especially since your spamming of the equipment and antenna groups.

But were you aware that multiple posting is a more serious breach of Netiquette than inappropriate cross-posting?

With cross-posting, at least most newsreaders will only see your message once; with multi-posting, they are forced to read it every time.

With all good wishes,

--

Kevin Alfred Strom.

August 11, 1999 is the day of the total eclipse -- a very important event this particular year, with the solar maximum so close. Radio Hobbiests are invited to observe the Audio Eclipse. Please visit http://hfradio.org for links and information about how you can participate.

Of course, you can find other great resources on my page, as well. The Amateur / SWL site includes map generation (for instance, create an equidistant azimuth map projection centered on your location), propagational forcasts and up-to-the-minute event information, swap and shop, and more. You can even sign up for a free website.

Your comments and suggestions go a long way to help me make the site useful. It is my hobby... but I am working hard to make the site worth your repeated visit. So come on by. http://hfradio.org.

73 de NW7US, Tomas.

Kkkevin do not worry abot my posting habbits yours should be of MORE concern to you. Why is it that you and the rest of the liberty net gang post in different screen names all over the anmateur NGs.
Why is it that the liberty net gang posts multiples of the same message?

More ridulous Bullshit from the desapate 395o liberty net gang. I say Go Ahead, it would give me the opportunity to "turn over all the evidence of illegal activity that I have on your group. Doing so would probably enable me to shut you up for awhile. Have fun. LOL

Get a crimp tool and put another on. A properly done connection
of this sort is one of the MOST reliable ones you can use.

Thats precisely why you DO see them on telephones.
John

WOW... I just cut the two middle tines of a four tine fork off and cut the
remaining two outside tines down to about half their original length.
adjusted the span to fit the nuts... all it cost me was an explanation to my
wife. If you hide it well enough you may not even need to do that!!! Why
make a mountain out of a mole hill????

SB DX @ WW $OPDX.421
Ohio/Penn DX Bulletin No. 421

The Ohio/Penn DX PacketCluster
DX Bulletin No. 421
BID: $OPDX.421
August 9, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2RAJ/WB2YQH & The 59(9) DXReport, W3UR & The Daily DX, N6FF, N6HR, N6RT, K7BV, K9YO, AH0W/OH2LVG, G3NOM, HA0HW, JE1DXC, JM1LJS, ON4LDF, PA1AW, PY7ZZ, RW4HW, SM0CCM, SP2BIK, TA3YJ, UT5RP, V63PD, VK8NSB, VK9NS and 7N2UTO for the following DX information.

MYSTERY OPERATION FINALLY ANNOUNCED! During all last week there were reports that an operation was going to take place from one of the "Top 20 Countries Wanted" (P5 was mentioned not to be one of them). Finally, thanks to a press release from Ray Gerrard (G3NOM), he reported that the International Amateur Radio Volunteer (IARV), as per the annual aid program previously announced, has dispatched nine members (including the leader JA1UT) to the Republic of Yemen (7O) on August 5th, and they will stay until August 19th for voluntary work to establish a hospital communication network in remote areas. The opportunity will be taken to offer a donation of amateur radio equipment to the government of Yemen and to help them resume amateur radio activity in their country. IARV would sincerely appreciate cooperation from the DX community on this inititative of inviting a new comer to our Amateur Radio field. More news will be announced later.

5H8, TANZANIA. "The 59(9) DXReprt" reports that Terry, W7RNF, is stationed here for the next few years and is active as 5H8TL. He is the first station to use the 5H8 prefix. QSN reports seem to show Terry likes 15 meters SSB between 1800 and 1900z. Also, check 20 meters SSB after 0400z. QSL via W7RNF.

8P, BARBADOS. Early reports mention that operators K4BAI, K1TO and N4TO plan a serious Multi-Single effort in the CQ WW CW Contest in November. Their activity will between November 23-30th. The contest callsign is not set yet; it will be either 8P9Z or 8P0 something.

CLOSER TO A POSSIBLE NEW AND MAYBE A DELETION??? In international news, the Associated Press reports that Montenegro has said that it wants to abolish the Yugoslav federation (in its bid to win independence) in favor of a loose partnership with Serbia that would allow the two republics to go their own ways. Montenegro government has approved a plan that would give it the right to maintain its own army, foreign ministry and currency while remaining lossely linked to Serbia in a confederation called the Association of the States of Serbia and Montenegro. The report states that President Slobodan Milosevic is beleived to be almost certain to reject the proposal in which case Montenegro says it would call a referendum on full independence.

CORRECTION TO OPDX.420. The callsign ZK1MSG under the section "ZK1, SOUTH COOK ISLANDS", was wrong and should read ZK1MGS.

CT3, MADEIRA. Ben, DJ8FW, will be active as CT3/DJ8FW during his holiday from August 12-20th. He will concentrate his activity on the PSK31 Mode mainly in the mornings and evenings, but if bad WX, look for him also on CW on the WARC bands.

ES75, ESTONIA. The amateur radio operators of Estonia will be signing ES75 + their callsign's suffix throughout August to celebrate the 75th Anniversary of the first QSO ever made with an ES callsign. A special station will operate as ES75M from Muhu Island IOTA EU-034. QSL to home calls.

FS & PJ7, SAINT MARTIN AND ST. MAARTEN. The "Caribbean Tour 1999" has started as reported in OPDX.414. Now until August 11th, look for Ronald (PJ7/PA3EWP), Rob (PJ7/PA5ET), Peter (PJ7/PA4EA), Martin (PJ7/PA4WM), Henk (PJ7/PA3GCV), Dennis (PJ7/PA7FM) to be active on all bands 160-6 meters CW/SSB/RTTY and maybe Satellite/SSTV operations. During this time, the team will become active from Saint Martin (ed. which they have as this bulletin was being prepared) and sign FS/PA3EWP, FS/PA5ET, FS/PA4EA, FS/PA4WM, FS/PA3GCV and FS/PA7FM. Also see below, V47 and VP2E. The QSL manager for this tour is Rob, PA5ET. QSL can be sent via the bureau or direct to: Rob Snieder, van Leeuwenstraat 137, 2273VS Voorburg, The Netherlands. Detailed information about the tour can be found at the Web site: http://www.muurkrant.com/pi4com/tour99

IOTA NEWS.....
AS-117. Operators JH1HHC and 7N2UTO will be active as JH1HHC/0 and 7N2UTO/0 from Sado Island, August 28-29th. They will operate SSB/CW/RTTY on 80-6 metres (WARC bands included). QSL via home callsigns either direct or through the bureau. (Note: HL5CL is NOT the QSL manager of 7N2UTO.)
EU-102. Operators Nikolai/UA9KM, Serge/UA9KL, Valery/UA9KI, Mike/UA9KO, Mike/UA9KGH, Valery/RW4HW and Victor/UA4RC will be active from Zelenyy and Lovetskiy Islands (EU-102, RRA NEW ONE) between August 17-27th. The callsign will be RI1P. Activity will be on all bands, WARC included. QSL via UA9KM, Nikolai Kuprin, P.O.Box 158, Nadym, 626711, RUSSIA.

OC-199. Don, VK6DJP, is on a fishing trip on Rosemary Island, part of the Dampier Archipelago. He plans to be active on the bands (20/15 meters) during his stay. He will be there until around August 14th, weather permitting. He is aware of 14260 and 21260 as IOTA frequencies. This is not an IOTA Expedition, but with his ICOM 706 and wire antennas he will at least give some island chasers another chance for OC-199. Power is available, so this is a big plus. He has promised to be as active as possible, but he will put fishing first. QSL information is to his home call, and he says he is okay in the callbook. (TNX to VK9NS).

IOTA WRAPUP (NA-169). The W7W Team from Waadah Island NA-169 cleaned up the worldwide demand for the Western Washington Island Group. Over 3000 QSOs were logged before, during and after the IOTA Contest. QSL via W5DX.

JW, SVALBARD. The latest news about the 1999 Svalbard Arctic Polar DX-pedition by Jo/DF6VI and Tom/DL4OCM, is that they should be on the air during the afternoon of August 9th. Their planned end of this operation is August 16th. They want to work on all bands from 80-10 meters including the WARC bands on CW/SSB/RTTY. Their QTH will be Longyearbyen, Svalbard (EU-026). The QSL cards should go to JW/DF6VI's and JW/DL4OCM's home addresses or via the DARC bureau. More information is available and maybe a log search on Jo's home Web page at:
http://www.qsl.net/df6vi/jw.htm
DF6VI's address: Joerg Engelbrecht, Heeperholz 1, D-33719 Bielefeld, Germany
DL4OCM's address: Thomas Steinmann, P.O.Box 1117, D-37162 USLAR, Germany

KH3, JOHNSTON ISLAND. Information from Dick, N6FF, indicates that Bill, NH6D/KH3, should be active from August 9-13th. Bill should be active daily starting about 0330-0400z and again about 1500-1530z, depending on work committments. He prefers CW, and expect to find him on that mode, but he does operate SSB occassionally. His present antenna set up only allows operations on 10/15/20/30 meters, antennas for the lower bands is presently a problem, and they are working on it. They must convince the powers on Johnston Island that the antennas and birds can co-exist, a difficult job (as ZS8D on Marion Island well knows). QSL via N6FF. Watch for logs to be posted on the Web at: http://dx.qsl.net/logs
Meanwhile, reports from "The Daily DX" reports indicate that Bill, NH6D, will also be active (as time permits) from August 9-13th. His estimate operating time on the air will between 0330Z-0400z. Look for him on 10/15/20/30 meters CW. Emphasis will be on EU, AF, W1,2,3,4 and all points south of Florida. QSL to N6FF.

LIGHTHOUSE ACTIVITY. Celebrating the International Lighthouse/Lightship Weekend during August 21-22nd, the radio station using the callsign SN2KM will be active from the marine lighthouse in Krynica Morska. Krynica Morska is located on the coast of the Baltic Sea in Poland (19E2712 and 54N32112). The station will be operated by five operators: SP2BRN, SP2IZC, SP2TQW, SP2NBD, SQ2BXJ and SP2BIK. QSL via SP2BIK.

OH0/OJ0 DXPEDITION (Trip Two). Dennis, K7BV, Editor for the National Contest Journal, has been invited back to operate from Aland Islands (OH0)

and Market Reef (OJ0) in September, thanks to Seppo/OH1VR, Lars/OH0RJ, Ari/OH1EH, Jukka/OH2MAM and Juha OH1JT. The primary focus of this trip will be OJ0. Dennis anticipates arriving on Market Reef via helicopter during the afternoon of Tuesday, September 14th. He will stay until the early morning hours of Monday, September 20th. Special emphasis will be made to do an extensive amount of operating on 80 and 160 meters each night. The trip will include operations on all bands 160-10 meters (WARC bands included) on both SSB and CW. RS13 satellite appearances will be as frequent as possible. QSL OH0 - OJ0/K7BV via KU9C, Steve Wheatley, 12 Netherton Terrace, Morristown NJ 07960. The complete press release by Dennis, K7BV, will be sent to all OPDX InterNet Subscribers as an additional bulletin.

PALESTINE OPERATION WRAP UP. Hide, JM1LJS, reports having a very pleasant trip and operation from Gaza and the West Bank. He informs OPDX the following totals (NOTE the QSL Managers):
July 26-29th July 30-August 1st
Callsign: E4/JM1LJS Callsign: E4/JM1LJS
QTH: West Bank QTH: Gaza
QSL via JL2XUN QSL via VK4FW
Total QSO: 1713 (includes dupes) Total QSO: 1703 (includes dupes)
CW: 426 / SSB: 1287 CW: 1413 / SSB: 290
On August 1st, Hide was active as 4X/JM1LJS from Tel Aviv and made only three QSOs on SSB. He could not receiving permission from the hotel to operate. QSL via JL2XUN.

PY0F, FERNANDO DE NORONHA ISLAND. Fred, PY7ZZ, is now active as PY0FZ, possibly for only a few more days. He reports that this is not a DX-pedition, but he will be active during his free time from PY0FF's station. He was spotted on Sunday on 14195 kHz at 0645z. QSL to his home callsign.

QSL INFO AND NEWS......
The logs of ZF2NT and HB0/DF6VI operations can now be found on the Web site: http://dx.qsl.net/logs

Frank, AH0W/OH2lVG, reported on Monday last week that the 3B9R Rodrigues Island DXpedition QSL cards have been printed in Japan and are in transit. The cards will start to flow as soon as they arrive to the QSL manager in Arizona. QSL via N7LVD, John Johnson, 5627 West Hearn Road, Glendale, Arizona 85306-4213.

QSLs for Arne, XE1/SM0OUG, goes to Lars, SM0CCM, who prefers bureau cards. Lars mentions that Arne promised a lot of 50 MHz activity. NOTE! ONE (1) US DOLLAR DOES NOT COVER AIR MAIL POSTAGE FROM SWEDEN TO USA. ONE IRC DOES.

RARE/NEW IOTA'S TO BE ACTIVATED. Stuart, VK8NSB, reports in a press release that he has been granted permission to operate from 2 IOTAs in the Northern Territory. The first island, Melville Island (OC-173) will be activated from the November 4- 9th. The second island, Croker Island (NEW IOTA, never been activated before - located in the Central Island Group NT) will be activated November 11-16th. Stuarts states:

"This DXpedition will be for the children on both Islands, Amateur Radio Display for the kids, 2 out of 6 days is to show the children on both remote islands Amateur Radio (1 SSB station mainly for the children to listen and talk to other Hams from around the world)." Currently Stuart is looking for some assistance, either green stamps or EQUIPMENT and operators. He is putting together a 5 man team, and two of the operators are confirmed (Stuart/VK8NSB and Peter/VK8PDG). They plan to have three stations active (2 SSB and 1 CW). QSL Manager will be Jim Smith, VK9NS. OPDX InterNet Subscribers will receive Stuart's complete press release (with details) as an additional bulletin.

SPECIAL EVENT. Belarus Amateur Radio Union's President Alexander Pyatunin (callsign not given) reports that a group of Belarus Hams will provide communications for the Belarus team going to climb Mont Blanc, August 9-20th this year. Operators will be EU1AZ, EU1DX, EU1ABC, EU1UC, EU1ABC, EW1CM, EW1PA, EW2CR, EW2KW, EW8DX, EW8EW, EW8MW, EW8RR and DL7VFM. Callsigns to be used are F/EU5HQ (base) and TM0MB (Mont Blanc team). Activity will be on all HF bands and on 6m, 2m, 70cm CW, SSB, RTTY, SSTV and FM. Pictures would be transmitted by SSTV and Internet.

SV, GREECE (YL and IOTA operation). Nilay/TA3YJ (XYL) and Berkin/TA3J (OM) will be active from Athens (SV1) and Khios (SV8, EU-049) between August 12-17th as SV/TA3YJ and SV/TA3J. Activity will be SSB on 160/80/40/20/15 /10/2 meters and 70 cm. QSL via home callsigns, bureau or direct to:
TA3YJ - Nilay Mine Aydogmus, P.O. Box 876, 35214 Izmir - TURKEY
TA3J - Berkin Aydogmus, P.O. Box 987, 35214 Izmir - TURKEY

TOTAL SOLAR ECLIPSE STATION ACTIVE. Look for ON7SUN to be active from August 8-11th. This will be the only special event ON station under the total solar eclipse activity. Activity will be on all modes and bands. A special QSL and Award is available. QSL via the bureau or direct to ON4LCV.

V47, NEVIS. After their St. Maarten/Saint Martin operations, the "Caribbean Tour 1999" will be active from here August 11-18th as VP2E/PA3EWP, VP2E/PA5ET, VP2E/PA4EA, VP2E/PA4WM, VP2E/PA3GCV and VP2E/ PA7FM. Their three stations operation should be the same as on FS/PJ7. QSL via PA5ET direct or via the bureau.

V6, CHUUK ISLANDS (Micronesia). Peter, V63PD, informs OPDX that he is the only remaining resident station in the Chuuk Islands. He operates on the 40/30/20/17/15/12/10 meter bands on SSB and with some CW. Chuuk has an IOTA reference number of OC-011, and its location is 7.5 degrees North and 152 East. Peter mentions that it seems that most hams he talks to do not know where Chuuk Island is. The former name of these islands was Truk. Since the name was changed some ten years ago to Chuuk, he identifies his QTH consistently as Chuuk. It is pronounced "chuke"--- rhyming with Duke. Peter's QSL Manager is VK4AAR and has a website at:
http://www.qsl.net/v63pd

VP2E, ANGUILLA. After their St.Maarten and Nevis operation, the "Caribbean Tour 1999" will be active from here August 18-25th as VP2E/PA3EWP, VP2E/ PA5ET, VP2E/PA4EA, VP2E/PA4WM, VP2E/PA3GCV and VP2E/PA7FM. Their three

stations operation should be the same as on PJ7 and V47. QSL via PA5ET direct or via the bureau.

YJ, BANKS ISLAND (Vanuatu, IOTA DXpedition). Masayoshi, JE1DXC, will be active from Banks Islands between August 12th and 16th. The callsign was not given, but Masayoshi has operated as YJ0AXC. He will be active from Banks Islands between August 12th and 16th. Operation will be on CW/SSB, 14/18/21/24/28 MHz running 100 watts with a generator and dipoles. QSL requests should go to ONLY his CBA. Masayoshi reports, "The Banks Island group ranks 61st on the list of Most Wanted Island Groups. The Banks and Torres groups have 62 islands, 13 of which are inhabited. Most of the remainder are either sandy islets or jagged volcanic rocks poling out of the sea. This area is one of Vanuatu's most humid, and has an average rainfall of 3900mm per year. As elsewhere, the islands suffered heavily from black-birding and disease in the latter half of the 19th century. By the 1930s there were barely 2000 people left, but now the population is recovering and currently stands at about 6000. There are four airfields in the area, but little in the way of accommodation and motor transport. Despite its considerable beauty and fascinating culture, very few visitors make it to this part of Vanuatu."

ZL7, CHATHAM ISLAND. Lothar, DJ4ZB, plans on be active between February and March in the year 2000. Callsign may be ZL7ZB or ZM7ZB. Activity will be 80-6 meters, with an emphasis on 10 meters.

What a riot! My ham shack is a 10th-floor ocean-front condo, with a view of the Ala Wai Harbor, Ala Moana Beach, and Mamala Bay all the way out to Barber's Point. My "window" is a sliding glass door taking up an entire side of the condo, which remains open all day, all year (except during high winds / hurricanes). My sailboat is docked in the harbor in my "back yard."

If you're ever able affort a trip to Hawaii, email me -- I'll invite you up for a beer. The view from the "shack" is truly beautiful. (If you send me your postal address, I'll mail you a photo.)

As for watching bikini-clad girls on the beach, I'm have my own bikini-clad girl to watch! ;) She's an Asian beauty who's lot prettier and trimmer than the fat-chicks you export over to here from your side of the Pacific.

Now, what's your real beef with me posting CB'er NAL notices to rec.radio.cb? Attempting to anonymously ridicule the messenger just because the message scares you is pathetic and cowardly. I'll now make sure you're the first to know each and every time a CB'er is fined for illegal on-the-air behavior.

Jeff KH6O

P.S. I've already been to the beach this morning: I'm in the 80+ degree water every day at 6am for a 2 km swim. If you ever make it over here, I'll be happy to race you -- winner buys lunch. Be forewarned, though -- I broke three state swimming records a decade ago. I'll show you the medals if you have any doubts.

he, he, he, ROTLLMAO. Jeff, its sounds an awful lot like you love to give yourself warm and fuzzy feelings, but believe me, the rest of the planet doesn't really give a rats ass. Perhaps you and that other symbol of amateur radiodom, The DonkeyBoy, should swap stories in order to see who has the best yarn. As far as NAL's are concerned, save yourself the effort because believe it or not, we CBers know how to access the FCC website just like you. You see, I just freed up some more swimming time for you.

Oh, and by the way, This posting was submitted from alt.radio.cb.

3750. Pager Foxhunt... is it possible?

Newsgroup: rec.radio.amateur.misc

Hello all...

Given a model number and telephone number is it possible to track down a pager using any sort of detection method? We have a kidnapped young lady in the area and one fact in the case is that she probably has her pager with her. The suspect is behind bars, but she has been missing for 10 weeks now.

The official Motorola response was 'impossible' but I'm wondering if it's more like 'very difficult so next to impossible.' I don't know the pager protocols... is there a transmitter in the thing or just a receiver? I Don't have a pager, so don't even know if 10 weeks is well beyond expected battery life.

Any help in answering the question would be appreciated.

More like almost impossiable. The battery life is not that long in
most pagers. The pager probably does have a local oscillator that
you can probably hear at a few feet to maybe 50 feet at a wild guess
for the range. All you have go to do is get that close.

Exactly Jeff,
Up until about 1980 you had to be at least a General for a year to even test for Extra. I doubt that PUSSYCat is old enough to remember what happened in 1983 much less 1963.

I've known that PUSSYCat is a liar for months now. He makes antennas out of pine trees, he makes grounds out of magnets. Who does he think he is? MacGyver?

I'll bet your monitor has more than Wildcat cooties on it. Be careful! He'll threaten to call your employer, your ISP and even your mommy if you aren't nice to him! He's even less than a PUSSYCat.

Kevin, WB5RUE

In the 1960's they took prayer and the Ten Commandments out of our public schools hoping to liberate a generation. They succeeded. Now we have a generation who thinks they have the liberty to lie, cheat, steal, kill, freeband....

Was Buford O'Neal Furrow going to the
Las Vegas home of the well known internet
"Hate Buddha" KK7HO (AKA Tim Volz)?

Rumor has it, that Volz and fellow 'hater'
Furrow are acquaintances, and have similar
extreme beliefs.

A quick scan with www.deja.com will show
that Volz's 100's of extreme posts attacking
other amateur radio operators show that
Volz is a kindred spirit with Furrow.

Further info on KK7HO is at:

Do not concur. The 1st Amendment was intended to protect potentially
unpleasant speech, not just speech approved by the majority. Who gets
to decide which are "facts" and which are "supposition, conspiracy or
propaganda?" I do not cede that call to anyone.

Nevertheless, there is great wisdom in the now-discarded tradition of
keeping political discussion off ham radio.

Hola-
I visited your site and did not find my call on the list of idjit
candidates. I want to place myself on it, because I have succeeded in
perpetuating a hoax that was later refuted by Microsoft, in regard to
updating MM/dd/yy to MM/dd/yyyy for Y2K compliance.
I have unfortunately been talking to too many Webmasters and have
been forgetting that Hams, for the most part, are smarter than the
average new breed of computer gurus, who have only recently learned how
to communicate. Computerr people IMHO can mess up their software worse
than any Hams I have ever known could mess up their hardware.

Gracias tambien,

I never met a Ham I didn't like,
Hams need MORE license classes and less idjits,
Bob Wex w2ilp (Idjit Labeling Policy?)

Compassion is the cheif law of human existence.
--Fyodor Dostoyevsky "The Idiot"--

As some time it may happen that a victim must be found,
I've got a little list - I've got a little list

Of society offenders who might well be underground,
And who never would be missed - who never would be
misseed!
.....
Then the idiot who praises, with enthusiastic tone,
Every century but this, and every country but his own;
And the lady from the provinces, who dresses like a guy,
And who "doesn't think she waltzes, but would rather
like to try";
And that singular anomaly, the lady novelist -
I don't think she'd be missed - I'm SURE she'd not be
missed!
.....
--W.S. Gilbert "The Mikado" 1885--(NOT w2ilp)--

The Ham idjit who praises either CW or 'phone,
Every decade but this, and every country but his own;
And the Mensan down in Texas, who raises antennas to the
sky,
And who doesn't think he can learn the code, and doesn't
want to try;
And that non-linear philosopher, the computer scientist -
I don't think they'd be missed - I'm SURE they'd not be
missed!
--w2ilp 1999--

I have an Alinco DJ-580T (That's what's on the back of the radio, the front panel reads DJ-582) that has been modified to rx the 800 Mhz.

I reseted the radio and now I can't go to the 800 Mhz anymore by pressing the FUNC key and UHF.

Any help would be really appreciated.

please reply to joserivera@zdial.com

Thank you

HAve had both, as well as Standard C-508a,resulting in a certain experience in such matters.... I like the C-508 very well.... nice RX, decent audio (for it's size), and AA battery convenience.... I like the Q7a for all of the above, Plus 30-50 MHz coverage RX (fire depts here are Low band still). I had a VX1-r approximately two weeks....performance was good, nice audio, Lithium Ion batteries work well,but with this size rig,I do like the convienence of picking up spare power at the corner drugstore if you run out in a bind.....the BIG fault with the VX-1 is the inability to scan frequencies at VHF and UHF at the same time, unless they are programmed by computer...this omission makes the VX1r totally unsuitable for my needs....as you can tell I use my mini ht as a scanner as much as a transciever-the Q7 is ideal for this due to the frequency coverage.... they do act like a wireless Mike in conjunction with a nearby crossband radio....and that works very well... but 300 Mw is only gonna go so far.....
73 and as always, your mileage may vary....

Gee, in all my years of ham radio I've never had to ask an antenna
manufacturer for technical support?

Maybe you should be buying DB Products or Sinclair for the big bucks if you
feel you need support!

I have alot of these meters , Order all you need
All are Brand New, Never Used
Take your pick, three different ones to pick from
0 thru 12 amps .... or .... 0 thru 20 amps ... or .... 0 thru 40 amps
Size is approx 2 3/8" tall by 2 3/8" wide
These meters are great for that home brew project !!
$7.50 each .... shipped price to lower 48
See these meters at.........
http://www.jetlink.net/~ko6oy/meters.html
ALSO... The SMRA Ham Radio Swap Page Has Moved to..
http://www.jetlink.net/~ko6oy/swapage4.htm

Report the criminal KK7HO's crimes to your local office
of the FBI. KK7HO, aka Tim Volz, of Las Vegas's address
is available via www.QRZ.com.

Volz had been recorded conspiring (with K5BLB) to have
W1WCR killed via the federally regulated HF bands.
Hear the crime at the web site:

http://members.xoom.com/frg9600/500.wav

Just lookup your local office of the FBI, listed below,
and report Volz's crimes Monday morning.

Remember -- the amateur radio service is self policing.
It's our duty to end this harassment, and intimidation
that Volz and his associates are perpetrating on a
weekly basis.

Thanks for your phone call to your office of the FBI!

```
Report the criminal KK7HO's crimes to your local office
of the FBI. KK7HO, aka Tim Volz, of Las Vegas's address
is available via www.QRZ.com.

Volz had been recorded conspiring (with K5BLB) to have
W1WCR killed via the federally regulated HF bands.
Hear the crime at the web site:

http://members.xoom.com/frg9600/500.wav

Just lookup your local office of the FBI, listed below,
and report Volz's crimes Monday morning.

Remember -- the amateur radio service is self policing.
It's our duty to end this harassment, and intimidation
that Volz and his associates are perpetrating on a
weekly basis.

Thanks for your phone call to your office of the FBI!

Are you going to pay for the anti biotics? You need to get a health card
for the lizard. I say it is tit for tat, or something like that. Oh yes,
Porkkbutt, you need to see Jenny Craig with all that lard you are
toteing. I will talk to you about the "Riley Special" gotta get bigger
lines in here to operate it.

--SWL002. Thanks for getting aboard, we will get Cpt Truth. And about
Poor "SLOPS" Weaselman, he wants to run with us "BIG DOGS". But the boy
just won't hunt. It is a fact that Snake Man , You., and I are just too
fast for the boy. I don't think he will improve either. I just won't
read his posts til I am told he has improved his mind skills. Keep up
the good work my Man.

Honestly-
this message was bounced back to me by my ISP.....showed an error 441-
server error....
I had no idea it was being posted every time......
ISP has been notified of this, as well as other recurrent errors.....

sorry

Bill, N3DDY

Well, at least you admit you were jamming something.

By the way, I am not the author of the post to which you were
responding. Thanks anyway for thinking of me, though.

Go ahead and post the recording on this newsgroup or on your web
page, Tim, and put the url here. I'd like to hear it.

Will you do that?

Happy Internetting,

(Found on the newsgroups, and worth re-posting!)

Report the criminal KK7HO's crimes to your local office
of the FBI. KK7HO, aka Tim Volz, of Las Vegas's address
is available via www.QRZ.com.

Volz had been recorded conspiring (with K5BLB) to have
W1WCR killed via the federally regulated HF bands.
Hear the crime at the web site:

http://members.xoom.com/frg9600/500.wav

Just lookup your local office of the FBI, listed below,
and report Volz's crimes Monday morning.

Remember -- the amateur radio service is self policing.
It's our duty to end this harassment, and intimidation
that Volz and his associates are perpetrating on a
weekly basis.

Thanks for your phone call to your office of the FBI!

3782. AF2Y's STARTLING SCOOP

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-08 00:00:00 UTC
From: radiosigs@aol.com
Message-ID: <19990808111305.01184.00000430@ng-co1.aol.com>
Source record: 134405

Sometime I feel like the late Walter Winchell,"Ladies and gentlemen and to all the ships at seas, let's go to press.Flash....." I am bringing to you very important info regarding the less than cordial relationship between a certain gentleman named Riley Hollingsworth and specifically a white supremacist rat named Al Parker ,N2SAG and in general, that rotten Liberty Net which is a front for subversive organizations in our country.
How did I come by this information? By agent 48,a man of steel, of conscience, of equanimity and of patriotism. Believe me when I say that out there in cyberspace, among the trash there are truly decent folks who give of themselves to ham radio. Who care about it and will do all they can to preserve it and one of them is my friend and confidant.
Getting back to my scoop, this N2SAG buffoon who hates this country as much as I love it, has a "thing" for anyone who speaks out against the LibNet. And he likes to write letters, especially to a gentleman named Riley Hollingsworth. Letters of complaint about this one and that one and how the net should be free of interference and all that rot. Here is "SAGGY's" of July 10th, 4:00 P.M. GET OUT YOUR HANKIES DARLINGS..there'll be no dry eye in the house!!!
>>> <AlParkHam@aol.com> 07/10 4:00 PM >>>
Mr. Hollingsworth,

By your recent actions in reversing the fortunes of WA9KJI and W1WCR =
you=20
have, in effect, labeled the many honest witnesses to the May 1st incident =
on=20
3.950 MHz as "LIARS". The ARRL report only mentions an affidavit. The=20
identity of the author of that false affidavit has been discussed openly =
on=20
the air. Considering the past co-violating activities of WA9KJI and =
your=20
witness we might have figured it out anyway. It now seems clear that you =
are=20
relying on the untruthful affidavit of a notorious violator to destroy =
a=20
truly decent Ham radio operator and institution.=20

Did you know that:

K5MVK has likely been jamming the "Liberty Net" with Morse code for =
several=20
years with a repetitious, "REPENT, REPENT, REPENT"?

K5MVK has openly and regularly maliciously interfered with the "Liberty =
Net"=20
and others on 3.950 MHz in concert with K5BLB in voice mode for at least =
one=20

year?

K5MVK wrote a letter to you condemning the music playing and jamming of =
K5BLB=20
and subsequently declared him a paragon of decency when he decided that =
he=20
was angry at BLB's antagonists?

K5MVK engages in nightly, illegal CW broadcasting on our about 3.950?

K5MVK has been WA9KJI's co-jammer on countless occasions, usually =
pretending=20
not to be able to hear preexisting QSO's?

Mr. Hollingsworth, the character of your witnesses matters. My sworn=20
affidavit will be an honest account of what happened on May 1st. I =
have=20
offered to appear in any court in any venue to testify that WA9KJI was=20
calling CQ over an ongoing QSO when control of 3.950 was legally transferre=
d=20
from W3KE and AA8DP to W1WCR and the net. I have never jammed, and =
never=20
knowingly involved myself with anyone engaging in such behavior. =20

Forgetting for a moment about May 1st., both you and Mr. Hickman know =
very=20
well that WA9KJI has been a notorious violator. His self-identified =
tape=20
playing, noise making, obscenity and slander are well known to the =
entire=20
amateur community. What does it say about the character of K5MVK that =
he=20
would be prone to associate with and defend such a notorious miscreant?=20

Ironically all that K5MVK has really done is admit that he momentarily =
joined=20
WA9KJI in jamming N3GVA and KR4LY (now N2BUB) earlier that evening. =
His=20
affidavit is in reality a confession of his own serious violation. His=20
testimony on behalf of David Castle is analogous to a criminal testifying=
=20
that his partner couldn't have been guilty of jaywalking because at the =
time=20
they were both engaged in robbing a bank!

A truly neutral party has come forward to clarify the events earlier in =
the=20
evening of May 1st. when K5MVK apparently joined WA9KJI in talking over =
an=20
established East Coast QSO for a period of time. This witness took=20
contemporaneous notes and heard WA9KJI verbally attack N3GVA and N2BUB =
when=20

he called CQ over them and was informed that the frequency was in use. =20
Shortly after that K5MVK engaged in his usual tactic of acknowledging =
Mr.=20
Castle in order to assist him in talking over an ongoing QSO between =
people=20
he dislikes.=20

Mr. Hollingsworth, if you are still really interested in hearing the truth =
in=20
more detail from a centrally located vantage point, please call: =
WD4CIA=20
WALTER H. PHILLIPS JR, 104 MEADOWPOINTE E, HENDERSONVILLE TN 37075, at=20
615-264-2758. He is not affiliated with any faction. My sense is that =
he=20
might actually give K5MVK the "benefit of the doubt" regarding direct=20
knowledge of the ongoing East Coast QSO due to band conditions. As I=20
understand Mr. Phillip's perceptions of the event there is no doubt =
however=20
that WA9KJI was well aware that the frequency was already in use. It is =
my=20
opinion that K5MVK's previous pattern suggests that he also knew.

73's,
AL PARKER
N2SAG
516-681-6733

cc. Congressman Peter King

Now I'll bet you are dying to know if Riley replied and if so, how?
When agent 48 sent the reply to me, he asked me to remove some specific items
of info which I have done. What you are about to see is AUTHENTIC. Nothing of
the basic context has been doctored but part of a sentence has been omitted as
requested. There have been absolutely no additions or word changes. Here is
what Riley thinks of "SAGGYBOY" and his ugly Liberty Net.

Subj: Fwd: Re: A NEW WITNESS vs.YOUR "STAR" WITNESS FOR WA9KJI!
Date: 8/3/99 9:44:26 AM Pacific Daylight Time
From: RHOLLING@fcc.gov (Riley Hollingsworth)
To: kk7ho@aol.com

FYI, as mentioned the other day.

You know, Al, it's no wonder nobody at the FCC has wanted to do Amateur =
enforcement in the last ten years. I have a net here of whiners that want =
to be an International Broadcast Station on 3950, one of the most =
congested areas, and have it all to themselves, all the time, provoke =
everyone and use the frequency for anything in the world EXCEPT the basis =
and purpose of Amateur Radio and its allocated frequencies, and have the =
government run interference for them and provide a clear channel for them, =
ignoring the fact that frequencies are shared. I get mail from you all =
every day, and handling the "Liberty Net's (excuse me, "Great Liberty =
Net") problems would be a full time job. You rail every night about how =
bad the government is, but run to it every single day complaining, then =
constantly criticize and second guess everything we do. You remind me of =
the football cartoon, where the coach, finally tired of armchair advice =
and criticism, turn to the spectators and yells "You, in the brown jacket, =
go in for Number 42". All of you are starting to lose credibility with me. =
I need to move on to real problems of =
Amateur Radio being experienced by people who understand what it is for in =
the first place. Please do not contact me again.

THAT'S IT FOLKS.!! Need I say more? Yes, I think I will. Is there any doubt in anyone's mind about whether Riley knows or doesn't know the truth about the 3.950 beasts? And yet I 've read posts from morons who have this false sense of security because Riley checked in once. The dopes mistook it for approbation. What a joke; "what fools these mortals be." (Doc Shakesbard).
One needs not read between the lines in the above response-it's all out in the open. Mr.Hollingsworth has as much regard for" SAGGY" and his hate filled buddies as I do for the K.K.K.
Get the part about how SAGGY and his SAGGYITES run for government help after doing nothing but belittling that same government? How are you going to answer that, you Hicksville white supremacist s.o.b?
Now don't get me wrong folks-I am not talking for Riley but rather basing my statements on his. And don't anyone ever think that I was given the information because I stand in special favor with the man. No way-I am no different than anyone else which is why I watch my Ps and Qs on the air. If I get out of line I would expect the wrath of Mr.H. to come down on me just like it's come down on others. The same rules set out for you are mine to follow also. I am an "equalist"(I think I just made up a new word), not a supremacist. The only thing unique about me is my very stirring and outstanding callsign of AF2Y.
. Many have asked me how I got something so rare and I feel obliged to tell them it's a commemorative call celebrating the circumcision of my great great great grandfather Solomon from Lublin in1661. Aside from that I am exactly the same as you, a regular vanilla ham as the great NR5T used to put it. I miss the "evil midget," don't you?
But in all seriousness, I'll close with this: "Libnetnuts, you can please the bigots, tick off the tolerant but can't FOOL or CON the tolerant Mr. Hollingsworth. The ring is closing on you damned slimeballs. If you think you're going to, in perpetuity, reserve a frequency to demean minorities and immigrants, preach anti-Semitism, hatred of our government and government officials from the White House down to heaven knows where and trivialize,

minimize or ridicule the Holocaust, guess again. You're washed up!
Doc

3783. Another Stellar Day on the Amateur Airwaves

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-08 00:00:00 UTC
From: Wildcat <wildcat@tp.net>
Message-ID: <urhr3.1521$qu5.129349@news21b.ispnews.com>
Source record: 134406
Cross-posted to: rec.radio.cb,rec.radio.amateur.misc

I had the displeasure last of listening to amateurs on the Liberty Net last night (3.950). In addition, while these guys where trying to hold their weekly net, I heard other Hams playing music, white noise, farting sounds and a taped 60 year old radio skit from Amos and Andy in an attempt to block the broadcast.

Im certainly glad to see that not only CBers have this "supposed" propensity the perform illegalities. In a few short years if sure these guys will self-change the public's stereotype of Amateur radio operators because its the bad apples that usually set public perceptions.

3784. AF2Y's STARTLING SCOOP AGAIN

unknowing, inexperienced opinion snipped>

Hey polly, are you going to have the common courtesy to give Billy Jack a reach-around this time?
Poor polly, desperate for attention and adulation appended his little drooling tributes to his master Herb at _every_ opportunity no matter whom the post was directed at. This tactic was, like all things in his life, a failure. Thus he has abandoned it, and even more telling on the angry psychology front, he has taken to _copying_ the same post and re-heading it across several strings caring not a wit what the contents thereof say (obviously). Sad. Secondly, and again very telling, he has ceased to take time to name lame me. This is very important for a two-fold reason: first, it shows that the glee in this game has completely flown as he now realizes he hasn't a hope in hell of coming out of this looking any better than a burnt piece of toast; second, it clearly demarcates the line of easy anger has been crossed and points incisively to a very low moderate IQ of 104 or less for my senile little pet. In another words, don't count on this being an act, or Polly being very good at cocktail parties. Not that his odious personality precludes and invitation to parties.

Jeff, please tell me, how much time do you spend on the CB radio? If the answer is none, I cant imagine why someone who would not spend any time on the CB hobby, be so concerned about what is happening with that particular hobby.

Does your self ordainment also cover the FRS and GMRS hobbies as well, thus making you a "full spectrum" interloper? Judging by your email location, I would think that watching bikini claded women would make for much more interesting time fodder than worrying about what mischief CBers are into. Another suggestion to you might be to actually get involved in the correction of the degradation of your own hobby (Amateur Radio) before worrying about what the guys buying the $49 radios at Radio Shack are doing.

Someone else (a long time Ham) recently told me that opening the window in your shack at least once a month, thus letting some fresh air in, helps considerably as well.

These incompetent FCC management officials
are all paid in excess of $85,000 a year, plus bonuses,
and travel/misc expenses to ENFORCE FCC rules &
regulations against malicious intentional jamming by
unlicensed & unidentified signals.

WHY ARE THESE BUREAUCRATS
PERMITTING THE GREAT
LIBERTY NET TO BE JAMMED?

We pay their salaries, ASK THEM!

Joseph P. Casey, jcasey@fcc.gov
202-418-1100

Dennis P. Carlton, dcarlton@fcc.gov
816-353-9021

John R. Hudak, jhudak@fcc.gov
202-418-1180

Robert J. Douchis, rdouchis@fcc.gov
301-206-2896

Arlan K. VanDoorn
202-418-1105

Robert W. Crisman
202-418-1130

Dan S. Emrick
202-418-1170

Roy E. Kolly
202-418-1150

Call the FCC's much vaunted HFDF
automated facility @ 301-344-3414 or
fax them @ 301-206-2896 and ask them
what they do beside sleep, watch TV, and
complain they don't get paid enough.

Call the Washington watch officer 24 hours
a day @ 202-632-6464 immediately when
jamming starts & ask why the FCC will not
apprehend unlicensed unidentified jammers.

MAKE THESE PEOPLE WORK AND GIVE US ANSWERS for the money we are paying them!

For those with inquiring minds, W1AW was using Harris commercial (costly) transceivers in transmit only mode since the renovation they charged to the membership.

No, the good old ham rigs we all use weren't good enough for K1ZZ and his contest coterie.

So, what happened ? The Harris "professional" rigs broke down one by one; serves them right, except YOU paid for it with their fund drive.

So the last time I spoke to the control op, he declared "we will go back to ham rigs; we've started replacing some in fact."

What typical ARRL activities...

Anyway, they do NOT LISTEN before they transmit. They think the 500,000 non-ARRL members, who I will join later this year, care what their BROADCAST schedule is.

How about a control circuit diagram, Dave ?

You think you're not accountable Sumner ? You're the trustee.

Can you hear who is on 3582 through those glass doors, LIDS ?

I'm just getting warmed up with the issues that need to be addressed, and I don't care if ham radio goes away while trying; double standards will be dealt with through REAL branches of government.

FOUNDATION FOR AMATEUR RADIO
c/o Al Brown
8645 TOWER DRIVE
LAUREL, MD 20723-1244

-- For immediate release --

F.A.R.FEST '99 AT NEW LOCATION

The Foundation for Amateur Radio (FAR) will sponsor the 42nd annual F.A.R.Fest amateur radio hamfest on Sunday, September 26, 1999, at Prince George's Stadium 1/4 mile south of the junction of US-50 on US-301 in Bowie, Maryland between Washington, DC and Annapolis, Maryland.

This is a new location for F.A.R.Fest, with a paved area that accommodates over 700 tailgaters. Vendors and other sellers will be able to set up under the canopy of the stadium concourse. General admission tickets into F.A.R.Fest '99 are $5.00 at the gate; $10.00 for tailgating, which requires the purchase of general admission. Vendors and other exhibitors should contact Marry Morris, N4TCI at amateur_radio@hotmail.com, or at 703-971-3905 for more information.

The Special Events station W3PRL-AM will be on display.

Talk-in frequencies are 146.520 MHz and 147.105(+) MHz.

To get to F.A.R.Fest '99:

From points North:
Take I-95 south to the Baltimore Beltway (I-695) to Exit 4 (I-97 South) toward Annapolis. On I-97 South, take Exit 7 (Route 3 South - Bowie/Odenton). Take Route 3 for approximately 11 miles. After passing under the Route 50 overpass, proceed to second traffic light and turn left into Stadium Drive. NOTE: Route 3 changes to Route 301 after you pass under Route 50.

From points South:
Take I-95 North to Exit 104 (Route 301 North). Take 301 North past Upper Marlboro. Go through the traffic light at the Route 197 intersection (Rip's Country Inn will be on the right). At the next traffic light, turn right into Stadium Drive.

From points East:
Take Route 50 West to Exit 13A (Route 301 South). At the second traffic light, turn left into Stadium Drive.

From points West:
From I-70 East, follow directions coming from points North.

From Washington, D.C. or the Capital Beltway:
From D.C., take New York Avenue to Route 50 East, or the Capital Beltway, Exit 19A (Route 50 East). Take Route 50 to Exit 11 (Route 197). Go South on Route 197 for approximately 1.5 miles to Route 301. Turn left onto Route 301 and remain in the right lane. Turn right at first traffic light into Stadium Drive.

For general information on F.A.R.Fest '99, see the webpage at URL:

http://www.amateurradio-far.org/

or contact Al Brown, KZ3AB, at ﷺamateur_radio@hotmail.com,ﷺ or at 301-490-3188.

> AF2Y
>

Once again it was Mr. Dale's son who had robbed him!!!!! Missing were 16 two dollar bills, and a "BOOM BOX". A altercation began between Mr. Dale and his wife RITA. "MRS. Dale said," I will prosecute the sorry son of a bitch, even if his druggie dad will not". Boom de Boom Boom!!!!!! AF2Y really knows how to pick his friends. I bet he didn't go meet Druggie Dale while Stupid was vacationing in N.Y. Oh, I almost forgot. the items that were stolen from the home of druggie Dale were recovered at two local pawn shops. The individual who pawned the items was James H. Dale II, he seems to be almost as stupid as the father. Hear more about Jimmy Dale in the upcoming single by Willie Nelson, "MY DAD IS A DRUGGIE, AND I STOLE THE FAMILY BOOM BOX"

Keep us posted, Getback. We're all on board and ready to get after him. After Operation PORK BUTT !!!!!!!!!!!! we're on a roll. Ready to rumble. But we better be careful cause Captain Truth might be a friend of Roger and we sure wouldn't want cross Roger. The same way we wouldn't want to rile PORK BUTT !!!!!!!!!!!!!!!!!!

I have an Alinco DJ-580T (That's what's on the back of the radio, the front panel reads DJ-582) that has been modified to rx the 800 Mhz.

I reseted the radio and now I can't go to the 800 Mhz anymore by pressing the FUNC key and UHF.

Any help would be really appreciated.

please reply to joserivera@zdial.com

Thank you

Jose Rivera N3TPO

Hola!

The votes are in and the lowest scum in the pond has been chosen!

KK7HO, Tim Volz! Idjit and wacko supremo!

He was chosen as the lead story in the Dutch magazine THE DAILY WACKO! See it at
http://home.worldonline.nl/~kuifje/editie203.htm !!

What an idjit!

KK7HO will be hard to top, but a new crop of radio idjits is always
being grown right here in rec.radio.

Go to http://homestead.deja.com/user.big_guy_one/BGO.html RIGHT NOW
AND SEE OTHER IDJITS - and vote for your favorite.

Gracias!

BGO

As I type this, KK7HO, is on 3.950 jamming the
regularly scheduled Liberty Net. Tim and his
pal K5BLB, squatted on the frequency, and refused
to give it up to the 14 year old weekly net. These
two are aided by another criminal, known as the
Doofus Jammer. There is a $1000. reward for
information leading to the arrest of these criminals.
There will be more on the details of this reward
posted in the days that follow.

In the mean time, you can help keep what sanity is
left on HF bands by reporting criminal acts to the
local field office of the FBI. Criminals like KK7HO
who have conspired to have W1WCR killed via
shortwave radio. Here is the URL that contains the
evidence:

http://members.xoom.com/frg9600/500.wav

We hams who love this nation and abhor any person or group of persons
conspiring to commit murder via the federally issued airwaves, have
an obligation to keep our FBI informed. The Federal Bureau of Investigation
works FOR US and against criminals like KK7HO. These shortwave outlaws
are DOMESTIC ENEMIES and are as treacherous as any documented anarchist,
communist or Nazi. Show your patriotism for those who hate our fellow hams.
Keep our FBI informed. The only thing you have to lose is your nation.

* FBI Field Office Contact Information/Home Pages
* FBI Legal Attache Office Contact Information

The FBI's field offices are located in major cities throughout the United
States and in San Juan, Puerto Rico. In addition, resident agencies are
maintained in smaller cities and towns across the country. All of these offices
may be contacted twenty-four hours a day, every day. Check out the Field Office
Contact page for addresses and phone numbers of the closest FBI office to you
-- as well as links to their web sites.
At this time, FBI Headquarters does not accept E-mail. If you have any comments

FCC Amateur Radio Enforcement Log
Listen to Him discuss commiting Mail fraud on amateur radio
http://www.angelfire.com/ga/3950Page2/images/CrossP2.rm

HUDSON, NH [UPDATE]: Extra licensee Victor A. Misek, W1WCR, has replied to a May 7 letter from the FCC that had expressed FCC concerns about the operation of the Liberty Net on 3950 kHz Saturday evenings. FCC attorney Riley Hollingsworth, K4ZDH, had written Misek to report that monitoring on May 1 indicated that Misek's station and members of the group for which he was acting as net control "began transmitting on top of existing Amateur communications that were already in progress." In his response, supplied upon request to the FCC, Misek told the FCC that other stations had yielded the frequency to the net on May 1 and that he's been "diligent in avoiding starting the net 'on top' of ongoing communications" and often moves the net to another frequency where "the jammers stalk us." Misek also has requested a copy of a tape recording supplied to the FCC that Hollingsworth used in deciding to rescind a license modification that would have kept David Castle, WA9KJI, off the HF bands for two years (see "FCC Withdraws License Modification" elsewhere on the AWE news page). Hollingsworth also had asked Misek to justify the Liberty Net's use of Amateur Radio frequencies and said the FCC "cannot tolerate deliberate jamming among licensees, including retaliatory jamming." Misek declined to justify the net's existence, citing no legal requirement in Part 97 to do so. Misek said the net was a forum "to discuss current events and other subjects," and he asked the FCC to "review perceived problems of which I am not aware, so that the net can be brought into compliance should there be a problem."

Could someone bring me up to day on what is going on?
Who is porkbutt and such? I realize that we are starting
to clean up the bands but who are all the players?

I need a list of everyone involved, to include what crimes
they have committed. This includes those on both sides.
It seems that even the guys who opposed the "Bad Guys" are
not without sin.

Maybe it is time to really restrict amateur radio. Maybe
it is time to restrict Americans in general.

73s.... N9NWO

3837. Re: JAMMING: Call These FCC Officials

Newsgroup: rec.radio.amateur.misc

Maybe it is time for the Liberty net to be
shut down. It appears that neither side is
without sin. Trash on both sides. I would
like to see both sides off the air!!

And just because you pay taxes does not give
you a voice. You don't write the checks, the
politicians do.

Pathetic. I must say, though, you've definately have outdone yourself
with those juvenile, witless, prosaic sub-human droolings.
You have permanently made a place in the world as a MORON.
I knew better than to expect an original idea from you, but it is
pathetic to use another's "f(LAME in your case)" tactics.
You're like a pin without a head, always getting into things beyond your
depth. You can always be counted on to hit the nail right on the thumb.
Try harder, STUPID.
Oh, and I won't pay for your unsolicited promotion, and that would be
10-15%. Oh, well, you would just spend it on drugs or booze anyway.

KKKnuckles dragging upon the dung-heaped delapidated horse barn,
"getback" <getback@my-deja.com> is still in his delusional state so he
whines:

>>My good friend SWL, you are so right . Herbie is still here . Pork
>butt is gone, Roger is still getting his lard assed , pimpley faced
>,pear shaped rear end, kicked all over the forum.

Hmmm. Let's discuss your erroneous description of me, shall we?
Not that it bothers me that you choose to assume what I look like, but,
hey it's your _LIE_, so
"lard assed" = Not even close. I'm my ideal weight, unlike the
stumpjumpers, who go on a 14 day diet and the only thing they lost was
two weeks.
"pimpley{sic} faced" = Quite hard to happen in my mid forties, but I know
Fwankie and Lloyd are so ugly, they have yet to lose their virginity.
"pear shaped rear end" = I didn't know your were such a connoisseur
of male buttocks. I suppose it must be that lifetime subscription to
"ASSMASTER" magazine that honed your eye for male anatomy.

>LIFE IS GOOD, to us that is,

When _you_ masturbate to "TEEN BOY" pornography, I guess you
Think that it's the cat's meow.

> Not so good for "SLOPS" with a shoe factory being planted in
>his lard ass every day, every day, Ho Ho.

Hmm, I see a few palsied, weak appendages trying desperately to gain my
attention. Other than that, I have quite the laugh trying to decipher
inane babblings.

> Have you heard the Roger song?
>It should be posted by now?
>Keep up the good work.
>Getback

Polly's ears are so big, if they hooked him up to a TV you would receive
satellite service.

* Keep up the good work Frank, THE FUHRER MANNY W4SS WILL BE PROUD OF
*YOUR NAZI/HITLER TYPE ACTIONS.
*
*After the ARRL disbanded the test team for violations of FCC Part 97
*rules this test team has been able to regroup and continue to operate
*under new management and a liaison that is honest and will not allow the
*unethical games played by the previous NAZI test team to continue.
*KG4U GRAF T. FUCKENMAIER AND AD4PS ARE NO LONGER allowed in the ARRL VE
*program. AD4PS DENNIS HAMILTON WAS KICKED OUT OF THE ARRL VE program
*because of questionable actions during an ARRL test session. Membership
*is all of the major clubs and repeater groups in the area have suffered
*tremendously along with repeater traffic dropping to an all time low.
*Several hams that are currently under the employ of Palm Beach County
*Government and local municipalities have been the targets of
*investigations as a result of their actions such as thievery, ethnic
*slurs, threats against civilians and homosexual actions on county time.
*
*PALM BEACH COUNTY government officials have issued a direct order to
*AD4PS DENNIS HAMILTON, not to use any amateur radio equipment while he
*is on County time as a result of threats made by him to a County
*civilian. Believe it or not AD4PS DENNIS HAMILTON is the R.A.C.E.S.
*officer for PALM BEACH COUNTY. WHAT A DISGRACE TO THE R.A.C.E.S. PROGRAM
*AND TO PALM BEACH COUNTY. KEEP IN MIND THAT &#65533;THE FUHRER&#65533; W4SS MANNY
*PAPANDREAS IS THE HEAD OF THE PALM BEACH COUNTY EMERGENCY MANAGEMENT
*PROGRAM. This program is now suffering from lack of participation due to
*the action of the NAZI managers of this much-needed emergency program.
*Even the faggot infested Wellington E.O.C. has better participation in
*emergency programs.
* As a result of these actions there has been a resurgence of decent
*amateur radio operators who have vowed to take up the fight against this
*insidious cancer which has plagued the hobby here in West Palm Beach.
*There is currently a loose confederation of hams who have begun to rally
*around this silent majority and move toward regaining control of ham
*radio, and sending forth the message that &#65533;THE FUHRER&#65533; W4SS MANNY
*PAPANDREAS and his lying band of disgruntled malcontents NAZI
*STORMTROOPERS don&#65533;t speak for the rest of us.

Poor, poor Polly, he was going crazy, getting on 14.313 absolutely livid about not having phone service. He had somebody call his butt-buddy Billy Jerk and they got on freq. It is too bad he had to move away from Memphis and out where tin cans and string serve their communication needs. Of course, this is his first house with indoor plumbing.
Then Poor, stupid Polly tried to blame others for his bad investments. It seems that ol' Polly took a shellacking in the stock market.

Several members of scout Explorer Post 599 had the privilege of being some of the last hams to operate Barry's station several years ago on a visit. He spent over an hour in his shack talking to the Post about his early experiences in radio, and how he foresaw the future of radio communications. My son, now a computer industry techie, will always remember the thrill of signing off as K7UGA at Barry's station.

Many here in the valley wanted to preserve Barry's house and separate detached radio shack as an intact public museum, but his wife, kids, (and I suspect Paradise Valley) did not want that to happen. We're all just grateful that someone decided to pick up the pieces and reassemble his shack as a static display.

That's great Matthew, and people should definitely try the simple approaches first. One's that I've tried are:

1. Using a single pointed instrument, like a small screwdriver, see if you can gently tap the nut loose (by pushing in a counter-clockwise direction on the nut). By occasionally switching to different slots, you can possibly just work it out slowly.

2. If this is not successful, do as Matthew has suggested, simply take some flat stock (or a fork) and make a custom-shaped two-toothed thing that you can turn with your hand. This can most easily be done with a file or grinding wheel and some flat steel stock, approx .030 to .050 inches thick. In my case all this yielded was a bent tool, since Kenwood had really torqued the nut on.

3. If this is not strong enough, you can move to the next level, a needle nose plier. The best method I've found is to use a very small c-clamp on the sides of the pliers to help strengthen the plier's hinge point. First spread the pliers to fit two of the slots, and to clear the microphone connector housing, and tighten the clamp really tight. If you're very careful, you can apply quite a bit of torque this way, but if you slip (as I did) you'll probably gouge the front panel of your radio.

4. If, incredibly, this still is not strong enough, or you don't want to risk hurting the front panel, then you need to bring in a tool such as the one I've found.

Hey STUPID
If you had bothered to stay in school and get an education, you would have recognized that "cain't" was part of Dan/W4NTI's tagline.
And big Al's juvenile snivelings on the air are any indication of his abilities, well I have nothing to worry about. In any case, like the rest of you slobbering sub-human stumpers/barfies, he wouldn't be able to get the job done.

You're absolutely right Jeff, someday with a quality education I'll actually be able to hang up my McDonalds hat forever. That French Fry oil was really getting to my brain. Thanks for the tip.

> I'm really flattered that you think it's a yarn, but it's all easy to
> verify -- just pay a visit to our lovely state. And spend lots of money
> -- our economy needs it.

You might want to put that quality education of yours to work and find out the real definition of a yarn. I suggest you use Funk and Wagnalls as compared to Websters Unabridged.

> But now that I know it bothers you, I'll be sure to post the NALs.

Ha! Its not the NAL's that bother me, mostly because the NAL's are being handed out to more amateurs than CBer's. Its the fact that some pompus, self righteous, and sadly confused individuals think that because they passed a test that a 12 years old girl just passed, they are self ordained radio cops. It is actually pretty pathetic. In addition, SOME of these same guys feel the task is theirs, to enlighten the uneducated (or under-educated) radio enthusiast because THEY supposedly know more. You seem to be the quintessential poster boy for this group.

> I'm done with these exchanges; they serve no useful purpose. Give me a
> call if you're ever in town, my friend.

That the best news Ive heard in a great while, you take care now.....and, watch out for those sharks!
Ive heard that they are really CBers dressed up in fish costumes

Pathological Liar, yup thats me Jeff, whatever still gives you that warm and fuzzy "superiority" feeling. It probably comes from that lack of a quality education. This is usually what happens when I comment on things that I am not "completely" familiar with, similar to the Hams who spend a considerable amount of time on the CB newsgroups touting rules/regulations and Constitutional Law that they aren't completely familiar with. An arrogant smart-ass perhaps, but a liar I'm not, Im called too many other things and I cant take on any new titles.

Sounds like you're a tad bitter about my previous post.................a good swim will work it off.

A more total misunderstanding of my point would be impossible.

I'd suggest that "Big Guy One" deserves to be on his own "Idjit"
poll for that absurd error; but I'll forbear since it appears that
English is not his first language, making his mistake more
forgivable.

Wonderful world,

I recieved this via email 1 week ago with instructions to post this so
it cannot be traced.
I had forgot to post this then so here it is, am an now doing this while
on vacation.
Stan VE3PET

RADIO HAMS SEE THE TRUTH
It is finally hereï¿½. After months spent enduring the garbage which has
been spewed forth by the members of the JOKER AMATEUR RADIO CLUB, THE
NOMOJO AMATEUR RADIO CLUB, and the even more disgusting GROUP OF CERTAIN
NAZI HAMS THAT FREQUENT THE 146.94 AND 147.045 REPEATERS, AND THE 147.57
SIMPLEX FREQUENCY and their band of mealy mouthed, back stabbing, two
faced lying malcontent faggots, decent law abiding amateur radio
operators in Palm Beach County have begun to take back their clubs and
airwaves.
Fed up with the lies and innuendo, which have caused considerable
division amongst local ham radio operators and Palm Beach County
Government. A cohesive effort to thwart the efforts of this virulent
minority has come forward to stem the tide, which is poisoning our hobby
and causing the PALM BEACH COUNTY government to realize that some of
their employees are thieves, druggies and liars

Recent elections in the West Pal Beach Amateur Radio Club sent a clear
message to these STORM TROOPERS of ï¿½THE FUHRERï¿½ W4SS, MANNY PAPANDREAS
that their brand of amateur radio guerilla politics and HITLER TYPE
PRACTICES are welcome in Palm Beach.

The actions of ï¿½THE FUHRERï¿½ W4SS MANNY PAPANDREAS, AND STORM TROOPERS
KG4U GRAF T. FUCKENMAIER WD4IUD, WALTER PEACE, AD4PS, DENNIS HAMILTON,
W2TIA LEO WINTER, W1OB, JAMES DOVER AND K4LES LESLIE FAGGOT CARTE have
caused the cessation of all traffic nets in the West Palm Beach Area.
Some of these individuals have done serious damage to the long running
West Palm Beach Test sessions.

Even Federal governmental agencies are wondering ï¿½WHAT GOING ON IN PALM
BEACH COUNTYï¿½. They look at Frank Haggerman and have him on their list.
FRANK FOR SOME REASON CANNOT FIGURE WHY THE SECRET SERVICE visited his
HORSEBARN THAT HE CALLS HOME AND QUESTIONED HIM ï¿½WHY DID HE MAKE THREATS
AGAINST PRESIDENT CLINTONï¿½. But we all know Frank is a good radio hamï¿½HE
NOT ONLY MAKE TREATS AGAINST THE PRESIDENT BUT HAS BEEN CAUGHT JAMMMING
ON VARIOUS REPEATERS NUMEROUS TIMES. BY THE WAY FRANK HAS THE INTERNAL
REVENUE SERVICE SETTLED UP WITH YOU YET?

Keep up the good work Frank, THE FUHRER MANNY W4SS WILL BE PROUD OF
YOUR NAZI/HITLER TYPE ACTIONS.

After the ARRL disbanded the test team for violations of FCC Part 97 rules this test team has been able to regroup and continue to operate under new management and a liaison that is honest and will not allow the unethical games played by the previous NAZI test team to continue. KG4U GRAF T. FUCKENMAIER AND AD4PS ARE NO LONGER allowed in the ARRL VE program. AD4PS DENNIS HAMILTON WAS KICKED OUT OF THE ARRL VE program because of questionable actions during an ARRL test session. Membership is all of the major clubs and repeater groups in the area have suffered tremendously along with repeater traffic dropping to an all time low. Several hams that are currently under the employ of Palm Beach County Government and local municipalities have been the targets of investigations as a result of their actions such as thievery, ethnic slurs, threats against civilians and homosexual actions on county time.

PALM BEACH COUNTY government officials have issued a direct order to AD4PS DENNIS HAMILTON, not to use any amateur radio equipment while he is on County time as a result of threats made by him to a County civilian. Believe it or not AD4PS DENNIS HAMILTON is the R.A.C.E.S. officer for PALM BEACH COUNTY. WHAT A DISGRACE TO THE R.A.C.E.S. PROGRAM AND TO PALM BEACH COUNTY. KEEP IN MIND THAT ï¿½THE FUHRERï¿½ W4SS MANNY PAPANDREAS IS THE HEAD OF THE PALM BEACH COUNTY EMERGENCY MANAGEMENT PROGRAM. This program is now suffering from lack of participation due to the action of the NAZI managers of this much-needed emergency program. Even the faggot infested Wellington E.O.C. has better participation in emergency programs.
As a result of these actions there has been a resurgence of decent amateur radio operators who have vowed to take up the fight against this insidious cancer which has plagued the hobby here in West Palm Beach. There is currently a loose confederation of hams who have begun to rally around this silent majority and move toward regaining control of ham radio, and sending forth the message that ï¿½THE FUHRERï¿½ W4SS MANNY PAPANDREAS and his lying band of disgruntled malcontents NAZI STORMTROOPERS donï¿½t speak for the rest of us.

Charlie Newell K2GNZ/?

3889. Re: Kenwood Nuts Revisited

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-09 00:00:00 UTC

One drawback to the cheap methods I've tried is that, especially with the mobile rigs, it's very easy to have the pliers or screwdriver slip and scratch the front panel.

Try the fork deal at your own risk, but remember, it's always easier to get forgiveness than it is to get permission.

I've done it both ways. The tool is awfully nice.

>
> Then why isn't it called HAM type activity???

lol.....My feelings exactly. This is the stereotype that we CBers have endured from many in the Amateur community for many years now. Unfortunately I know many a CBer who eventually became an Amateur, and then looked down upon his radio roots as if embarrassed.

Wasn't it Harry Truman who said: "I will never abandon my friends for the sake of appearance"

August 4, 1999

CERTIFIED MAIL - RETURN RECEIPT REQUESTED

Mr. Alan E. Strauss
17401 NW 47 Avenue
Carol City, FL 33055

SUBJECT: Amateur Radio license WA4JTK

Dear Mr. Strauss:

We have received your recent complaints of interference to a "net", for which you serve as net control, called the "14.247 DX Group". We are reviewing those complaints.

However, there have also been complaints that your group monopolizes that frequency and interferes with ongoing communications when starting the net operations. This is to remind you, and all other licensees who may at times act as net control for your group, that Amateur frequencies are shared frequencies and the "net" has no greater rights than any other licensed operator on any given frequency. A net "taking over" a frequency from existing legitimate communications is considered deliberate interference and cannot be tolerated on the Amateur frequencies.

Sincerely,

W. Riley Hollingsworth
Legal Adviser for Enforcement
Compliance & Information Bureau

Federal Communications Commission

You'll need a crimp tool that will handle 8 conductor RJ-45 plugs. These are the same ones used on Ethernet patch cords and ISDN modems. The Radio Shack crimp tool will only do 4 conductor RJ-11 plugs (unless they've changed it recently).

We've had MUCH better luck with the modular plugs than we ever did with the round ones, though you'd never believe it by looking at one.

Good luck,

-Matthew Williamson, N5VQT

Do you already know : Analyzer2000 has now also a logarithmic frequency axis!

Analyzer2000, one of the world's most fastest and famous audio analyzers,
is now available in the 3.20 version.

It's full functional shareware and can be download at
http://members.aol.com/btf1

+++Superfast spectral analysis with FFT display for time and frequency variant
signals
+++FFT sizes from 256 to 16384 points, dynamic range up to 160 dB, graphical
zoom up to 32:1
+++linear or logarithmic frequency axis
+++Time analysis with oscilloscope and envelope display
+++Sonagraphic analysis with waterfall display
+++Measurement tools like markers, frequency rulers, level rulers, time rulers
+++Easy determination of THD, SNR (SINAD) and VCO phase noise (dBc/Hz)
+++Built-in test generator for sinewave and/or noise stimulation (full duplex
mode)
+++Multi morse decoder
+++PSK31 modem driver for the new RTTY mode
+++Simultaneous recording directly from PC sound card to standard wave file
+++Snapshot functionality (20 seconds post trigger memory)
+++Analyzing of standard wave files or post trigger memory in offline mode

> Then why isn't it called HAM type activity???

You're missing the distinction between CBers who happen to be
licensed but continue to behave like CBers, and hams who behave like hams.
"Ham-type activity" falls into a ninety-plus-year-old well-defined
category (see below for our modern-day government-mandated charter).
Operating outside that category places one outside "ham-type activity."
For example, the CBer who gets his Advanced ticket but says he misses his
illegal free-banding days is certainly on the peripheral edge, walking
that fine line that separates him from the established amateur category.

Hope that helps.

Jeff KH6O

97.1 Basis and purpose (of the Amateur Radio Service).
The rules and regulations in this Part are designed to provide an amateur
radio service having a fundamental purpose as expressed in the following
principles:
(a) Recognition and enhancement of the value of the amateur service to the
public as a voluntary noncommercial communication service, particularly with
respect to providing emergency communications.
(b) Continuation and extension of the amateur's proven ability to contribute
to the advancement of the radio art.
(c) Encouragement and improvement of the amateur service through rules which
provide for advancing skills in both the communications and technical phases
of the art.
(d) Expansion of the existing reservoir within the amateur radio service of
trained operators, technicians, and electronics experts.
(e) Continuation and extension of the amateur's unique ability to enhance
international goodwill.

Whether you agree or disagree with the Liberty Net, I think you'll agree that
it is
a real mystery as to why the FCC has allowed this net to be jammed for at least

7 years.

Gee, you don't suppose that president
Clinton has ordered the FCC to allow the
Liberty Net to be jammed, do you?

3917. Kevin Strom taken to task in rec.shortwave

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-09 00:00:00 UTC
From: kk7ho@aol.communicate
Message-ID: <19990808212754.05024.00001383@ng-ce1.aol.com>
Source record: 134369

kkkevin taken to task, and very well I might add. Mr Peter Maus, my hat's off
to you sir.

kevin strom writes:>>
>>If a maximization of genetic diversity were Nature's goal, or a
>>hallmark of fitness, then it would be to our advantage to mate with
>>Chimpanzees -- and as often as possible.
>
Though there is an obvious remark there that I will forego in this case, this
remark is absurd. Cross species mating is not the issue. Wide genetic
diversity within a species is.
>
>>And Nature would be full of examples of rampant cross-species
>>mating. But in reality, this almost never happens. Name one of any
>>significance.
>
It doesn't. The genetic code is not open to this kind of intrusion. Again.
We
are talking of races of Humanity. Not separate species. Your argument is
not
relevant to the issue.
>
>>Genetic diversity, like the consumption of water, is a good thing --
>>within limits. Too much is as fatal as too little.
>>The European race, which embraces peoples from Sicily to Norway, from
>>Portugal to
>>Siberia, and all the colonies created by our race's civilization
>>around the globe, is in no need of further diversity.
>>
>
Interesting conclusion. Gratuitous...but interesting. You are, however not
the arbiter of this matter. And there are pockets withing the European
community well in need of diversity. The British, for instance, for the
teeth
and their culinary gifts alone.
>
>>The development of new species by subspeciation leading to full
>>speciation and divergence is the mechanism of evolution -- of Life
>>itself. Its chart looks like the branching of a tree. Once they have
>>diverged, it is very rare indeed for branches to recombine.
>
Subspeciation for the purpose of adaptation comes with varing degrees of
taxis.
Again this is not the issue with Humankind. The segregation you suggest is

entirely decided by man, not natural selection. And only a few of man's
agents
at that. Once natural selection has created a divergent branch, it usually
does
not
recombine...but artificially created branches, returned to the wild recombine
and pool to facilitate general adaptability. Purebred dogs, as I have
already
mentioned, return to a general, and widely adapted standard within a few
generations without the gentle interference by man.
>
>>The talk of "purity" is a strawman position, which I did not inject
>>into the conversation.
>
Fair enough.
>
>>No one disputes that Chinamen and Germans and
>>Pygmies had a common pre-human ancestor -- None of
>>that constitutes an argument that the unique qualities of Germans,
>>Chinese, and Pygmies should be wiped out by genocidal racial mixing,
>>however.
>>
>
No one suggests, either, that racial mixing would be tantamount to, or result
in, genocide. Genocide is a strong word. And by its definition, it implies
decision and
action. You are perhaps thinking of extinction. Races do not become extinct.
>
They may be absorbed, however.
>
>> the creation
>>of beings not fit to survive in a state of Nature and without the
>>natural psychological barriers against crossing that characterize
>>true species or subspecies.
>>
>>
>
Again, the argument concerning crossing is not relevant. Nor are we talking
about non viable beings, or being selected in Nature. We are talking about
beings mated or not by decision, not natural selection. The program of
racial
isolation which you promote is not natural. It is by decision. Oddly, by
your
specific race.
>
>>Actually, as a most curious hybrid agglomeration of Semite,
>>European, and Khazar stock of quite recent coalescence, it would be
>>closer to the truth to state that _no_ other group is "descendent
>>from the Jews" -- at least as the Jews are constituted today.
>>

You parse your words carefully. And mix your references until your argument conflicts itself. No one would be decendant from anyone who is constitution is
extant today.
>
>>I'd like to hear your explanation of your theory of universal
>>Jew-descendance,
>
Actually, you addressed it earlier this post.
>
>>which I've heard from no one else.
>
Which matters not a whit. That no one else has said it, doesn't perforce require it to be wrong. No one had ever told doctors to wash their hands to prevent sepsis and contagion. Not until Joseph Lister said it. He had the virtue of being right.
>
>
>
>>Frankly, it
>>reminds me of nothing more than the more extreme Christian Identity
>>origin-tales, except yours makes wilder claims -- it's "Everyone's
>>Identity." Weird

StrawMan at its finest, Kevin.

Given the state of ham radio, its technological backwardness and the age of hams, that's where it belongs.

At least they didn't sell it to some poor high school kid like they would try anywhere from DC to Maine...

SB QST ARL ARLB050
ARLB050 Goldwater ham station to become museum exhibit

The well-known ham station of the late Sen Barry Goldwater, K7UGA, is being donated to the Arizona Historical Society for display as a museum exhibit. The Society plans to set up the massive station console and equipment ''as the late Senator used it,'' said Reba Wells Grandrud, director of the Society's Central Arizona Division.

> Extra..... But that was is in 1963.

Oh, now I see that I've been exchanging posts with a pathological liar.
Even as late as 1976, when I got licensed, one had to go to an FCC office
to upgrade from Novice to General. Monday through Friday, only -- govern-
ment offices were closed on Saturdays. There was no VE testing system as
we have today (and one had to wait about three months for the license
to arrive by mail). In 1963, I believe one had to have been licensed for
at least one year prior to being allowed to take the Extra Class exam.

Yuck, my monitor has "wildcat" cooties on it -- better disinfect it.

How long does it take to put up a 440 repeater ? Excuses and excuses are all WA1JSE has.

First it's the crystals which he had no control over, but get off that frequency coordinator crusade. We all warned you six months ago you'd wait forever. And you got what you deserved.

Now it's "the duplexers have to be retuned." Blah, blah, if you shut up and did it, instead of discussing it three times a day every day since you've been home (one each with WA1KCC, N1VLG and N1YRQ) you'd be done by now.

Course, then you 2 meter CB people'd have nothing to complain about.

\\\\\\\\\\\\\\\\\\\\\\\\\

N1VLG: stop repeating the same story to the same people every week, like all your conversations.

You're such a wanna be it isn't funny.

-the "How many houses Karen and I own Show, Live"
-the saga with her father; do you know how many times you said "he's going to go this week" ? Every week for two months. Like she's the only one whose father ever died ?
-the "Lycos guy"
-the inevitable ass-kissing you render unto W1WEF once a week; he thinks he knows everything, yet can't program his own radios; what does that tell you ? Opine on the contesting or ARRL subjects sometime and see how nice and tolerant a guy he REALLY is.
-You have some nerve bitching out the so-called tourists; tourists don't own houses
-You're not even a Cape Codder, you just go around making comments like you are. Melrose is not Paris.

If any of my group EVER hears your wife on that Alinco HF in her car without upgrading her license from CODEFREE TECH, before the licensing is modified, I'll have the government fall on you like a ton of bricks and it will not be Riley Hollingworthless; it'll be MY friends at FCC. So you keep talking it up, and we'll be watching you.

And it's time the Massachusetts taxpayer stop footing your ham antenna installation bill on your Yukon, every time that sheriff's department gives you a new radio or antenna for that job your wife got you.

/////////////////

Skid, W1TTY, I know you're reading this; go flatuate yourself to death, you're a bore. And take certfied whiney baby Albie with you, picking up W1DPN along the way to the methane gas plant.

//////////////////

W1WEF, you were a riot to watch at Sesuit harbor having a shit fit because some guy (in your judgement) took too long to drive away from the landing. You can't even back your boat up without jack-knifing (heh heh) after thirty years of boating.

If you lean on the horn like a psycho like that, we wonder (not) if you QRM those you don't like, while touting yourself as a "model" ham and "A-1 Op".

I'd get those chest pains checked out, heh heh.

Aloha XE2BGO (XE2_Bean_Gas_Outlet -- nice callsign),
I'm not surprised that you cannot understand the on-topic nature
of the hurricane updates; they have to do with possible future FCC-
declared communications restrictions on certain HF frequencies
(80, 40, and 20m) if these storms move into Hawaiian waters.

Still waiting to read your response to this fellow's request for
assistance:

3931. Hurricane update

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-10 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7optt1rsc1@news.hawaii.edu>
Source record: 134133

HURRICANE EUGENE

EUGENE APPEARS TO HAVE WEAKENED THIS MORNING AS THE EYE FEATURE
DISAPPEARED AND THE CENTRAL DENSE OVERCAST SLIPPED SOUTHEASTWARD
FROM THE STORM CENTER. INFRARED SATELLITE IMAGERY SUGGESTS THAT
THE LOW LEVEL CIRCULATION CENTER IS ON THE WESTERN EDGE OF THE
DENSE OVERCAST HOWEVER...VISIBLE IMAGES LATER TODAY WILL HELP
CLARIFY CENTER LOCATION. SATELLITE IMAGERY SUGGESTS THAT THERE MAY
BE SOME SOUTHERLY SHEAR OVER THE HURRICANE THAT HAS RESULTED IN THIS
DISPLACEMENT AND ACCOMPANYING WEAKENING. CONVECTION IS STILL FORMING
IN BURSTS NEAR THE CENTER HOWEVER AND THIS REMAINS A STRONG STORM
WITH 85 KT WINDS.

INITIAL MOTION IS ESTIMATED TO BE 270/12...A SLIGHT INCREASE OVER
PREVIOUS ESTIMATES. WITH THE INITIAL AND PAST POSITIONS RELOCATED
SLIGHTLY NORTHWARD...THE OFFICIAL FORECAST HAS BEEN SHIFTED BACK A
BIT TOWARD THE NORTH. BUT WITH CONTINUED WEAKENING FORECAST BY
SHIPS INTENSITY MODEL DUE TO MOVEMENT OVER COOLER WATER... LATER
TRACK HAS BEEN ADJUSTED TO A SLIGHTLY LESS NORTHWESTERLY ANGLE.
EUGENE SHOULD TRACK WESTWARD FOR 12-24 HOURS SOUTH OF THE
SUBTROPICAL RIDGE...FOLLOWED BY A WEST-NORTHWESTWARD MOTION TOWARD
A BREAK IN THE RIDGE NEAR THE HAWAIIAN ISLANDS. AS EUGENE MOVES
CLOSER TO THE HAWAIIAN ISLANDS DEEP LAYER WINDS BECOME MORE
DISORGANIZED AND SOME SLACKENING IN FORWARD SPEED IS EXPECTED.

FORECAST POSITIONS AND MAX WINDS

INITIAL 10/1500Z 13.7N 136.4W 85 KTS
12HR VT 11/0000Z 13.7N 138.2W 85 KTS
24HR VT 11/1200Z 14.0N 140.5W 80 KTS
36HR VT 12/0000Z 14.5N 143.0W 75 KTS
48HR VT 12/1200Z 15.0N 145.0W 70 KTS
72HR VT 13/1200Z 16.5N 149.0W 65 KTS

HURRICANE DORA

THE DEEP CONVECTION AROUND THE CENTER OF DORA HAS EXPANDED AND
BECOME MORE SYMMETRIC IN THE LAST 6 TO 12 HRS. DVORAK INTENSITY
ESTIMATES ARE 102 AND 115 KTS FROM TAFB AND SAB...RESPECTIVELY.
THE OBJECTIVE TECHNIQUE IS YIELDING 5.7 TO 5.9 OVER THE LAST FEW
HOURS. THUS...THE INTENSITY IS BUMPED UP A NOTCH TO 110 KTS FOR
THIS ADVISORY. DORA IS LIKELY CLOSE TO ITS PEAK INTENSITY. THE
OFFICIAL FORECAST SHOWS A PEAK AT 12 HRS...115 KTS...FOLLOWED BY
A GRADUAL WEAKENING TREND THEREAFTER...ALONG THE LINES OF THE
PREVIOUS ADVISORY.

THE INITIAL MOTION ESTIMATE IS 270/9 KTS. THE PHILOSOPHY BEHIND THE TRACK FORECAST OF DORA REMAINS UNCHANGED FROM THE PREVIOUS PACKAGE AS THE DEEP LAYER RIDGE SHOULD CONTINUE TO STEER THE HURRICANE ON A GENERAL WESTERLY COURSE FOR THE NEXT 12-24 HRS FOLLOWED BY A GRADUAL BEND TOWARD THE WEST-NORTHWEST BEYOND 24 HRS AS THE RIDGE SLIDES EASTWARD. THE OFFICIAL FORECAST IS VERY SIMILAR TO THE PREVIOUS ADVISORY AND IS IN GOOD AGREEMENT WITH BAMD AND P91E.

FORECAST POSITIONS AND MAX WINDS

INITIAL 10/1500Z 14.3N 119.9W 110 KTS
12HR VT 11/0000Z 14.4N 121.5W 115 KTS

Well
I can't figure aout why they can't get Capt. Truth either. He is in North Carolina too. In fact he is close to Al Abernasty K4OKA. I seem to wonder if that location finder is worth a crap. I mean the only way they got porkbut and Abernasty everyone new who those losers are. I would like to see them nail Squeeky AKA Tenthousand fiiiiiiiiiiiiiiiiiiiiiiiiiiiiiive huuuuuuuuuuuuuuuuuuuuuuuuuuunnnderd dollars!Oh yes and I would like to see them nail Capt Truth and I also would like to see them nail Bathroom man even though he was quite funny. So the fact that these clowns are still running around with no calls and no licenses WHAT IS THE DEAL HERE! So I think that the Laural DF station is a farse. Thats just my opinion I could be wrong

Hi, I am having some problems with interference from a pipe organ into our PA system at our church. When you have a mic channel up you get a click or pop in the PA as you release a note on the organ. I have done some filtering on line inputs and outputs and that helped some. The mixer, an Electro-Voice, has filtering on the XLR inputs, but is not transformer balanced. I tried building a test filter on one of the inputs (as suggested by Shure Microphones) using 3mh chokes with 6-50pf varible caps across them and .01's to ground on the mixer side, also 100uh in the ground line. This didnt help either, I then purchased a Sescom matching transformer that will pass phantom power, (with problem happens only using electric-condenser mics by the way), as suggested by Shure, this didnt help either. It is being caused by the solinoids as they collapase, just on some notes. I can filter this right at the solinoid, but this would require many caps, probably around 150, and if you saw how hard it is to get the solinoids you would understand why we have to go the filtering in the PA route. If any of you hams have had to filter out CW or a similar QRM and can offer some advice I would appreciate it. We could use non-condersor mics, but we really need the electrics as they pick up so well. Thanks for reading this and for your time!

That's where it needs to be to show people that Amateur Radio is
important enough to be remembered as a part of Sen. Barry Goldwater's
life. No matter what you think, the fact that Amateur Radio is going to
be included in a museum exhibit is a good thing for ham radio!

> At least they didn't sell it to some poor high school kid
> like they would try anywhere from DC to Maine...

BTW if that high school kid wanted a radio s/he would find one that
was newer and had an echo built in with all the bells and whistles!
They would never want anything without a 'digital' display THEY WOULDN'T
KNOW HOW TO WORK THE THING! ;)

Source record: 134148

When I first saw this post, I thought AF2Y was playing some type of practical joke. The grammar and sentence structure written by Mr. Hollingsworth did not look as if it came from an accomplished attorney. In fact, the way the words and sentences ran together, I thought maybe it was written by Doc. Words that should have been capitalized, were not. And words that were not suppose to be capitalized, were. That also led me to believe that maybe it was KK7HO who had masterminded this reply.

Today, to my utter amazement, I learned that this WAS an actual response from Riley Hollingsworth! What an absolute embarrassment!! Not only does his sentence composition suck, but he is TOTALLY flawed in legal logic!

Folks, you'd better beware! There is MUCH more to this Hollingsworth fella than meets the eye! We already have the NEXTEL story. And I firmly believe his purpose is to DESTROY ham radio, not to save it. Why would the FCC suddenly decide to enforce a service they haven't touched in ten years???

Will the ARRL, who has jumped in bed with Riley and given him oral sex for the last several months, utter the words "et tu Riley?"

What's even scarier, is how an amateur radio thug like AF2Y was able to come up with the original e-mail from N2SAG.

Willie

3947. Re: Need help with QRM

Newsgroup: rec.radio.amateur.misc

Source record: 134149

I suspect, like you, that the problem is due to spikes from the collapsing fields on the organ's solenoids when power is dropped to each one.

If they are generating enough AF energy to induce a "pop" into your audio lines, the only kind of filter on those lines that would get rid of the "pop" would also eliminate your audio. Double-shielded, 100 per cent. coverage, audio cabling might help, as might relocating the condenser microphones and their cables so there's a larger distance from them to the organ's control wires.

But I think attacking the source will be called for.

Assuming they are DC solenoids, the best approach initially would be to parallel each solenoid's coil with a reverse-biased diode of ample PIV and current rating, oriented of course so that it passes no current when DC voltage is applied to the solenoid. This will absorb the reverse emf from the collapsing field and probably end the sparking at the control contacts which is likely causing the "pops."

Capacitors could be added, too, but they're often unnecessary in cases like this, and, if large enough, could delay the solenoid's release.

You don't need to place the diodes at the solenoids themselves. They could be placed on the terminal strips or switch contacts which feed them -- wherever is most convenient.

Good luck,

--

Kevin Alfred Strom.

3955. wanted: NRD-525 S-meter readout with RS232 cable

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-10 00:00:00 UTC
From: odo <odo@mail.blinx.de>
Message-ID: <37B055B7.FBBFEFFE@mail.blinx.de>
Source record: 134157

Hi folks,

I'm looking for an S-meter readout-extension for the NRD-525 to work with the RS232 computer connection and the SHOC RadioManager 4.3S. Maybe someone is willing to sell it or has the layout that I can build it myself?

Any help is greatly appreciated,

odo

If you are a Mormon and would like an LDS suffix for your callsign, there are plenty of unused calls in both the 2 by 3 K and W series.

If you would like the lists, I can e-mail them to you.
They are current as of today.

I'd say it's okay, the higher the better... Anyway, don't connect the
panel directly to the battery, you have to have a regulator or
something.

Consider the number of aircraft, PD, and FD RF interference complaints the FCC receives daily on their telephone hotline. ARS complaints are not very a high priority. The FCC does not exist to only resolve ARS interference.

Mr Getback, that is a wonderful poem. I noticed your credit for it was "Author unknown". I wonder who wrote it. If you had, you would take credit for it. If you find out who wrote it, you should tell the whole forum. It is a work of art, and the author is very creative. He described the sub-human Wiseman to a "T". Keep up the good reporting....Rileygotcha lover of good literature.....

Translation: They couldn't get the job done with their own "merits," so
they whined and complained to get AOL do do their dirty work.
Poor Lloyd, posting another's e-mail is a serious violation of AOL's TOS.
Lllllloooyd makes you wish birth control could be made retroactive.

3977. 220V to 110V conversion

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-10 00:00:00 UTC
From: Jim Allen <jim_allen@hp.com>
Message-ID: <37B03920.52EE@hp.com>
Source record: 134196

I'll be traveling with a 100W solid state rig. It needs 12V at 20 A. I have a nice Astron 20A switching power supply. My problem is that the main part of my trip is to a place that has 220V.

I was thinking of using one of those travel converters, but that might not be a good thing. The directions say that you can use them with hair dryers, etc., but not electronic irons, ect. I'm thinking that maybe they don't supply a good constant voltage.

I have one that is rated at 1600 watts. Is this going to work? Anyone have a better (and hopefully light weight) idea?

Thanks,

Jim

You mean such as the real, slaveholding (which I do not advocate)
Jefferson ? Perhaps the real, white seperatist Lincoln with his real
(albeit costly) plan to return Africans to their homes ?

Maybe you mean the blacks and mulattoes who were slaveholders ?

Nothing like an uneducated liberal, brain-washed by a WASP Democratic
party that would have died in 1960 had it not pandered to Africans for
power, at their own expense.

How many Africans have you taught in ham radio classes ? Had dinner with
this week ? Are related to ? Leftists love to expound.

I have for free a store/dealer brochure for the FT101 and the FTdx570.
Both are in great shape except where dad wrote in ink some prices on the
second inside cover of both.
Rather then post here some scanned picture's of them, I have posted
these on my web page for viewing. (URL is below)
I just require a self address stamped 8 x 11 envelope, but you must
email me first so I dont get multiple people sending for it. I will
email you back if you are chosen.

They can think it's temporary all they'd like at Bolshevik HQ in Newington.

FCC, like all agenices, is expected to produce revenue in cases of enforcement, as enforcement takes resources and resources cost money.

Do K1ZZ, Propaganda Ministers KE3Z, and N1RL, et al., really believe FCC will let Riley hand out detentions forever ?

The first temporary transfer was the first wake-up call to him that balance is the key to any Renaissance man; something ARRL staff would know nothing about.

Hold on there, VFP-man. I'm jealous. Roger-dodger said I am the one that's going to get kicked off of AOL. He said it yesterday. He even told me bye bye. He sent my post to abuse. I know you saw that. And now you have the nerve to tell me he's the one that got tossed. Well let me say this about that.
PORK BUTT !!!!!!!!!!!!!!!!!!!!!!!!!

4015. _Vandenberg AFB Launch Schedule

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-10 00:00:00 UTC
From: Brian Webb <102670.1206@CompuServe.COM>
Message-ID: <7oo192$84n$2@ssauraaa-i-1.production.compuserve.com>
Source record: 134255

Vandenberg AFB Launch Schedule
As of Monday AUG 09 15:10 PDT

Launch
Time/Window Launch
Date (PST/PDT) Vehicle Comments

AUG 20 01:45-07:45 Minuteman III ICBM test launch (non-orbital). First
missile

AUG 20 01:45-07:45 Minuteman III ICBM test launch (non-orbital). Second
missile

SEP 03 11:21-11:51 Athena II Payload is Ikonos 2 satellite

SEP 15 05:30-09:30 Minotaur Payload is ASUSat, FalconSat, OCS, and
Opal satellites

SEP 19 Unknown Titan II Payload is DMSP satellite

SEP 29 19:00-23:30 Minuteman II Missile defense test. Vehicle will send
simulated warheads downrange. A second
missile will attempt to intercept the
simulated warheads.

OCT 05 00:12-00:20? Taurus Payload is KOMPSAT satellite

OCT 21 Unknown Delta II Payload is Iridium satellites

OCT 27 00:01-06:01 Minuteman III ICBM test launch (non-orbital)

NOV 12 Unknown Pegasus XL Payload is TSX-5 satellite. Missile will
be launched from aircraft staged from
Vandenberg AFB

DEC 15 Unknown Delta II Payload is EO-1 and SAC-C satellites

JAN 18 19:00-23:30 Minuteman II Missile defense test. Vehicle will send
simulated warheads downrange.

Notes

1. The above schedule only lists events that have been officially scheduled by
the 30th Space Wing at Vandenberg AFB.

2. All launch dates and times are given in Pacific Time using 24-hour military
time. Here are some sample time conversions:

00:00 = Midnight
07:00 = 7:00 a.m.
13:00 = 1:00 p.m.
23:00 = 11:00 p.m.

The above schedule makes no distinction between Pacific Standard Time (PST) and Pacific Daylight Savings Time (PDT). PST is in effect from the last Sunday in October to the first Sunday in April. PDT is in effect from the first Sunday in April to the last Sunday in October.

3. The Pacific Time zone lags UTC by 7 or 8 hours, depending on the time of year. The time difference is as follows:

1998 OCT 31 - 1999 APR 03: Pacific Time = UTC - 8 hrs.
1999 APR 03 - 1999 OCT 31: Pacific Time = UTC - 7 hrs.

4. With the exception of Minuteman III and Peacekeeper launches, launch dates are fluid and tend to change over time.

5. Launches for all vehicles except the Pegasus XL are scheduled for the start of the launch window. Pegasus XL launch times are scheduled for the middle of the launch window.

6. Prior to the launch of a classified payload, the exact launch time is kept secret until about T-18 to T-4 hours. The launch window is also secret. Instead of providing the launch window, the Air Force announces a launch period. A launch period is a large block of time within which the launch window falls.

7. Minuteman III and Peacekeeper missiles are usually launched on the first attempt and on-time. Delta II and Titan IV launch attempts scheduled for October through February are prone to last minute cancellation due to upper level winds.

8. For the current status of a pending launch, consult these sources:

Vandenberg Launch Update Line: 805-606-1857

Boeing Delta Launch Hotline: 714-896-4770

Florida Today Web Site: http://www.flatoday.com/space
An excellent source of information. On launch day, a web page with the latest countdown status will be added to the space section of this web site. Beginning at about T-30 minutes, be sure to hit the Reload button on your web browser every few minutes to get the latest countdown status.

30th Space Wing Public Affairs Office: 805-606-3595
This office is manned Monday to Friday from 07:30-16:60 and from T-1 hour to T+1 hour on launch day.

9. The above schedule was compiled from unclassified information approved for release to the public.

Mr Getback

Many thanks for this true poem about poor dumb Roger Weaselman , Wiseman, whatever. I did not know for sure that he is the result of a Female Prison cook and a Life without parole convict. But the poem tells it all. This explains his antisocial behavior. I guess being a bastard is a big load to carry and "SLOPS" is taking it out on the good people of this forum. In any event, keep the good poetry coming from the wonderful poet that wrote that one. I noticed you said "Author Unknown". Is it not possible to find out the author? Just keep up the good work, you are a credit to our forum..... Rileygotcha..returned and ready for action...

I am a professional software engineer and a long time short wave
listener.

I have developed a Windows program that allows you to filter audio in
real time.

Connect the "Line Out" on your short wave radio to the "Line In" on your
PC's sound card.

Use the Windows "Volume Control" program to assign inputs and outputs
and set levels.

The program takes the digitized audio, filters it and plays it out
through your PC's speakers!

No special hardware or modifications needed.

It does require a fast PC - 200 Mhz or better.

For more information and a free Shareware copy of the program visit my
web site:

http://www.winternet.com/~swezeyt/dsp.htm

I hope you will consider purchasing it.

Thanks a lot,
Tom Swezey

PS: I have just created a special version of the program that outputs
the audio in simulated Stereo! You do need a faster PC than 200 Mhz
though, it does a lot of calculations to do it.

4037. Pacific hurricane watch

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-10 00:00:00 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <7ooot7$2dd$1@news.hawaii.edu>
Source record: 134277

From Central Pacific Hurricane Center:

HURRICANE EUGENE

THE INITIAL MOTION ESTIMATE IS 265/10. ALL OF THE MODELS SHOW A MOSTLY WESTWARD MOTION THROUGH 48 HOURS WITH A STRONG RIDGE HOLDING TO THE NORTH OF THE HURRICANE. THE GFDL AS WELL AS THE DEEP AND MEDIUM BAM MOVE THE STORM NORTH OF WEST AFTER 48 HOURS...AS EUGENE NEARS THE WESTERN PERIPHERY OF THE RIDGE. THE OFFICIAL TRACK FORECAST HAS THUS BEEN BASED ON THIS GUIDANCE.

WITH A WELL DEFINED SMALL EYE FEATURE ON BOTH VISIBLE AND INFRARED IMAGERY AND DVORAK INTENSITY ESTIMATES FROM TAFB AND SAB INDICATING A STRONG T5.0 ON THE DVORAK SCALE...CURRENT MAXIMUM WINDS HAVE BEEN INCREASED TO 95 KNOTS. THE FORECAST HEADING OF 270 DEGREES WILL KEEP EUGENE OVER FAIRLY WARM SSTS AND THE INTENSITY IS FORECAST TO 100 KNOTS IN 12 HOURS.

FORECAST POSITIONS AND MAX WINDS

INITIAL 09/2100Z 14.0N 132.9W 95 KTS
12HR VT 10/0600Z 14.0N 134.5W 100 KTS
24HR VT 10/1800Z 14.0N 137.0W 100 KTS
36HR VT 11/0600Z 14.0N 139.5W 100 KTS
48HR VT 11/1800Z 14.5N 142.0W 90 KTS
72HR VT 12/1800Z 16.5N 146.0W 85 KTS

HURRICANE DORA
DORA HAS A SMALL...WELL-DEFINED EYE 5-10 N MI IN DIAMETER. IT IS A STRONG T5.0 ON THE DVORAK SCALE...AND ESTIMATED MAXIMUM WINDS ARE NOW 95 KNOTS. THE HURRICANE HAS BEEN MOVING ROUGHLY ALONG THE 27 DEG C SST ISOTHERM...AND VERTICAL SHEAR APPEARS TO BE FAIRLY WEAK OVER THE AREA. A LITTLE MORE STRENGTHENING IS EXPECTED...WHICH WOULD MAKE DORA A CATEGORY THREE HURRICANE PROBABLY BY LATE TONIGHT.

MOTION CONTINUES SLIGHTLY SOUTH OF DUE WEST. NO IMPORTANT CHANGES ARE MADE TO THE OFFICIAL FORECAST TRACK FROM EARLIER TODAY. THE LATEST NCEP GLOBAL MODEL RUN CONTINUES TO SHOW A 500 MB RIDGE BECOMING BETTER ESTABLISHED TO THE NORTH OF DORA DURING THE NEXT FEW DAYS. SO...A CONTINUED MAINLY WESTWARD TRACK IS LIKELY. THE OFFICIAL FORECAST IS VERY CLOSE TO THE STATISTICAL/DYNAMICAL GUIDANCE.

FORECAST POSITIONS AND MAX WINDS

INITIAL 09/2100Z 14.4N 117.3W 95 KTS
12HR VT 10/0600Z 14.3N 118.7W 100 KTS

```
24HR VT 10/1800Z 14.4N 120.7W 100 KTS
36HR VT 11/0600Z 14.7N 122.7W 100 KTS
48HR VT 11/1800Z 15.0N 125.0W 95 KTS
72HR VT 12/1800Z 16.0N 129.5W 90 KTS
```

Very good point.

> SB QST ARL ARLB050
> ARLB050 Goldwater ham station to become museum exhibit

I think that they should make a dedicated museum for Nixon's tape
recorder even though it is probably now replaced by a CD recorder in the
Oval Office. I like privacy. I wouldn't want any cameras or recorders
in my "Oval Office", when I sit on my oval seat.

> Share what you know. Learn what you don't.

Let me share this: -
From what I recall Goldwater's MARS station contained mostly Collins
Radio equipment. I'm not sure of the facts, but I would not be
surprised if most of that equipment was contributed to Goldwater by
Collins Radio or Art Collins himself.
I had great respect for the late Arthur Collins. I would rather that
station be called the Arthur Collins Memorial station...That would keep
it less political IMHO. I guess I am more impressed by a CEO, who
promoted SSB technology than a politician, who promoted himself for
political purposes, as all politicians must do. Goldwater mellowed in
his old age. He even admitted that he was glad that he didn't get a
chance to bomb China or the USSR.

Just my opinion.

Hams need MORE license classes,
I never met a Ham I didn't like,
Bob Wex w2ilp (I Like Philanthropists)

In your heart, you know he's right.
--Barry Goldwater's political
campaign slogan [1964]--
No problem...He was right...but it
didn't get him elected.
--w2ilp--

A government that is big enough to
give you all you want is big enough
to take it away.
--Barry Goldwater (Oct 21, 1964)--
Does that make sense? No wonder he
didn't get elected. Now-a-days the
politicians on the right want to
GIVE out tax breaks to get elected.
They don't want to remind folks that
that the government may TAKE AWAY
their future social security.
Big? Little?...Size doesn't
matter if you have power and money...
she said.
--w2ilp--

4043. Re: 220V to 110V conversion

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-11 00:00:00 UTC
From: Murray Kelly <mkelly@powerup.com.au>
Message-ID: <37B0F60C.7223@powerup.com.au>
Source record: 134033

I wonder that there isn't a jumper inside that allows
220/110V supplies, like most SMPUs.

It is mostly located near the rectifier and two stacked
electrolytics. If it has only one elecrolytic then you
probably can't change over, but that would be unusual.

Can't answer the travelling reducer. There is no transformer
but the load is remote - thru the other side of the switching
transistors. Tricky! :-)

Cheers.

Hello All,

I am looking for plans for a 2m folded dipole.
We are trying to make an antenna for a 2m
repeater, and I was told that a folded dipole
may do the trick.

I would also like some info on how to phase them.
We plan on phasing 4 of them together.

If you can help, please E-mail me.

E-mail: mikrounit@hughes.net

Thanks & 73,

Mike Green KQ6MU

Of course, that should read "Are there special suffixes. . ." (correcting
wrong-word error).

Hi everyone
I have recently received my Tech Classs license and want to upgrade now to tech plus I just purchased the Gordon West Tapes at Radio Shack and have been doing some practice and listening Can someone tell me the BEST way to upgrade Should I get a Computer program if so what Program also I would like some input on how you folks did it what method. I will definitely obtain the
software if that is the way to go Could use some good advice
Many thanks

Congratulations, and welcome to the Amateur Radio SERVICE. First off
you must decide if you are learning morse code just to pass the test
and discard it, or are you learning it to be able to use it. In either
case you need to get a something to listen to that you wont be able to
memorize. I'd say a random generated computer program may be your best
bet. At least initially.

Id then suggest you buy, beg, borrow or whatever a receiver that you
can listen to the W1AW (ARRL) code practice transmissions. You can
also get this by going to www.arrl.org and finding the new internet
code practice they have just initiated.

I highly recomend you pass you code and then go on the air and learn it
the best way possible. By using it.

Dan/W4NTI

Poor polly didn't do very well in the service. He took a year to get
through basic, then he was relegated to be permanent latrine orderly.

That's why he has such a complex on those who have recieved an honorable discharge, instead of the general discharge Polly received.

Hola, Herman, you are still an idjit!

Weather conditions which may affect your minor island group are
of no concern to amateur radio. "Declared restrictions" of your
FCC are not of concern to us because they only apply in your country.

Take your weather traffic to a local US medium.

4063. Legal Question

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-11 00:00:00 UTC
From: drradioman@my-deja.com
Message-ID: <7os548$c8m$1@nnrp1.deja.com>
Source record: 134053

Since it appears the email to the FCC gets published on this NG, I would like to know how it was obtained. Does the wireless bureau have a public inspection file open to the public that contains letters to public officials? Can I file a FOIA request for all letters pertaning to ham radio and the liberty net as an example? Since I know you hams always have you nose in someone else's business perhaps you know the answer (how 'bout it F2Y?).
Thanks for any legitimate legal cites. I am serious about the question!!

I have a Watkins Johnson WJ-8718-23 receiver in cosmetically good to very good condition serial number 1 (ONE). Comes with a copy of the instruction manual. It lights up but needs some service, a friend of mine said the situation is
on the digital board, a little burn mark also some resistors may need to be replaced on another board connecting to the digital board. He said its defintely fixable. The case, and front panel look good, a few push buttons may need replacement. The price is $475.00 plus shipping, because it need service.
I have a very very heavy duty shipping box for it now.

> AF2Y
> Doc
>
Dr. Hate already burned his source. The Hollinsworth E-mail was copied
to another FCC employee one William Cross who leaks his information to
N4LMC of the Intercon Patching Network. (The Promoters of both AF2Y and
WB2OTK) N4LMC has not learned that someday like Doris she will be hurt
by Dr. Hate. In my case for renewal we filed a brief detailing the
leaking by Cross to Hoffman. The FCC telephone logs proved my assertion
that this path between Cross and Hoffman was very active. Now it is E
mail. When someone inside the FCC leaks out information to the very
people who have been lobbying to get you off the air it is not an
impropriety since they are not, according to the FCC rules, part of the
proceeding. Actually everybody knows they are. They FCC rules are not
designed to be fair. Remember the government is not your friend.
Unless of course you are Ruth Hoffman or Dr. Hate.

> Chuck...K1KW
[...]

Chuck, I too had high hopes when Mr. Hollingsworth came on the scene.

But something very strange is going on in Gettysburg.

On May 1st, Hollingsworth himself checked into a well-known 75 meter frequency, 3950 LSB, during the weekly Liberty Net and announced that he was monitoring. Immediately he was obscenely taunted, and the QSO maliciously interfered with, by long-time jammer W9ART. W9ART openly challenged Hollingsworth to take his license.

W9ART has, additionally, been the perpetrator of numerous meticulously documented cases of intentional interference which were submitted to Hollingsworth over many months.

What has happened to W9ART? Nothing. And his is one of many such cases I could cite.

Also on May 1st on the same frequency, another serial jammer whose malicious interference career spans over seven years of almost daily QRMing, WA9KJI, was calling CQ and issuing taunts over an ongoing QSO a few minutes before Hollingsworth checked in. The ongoing QSO turned the frequency over to the NCS for the Liberty Net while WA9KJI continued calling CQ and monologuing.

What did Hollingsworth, who was presumably listening personally and aided by an advanced HF-DF monitoring system, do?

He cited the NCS, W1WCR, for starting the net over an ongoing QSO, which was manifestly untrue.

To his credit, a few days later, Hollingsworth reversed himself and suspended WA9KJI from HF operation for two years for jamming the QSO that, a few minutes later, turned the frequency over to W1WCR. This, I admit, was appropriate. But why the false cite to W1WCR in the

first place?

But then Hollingsworth reversed himself AGAIN, rescinded WA9KJI's suspension, and wrote a rambling letter to W1WCR accusing him again of starting the net over an ongoing QSO, though no sanctions were issued and a response wasn't even requested.

More information on these events is available at

http://homepages.go.com/~wikk3/hollings.htm

and

http://members.xoom.com/kevin_strom/amateur_3950.html

Furthermore, someone in the CIB is leaking private email, both to and from Hollingsworth, to AF2Y (radiosigs@aol.com), a practitioner of deliberate interference himself. AF2Y is, to put it mildly, a party to the jammer/net controversies on both 14313 and 3950.

AF2Y openly boasts in these newsgroups that he has a "mole" in the FCC, to whom he refers as "agent 48," who provides him with information and exercises influence over CIB matters on his behalf.

AF2Y may boast like a buffoonish clown -- but he has ample proof of his "agent" claim: he posts actual private emails from Hollingsworth to KK7HO and N2SAG, and an email from N2SAG to Hollingsworth, right here on Usenet! (See his thread "AF2Y's STARTLING SCOOP".)

I have confirmed that the emails are genuine.

It is also evident that Hollingsworth was ccing his responses to N2SAG to an adverse party in the case, Tim Volz, KK7HO -- which seems highly inappropriate and inadvisable.

Lastly, since AF2Y has made it public, I encourage you to read Hollingsworth's letter to N2SAG. It's unbelievable that a public servant in Hollingsworth's position could refer to (totally legitimate) interference complaints as "whining" and refuse to have further contact with any amateur in good standing, particularly the long-time promoter of amateur radio to the wider public, _Radio World_'s Al Parker, N2SAG.

Hollingsworth further opines that, since it would be a "full time job" to deal with the jammers on 3950, he wants nothing more to do with it. It seems fantastic, but he is actually stating that the rules may be broken with impunity there, as far as he is concerned -- as long as you're on the "right side," of course.

Something very strange -- and very wrong -- is going on in Gettysburg.

With all good wishes,

Kevin, WB4AIO.

The warnings for these two dangerous storms extend over days, not hours. It's of interest tracking their day-to-day position and increasing intensification, then weakening. The time element you mentioned is a problem, but attached to each update is the projected track and other data -- the projections seem to accurately predict the actual behavior:

HURRICANE EUGENE
INITIAL 11/0300Z 13.7N 138.7W 85 KTS
12HR VT 11/1200Z 13.8N 140.6W 85 KTS
24HR VT 12/0000Z 14.3N 142.9W 80 KTS
36HR VT 12/1200Z 14.9N 144.9W 75 KTS
48HR VT 13/0000Z 15.5N 147.0W 70 KTS
72HR VT 14/0000Z 17.0N 151.0W 65 KTS

HURRICANE DORA
INITIAL 11/0300Z 14.6N 122.0W 115 KTS
12HR VT 11/1200Z 14.7N 123.6W 110 KTS
24HR VT 12/0000Z 14.9N 125.8W 105 KTS

-------My good man, do you think there is any
sort of "security" in the FCC's CIB? They don't know
how to spell the word, let alone practice it! CIB has been
full of leaks for years.

C'mon, you're talking
about the same CIB clowns who had one of their MADFs
(Mobile Automated DF) cars, loaded with almost a
million dollars of the taxpayers' money in electronic
equipment, stolen at the 1996 Olympics! It was
"protected" by a Radio Shack alarm, in a public
parking lot!

You're talking about the same CIB which has an
employee in Powder Springs, Georgia, who plays ham
radio from his office during business hours, spewing out
sensitive FCC information all over the southeast, on a
system of repeaters he owns.

Security & CIB is an oxymoron, always have
been!

Use of the exclamation point shows you're getting excited again. Calm down, my south-of-the-border buddy.

>Weather conditions which may affect your minor island group are
>of no concern to amateur radio. "Declared restrictions" of your
>FCC are not of concern to us because they only apply in your country.

Amateurs throughout the Western Hemisphere would be requested to voluntarily comply. That you give a hint of an indication that you would not abide just shows that you don't consider yourself part of international amateur radio community (which may be true if you are just a V/UHF-only ham -- for the most part, your V/UHF signals are not international in nature).

Ham radio knows no artificial political boundaries. In the past, our FCC has requested US hams to voluntarily remain off certain frequencies which were in use for disaster communications taking place in your fellow Latin American countries. We complied. We hope you would extend us the same courtesy.

>Take your weather traffic to a local US medium.

Your past posts show that you are definitely no judge of what's on and off topic.

Further complaints from you just might result in more barbed wire being put in place along our mutual border. Why not work to improve your country's prosperity so that your fellow countrymen don't have to scramble like little cockroaches across the border to invade our country? Your name-calling ("idjit") does not help to improve person-to-person relations between our two nations.

(from Tim K.)

As near as I can tell, to be a Democrat:

* You have to believe the AIDS virus is spread by a lack of funding.

* You have to believe that the same overpaid public school idiot who can't
teach 4th graders how to read is qualified to teach those same kids
about sex.

* You have to believe that guns in the hands of law-abiding Americans are
more of a threat than nuclear weapons in the hands of the Red Chinese.

* You have to believe there was no art before federal funding.

* You have to believe that global temperatures are less affected by
cyclical, documented changes in the brilliance of the Sun, and more affected
by yuppies driving SUVs.

* You have to believe that gender roles are artificial but being gay is
natural.

* You have to be against capital punishment but pro abortion on demand -
in short, you support protecting the guilty and killing the innocent.

* You have to believe that businesses create oppression and governments
create prosperity.

* You have to believe that hunters don't care about nature, but pasty,
loonie activists who've never been outside Seattle do.

* You have to believe that self-esteem is more important than actually
doing something to earn it.

* You have to believe the military, not corrupt politicians, start wars.

* You have to believe the free market that gives us 500+ channels can't
deliver the quality that PBS does.

* You have to believe the NRA is bad, because they stand up for certain
parts of the Constitution, while the ACLU is good, because they stand up
for certain parts of the Constitution.

* You have to believe that taxes are too low, but ATM fees are too high.

* You have to believe that Harriet Tubman, Cesar Chavez and Gloria Steinem
are more important to American history than Thomas Jefferson, General Robert
E. Lee or Thomas Edison.

* You have to believe that standardized tests are racist, but racial quotas
and set-asides aren't.

* You have to believe Hillary Clinton is really a lady, and Rosie O'Donnell
is not really a man.

* You have to believe conservatives are racists, but that black people
couldn't make it without your help.

* You have to believe that the only reason socialism hasn't worked anywhere
it's been tried, is because the right people haven't been in charge.

* You have to believe conservatives telling the truth should be jailed
but a liar and rapist belongs in the White House.

After waiting several years for the results of a FOIA request
one of the amazing discoveries was that an employee, George Arsics, an
engineer at the Powder Springs Monitoring Station near Atlanta was
actually tracked down by other FCC employees jamming my communication of
on 14,313 and 14,315. He was suspended and later removed. This mater
should have been front page material but has was never given to QST or
any other amateur magazine. (FCC field engineer caught jamming KV4FZ)
Notice how the Enforcement News Service issues daily briefings and
interviews today. They also have the unmitigated gaul to refuse to renew
my license because of lack of candor. Give me a break.

BTW, Bloom, not a court in the land would deny me the right to QUOTE from a published article for non-profit purposes, so take your anti-first amendment attitude and don't let it hit you on the ass on the way to BY1PK HQ.

APA, NRA, NAACP- these groups act as adversaries protecting their members while ARRL's K1ZZ, W6ROD, N1RL, KC1J, KE3Z, et al. say "thank you sir may I have another."

What do I expect, after all they are HAMS.

"ULS Looms Large for Amateurs

NEWINGTON, CT, Aug 11, 1999--In less than a week--on Monday, August 16--the FCC's Universal Licensing System becomes a reality for the Amateur Service. The ULS ushers in an era of electronic, interactive filing and handling of Amateur Radio applications and marks a major change in the way Amateur Radio applicants will deal with the FCC. It also means the demise of the venerable paper FCC Form 610 series in favor of the "universal" Form 605--primarily designed for electronic use but also available on paper. Amateurs filing applications with the FCC under the ULS will use Form 605 for all purposes except--at least for now--club station applications.

Registration is Mandatory

To use the ULS to file an application, renew or modify a license, or apply for a vanity call sign, all amateurs first must register. Individuals eligible to hold a Social Security Number must provide this number--which the FCC refers to as a Taxpayer Information Number or TIN--in order to register in the ULS. This requirement is a mandate of Congress, not of the FCC. The FCC advises applicants still using paper forms to include their Social Security Number or Taxpayer Information Number on the upper righthand corner of the form to speed processing. Applicants should use ULS Registration Form 606 for both electronic or manual registration. To register electronically, visit http://www.fcc.gov/wtb/uls/ and click on "TIN/Call Sign Registration."
To file via the FCC's Wide Area Network, establish a direct connection to the FCC's WAN by using the "Dial-up Networking" utility of Windows 95/98 and call 800-844-2784. Once connected, point your Web browser to http://wtbwww05.fcc.gov/wtb/uls, and click on the "TIN/Call Sign Registration" button.
A paper Form 606 (TIN Registration Form) is available at http://www.fcc.gov/formpage.html or from the FCC's Forms Distribution Center, 800-418-FORM (3676).

Those filing a paper ULS Form 606 by mail will not receive an acknowledgement from the FCC. Amateurs can obtain their FCC-generated Licensee ID Number from FCC ULS Technical Support at 202-414-1250. The Technical Support staff also can redo forgotten passwords.
One big advantage to on-line registration is that the ULS application system checks for errors before data are submitted. This advantage is not available to manual filers."

I have mirrored the RA file from NASA - it is of the Black Sea Capture of the Total Eclipse. You can see it not only at NASA's site, but at http://hfradio.org.

Of course, you can find other great resources on my page, as well. The Amateur / SWL site includes map generation (for instance, create an equidistant azimuth map projection centered on your location), propagational forcasts and up-to-the-minute event information, swap and shop, and more. You can even sign up for a free website.

Your comments and suggestions go a long way to help me make the site useful. It is my hobby... but I am working hard to make the site worth your repeated visit. So come on by. http://hfradio.org.

Coast Guards restrains use of pepper spray, water hoses

(decides to throw 2 meter HTs instead)

August 11, 1999
Web posted at: 10:02 AM EDT (1402 GMT)

MIAMI (AP) -- The U.S. Coast Guard has revised its policy on use of force after an investigation found the use of pepper spray and fire hoses on Cuban refugees was inappropriate.
Water hoses will no longer be deployed directly against people and pepper spray will be restricted to when there is a clear threat to the safety of officers or refugees, Rear Adm. Thad Allen said Tuesday.
The new guidelines came after a June 29 confrontation between Guardsmen and six Cubans off Surfside that prompted widespread protests by Florida's Cuban community.
==========
Yes, instead just have your local city PD fire bean-bags and rubber bullets at white, taxpaying citizens like in Hartford CT, then beat them (Saturday/Sunday nights).

Hey NWO moguls, can you feel it ? It's coming. There are more of us than you.

Need a better reason to shut down and then throw this damnable Liberty Net off ham radio? Those white supremacist bastards who utilize a frequency for the propagating of hate, the kind of which culminates in an incident like this. AF2Y

Alleged L.A. Gunman Surrenders

By BOB MACY
.c The Associated Press

LAS VEGAS (Aug. 11) - The white supremacist accused of wounding five people at a Jewish community center in Los Angeles surrendered today, telling authorities he wanted his act to be ''a wake-up call to America to kill Jews.''

Authorities said Buford O'Neal Furrow, 37, also would be charged in the slaying of a postal worker who was shot Tuesday not far from the North Valley Jewish Community Center.

The man who identified himself as Furrow told authorities he took two cabs for the 275-mile trip from Los Angeles to Las Vegas, one to the California-Nevada line, the other the rest of the way.

He told investigators ''he wanted this to be a wake-up call to America to kill Jews,'' an FBI source said, speaking on condition of anonymity.

He walked into the office and said, ''You're looking for me, I killed the kids in Los Angeles.'' The source said Furrow assumed he had killed some children there.

''At a time like this, I'm glad. Happy is not the right word,'' Jeff Rouss, the center's executive director, said after the surrender was announced. ''I hope they can tell us that this is the bad guy. ... I know it will make all of our members, all of the children at our centers rest a little bit easier.''

Thom Mrozek, spokesman for the U.S. attorney's office in Los Angeles, said federal prosecutors would file charges against Furrow today in the slaying of Joseph Ileto, 39, a postal worker who was killed about an hour after the center shootings Tuesday.

''It now appears that is related,'' Mrozek said. Ileto was returning to his truck when he was shot several times. There was no indication of a theft, according to Postal Service officials.

Los Angeles County Deputy District Attorney Craig Hum said he had already filed a warrant charging Furrow with five state counts of attempted murder. State prosecutors were also weighing hate crime allegations, and Mrozek said federal civil rights charges also might be brought in the center shootings.

Early indications are the gunman acted alone, Los Angeles police Chief Bernard Parks said, adding that investigators are looking into possible links to any groups or other individuals.

Investigators from Los Angeles were traveling to Las Vegas to find out if the man would return to California voluntarily, Parks said. If not, extradition proceedings would begin.

The gunman gave the slip to police who arrived at the center within four minutes of the shootings Tuesday. He allegedly hijacked a Toyota at gunpoint about 20 minutes later - leaving behind a van full of ammunition, survival paraphernalia, and a book linked to white supremacist thought - then dumped the car at a motel and disappeared.

''There is no doubt about it that this is now a hate crime,'' said Rabbi Marvin Hier, dean of the Simon Wiesenthal Center in Los Angeles. He spoke before Furrow's arrest was announced.

The Southern Poverty Law Center, which maintains a database of white supremacists, has information that Furrow belonged to Aryan Nations in 1995, including a photo, said Mark Potok of the Montgomery, Ala.-based center.

''I have a picture of him, Furrow, in a Nazi outfit,'' Potok said today.

Furrow lived at times in Metaline Falls, Wash., once a haven for the supremacist group the Order, The Spokesman-Review reported in Spokane.

He served as a security guard at a white supremacist meeting in the 1990s and had a relationship with Debbie Mathews, widow of Order founder Robert J. Mathews, the paper said. Mathews was killed in 1984 when his hideout caught fire during a shootout with federal agents on Whidbey Island in Washington state.

At the center today, staff, parents and children slowly trickled back to summer programs under the gaze of armed security guards.

''Nobody's going to scare us away,'' said J. Eliad, a parent who was bringing his 4-year-old daughter back.

The wounded include a 5-year-old boy who was hit in the abdomen and leg. He was in critical condition today after undergoing six hours of surgery. He was given a fair chance of recovery.

Also hurt were center receptionist, 68-year-old Isabelle Shalometh, two 6-year-old boys and a 16-year-old girl who was a counselor at the center's summer camp that began Monday. The boys and the counselor were in stable condition today and Mrs. Shalometh, grazed on the arm and back as she dove for cover, was released from the hospital Tuesday night.

The violence was the latest shooting at workplaces and schools across the country, and brought immediate calls for stricter gun control and measures to protect children.

''Once again, our nation has been shaken and our hearts torn by gun violence,'' President Clinton said in Washington, adding that Americans should ''intensify

our resolve to make America a safer place.''

The organization that runs the community center posted armed guards at its several other operations in the region, and security was stepped up at children's programs in other states, said Nina Lieberman Giladi, an associate vice president.

In a red-and-white van found after the shootings, officers found large amounts of ammunition in metal boxes, magazines for an assault rifle, a booklet titled Ranger Handbook and freeze-dried food. Various news reports have said there was a copy of the book ''War Cycles, Peace Cycles'' by Richard Kelly Hoskins, which the Southern Poverty Law Center says is a staple of hate group literature.

A few hours later, a carjacked Toyota was found parked outside a motel in Chatsworth, another suburb in the San Fernando Valley, but hours of cautious searching by SWAT teams failed to turn up the gunman.

John Torres, special agent at the federal Bureau of Alcohol, Tobacco and Firearms, said that among Furrow's weapons was a Bushmaster, a semiautomatic rifle modeled after the Army's M-16.

The Seattle Times reported that late last year Furrow tried to commit himself at the Fairfax Psychiatric Hospital in Kirkland, a Seattle suburb, but got in trouble when he pulled a knife on staffers and eventually pleaded guilty to second-degree assault.

Furrow satisfied his sentence for the assault, said Arthur Wallenstein, director of the King County Adult Detention in Seattle. He was released in May.

Hi all. I recently did a job where we used about 500 LTS2000 Motorola portable trunking radios. Now I'm interested in purchasing some, but before I commit to them I'd like to check some stuff out first. I'm looking primarily for the RSS software so I can see what I can program these radios to do, but I'm also looking for any manuals ie. the radio manual and the RSS manual. Should I decide to buy these radios, I'm planning to buy most of this stuff new, but I don't want to spend all the money and then find out i don't need it. Also I'm having some trouble with my news programs, so if you could cc a copy of your reply to my email address, it would be muchly appreciated! Any info at all will be appreciated!

Thanks in advance for your help!

Let's get the story straight, Herb.

Arsics was not an engineer, he was a monitoring technician, a
grunt watchstander at that. It was also known that his head
was more in union business than in watchstanding.

> actually tracked down by other FCC employees jamming my communication of
> on 14,313 and 14,315. He was suspended and later removed. This mater
> should have been front page material but has was never given to QST or
> any other amateur magazine. (FCC field engineer caught jamming KV4FZ)

It would have been had not the U S Court of Appeals for the
Federal Circuit (which hears appeals of Federal personnel
actions) reversed the dismissal ordered by the Office of
Personnel Management for misconduct in office and ordered it
mitigated to suspension w/o pay for a specified period of time
because the union jumped and screamed about "unfair and unqual
disciplinary treatment" when compared to what other agencies
were doing at the time.

From that time on he was a watched man, and was on the
bye-bye list when the station was closed, and this time the
union screams couldn't save him.

> Notice how the Enforcement News Service issues daily briefings and
> interviews today.

Just to set the record straight, this all took place TEN
YEARS ago, when there was no "Enforcement News Service", and
under a whole different Bureau regime and philosophy where
such publicity was down-played.

The above info is not "secret"' it's all in the public
record, although the opinion of the Federal Circuit in this
case is not a "published opinion" which means that it can't be
cited as precedent.

Hey Josh,

We have 35 of those radios in 900Mhz and they're absolutely lousy. Poor
r'cvr and transmitter preformance, only run about 6 hours on a charge.
If I could throw them away, I would. We've had a lot better luck with the
MTX9000 radios.
But you know what they say about opinions...

Dan

You know, this doesn't surprise me at all.
This KK7HO character has been a real pain
in the ass for years here with all this ignorant
and hateful posts.

Ill bet that Tim Volz is on the
Jewish Defence League 's list and on the
Southern Poverty Law Center 's list as well.

Way to go, KK7HO@aol.com

Unfortunately, people can get programs like that for nothing simply by pointing their web browser at http://www.muenster.de/~welp/sb.htm.

There is also the issue of posting ads to a Usenet group whose charter forbids advertising (see news.answers), but I'll ignore that for now since you have long ago been upstaged by other hams.

3-man wants to know:
>Why are you picking on KC8JBO

It's ok to be new, 3-man. Glad to have you on board. Read the threads.
You'll see that Roger-dodger brings it on himself. Nobody's picking on him
unless he starts it first. The White-Hat gang does not pick on anyone, but
when someone starts it, we fight back. It's part of Project
PORK BUTT !!!!!!!!!!!!!!!!!!!!

Thanks for the background info, Getback. Hope 3-man reads it. He thinks we are going tough on Roger-dodger. No way. I hope you are right that he won't go postal. Who needs that. But you can't be too careful these days. Problem is Roger-dodger has a severe case of Porkius-Buttikus. Even a dose of Vitamin AOL didn't cure him. It's going to take a dose of Vitamin Riley on 313 to get his dysfunction under control. Then he will probably be a fine fellow. Or not. One thing for sure.

Message-id: <9129-37B09750-37@newsd-131.iap.bryant.webtv.net>

When I first saw this post, I thought AF2Y was playing some type of practical joke. The grammar and sentence structure written by Mr. Hollingsworth did not look as if it came from an accomplished attorney. In fact, the way the words and sentences ran together, I thought maybe it was written by Doc. Words that should have been capitalized, were not. And words that were not suppose to be capitalized, were. That also led me to believe that maybe it was KK7HO who had masterminded this reply.

Today, to my utter amazement, I learned that this WAS an actual response from Riley Hollingsworth! What an absolute embarrassment!! Not only does his sentence composition suck, but he is TOTALLY flawed in legal logic!

Folks, you'd better beware! There is MUCH more to this Hollingsworth fella than meets the eye! We already have the NEXTEL story. And I firmly believe his purpose is to DESTROY ham radio, not to save it. Why would the FCC suddenly decide to enforce a service they haven't touched in ten years???

Will the ARRL, who has jumped in bed with Riley and given him oral sex for the last several months, utter the words "et tu Riley?"

What's even scarier, is how an amateur radio thug like AF2Y was able to come up with the original e-mail from N2SAG.

Willie

THIS IS FOR ALL YOU LUNKHEADS AND BIMBOS STILL JAMMING ON 20 METERS. STILL PLAYING TAPES AND CARRYING ON LIKE CRAZIES. GLENN BAXTER IS A VERY WEALTHY MAN BUT RILEY HOLLINGSWORTH CAN AND WILL OUTLAST HIM. ARE YOU BIMBOS AS WELL OFF AS GLENN?ABLE TO AFFORD THE BEST REPRESENTATION? WILLING TO? IF SO, YOU'RE JUST PLAIN NUTS! ALTHOUGH I HAVE NOTHING AGAINST K1MAN, I WILL SAY THAT HE, MORE OR LESS, HAS BEEN CHALLENGING THE FCC FOR A LONG LONG TIME AND WINNING-UNTIL MR.H. CAME ON THE SCENE. ALTHOUGH POWERFUL AND RICH, BASED ON THE BELOW, EITHER BAXTER SATISFIES MR.H. BY PROVIDING THE INFORMATION DEMANDED, OR MR.BAXTER, WITH ALL HIS POWER, INFLUENCE AND MONEY, WILL BECOME ANOTHER N0VFP, A SHORTWAVE LISTENING HAM WITH A TINYTENNA.
AF2Y, Doc

August 4, 1999
ï¿½
CERTIFIED MAILï¿½RETURN RECEIPT REQUESTED
ï¿½
Mr. Glenn A. Baxter
RR 1 Box 776
Belgrade Lakes, ME 04918
Re: Amateur radio station K1MAN
Dear Mr. Baxter:
On June 25, 1999, you were requested, pursuant to Section 308(b) of the Communications Act of 1934, as amended, 47 U.S.C. Section 308(b), to furnish certain information about the operation of your station. This information was requested in light of our monitoring and of station inspection attempts on both May 14 and 15, 1999, dates on which your station was transmitting but there was no one present at its location.
Your response of July 25 failed to provide the information requested by the Commission, as detailed below.
Question 1. You did not provide the name, address and phone number of the control operator on May 14 and 15, 1999, the frequencies and times of operation, or the whereabouts of the control operator.
Although your response stated that you were the control operator for "K1MAN Amateur Information Bulletins", you did not provide the identity of the control operators for all other broadcasts such as, but not limited to, prerecorded interviews, transmissions of answering machine responses, live interviews, live, pre-recorded or automated station identifications.
Regarding the dates and times of broadcasts on those dates, you referred to your web page, but stated that the schedules had been altered "from time to time throughout the years". Finally, regarding your location on May 14 and 15, 1999, you merely stated that you were "both mobile and portable in the local area". Identify whether mobile or portable and at what times, and identify specifically the areas.
Question 2. In the response to this question you identified the control

operator only for "K1MAN Amateur Information Bulletins". You did not identify the control operator for all other types of transmissions and broadcasts, as described above.
Question 3. You did not furnish any information pursuant to this question regarding automated transmissions and control circuit configurations. Your statement that "the three Collins transmitters used are controlled by two Radio Shack timers, catelog (sic) number 61-1065" is insufficient. Please provide details and the control circuit configuration, as requested.
Question 4. You did not furnish the information pursuant to this question regarding programming schedules for the specified time period. You also stated that the web page schedule had been modified.
Question 5. Your response to this question regarding control operators only addressed "K1MAN information bulletins". Please provide the information for all other types of transmissions and broadcasts during the specified time period as requested.
Question 6. No information was provided regarding automated tape control devices.
Question 7. No information was provided regarding dates and times that K1MAN may have transmitted without a control operator being present since the inception of the license term.
Question 8. No information was provided regarding dates, times and frequencies of remote control operation since the inception of the license term, and no schematic of the control circuit was furnished as requested.
We again caution you that Commission rules require that Amateur stations be under the physical control of a control operator, and that the control operator must ensure the immediate proper operation of the station. The rules further require that station identifications be made at specific periods.
We are affording you an additional 20 days from the date of this letter to provide a full and complete response to the information requested, pursuant to Section 308(b) of the Communications Act of 1934, as amended. Under this provision, the Commission is given authority to request information from a licensee or applicant regarding the operation of a radio station. The Commission may revoke the license of a licensee who willfully fails to provide the information, or who submits a willfully false or misleading response. The information in needed by the Commission in order to determine what, if any, action to take in this matter.
Finally, you stated in your letter dated July 25, 1999 that you had not received the letter as a certified mailing, and that our letter had "misrepresented itself as Certified Mail...". We have your signature, however, on a U. S. Postal Service "Domestic Return Receipt" dated July 19, indicating that you signed for the certified mailing. A copy is enclosed for your records.
ï¿½
Sincerely,
ï¿½
W. Riley Hollingsworth

4128. KK7HO: Hides behind the skirts of his daughter!

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-12 00:00:00 UTC
From: Carl Morton <bigcarl@rapidlink.com>
Message-ID: <37B330BE.53D48B62@rapidlink.com>
Source record: 133930
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

Is this the same KK7HO (Tim Volz, Las Vegas)
that blames his daughter for his email spamming?

It's well known that Volz has a deep hatred for
anyone with patriotic ideals. Especially, anyone
associated with a shortwave group known as the
Liberty Net, whose members hold patriotic views.
Recently, these members received a "pornographic"
email from Volz's AOL account.

A few days later, as Volz was jamming the
Liberty Net's weekly 'on air' meeting, he was
confronted about the mass email sent out from
his AOL account. Volz was cornered and lying
wasn't working, so he blamed his daughter, saying
that she had sent the email to many Liberty Net
members.

What a man! Hiding behind the skirts of his
daughter....

Bill Clinton was jogging one day. He ran across a boy sitting on the curb with a cardboard box in his lap. Bill jogged over and ask the boy "What do you have in the box son?" the boy replyed "I got me a box full of Democrat kittens." The Prez was real happy with that answer and jogged on.

The next week Bill Clinton was jogging again this time with Al Gore. They ran across the same boy holding the same box. Bill said "Al come over here with me I want to show you something" They jog over and the president says to the boy "Son tell the vice-president what you have in the box" the boy said "I have me a box full of Republican kittens". Bill said "What do you mean Republican kittens they were Democrats just last week!" The boy replyed "Yes sir, last week they were Democrats but now THEY HAVE THEIR EYES OPEN!!!!" ;)

Sure. Anyone entering my country illegally is a criminal; those who
are successful in their border crossing and then hide, are fugitives.
How do your Mexican authorities handle such cases?

The U.S. is very generous in providing protection for political refugees,
but those attempting to enter only for economic reasons are photographed,
fingerprinted, and booted back home. It's up to you to and your fellow
countrymen to improve your nation's economic welfare.

Regardless, if a communications emergency were declared by our FCC,
would you voluntarily remain off of the frequencies in use? Your
past message gave an indication that you wouldn't.

Our charter reads, in part:
97.1 Basis and purpose.
The rules and regulations in this Part are designed to provide an amateur
radio service having a fundamental purpose as expressed in the following
principles:
....
(e) Continuation and extension of the amateur's unique ability to enhance
international goodwill.

International goodwill, BGO, is a two-way process.

4140. Re: HAIL DAVID J. SMITH !!!!

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-12 00:00:00 UTC
From: Joe Schlatter <w4hh@3wave.com>
Message-ID: <UdLs3.2649$Rh.62955@typ11.nn.bcandid.com>
Source record: 133942

Well, here is the story -- according to the conspiracy nuts.

Many, many years ago an unholy alliance of the Council on Foreign Relations, the Trilateral Commission, the World Bank, the Federal Reserve System, the Bilderbergers, the Knights Templar, and a few odd Jesuits, Episcopalians, and Flower Children foresaw that the world's critical systems would be controlled by computers. So, they conspired to plant the Y2K bug -- remember, all this happened about 30 years or so ago, long before Steve Jobs even dreamed of the Apple IIe.

Meanwhile, this unholy alliance set about sucking the US into the Vietnam War, liberating all the people of color, destroying our public school systems with teachers who practice witchcraft and teach humanism; taking the Bible out of schools; giving condoms to teenagers; electing Bill Clinton President; and doing all kinds of other bad stuff.

From time to time, they had to destroy those few who discovered the Truth -- thus the attacks on David Koresh and Ruby Ridge; the conviction of Timothy McVeigh; the assault on the Liberty Net and other patriots; yadda, yadda, yadda.

Of course, the US military is, meanwhile, practicing urban warfare.

White buses are being stashed all over the country. And black helicopters.

During WW II, Japanese living in the US and many German POWs were put in camps in various places around the country. Those camps are being secretly opened up.

To give you an idea of how widespread this evil thing is: Have you ever noticed the little TV cameras mounted on poles at some intersections? Bet you thought those were there for traffic control. Nope. Actually, they are there to allow Big Brother to track Real Patriots by photographing their license plates and reporting their movements to the UN. I read all about it one day in a tract from some militia crowd.

Now, here is what will happen:

On January 1, 2000, the Y2K bug will attack. Banks will not work; water, electricity, natural gas -- all out; grocery stores will have no inventory (computerized, you know); can't get gasoline (computerized pumps); cell phones, police radios -- all computerized, all useless (only CW will survive); everything will stop. There will be rioting in the streets and the Prez will declare martial law. Because the US military is not big enough to handle it, the Prez (who is a tool of the New World Order) will ask for UN assistance. At that point, the thousands upon thousands of UN troops who have been (are now) sneaking into the country, will emerge, get on the white

buses, fan out around the country, and we will all then be under the control of the UN. This is why the Prez is in such a rush to pass gun registration legislation: everyone whose guns are registered will be arrested.

Only those who have armed themselves and moved to the mountains of Idaho will be free.

Now do you understand?

As for myself, I am stocking up for January 1, 2000. My plan is to rush out on December 30, 1999 and buy up all the soda, beer, pretzels, chips, and dip that I can find; move both TVs into the den; then hunker down and watch college football for three days straight.

The recordings of Volz are real, and he is a known jammer of both amateur radio and the newsgroups -- but aren't you becoming a bit like him when you spam the newsgroups with the same text over and over again?

Also, bringing in the Buford lunatic has nothing to do with Volz or his adversaries, and only serves to inflame.

Let KK7HO reveal his own character; and expose his lies when they aren't so preposterous as to make that unnecessary.

But let's leave the spamming and the phony accusations to Volz and his co-agitators.

With all good wishes,

--

Kevin Alfred Strom.

They have not only ticked HIM off, hell they have ticked off many many
operators with their jamming, moving in on an occupied frequency, Heckling,
Lying, libel, slander, defamation, mail fraud, broadcasting, etc. that they do
on 3950 and in this NG. I doubt that they will ever "Act Right" here or "On
3950". You see they think that it's THEIR private shortwave "broadcast"
frequency. Their "propaganda" programming covers every race, but the white
race, every politician, every government agency, every country, everyone, that
does'nt think, act, believe, or agree with them. They scream First Amendment
this and First Amendment that but then do all they can to deny others who
disagree with them that same right. They play commercial content broadcast
tapes during the "So called" net and claim that it's OK. Then, when someone
else plays a tape they again scream about it. It's apparent that they think
there are two sets of rules, one set for them and Part 97 for everyone else.

I suspect that with their continued ranting and raving, LYING and defaming, and of course the Mail Fraud scheme, known as "Cross Pollination" (which can be heard at http://www.angelfire.com/ga/3950Page2/images/CrossP2.rm) may cause a few to have some answering to do. Hopefully they'll "Act Right On 3950" but many have been hoping for that for years and I don't see it ever happening with that Libnet Gang. To see them listed as a Hate Group go to http://www.bcpl.lib.md.us/~rfrankli/hatedir.htm

I've gotten a lot of responses with a lot of suggestions, and I appreciate all your input into the matter. One thing in common, all want the radio for parts, so here's my angle: I need the MARS / CAP mod for the Yaesu FT2600 mobile. I've talked to Yaesu tech support who said they would give info to a valid MARS / CAP certificate holder, which i'm not. I know this radio's not type accepted...blah blah blah...but this is a fine radio, and I would like to put all my ham / public service stuff into one field programmable radio. Whoever can get the mod for me first will get the radio and mic, I'll even pay shipping. Please help!!! This info is available for free out there, just takes resources that i don't have....
Thanks a ton everyone!

Give us some background on this supposed college professor. Knowing that most college professors are either extremely LIBERAL---and anti American--or so opend minded that you could drive a Mack truck into their heads.

Please inform us of the credentials of this wonderfull college professor.It is wreckless to pass on libelous information without citing the sources and the credentials of that source.
And while you are at it, please accept this bit of information. Nambla and the gay rights organizations have listed the BOY SCOUTS as a hate group. That is because they refuse to allow perversion into their organization. You can check that out by listening to the rantings of those groups.

Now if I said that you were a member of a hate group, The I hate the Liberty Net group, would you then be listed on that list? I think not...even though you seem to hate many things and many people. Your postings are indicitive of that fact. Hate is hate wherever you go and whoever you hate.
This is just my opinion, and I know you will try to come back at me with some acerbic lame posting using perverted phoenetics for my call sign, and I expect that from you. But in order for you to be taken seriously by anyone, you must cite your sources....document their credentials and question their motives.
My guess is that the college professor you cite is a communist homosexual who is also a member of Nambla who hates his mother and apple pie.
Check him out and let me know if I'm right. I bet this professor is closer to my guess than yours.
And no, I will not vistit the 3950 opinion page and I will not leave my opinion.

Hi folks,

I'm looking for an S-meter readout-extension for the NRD-525 to work
with the RS232 computer connection and the SHOC RadioManager 4.3S.

This extension is no longer available by SHOC :-(((

Maybe someone is willing to sell it to me or has the layout that I can
build it
myself?

Any help is greatly appreciated,

odo

4151. Re: Private Email Leak in CIB (was Hollingsworthless' Transfer)

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-12 00:00:00 UTC
From: Will White <wcw@uswest.net>
Message-ID: <37B2A07D.866C5EDC@uswest.net>
Source record: 133983
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

I'll make the obvious defense of Hollingswroth and the CIB: imagine you are hired by the City of New York to kill all the rats in the sewers, subways, and public buildings (actually happened a few years ago). Now imagine that you get all the best equipment, but only 2 assistants to exterminate a vermin population with a 300-year foot-hold in the City.

That is an exaggeration, but only slight. The FCC hadn't done a thing about amateur enforcement in almost 10 years when Riley came along. There is a huge backlog of problems and complaints. There is little money and few staff to do the job. Write your Reps. and Senators and ask for more money for the FCC and the CIB in particular.

I agree that it is fair and reasonable to question the policies at FCC regarding how they prioritize and pursue ARS violators. I really don't know how they decide who and what to go after, or in what order. But it is an enormous job, even with 10 Riley's, even with 50. . .

There is a CB op in my area who jams 10M, hacks repeater controllers, and broadcasts on CB, 10M, and 2M and 440 repeaters. I wish the FCC would NAL him and collect. He is a nuisance to me, and the guy has been reported by many different hams. But I won't make the leap that the FCC isn't doing their job just because they don't take care of a problem near *me* in the time frame I would like. Other cases may be a) more serious b) of longer standing c) better documented d) quicker to pursue and prosecute, I don't know.

Enforcement actions are on the rise, and I notice a measureable change each month in the types and numbers of successful FCC actions. On the bands, listening from 75M to 440, everyone is more aware of the FCC's presence and efforts, and they are talking about them. I even notice a drop in the amount of unidentified repeater uses, jamming (not really a significant problem here, only ocassional anyway), and broadcasting/sound effects/music. It takes time. We can help, as much by lobbying Congress for better funding for the FCC as by making tapes and documenting violations to the CIB.

I did not say a thing about "not posting". I said I was out of this
stupid and idiotic war. As for "qrming" I would like you to provide
dates and times and frequencies, so I can check my log to determine how
much crap you are spreading.

Is this the same KK7HO (Tim Volz, Las Vegas)
that blames his daughter for his email spamming?

It's well known that Volz has a deep hatred for
anyone with patriotic ideals. Especially, anyone
associated with a shortwave group known as the
Liberty Net, whose members hold patriotic views.
Recently, these members received a "pornographic"
email from Volz's AOL account.

A few days later, as Volz was jamming the
Liberty Net's weekly 'on air' meeting, he was
confronted about the mass email sent out from
his AOL account. Volz was cornered and lying
wasn't working, so he blamed his daughter, saying
that she had sent the email to many Liberty Net
members.

What a man! Hiding behind the skirts of his
daughter.

Good point N8WGM!

This guy is the bigest hater on the internet. He
posts 5-10 messages a day promoting the hatred
of the Liberty Net members. And you are right.

Volz's brand of hatred is hatred no matter who it
is directed against.

KK7HO has even threatened the lives of Liberty
Net members - ON AIR! You can hear the recording
of his threats and tone of his hatred on:
http://members.xoom.com/frg9600/500.wav

But I'll be waiting for Volz's response to your
very valid questions. But I doubt if he'll provide
any background info on his (so called)
"professor"

73's Jim.

4169. Where is "Porkbutt"?

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-12 00:00:00 UTC
From: tdavidson@my-deja.com
Message-ID: <7ouqv8$a14$1@nnrp1.deja.com>
Source record: 134001

There used to be a fellow on the air continually who called himself "Porkbutt" that I have not heard in a while..he suddenly vanished. The conversations used to be weird but entertaining. He appeared to have some followers who loved to listen all day to him talk about himself and his expertise in a variety of areas as well as his personal and professional successes, financial and otherwise.

It was entertaining because at the same time he was doing this, another group was on giving information about him that contradicted his claims. (I do have to admit that it seems funny that a "multi-millionaire" would live in a rented house in the woods in the middle of South Carolina or North Carolina or whatever)

There was actually a web page with some fat guy next to a radio desk and in various tennis outfits, etc. that the opposition (the "goodfellas?") apparently put up, claiming that these were pictures of "Porkbutt". They also had something on the page in a bathing suit that they claimed was his "wife" (personnally I think that's going a bit far)

Does this ring a bell? I have seen all these postings that talk about "Porkbutt Gone". What happened to him?

Only because you PUSSIES whined and complained since I was getting the
best of your simple butts. That's the rumphumper way, to run crying to
the teacher when they are getting their butts kicked.

Ah, you are not only an idjit, but also a burro's behind. To improve relations you would put up more barbed wire and call people cockroaches. I am prosperous enough, thank you, and my factory produces goods for my countries prosperity, not to provide cheap labor for some gringo landlord.

Perhaps your computer will be lost in the coming storm we all hope, and your lonely Mr. Dole will finally get his pineapple up to please Mrs. Dole.

It's a badge of honor, knowing I beat you so bad, you take this so
seriously, that you whined and complained because, quite frankly, you
were outmatched. You lacked the intellect to respond to what I typed,
so you changed the subject, just like they do in D.C.
You are not fire ants and yellow jackets, more like ROACHES.
Oh, and by the way, I can live without the internet, mainly because I
have a LIFE, unlike the "white hats" who live for this stuff.

Yes, indeed. Look and learn.

Learn the power that unelected, irresponsible leftist academics have to label dissident speech as "hate" and to falsely imply a connection between political ideas they don't like and crime. Look at how they exercise improper influence over police departments. Learn how Marxist or "minority" thugs who burn down houses and kill people in the streets are not listed in these "hate directories." Look and see how easy it is to smear someone by putting his name on a "list" which also includes the names of known criminals or very unpopular figures.

Learn well not to say anything which they declare to be "hate" or you, too, will be put on the "blacklist."

Look and learn, indeed.

With all good wishes,

Pure fantasy, Timmy.

The 3950 legitimate operators have, on hundreds of occasions, left you and your jammer friends alone when you were having QSOs on the frequency, as any listener can confirm. Even when the subject of your "conversations" was the "evil" East Coast stations, as it usually is, we haven't risen to the bait and have let you blather in peace.

In contrast, you and your jammer friends have often stated that, if your callsigns or names are mentioned, that gives you a "right" to "defend yourself" and talk on top of QSOs where you are not wanted. Examples of this are archived at my web site (url below).

The Liberty Net itself has, for many years, moved to adjacent frequencies when 3950 was in use, even when you and your slope-headed comrades were squatting on the frequency for the express purpose of preventing the net from operating there. I've heard your diseased colleague K5BLB say, innumerable times, "There ain't gonna be no Liberty Net this Saturday night," and you know it.

As far as your attacks on the legitimate operators on the Liberty Net for being "haters," you know you are being hypocritical. People of many different political opinions check into the net. Sometimes the views expressed are controversial. Often I don't agree with them myself.

But I have never heard anything from the legitimate operators on 3950 even remotely like your co-jammer K5BLB's call to murder all homosexuals (archived at my web site) and his statements that Jews are "rats" who should be "punished for all eternity" (tape soon to be archived at my web site).

Yet you support K5BLB, instead of condemning him as a "hater," and, oddly enough hyper-ethnocentric Jews like AF2Y seem to endorse this. Hypocrisy of this magnitude is simply breathtaking.

By the way, I'm surprised you haven't checked, but your "pollination" tape 2 doesn't work -- it cuts off after only 87 kb. Undoubtedly it's a fraud like your other tapes, but I'd like to hear the whole thing so it can be thoroughly debunked.

Honor bright,

<<Joe, have you ever heard that rightwing screwball Smith? He's a biggie on

WWCR(World Wide Christian Radio) but we can replace Christian with Crazy. The apostles must be turning over in their graves seeing how their faith in one man is being so misused and abused. Joe, David Smith is reaping big bucks by being in the business of hate and only a person of low or no mentality, i.e. Lloyd Davies, can readily accept his garbage as gospel. And to top it off take another look at Davies's post. The dope can't spell America.

[...]

Yes, I am sure that you are right about the magnitude of the
problem.

But I had been promised, personally, that certain problem cases were
about to be acted upon. Documentation and recordings were requested
-- and provided.

What happened? All the jammers have gone scot free; and questions
are now being raised in official channels about the _victims_ of the
jamming because their net (of thirty years' standing) talks about
controversial issues at times.

Due to lobbying (and, to put it bluntly, lying), some of which has
been visible and some _sub rosa_, the problem stations (and,
possibly, politically motivated allies) succeeded in drawing
scrutiny away from their flagrant rules violations by casting
aspersions on the political views sometimes expressed by operators
on the net which was the primary victim of the jammers.

Hollingsworth is caught in the middle of this, an unenviable
position to be sure, but his actions of late can only be described
as bizarre and inexplicable:

1) The repeated claims that the new high frequency direction finding
system now controlled from Laurel can find unidentified jammers

within milliseconds within an ellipse of a few thousand feet are now starting to ring a bit hollow, as much as I wish them to be true.

To hear them talk, one would almost imagine that the HFDF system has been equipped with an NAL-bot and a revocation-bot, sending the appropriate legal paperwork to the jammer automatically after the location of the signal has been fixed.

The reality is that none of the HF-unid amateur jammers have been caught, and their flagrant disregard of the rules of amateur radio and of civilized behavior increases daily.

There are only two possibilities: The claims for the system are true and they are, for some reason, not being utilized on amateur HF; or the claims are not true.

2) Reversing himself _twice_ over the events of May 1st on 3950. This is made all the odder since he was personally present on the frequency, making his acceptance of a jammers "affidavit" as an excuse for "changing his mind" about what actually happened border on the unbelievable.

2) First asking for documentation of intentional interference, and a few months later refusing contact with an amateur who spent many many hours doing exactly that -- even calling those who persist in documentation "whiners"! This, to me, seems wildly inappropriate and fantastically inadvisable. (The veracity of the man documenting the interference, columnist Al Parker, N2SAG, of _Radio World_ newspaper, has never been questioned, nor has his meticulous documentation of these cases.)

3) If the chief enforcement "point man" doesn't want to hear any more about the tape-players, obscenity-spewers, and noise-makers on 3950, what message does that send to these malicious individuals? Didn't he realize that? Does he care? How does this square with his public pronouncements that "jamming will not be tolerated" by the FCC?

4) The private email leak which allowed the odious AF2Y to publicly post on Usenet private messages to and from Hollingsworth and others may have been the work of someone besides Hollingsworth, but it certainly happened on the CIB's watch. And it has revealed that Hollingsworth was ccing one of the most notorious jammers, KK7HO, with his emails to Mr. Parker!

I think we have enough at this point to make an investigation desirable.

With all good wishes,

Kevin, WB4AIO.

4191. ICOM Dual Bander HT with EXTRA accessories!

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-12 00:00:00 UTC
From: hr_rig <hr_rig@newsreel.com>
Message-ID: <37B306DC.54AB4177@newsreel.com>
Source record: 134023
Cross-posted to: rec.radio.amateur,rec.ham-radio.swap,rec.ham-radio,rec.radio.amateur,rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.swap

You CANNOT miss this deal if you are looking for a UHF/VHF HT!

I have for sale the following items-
An Icom W32A HT: The radio is in MINT/PERFECT condition! It has NO dents, scratches, or other damage and no signs of wear. I have all of the ORIGINAL documentation, including the manual which came with the radio. I have its ORIGINAL box and all the paperwork for it. I purchased it from Ham Radio Outlet in New Castle, Delaware about 1 year ago. I am the ONLY owner of this radio and it was used as a backup radio. The radio has had VERY LITTLE use and the battery has been charged and discharged only twice. I have performed NO MODS at all on the rig.

That is not all, however!
I am looking to sell with the radio-

An MFJ Dual Band 144/440 MHz Antenna which works well with the radio (model MFJ-1724B). I have the original packaging for the mag-mount antenna and it is in very good condition.

A MAHA Speaker/Mic which also works well with the radio (model MH-800). I have the ORIGINAL packaging for the spkr/mic as well.

An ICOM Power Cable which supplies power to the unit from another power supply or from a carï¿½s electrical system. A cigarette lighter attachment can be added for more portability. This power cable runs the rig AND charges its battery. It is double-fused and in good condition.

A Radio Shack Discone Antenna for outdoor use. The antenna has very wide receive and transmits on 2m and 70cm (440). Please note that I DO NOT have the cable for attachment between the radio and the discone antenna. That would have to be purchased/made separately.

If at all interested, please contact Mark at hr_rig@hotmail.com I am an individual selling one unit with all of these accessories. I AM NOT a reseller. Please feel free to email any questions, concerns, or requests to that email address as well.

All serious bids will be considered!

Mark - hr_rig@hotmail.com (if telephone works better, please email me here and we can set up a time to talk!)

ps. Of course, the wall charger, rubber duck antenna, and all other accessories which came with the unit are included. I even have the belt

clip and wrist strap STILL IN THEIR ORIGINAL, FACTORY SEALED POUCH!!!
Email me soon... hr_rig@hotmail.com

Wow! Congrat on the license. I used the Gordon West tapes to learn CW. It
was great to 5 wpm. Then I couldn't copy 13 wpm. I had to go up to 20
wpm. The problem was spacing for me. If I had any complaint about the
tapes, it would be that after a few listen throughs I'd have the darn thing
memorized. Oh yeah, here is another problem that shows up; the West tapes
and computer programs send perfect code, easy to copy, a real pleasure to
listen to. On the air however, all isn't so perfect (hee hee)
Mr.runeverythingtogether is sending right on top of Mr. Chop. Hecan ts
eemt o fin dan y rythum. So, all that to say: listen and copy off the
air too.
BTW, there are a whole Host of cw programs avalible freeware and shareware.
Look for ham sites in yahoo.com and excite.com. Use what ever works for you
and have Fun!!!

Check Vic's own web page for the latest news:

http://homepages.go.com/~wikk3/hollings.htm

As far as I know, the last contact with the FCC for W1WCR was a rambling letter, sent certified mail and archived on the above site, from Hollingsworth in which he repeated the claim that W1WCR had started the net on top of existing communications (which is manifestly untrue, by the way) and made some other general statements including the rather unbelievable one, considering the long-established and ongoing jamming, that the Commission "will not tolerate" jamming on the amateur frequencies.

The letter didn't ask for a response of any kind, nor did it impose sanctions of any kind.

With all good wishes,

Kevin, WB4AIO.

The judges give this a 5.6 on the Olympic Troll-O-Meter!

The Armenian judges lodge a formal protest, insisting it should rate
at least a 9.8, if not a 10.

The statement is sufficiently trollish, of course, but way too obvious.

It was poorly written, poorly executed, and was so incredibly lame as
to lack the true drawing power of a really masterful troll. Maybe
as high as a 5.9 for the sheer stupidity of the premise, but a 9.8?
Never! The Armenian judges tear their hair out, throw their balalaikas
down in dismay, and perform the traditional Armenian Dismay Chant!
They demand a recount!

BUFORD FOR PRESIDENT!

Congrats on your new license! When learning code do 2 things. Start
learning each letter at 15 or 20 words a minute. Don't start at 5 or
less. I learned the hard way. It took me several years to get to 15wpm
because I learned at 5wpm. Learn what each character sounds like at
15- 20 wpm first with more spaceing between each.

Second, listen to live qso's on the 80 or 40 meter novice bands.
Listen to the ARRL code practice over the air or on their web site.

3rd, PRACTICE sending code with someone. See if there is a code
practice net or class in your area through a local club.

4th - PRACTICE EVERY DAY for at least 15 minutes each session.

Good luck and welcome to ham radio!

I was told that at least at one time there used to be surplus electronics warehouses on Canal steet in New York City. Does anyone know if they still exist and if so where??

Cutting through all the BS and eggo trips between Clint and GGS.
In the beginning there were some problems with both ADMS and EVE not setting half frequency bits in the radio on 2k5hz or something like that.
Have you tried manually entering the desired frequencies and seen the result.

Things like cables will give clone error.

The question I have is are you ussing the standard belt clip. As oversize screws can kill 70cm output power.
Did the radio use to hit the repeater OK?

Cheers
Eric.

<<Congrats for once again bringing it to the attention of all. I've seen similar posts for many months. Yep, these fellows make a career out of hate and I think that WB4EIO is getting paid for it-he's Kevin Adolf Stromitler. However, the leader of the pack. W1WCR and one of his chief stooges,N2SAG have made a gigantic mistake. Both TICKED OFF Riley Hollingsworth and he's one dude you definitely do NOT want to tick off. NO WAY! And so let's sit back and watch the events unfold as the Liberty Net pits its "best brains" against THE ENFORCER!
AF2Y

question!!

There's a serious way to have serious legal questions
answered via an online question page. It's not
free, but it's economical, secure, and competent:

LEXSTRAT.COM provides answers to specific legal
questions for a flat credit card charge
(depending on question complexity and factual
situation) LEXSTRAT.COM provides an evaluation by email only,
no sooner than one hour, and usually within 48 hours from
transmission of a hypothetical prepaid inquiry. If necessary,
LEXSTRAT.COM asks by email for any needed additional
information before creating its single, final report,
which focuses upon several or all of the following:

* General discussion of legal concepts which may apply
* A selection of suggested alternative strategies
* Identification of possible legal "gotchas" or hidden traps
* Pertinent citations of statutes, rules, cases
* URL's of possibly useful Internet resources
* Identification of pertinent textbooks, treatises, courses,
educational materials
*(Having nothing at stake in the outcome) A realistic assessment
of success or failure

A link to the LEXSTRAT.COM secure question portal is at:

http://www.lexstrat.com/nolawyer/myquestion.html

Mostly verry true with one important missing element.

The republicans and democrats are controlled by the same interest groups and have the same agenda.

One party with two heads

The Republicrats.

Look at the GOP sell out on Gun control.The phoney tax cut they are pushing.

The GOP wanted government to grow a few points less than the Democrats at the last presidential election.The differance between the GOP and DEM.

OH 3 or 4%,

In the word of Governor George Wallce the diferance is tweedle dum tweedle dee

FCC Amateur Radio Enforcement Log

HUDSON, NH [UPDATE]: Extra licensee Victor A. Misek, W1WCR, has replied to a May 7 letter from the FCC that had expressed FCC concerns about the operation of the Liberty Net on 3950 kHz Saturday evenings. FCC attorney Riley Hollingsworth, K4ZDH, had written Misek to report that monitoring on May 1 indicated that Misek's station and members of the group for which he was acting as net control "began transmitting on top of existing Amateur communications that were already in progress." In his response, supplied upon request to the FCC, Misek told the FCC that other stations had yielded the frequency to the net on May 1 and that he's been "diligent in avoiding starting the net 'on top' of ongoing communications" and often moves the net to another frequency where "the jammers stalk us." Misek also has requested a copy of a tape recording supplied to the FCC that Hollingsworth used in deciding to rescind a license modification that would have kept David Castle, WA9KJI, off the HF bands for two years (see "FCC Withdraws License Modification" elsewhere on the AWE news page). Hollingsworth also had asked Misek to justify the Liberty Net's use of Amateur Radio frequencies and said the FCC "cannot tolerate deliberate jamming among licensees, including retaliatory jamming." Misek declined to justify the net's existence, citing no legal requirement in Part 97 to do so. Misek said the net was a forum "to discuss current events and other subjects," and he asked the FCC to "review perceived problems of which I am not aware, so that the net can be brought into compliance should there be a problem."

GIVE ME A BREAK!!!!

Must be a clintonista out there if you believe this bs.

The violence in this country is due to a complete moral bankruptcy
in America and a desire to give up freedom for a little security.

The socialist government in DC can well use these incidents to further their
agenda standing on the bodies of victims. Victims created by their liberal
system of education.Dope,(mandated by the schools (rydalyn prozac),values
clarification, and destruction of all faith in God,Morality, and decency have
been the lefts agenda for decades.

I'm hearing from allies and seeing posted news of Polly's suspenders for 90 and of SAGGY's for 365 from HF. Where did this info come from? I can't find it on ARRL Web Extra, the oral RAIN REPORT, the written RAIN REPORT and the FCC Daily Indigestion. For heaven's sake gentlemen-post things that are true and if there is no substantiation, don't lie to get attention. Will one of you fine gentlemen come forward with PROOF? Thank you from the bottom of my kishkas.

You CANNOT miss this deal if you are looking for a UHF/VHF HT!

I have for sale the following items-
An Icom W32A HT: The radio is in MINT/PERFECT condition! It has NO dents, scratches, or other damage and no signs of wear. I have all of the ORIGINAL documentation, including the manual which came with the radio. I have its ORIGINAL box and all the paperwork for it. I purchased it from Ham Radio Outlet in New Castle, Delaware about 1 year ago. I am the ONLY owner of this radio and it was used as a backup radio. The radio has had VERY LITTLE use and the battery has been charged and discharged only twice. I have performed NO MODS at all on the rig.

That is not all, however!
I am looking to sell with the radio-

An MFJ Dual Band 144/440 MHz Antenna which works well with the radio (model MFJ-1724B). I have the original packaging for the mag-mount antenna and it is in very good condition.

A MAHA Speaker/Mic which also works well with the radio (model MH-800). I have the ORIGINAL packaging for the spkr/mic as well.

An ICOM Power Cable which supplies power to the unit from another power supply or from a carï¿½s electrical system. A cigarette lighter attachment can be added for more portability. This power cable runs the rig AND charges its battery. It is double-fused and in good condition.

A Radio Shack Discone Antenna for outdoor use. The antenna has very wide receive and transmits on 2m and 70cm (440). Please note that I DO NOT have the cable for attachment between the radio and the discone antenna. That would have to be purchased/made separately.

If at all interested, please contact Mark at hr_rig@hotmail.com I am an individual selling one unit with all of these accessories. I AM NOT a reseller. Please feel free to email any questions, concerns, or requests to that email address as well.

All serious bids will be considered!

Mark - hr_rig@hotmail.com (if telephone works better, please email me here and we can set up a time to talk!)

Of course, the battery wall charger and an original battery are included as well as all of the other parts in the original box!

Well, I was the victim of internet based credit card fraud today; I rarely use my card (thus my knowledge of 5 places where the perp could be, not including INTERCEPTION), but seems some really dimwitted fool chose me as a victim- big mistake, pal o' mine.

The loser set up an isp account in its name; not to fear, the Bureau is already working on it, as are the relevant corporations. This is a true tale.

Now do you see (and I'm sure the imbecillic children and federal lackies who disagreed before will do so again) why our SSNs should not be floating around a SERVER CONNECTED TO THE INTERNET ?

Don't believe the ARRL LIE of "security". They'd have the 80 percent of hams who are non-members' licenses CANCELLED if it would save their bands and their JOBS. Incentive licensing PROVED THIS.

The difference between giving your number to the Army and such is, no where can you go and access a server with said information, even THEORETICALLY, unless you're on the DoD LAN.

Part II: My HF rig has little to no power outpout on 20-10 and you know what ? Good riddance. I'm not giving Kenwood 100 some-odd bucks an hour to "repair" a rig I barely used.

Thus, I will say again with, as Lincoln said, my "feet firmly planted": HELL WILL SERVE KLONDIKE BARS BEFORE I GIVE FCC MY SSN, as long as said data can be accessed by hackers via the web.

And they'll find themselves in court first. I do love test cases.

I have three peices of radio gear for sale.

1) Yeasu FT 2400 50 watt 2-meter moblie $150.00 you pay shipping and insurance. This is a good little 2-meter rig apperance wise its a 7 on a scale of 1 to 10. It comes with a keypad mic. Drope me a line if you are interested.

2) A Kenwood TS 120 moblie HF rig. This rig is a very simple HF rig. It covers the convental HAM bands 80 thru 10. It does about 70 watts out and is a again a 7 on a scale of 1 to 10. I'm asking $300.00 for the radio mic and power cord.You pay for the shipping and the insurance.

3) Dentron Clipperton L HF amplifier. I have $550.00 in the amp, with all the work I have invested in this amp that is what I have in it. But in all farness the amp isn't worth what I have in it so my asking price is $400.00. You pay shipping and insurance. This amp has been redone inside. I replaced the caps last year. It now ask 220uF caps in the power supply in stead of the 100uF and it also has new 1N4007 diodes too. The band switch is also new. The 572bs have very low use. I put new 572bs in the amp back in Feburay. I think I have fired it up 3 times since then. This amp is my back up. I run a SB 220 and I have another amp coming from Maryland for a back up amp. Its a pair of 813s built in the 1960s by my grandpa. Fullwave bridge powersupply the whole nine yards. So I don't need the Clipperton L any more.

I'm looking to get another HF rig. My TS 930 power supply crapped on me. I have ordered a new Power supply board for the rig and I just put a new PLL board in the rig. I really will not know what the damage is until I get the new power supply board installed.
I will also listen to any trades that anyone might have to offer for all of the equipment above. Heck I'll swap it all for another WORKING TS-930S/AT with the AM filter or TS-940S/AT with the AM filter.
I also have the Narrow CW filter that I would trade for the 6 KHZ AM filter that goes in the TS-930S/AT.
Thanks for reading and 73 from Oris

Not really, Here's why:

"Remember that Clinton had campained for liberals. He also was a liberal.
Norman Thomas, six times candidate for the President of the United States on
the Socialist Party ticket said: 'The American people will never knowingly
adopt Socialism, but UNDER THE NAME Liberalism they will adopt EVERY fragment
of the Socialist program until America will one day be a Socialist nation
WITHOUT KNOWING HOW IT HAPPENED.'"

Hi.... I am in the process of putting together a bunch of stuff that I've had kicking around here together to make a 4-1000 amp... I have at least a dozen schematics for GG amps but almost nothing for Cathode grid driven amps using the 4-1000. The only real drawback that I've seen so far is that it requires a slightly more complicateed power supply (screen voltage and the like) but I already have the stuff to incorporate that into it. The main advantage that I can see for this amp is that it takes very little drive to send a 2500 watt bird slug into oblivion (or at least to cause the needle in the meter housing this slug to gently tap the right hand stop pin). I can imagine, though maybe not rightly, that this amp may be a little more difficult to tame, parasitically speaking, but then I plan to swamp the heck out of the input grid circuit to knock down the input drive to a level that won't cause the tube to exceed the plate dissipation rating....in my way of thinking this would seem to knock down a "possible parasitic" enough to where it would never get started... where is Rich Measures when you need him...anyway, any info would be helpful I'm looking to start this project in the next 1-2 months....

Timmy has finally flipped. He's responding to his own messages,
perhaps because so few pay attention any more.

Just in case you are reading this, Timmy, you still haven't fixed
the second "pollination" file. It still terminates after only 87 kb.

Oh, and by the way, your friend K5BLB was on the air tonight, at
11:06 PM Central Time, explaining why he doesn't watch television
sports any more, using the "n-word" twice, and averring that there
were too many such people on the screen "playing with their balls,"
as he put it.

I assume that he will be the next subject of your great crusade
against "hate."

Hope this helps.

Have a day,

Kevin, WB4AIO.

I'd like to discuss it, but since, as I've told you before, the file
is defective (it terminates after only 87 kb), I haven't been able
to listen to it all yet.

And, Timmy, don't you think you just might be spamming the
newsgroups with your seemingly endless multiple postings of the same
text over and over? I mean, once someone has read your, shall we
say, "material," is it really going to help him understand or agree
with you to read it several hundred times? Do you actually believe
that anyone is going to do that?

Just wondering.

Esse quam videre,

It works well, though the low light sensitivity is not up to where I'd like.
I have a unit in the car, with the interface cable to the TM-V7. I think
they were a little silly not to power it from the car, since it does eat
batteries rather quickly.

Yes, we do. As I mentioned, many of the operators on there talk in a
strange manner and say weird things. As I mentioned, the rig is in on
my boat for comms with the fishing fleet.

>I applaud your courage man! Those truckers on Channel 19 really appreciate
>the technical skills your tutelage can offer.

As I mentioned, the fishing boats (and thus, the radio itself) are on
Channels 21 and 22.

Consider saving my comments so they don't have to be rewritten for you.

Take care, Jeff

By careful wildcat. "Jolting Jeff" is already embarrassed enough by associating with us maleducated CBers. You wouldn't want to upset him to the point where he'll say something rash. I hear Jeff (known herein as "JJ") also regulates and moderates the alt.radio.kids.walkies.talkies Newsgroup in his spare time, which keeps those pesky 11 year old future CB wanna-be's in line. What would we do without people like him, and isn't the world a much better place because of it?

Bravo Jeff. Im sure the ARRL has some sort of plaque for such efforts, as a matter of fact, Im personally going to draft a letter to Congressman Elhers because I feel good deeds should'nt go "un-noticed".

>protocols... is there a transmitter in the thing or just a receiver?

Standard pagers are receivers only - the transmitters transmit "blind"
and get no acknowledgement of whether the page was actually received.

So this pager will not transmit RF that's detectable from a long
distance. It will have a local oscillator, and knowing the model of
the pager you could find the frequency. But range will be short.
More seriously, *every other* pager of that model, plus any other
pagers of other models tuned to the same service and using the same
local oscillator, will also radiate the same frequency. Finding the
one pager you are looking for would be near impossible.

Dave

Dont confuse them Roger, the truth is a three letter word to these
fools. Six didn't pop much down here, hope you did a few. I remember
doing MS back in 63 on 2m cw. Didn't have ssb back then.. hi. Did it
with a homebrew tx using a single 832a, probably got about 10 watts
out, to a homebrew 10 element fed with 300 ohm TV line. Rx was a
Hallicrafters SX-111a and a Ameco Nuvister converter. Those were the
days. HI HI. If these guy's that are attacking me put in one tenth of
the time I have for this service they would have some inkling of what
Amateur Radio is supposed to be.

Gee's Jeff. Why did you stop co-posting to the CB Newsgroup. Apparently a "one-way" debate is easily won eh? I guess it is one way of satisfying ones ego.

>Jeff KH6O writes with poly-syllabic heinous hyperbole (I bought a new dictionary):
> I was told that you claimed to have been a long-time licensed ham who
> turned in his license in the 70s due to some dispute with the ARRL.

Sorry, but your email pals (or your comprehension of my posts) are sadly mistaken. No-one ever said I was ever a "long time" Ham (unless one considers 3 years or so a long time). I actually discovered what assholes *many* Hams were early in the hobby and I had the sense to abandon it because my personality would have me arguing with them every moment (hmmmmm, is it 1977?). Pomposity and self-rightousness are two traits that I really didnt/dont need to acquire, especially from many of these emotionally stagnant, and societally naive group of individuals.

In addition, at that time, I saw the ARRL as an "ill progressive" and "self serving" organization dedicated to the interests of a vocal minority who spent the majority of their time looking backwards as compared to forwards (Im told things haven't changed much; I guess there is something to be said for consistency). And finally, running home everyday to eat a meal, then to give my wife a peck on the cheek, and to finally retreat to a radio shack until 2 AM every night wasn't really what I considered as "having a life".

Actually the biggest reason is because I don't look good wearing a "Pocket Protector".

>Jeff KH6O writes even more heinous hyperbolae (oops):
>If that were true, then you would certainly know the licensing procedures of
> the period in question. (No Saturday testing, no General exam given
> outside an FCC office, not possible to upgrade from General to Extra
> in two weeks.)

Sorry Jeff, but if you did comprehend my posts, you would have noticed that I did say that I took the General Test at the Customs House located in Boston, MA which was a FCC branch office in 1975. We disagree about the test being taken on a Saturday, which if you do some investigative work on your own, (I don't consider this conversation worthy of the effort), you will find
that Saturday tests were given at this location quite frequently. I'm sure there are some "still living" Amateurs up here in New England that can drag their hemorrhoids over to a computer to verify this for you, if you are that

concerned. Or perhaps the illustrious ARRL can provide you with an old testing schedule.

As far as the Extra Class ticket was/is concerned, I repeated in my posting what I was told (which I am assuming by the responses was incorrect). Unlike those who become physically and sexually stimulated by Ham nomenclature, I really don't consider the Amateur License structure worth remembering. I was never an Extra Class ticket holder nor would I ever consider wasting time on such an endeavor, again, "A life is a terrible thing to waste".

Now, if you want to debate Constitutional Law with regards to Telecommunication Issues, Ill by more than happy to engage you in such because I wouldn't be citing second hand information.

4279. Radio Gear FS

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-13 00:00:00 UTC

Cross-posted to: rec.radio.amateur.misc,rec.radio.cb,rec.radio.swap

I have three peices of radio gear for sale.

1) Yeasu FT 2400 50 watt 2-meter moblie $150.00 you pay shipping and insurance. This is a good little 2-meter rig apperance wise its a 7 on a

scale of 1 to 10. It comes with a keypad mic. Drope me a line if you are

interested.

2) A Kenwood TS 120 moblie HF rig. This rig is a very simple HF rig. It covers the convental HAM bands 80 thru 10. It does about 70 watts out and is a again a 7 on a scale of 1 to 10. I'm asking $300.00 for the radio mic and power cord.You pay for the shipping and the insurance.

3) Dentron Clipperton L HF amplifier. I have $550.00 in the amp, with all the work I have invested in this amp that is what I have in it. But in all farness the amp isn't worth what I have in it so my asking price is $400.00. You pay shipping and insurance. This amp has been redone inside. I replaced the caps last year. It now ask 220uF caps in the power supply in stead of the 100uF and it also has new 1N4007 diodes too. The band switch is also new. The 572bs have very low use. I put new

572bs in the amp back in Feburay. I think I have fired it up 3 times since then. This amp is my back up. I run a SB 220 and I have another amp coming from Maryland for a back up amp. Its a pair of 813s built in the 1960s by my grandpa. Fullwave bridge powersupply the whole nine yards. So I don't need the Clipperton L any more.

I'm looking to get another HF rig. My TS 930 power supply crapped on me.

I have ordered a new Power supply board for the rig and I just put a new

PLL board in the rig. I really will not know what the damage is until I get the new power supply board installed.
I will also listen to any trades that anyone might have to offer for all of the equipment above. Heck I'll swap it all for another WORKING TS-930S/AT with the AM filter or TS-940S/AT with the AM filter.
I also have the Narrow CW filter that I would trade for the 6 KHZ AM filter that goes in the TS-930S/AT.
Thanks for reading and 73 from Oris

Scout leader found hanging from tree has foot amputated

Sunday, August 8, 1999

Associated Press

ORLANDO - Doctors have amputated the left foot of a Boy Scouts leader who was found hanging naked upside down from a tree as part of what investigators described as a solo sex act.

An hour-long surgery to amputate Clark Anthony Getz's foot above the ankle was successful, a spokesman for Orlando Regional Medical Center said Friday.

Getz, 42, has been hospitalized since Monday after authorities found him dangling from a rope about 12 feet off the ground. Blood flow to his feet had been cut off for more than 24 hours.

The left foot "developed an infection that needed to be taken care of before it got worse," said hospital spokesman, Joe Brown. "When you deprive a part of the body of oxygenated blood for 24 to 26 hours, tissue begins to die."

Doctors ran tests on Getz's feet, which were swollen, discolored and barely had a pulse when he was taken to the hospital. A prosthesis would be considered.

Florida Park Service rangers heart Getz yelling Monday before they found him in a densely wooded area near the Lake-Sumter County line. His wife had reported him missing Sunday after he didn't return from a bicycle trip.

Getz had tied himself from a tree but had gotten tired and couldn't pull himself up to untie the ropes, said Sgt. Nick Pallitto, a spokesman for the Lake County Sheriff's Office.

His situation was captured on a video camera that he set up.

"He was doing something sexually to himself. I guess that's his thing," Pallitto said Tuesday. "It may have been an autoerotic situation."

It was discovered? That's interesting since there is no Clark or Anthony Getz in the FCC amateur database, and no licensed hams in Florida with the name Getz. So who did the discovering?

Tim ka8ddz

KKKevin Strom your such a ridiculous Spin Meister and Liar it's amazing. You need help , I just realized that your believing your own LIES and PROPAGANDA..
A problem that you also seem to be having kkkevin is that no one ELSE believes YOU.
Trying to "fluff" SAGgy into being somebody, that's damn funny. When is he gong to quit living with his mother in law?
Calling me a Jammer - That's a damn lie.
I got pissed one night, and ever since then you've been spin doctoring the hell out of it. LOL Hell it was two years ago kkkevin - let it go.
Your statement that "all the jammers have gone scott free" Is another damn LIE. LOOK how many Riley has caught. YOUR problem is you want him to catch people who ARE NOT Jammers. LOL That's why your spinning around and around.
Then you go on to creating a conspiracy in the CIB about other organizations suposedly having something to do with it.
kkkevin SPINNED
>Due to lobbying (and, to put it bluntly, lying), some of which has
>been visible and some _sub rosa_, the problem stations (and,
>possibly, politically motivated allies) succeeded in drawing
>scrutiny away from their flagrant rules violations by casting
>aspersions on the political views

No one has to "cast aspertions" kkkevin everyone knows. The truth is the truth no matter how much you spin doctor it to look otherwise.
LOL LOL LOL LOL LOL LOL LOL LOL LOL
Where's the gray space men and the black helicopters kevin?

>To hear them talk, one would almost imagine that the HFDF system has
>been equipped with an NAL-bot and a revocation-bot, sending the
>appropriate legal paperwork to the jammer automatically after the
>location of the signal has been fixed.

You HEAR voices again kkkevin? Get some help. LOL

4297. FCC JAMS HAMS!!!!

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-13 00:00:00 UTC
From: n0vfp@aol.comnospam
Message-ID: <19990812222532.11073.00000318@ng-cs1.aol.com>
Source record: 133961

http://www.atlcom.net/~geozim/index.htm

FCC JAMS HAMS,
the FCC is a criminal faction of a criminal executive branch,
engaged in a criminal coverup which is further protected by
a criminal Justice Department, also a party to the crime.

The FCC knowingly, intentional, deliberately, willfully and
purposefully supplied radio jamming equipment to the FBI and,
with reasonable assumption, to the US Air Force for the
purpose of jamming AM and FM radio broadcasters, TV
broadcasters and the Amateur Radio Service. The amateur
station jammed was defined as a Title 47, Code of Federal
Regulations, Part 97.405 Station in Distress, relaying
emergency communications critical to safety of human life.
As a result, appoximately 100 people died.

FCC is also a deliberate violator of the Freedom of
Information Act, using an exemption of documents not
allowed under the list of exempted documents types.
Whereas, I have not posted details on this to the
website yet, you can read the 36 descriptions of
FOIA requested documents in the FOIA Administrative
Appeal letter. All of these are denied on the basis
that I have figured out what the nature and content
of the documents are, and the FCC does not want to
verify my logical, analytical and deductive work
that has narrowed down the documents almost to the
point of writting them myself. Actually, I already
have two of the documents, and stand ready to
publish them, as soon as I can arrange to leave the
country, and post them from a safe place.

Neither last nor least, but in closing on FCC criminality,
FCC is a criminal co-conspirator with FBI to classify
documents pertaining to the criminal operations of the
FCC and FBI. Such classification of documents for the
purpose of avoiding criminal prosecution is specifically
described as a criminal violation in any Executive Order
pertaining to such classification at the time of
classification.

Get the FCC out of the control business, contact your
Congressman, ask that he support Henry Hyde of the House
Judiciary Committee to convene a hearing into the
criminal coverup by FCC Chairman Kennard of the

criminal operations of the FCC and FBI and US Air
Force engaged in Communications Act violations.

Get the American Radio Relay League out of its
tyrannical misrepresentation of the amateur community.
Publish the fact that the ARRL board voted not to
reveal the criminal operations of the FCC and FBI.
What decent person would be a member of such
a criminal organization. If you are in the ARRL,
moral integrity demands you quit.

4299. Novus Ordo Seclorum - New World Order.

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-13 00:00:00 UTC
From: n0vfp@aol.comnospam
Message-ID: <19990812222707.11073.00000320@ng-cs1.aol.com>
Source record: 133963

Dear Newswatch Magazine Listeners/Readers:
In the March 1 and April 15, 1999 Newswatch, we took an overview of the plan for world government thus far. We gave the history of the founding of the Illuminati on May 1, 1776, and their avowed purpose for a Novus Ordo Seclorum - New World Order.

Albert Pike of Little Rock, Arkansas, had reached the head of all the lodges of the Ancient and Accepted Scottish Rite of Freemasonry when he worked with Mazzinni of Italy to layout the final program to achieve world government toward the end of the 20th Century or shortly thereafter.

Pike stated there had to be many revolutionary wars and three world wars. The third world war would destroy atheism, which they would establish as a seen enemy of the western world of Christianity [Russia], and Christianity at the same time. The horror would be so extensive that the world would finally lay down their will to remain as sovereign nations and would accept their world government.

Once Russia had been overthrown during Pike's predicted first world war, V. I. Lenin added to the program to achieve world government by the close of the 20th Century. FIRST, they would take Eastern Europe. That was achieved out of the ashes of the second world war. After each world war, an international organization was attempted to be set up for world government. After World War 1, the League of Nations was attempted unsuccessfully. After World War 11, the United Nations was successfully established by Communists who had infiltrated into the Departments of State and Treasury.

Albert Pike's two of three world wars had now been achieved by 1945. As Lenin said: Eastern Europe was taken as the first step of three in establishing world government. SECONDLY, Lenin said they would take the masse of Asia. High infiltrators in government set up the strategy to supply

Mao Tse-tung's Communist insurgents with Lend-Lease military equipment through Russia to Mao. The State Department then cut off all military aid to U.S. ally Chiang Kai-shek of free Nationalist China. With no part replacements, ammunition and new equipment, Chiang retreated to Formosa. The SECOND step of Lenin's plan was underway. During the 60s and 70s, Vietnam, Laos, and Cambodia along with other smaller nation-states fell to Communism.

The THIRD step was to surround the United States and cause it to fall: 1) From infiltration from within; and 2) Disarm the U.S. and Communism's military might from without.

Cuba fell to Fidel Castro with aid from the U.S. State Department and the mass media - newspapers and TV. The following years have seen Central and South American nations embroiled in government overthrow or guerilla warfare with

Communists. Someone has forgotten to tell them and their African counterparts that Communism is supposed to be dead, and the cold war is supposed to be over. Was there a PLAN by which the United States would fall into a deep sleep militarily, so Communism could eventually SMASH us with a clinched fist?

Did V. I. Lenin say that "treaties are like pie crust, to be broken?" Is that one of numerous reasons WHY you cannot TRUST Communism to be dead, dying, decaying, and now acceptable to be friends with the modern world? What if THEY have infiltrated as Fabian Socialists to gradually legislate Socialism/Communism upon the American people? Would any President do so? We showed clearly the Republican President's Reagan and Bush records to determine an answer! Would a Democratic President prepare America for its fall and collapse into a one-world-government with United Nations military occupying our nation? Read on and judge the facts as to where truth lies!

Sincerely,

David J. Smith

P.S. We now have our new building!

Don't get too carried away, Joe. Better check DJ Smith's web page and see if college football is y2k compliant.

All the pretzels and beer have been allocated for use by the UN troops in the white tanks and black helicopters.

Sorry to bust your bubble, Joe, but it don't look good from here. If you'd read the fine print in DJ Smith's web page, you'd know these things. Now go on down to the gun show and buy that M-16 and a few cases of ammo and a few thousand MRE's and go home and get ready.

Yeah, that's the ticket. MRE's and college football. Whatta way to ring in the new.

First let me say sorry for posting here, but all my newsgroups (namely rec.radio.swap) are not working! Something with Ma Bell they say?

I have the following for sale:

MT1000 99ch, one batt. excellent cond. $275
MT1000 8 or 16ch. one batt. exc. cond. $175
P200 6 ch. five batts. about 93 date, good cond. $160
rapid charger for above radios excellent cond. $35

all are UHF 438-470 and plus shipping conus. Please email if interested.
thanks!
Randy

Herb Schoenbohm wrote in message:
>>>After waiting several year for the results of a FOI request...

Mr. Schoenbohm:

By all means, please have your attorney research
this case! If what I tell you is NOT true, please post
back here and say so.

I worked with National Treasury Employees Union
Atlanta for a while. The case was well known. At
no time WHATSOEVER in any way, shape, or form,
under ANY circumstances did Mr. Arsics cause
interference to KV4FZ. After receiving back pay
(with interest) and all benefits, Mr. Arsics later
VOLUNTARILY resigned and transfer to a
military job, as an intelligence analyst, I think.

Good luck in your legal battle.

Larry H. (ham call withheld)

P.S. The FCC lost this case EVERY step of the way,
NOT just in the U.S. Court of Appeals. They lost at
the arbitration hearing, they lost reconsideration of
the arbitrator's findings, AND they lost an appeal to
the U.S. Court of Appeals. It's all in the public
record.

4319. Do you have to be stupid to be a Republican? Was: Re: Democrats

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-14 00:00:00 UTC
From: Joe Schlatter <w4hh@3wave.com>
Message-ID: <Nyot3.197$x04.19285@typ11.nn.bcandid.com>
Source record: 133733

Do you have to be stupid to be a Republican? Consider:

1. After the 1996 election, the Republicans were going to expose campaign finance misdeeds by the Democrats. The Republicans were led by Senator Fred Thompson who saw the next President every time he looked in the mirror. Thompson opened his hearings with allegations that the Chinese got US technology in exchange for contributions, yadda, yadda, yadda. What happened? Dems had to give back a few hundred thou, one inconsequential clown was convicted of some technicality.

2. Bill and Hillary got involved in some dumb land development deal. I am a builder and developer in East Tennessee and what they did -- sweetheart financing, etc., -- is typical of local deals. But, the Republicans decided that Whitewater was as big a threat to the Republic as Watergate and they set out after the Prez. What happened? They got a minor law partner of Hillary's who was playing games with his billing.

3. When the special prosecutor could not find anything in Whitewater, he started in on the Prez's inability to keep his pants zipped. Only it turned out that his two star witnesses -- Arkansas state troopers -- couldn't find the truth if it were glued to their butts.

4. So the special prosecutor kept calling in witnesses and threatening them until he dug up Monica. Big fat deal. In spite of the fact that over 70 percent of the American public said "Leave it alone," he persisted and the Republicans looked like a gang of over-zealous asses with their impeachment lynching.

5. Now, we have various prognosticators predicting budget surpluses. So, the Republicans are saying, well, let's cut taxes because we have all these surpluses. Never mind that over 65 percent of the American public says, forget tax cuts, get Medicare and Social Security on solid footing.

6. Never mind that 85 percent of the American public wants serious gun control -- just so the NRA pays the campaign bills, Republicans will kiss Charlton Heston's ass.

7. And now we find that Mr. Family Values himself -- Newt Gingrich -- is separated from his SECOND wife for reasons on -- are you ready for this -- unfaithfulness. Just like his first wife, whom he served with divorce papers when she came out of cancer surgery.

Just remember: Vote Republican. It's easier than thinking.

4320. AF2Y supports BIGOT R. Wiseman

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-14 00:00:00 UTC
From: getback <getback@my-deja.com>
Message-ID: <7p3usk$no2$1@nnrp1.deja.com>
Source record: 133778

Why does AF2Y support the proven bigot and racist R. "SLOPS WISEMAN?

ANSWER: Af2Y is a trouble maker who uses his religion to raise hell. He could care less if anyone is a bigot or racist, he loves and wants to cause trouble and hurt people. His support of Wiseman shows that this is true. He has a long history of troublemaking on the amateur bands, and now he is a internet thug.

Dear Getback:

Thanks for the info. Another gentleman wrote that Porkbutt's ticket was taken by the FCC. Does this mean, in fact, that we Porkbutt will NOT be back? I am not sure who his suckboys are but I think there were some W2s and W8s and some Canadian guy who loved to listen to him tell stories all day and virtually all night.

I don't want to say who sent it, but I did receive an e-mail stating that Porkbutt is a well-known music producer and the reason why we don't hear him anymore is because he has some kind of big project on the west coast for some police show. So there sure is a lot of information floating around, although this last tidbit seems like a stretch.

I hate to kep asking questions, but everyone is also writing about "Herb". Are you guys talking about KV4FZ? If so, I think I know that story.

Time does not permit me to give you the complete story on "PORKBUTT" and his great musical ability {according to him), at this time, but I will, when time permits send you the complete story about him. His Canadian friend misses him so much. I have to leave , but will write you later about "PORKBUTT", and fill you in on that great amateur "HERBIE" from the Virgin Islands/

Wow...that's weird...I was going to give you their Web site at:

http://www.peetbros.com/

Eddie - how did you "approach" them? I mean, did you tell them that your
Web site is going to highlight the quality and affordable nature of
their systems, and that you need this replacement part?

That sounds just too weird for a company like Peet Bros. to NOT support
its clients with spare parts.

And your proof of my bigotry and racism is? A post made by somebody
else, that was posted as raven at hgo.net? Please providew prof that I
am a racist or bigot. I'm afraid it's the rumphumpers and barfies that
win out on that.
KV4FZ supports Neo-Nazis, so that speaks for itself.

:
: Why, so you can send in your black helicopters like they did to David J.
Smith?
:
:

No need. Already the Military Intelligence community is being used by
law enforcement to build lists of folks who need watching.

Besides the "black helicopters" are the new BlackHawks that replaced
the old Hueys. It is just that you guys are out of touch.

:
: Thanks,
:
: Jim

There are converters but they are much to bulky.

Besides if you have a switching power supply, it is
already setup to do either 220V or 110V.

: They have not only ticked HIM off, hell they have ticked off many many
: operators with their jamming, moving in on an occupied frequency,
Heckling,
: Lying, libel, slander, defamation, mail fraud, broadcasting, etc. that
they do
: on 3950 and in this NG. I doubt that they will ever "Act Right" here or
"On
: 3950". You see they think that it's THEIR private shortwave "broadcast"
: frequency. Their "propaganda" programming covers every race, but the white
: race, every politician, every government agency, every country, everyone,
that
: does'nt think, act, believe, or agree with them. They scream First
Amendment
: this and First Amendment that but then do all they can to deny others who
: disagree with them that same right. They play commercial content broadcast
: tapes during the "So called" net and claim that it's OK. Then, when
someone
: else plays a tape they again scream about it. It's apparent that they
think
: there are two sets of rules, one set for them and Part 97 for everyone

else.
: I suspect that with their continued ranting and raving, LYING and
defaming,
: and of course the Mail Fraud scheme, known as "Cross Pollination" (which
can be
: heard at http://www.angelfire.com/ga/3950Page2/images/CrossP2.rm) may
cause
: a few to have some answering to do. Hopefully they'll "Act Right On 3950"
but
: many have been hoping for that for years and I don't see it ever happening
with
: that Libnet Gang. To see them listed as a Hate Group go to
: http://www.bcpl.lib.md.us/~rfrankli/hatedir.htm
:

The problem is that you are as bad as the people you hate.
Boths sides are not without sin. Both sides need to be removed
from amateur radio.

Just throwing away a transaction receipt away in the trash is a good
way to share your CC number.

Or the guy at the store who double slips your card in the machine when
you buy something then goes on a shopping spree with your number.

There are lots of ways to get your _plastic_ ripped off!

This is the second appeal to worldwide operators for cooperation is assembling a unified list of call book servers available via the WWW. If you have additions, deletions, or ideas for this list, please forward them to me directly.

Thanks to all those with corrections and deletions from the original post.

I see this as an evolving FAQ, and decided on these groups because of their international audience. I will repost as a FAQ if I get enough response to fill in the gaps.

If someone from Germany and the UK would send a note telling me why the old sites seem to be dead or now commercial, I will include an explanation in the FAQ.

Thanks for your help, and 73 from Mike in Fort Myers, FL

I don't care to get in a pissin contest, but perhaps you can answer this for me. Why is it that you folks that profess to support Herby and his fight (amongst other things) for free speech, advocate silencing someone that opposes your point of view? Don't you think this is a bit hypocritical?

Please clarify, what exactly was said? What specific "war story" are
you refering to? Possibly the one where I got my back, leg, neck
twisted almost in two by the Chicom rocket? Or is it the one where I
was NCOIC of the Combat Forward Control operations in Saigon during TET
of 68? Or maybe the one about me flying over Cholon counting the
bodies I helped kill? Tell you what assole, you want to see the
paperwork? Ill send it to you. I have lots of spare time now, since I
am nearly housebound defending your right to show your ignorance.

Herb
For one George didn't steal from anyone. He just got caught jamming! You did steal from innocent people you didn't even know! I geuss the fact that you didn't know made it ok to steal from them! You have been convicted and the reason you can't renew your ticket is the fact that you used amateur radio to teach others how to steal. Give you a break? Why should the FCC give you a break when you stole countless amounts of money with your long distant phone calls on other people's bills. Yes you didn't steal from them directly because all they had to do was complain about not making the phone call and then the telephone provider had to pick up the charge which in time will give the service providers reason to one raise rates thus stealing from everyone or two make the person who didn't make the call pay for it then you are stealing from a innocent person.
I still wonder which is worse stealing from strangers and teaching other people how to do it or stealing from friends. Either way in my book you are no better then Richard Whiten. Amateur radio is better with out either one of you!
Thats Just My Opinion I Could Be Wrong!
BTW I forwarded this thread to Mr Hollingsworth I would like to know who has been sending letters that were addressed to Mr Hollingsworth out to Mr Obrien. This happened in the spring and was brought out in a Dallas GA courtroom when Mr Obrein lied under oath about his webtv account. So the CIB has a leak. Its just a matter of finding the mole.

Hey Doc this Tony Heatwole is the best example of "liberal education in
America" that I have ever seen. Please allow me to pick it apart;

"Why does the Republican party exist?"
Because it is the party of Lincoln, the party that freed the slaves
of PARTS of the confederacy.

"The confederates, tax evaders need a place to go"
By confederates, I assume you are refering to southerners. Most of
the "tax evasion" is done by big business and their loopholes. The
southern people are hard working, law abiding citizens of a country
they would prefere to be seperate from.

And BTW, the Democratic party, is STILL the MAJORITY party of the
South.

Have a nice day, dummy.

For good, simple passive grid amplifier that works with any tetrode, go
to http://www.oceanfree.net/ei9gq.

In case I've got that wrong, just enter ei9gq into Alta Vista.

No complicated screen supplies. Circuit is based upon the G2DAF linear,
which was popular here in the '60s, using 813's.

Last night the Athens Alabama idiot committed libel per se by labeling Riley Hollingsworth a communist. In the event Riley was out of town, I sent him a copy because it probabaly will be off the board upon returning. Looks to me, based on the following posts ,that lamebrained Lloyd knows he might be in doo doo. Here are his excuses. By the way the reason I'm posting my statements HERE rather than directly to N0VFP is because the big brave white supremacist has locked me out of his mailbox. Hell, W9XN did the same thing to me regarding his BARF Discussion Forum. Two yellow bellies. Lloyd Chittum and Martin Davies-hell one could fit right inside the other-interchangeable uncouth louts- but Martin's so damned fat we could add a Schoenbohm too. AF2Y, Doc

So what Doc. We as American citizens have the right to be critical of Government employees. I was using a little tounge and cheek, You can never take a joke can you??

Tell that to people who on a daily basis call Bill Clinton a Communist. Tell that to David J. Smith.

LLoyd Davies, N0VFP /4 NCI 2841, ARRL member
Athens, Alabama EM64

Interesting to note that Davies is saying that it's okay for him to slander and libel because one of his heroes, David J.Smith, does it. In other words, even though Lloyd the Toid knows that Clinton is NOT a communist, he'll still parrot the "Party Line." I remember a Junior Senator from Wisconsin named Joseph McCarthy doing that around 1951-53 and he ended up disgraced, broke and then dead. Lloyd knows that Riley Hollingsworth's no communist but because the ultra radical rightwing in this nation is hungry for power, everyone associated with the federal government is fair game. Personally speaking I hope Riley does to Lloyd what Morris Dees did to Tom Metzger-TAKE THE FARM!***

>their systems, and that you need this replacement part?
Just told them I had a paddle bronen off in a storm. They replied "the assembly has to be individually calibrated", but it is simply a magnet and a metal strip inside a plastic hub that slides on and off. I was able to fabricate a replacement wind cup and balance the assembly to restore operation 'till the UV radiation got to my Plas-T-Pair. Have since purchased a new Davis Weather Wizard III which I believe to be a much better instrument and the Davis folks will sell replacement paddles etc.
>That sounds just too weird for a company like Peet Bros. to NOT support

The only thought I have is to pick a time and day to page
her, and have all of the residents of the region stop and
listen for a page. I know that's a huge long shot, that it
is on, and somewhere where it could be heard. And you'd
need the cooperation of the police, and the local media, and
lots of random people. Maybe you could even get the local
pager companies to only page that number for some 10 minute
time period?

Grasping at straws, but a sad story. Good luck.

Just random thoughts

Getback:
I just received an e-mail from someone who claimed to be Porkbutt telling me to stop asking questions, calling me "WTIA" (whatever that is), and telling me that I am "jeluos because I will never have the lifesyl" he has, and that in fact we was writing the reply as he was "finshing the pan of peach cobber" that his "blond bomshell wife" made for him this morning.

All the misspellings are left in, so sorry if it's hard to read.

What is the URL of that page that the "goodfellas" put up making fun of Porkbutt (and supposedly showing his house, with big speakers with the grilles removed like in a college dorm room)? Now I think that maybe the photos on that page were indeed Porkbutt, because anyone who eats a whole pan of peach cobbler in one sitting is probably going to be pretty fat unless he has a pretty active metabolism.

Tom

I presume that you live in the South because of the "4" call, although you could in fact live anywhere.

Anyway, *I* live in the South and neither I nor anyone I know wants to be separated from this country. Your comments are a slap in the face of Southerners who have given their lives for this country and who have long ago gone way beyond the civil war.

If YOU want to live in the past, fine. But don't you DARE presume to speak for other Southerners who have sent men to the moon, who have pioneered the transistor and who regard themselves as fully participating, contributing citizens of the United States.

If we'd rather live somewhere else, please explain why so many of our immediate past presidents were from the South? It sure seems like the people who supported them didn't want to be somewhere else.

Your kind of ignorance really pisses me off, especially because it is your kind who runs his mouth in an attempt to drown out the rest of us.

When you get a clue, call me.

== Dave

Dave,

In NO WAY should my comments be considered derogatory to the Southern
people. My comments were directed to a "fool" that don't know basic
history. If you find my comment about southerners prefering to be a
country of their own, then I can only say that here in Alabama the
majority of folks I KNOW think this way.

As for the Southerners spilling blood for this country, etc. I know, I know...Again you took it out of context. I am refering to the days before the 19th century ended and the turmoil of recent history began.

The call is indeed from the South, although I did not have the honor of being born here. I have the sense to live here.

This is a misnomer.

The Illuminati date to the Italian Renaissance.

The U.S. "Chapter" was formed in 1776, as were a number of secret
societies, one of which I am a member of.

Further, the term refers to taking power away from monarch(ist)s. Sorry,
Lloyd, you missed the last phase of the conspiracy by at least 82 years.

Time to get REAL paranoid, Lloyd.

I don't believe what I got from the "Indiana Wheezer." The guy's supposed to have been smart enough to get "Raincoat Charlie's" fine reduced. But he tried to pass himself off to WB2OTK as a friend but in reality, "Wheezie" was giving him the kind of help that would have produced a Richard Schoenbohm. He's intelligent enough to chair the BARF Message Forum but not man enough to retain me as a poster. Intelligent enough to head the BARF Website, dedicated to the German Army in W.W.II, which was responsible for hundreds of thousands of Americans lying six feet under throughout Europe and Arlington Cemetery and also dedicated to the Waffen SS which was Hitler's murderous armed henchmen who'd wipe out towns filled with innocent men, women and children. Don't believe it?Look up just one on your own. It was called Lidice. The Wheezer's parents are a backwoods ignorant goyische hillbilly and a Yiddische momma and unfortunately he got his etiquette, manners and morality from his old man. This is one of the rottenest,most vicious, malignant libelous pieces of writing that ever hit my mailbox and I want you to see first hand, the mindset of this fat wheezing Hoosier pig. You'll be as shocked as I. AF2Y,Doc

Listen Ass-Wipe,

I don't send unsolicited, anonymous mail to anyone, not even to a slime-covered maggot like you. You chose to be my enemy. Fine, fuck-nuts - live with it! Keep your unsolicited crap out of my USPO Box. If you do not, you are going to receive a visit from a USPS Postal Inspector. That Inspector will have the power to place you under arrest on the spot. I have no intention of fucking around with a clown like you. You are a deranged sociopath who does not merit one ounce of consideration from me.

Don't you believe any of those e-mails you are receiving from AOL? You have been identified as a hate-mailer and a demented lunatic. They don't believe your fairy tales about Nazi's and Anti-Semites. Nobody believes you. Do you think the little men in white coats will believe you when they come to strap you into a straightjacket?

You don't have the balls, the talent, the education, or the skill to debate any of the real issues with me. All you can do is name-call and make vicious attacks upon innocent family members. So kiss my ass! I have given you every benefit of the doubt and, in return, you have done nothing but shit on me.

Now I am going to deal with you in a different way. I am going to deal with you using methods that you don't expect from the guy you say is wheezing with one lung. You know the same guy you say is a hypochondriac, never mind the scars from the surgeon's knife. Keep chugging on that oil-less treadmill, dumb shit! People like you, who fear The Grim Reaper, are a joke to me. I see great humor in a miserable slug like you grasping for life's meaning in a worthless homebound existence. But, alas, I've run out of pity for you.

You couldn't make it as a dentist you couldn't make it as a son, husband or father and you sure as hell couldn't make it as anyone's friend. Your attempts to poison my friendship with Rich are laughable. There's no friendship to poison, you hate-filled troll! However, you shouldn't think that I am unaware of the role you played in destroying Rich's relationships with people who really cared about him. You have not fooled me in the least. And you had better believe that Big Al knows the real circumstances surrounding Rich's departure from our 75-meter group. He knows all about your sick demands and your perverted ultimatums. I wonder how well you sleep at night knowing that, someday, Rich and Al will be friends again and you'll still be on your treadmill of hate.

While you're at it, why don't you learn to read or get your eyes examined? Can you read at all? You were expelled from the Better Radio Discussion group for violating Deja's Policy and AOL's TOS. If you are ready to abide by those policies and your ISP's TOS then you are welcome to come back. Otherwise, play the victim for a few more weeks.

```
You couldn't convince anyone you were a victim if your life depended upon it.
You are looking for any excuse possible to avoid debating the issues. You
would rather pretend you are a TV wrestler and exchange insults with people
who can't reach out and put their hands around your throat.
```

Don't write to me again. I don't want to hear from you until you are ready to re-join civilization and behave like a decent, respectful, educated human being. If you can ever bring yourself to the level of self-realization necessary to understand that 99% of the turmoil you face comes from within your own hateful heart, then I am willing to explore ways to have a dialogue with you. Until that time, you can take your false accusations, your lying tongue and your demented vexation letters and shove them straight up your fat ashkaNAZI ass!

```
Love to you and yours,

martin
```

```

Message-id: <19990812222532.11073.00000318@ng-cs1.aol.com>

http://www.atlcom.net/~geozim/index.htm

FCC JAMS HAMS,
the FCC is a criminal faction of a criminal executive branch,
engaged in a criminal coverup which is further protected by
a criminal Justice Department, also a party to the crime.

The FCC knowingly, intentional, deliberately, willfully and
purposefully supplied radio jamming equipment to the FBI and,
with reasonable assumption, to the US Air Force for the
purpose of jamming AM and FM radio broadcasters, TV
broadcasters and the Amateur Radio Service. The amateur
station jammed was defined as a Title 47, Code of Federal
Regulations, Part 97.405 Station in Distress, relaying
emergency communications critical to safety of human life.
As a result, appoximately 100 people died.

FCC is also a deliberate violator of the Freedom of
Information Act, using an exemption of documents not
allowed under the list of exempted documents types.
Whereas, I have not posted details on this to the
website yet, you can read the 36 descriptions of
FOIA requested documents in the FOIA Administrative
Appeal letter. All of these are denied on the basis
that I have figured out what the nature and content
of the documents are, and the FCC does not want to
verify my logical, analytical and deductive work
that has narrowed down the documents almost to the
point of writting them myself. Actually, I already
have two of the documents, and stand ready to
publish them, as soon as I can arrange to leave the
country, and post them from a safe place.

Neither last nor least, but in closing on FCC criminality,
FCC is a criminal co-conspirator with FBI to classify
documents pertaining to the criminal operations of the
FCC and FBI. Such classification of documents for the
purpose of avoiding criminal prosecution is specifically
described as a criminal violation in any Executive Order
pertaining to such classification at the time of
classification.

Get the FCC out of the control business, contact your
Congressman, ask that he support Henry Hyde of the House
Judiciary Committee to convene a hearing into the
criminal coverup by FCC Chairman Kennard of the
criminal operations of the FCC and FBI and US Air
Force engaged in Communications Act violations.

Get the American Radio Relay League out of its
tyrannical misrepresentation of the amateur community.
Publish the fact that the ARRL board voted not to
reveal the criminal operations of the FCC and FBI.
What decent person would be a member of such
a criminal organization. If you are in the ARRL,
moral integrity demands you quit.

***Lloyd, I hope you're proud of this libelous trash to which you've put your
name . You see moron, it works this way. There's an axiom which says; THINGS
EQUAL TO THE SAME THING ARE EQUAL TO EACH OTHER. Ever hear it before? Why is it
significant? Riley is as interested in this forum as he is in ham radio. He's
looking for Internet links to problems on the air and YOU are exactly what he's
seeking. But there's more to it than that. You are one of "The Wheezer's" boys
i.e. a valued BARF supporter. In fact. Chittum has given you some kind of
honorary position on his neo-Nazi BARF website? Why? Maybe he's just kind to
dumb animals? Your ugly subversive mindset reflects exactly that of EVERYONE
associated with Schoenbohm and that BARF collection of reprobates. You are a
Timothy McVeigh in the making. You embody the KKK and every other rotten lousy
subversive organization in this country. You are the kind of person looked at
by the marvelous Morris Dees and his Southern Poverty Law Center. By saying
that the FCC is a criminal faction of this government, you are labeling Riley
Hollingsworth a criminal. In doing so you allow him to have a closer look not
only at you but all your BARF slimeballs. In other words, you are digging a
hole for yourself and them too. Maybe some day you'll want to upgrade once you
find a brain. With this kind of anti-FCC, anti-American propaganda you'll have
as much chance at upgrading as I do walking on the moon. And by the way I'm
making it my business to show Riley your garbage which is representative of
W9XN and the rest of the BARF garbage. Nighty night, you s.o.b.
Doc

Pure fantasy, Timmy.

The 3950 legitimate operators have, on hundreds of occasions, left
you and your jammer friends alone when you were having QSOs on the
frequency, as any listener can confirm. Even when the subject of
your "conversations" was the "evil" East Coast stations, as it
usually is, we haven't risen to the bait and have let you blather in
peace.

In contrast, you and your jammer friends have often stated that, if
your callsigns or names are mentioned, that gives you a "right" to
"defend yourself" and talk on top of QSOs where you are not wanted.
Examples of this are archived at my web site (url below).

The Liberty Net itself has, for many years, moved to adjacent
frequencies when 3950 was in use, even when you and your
slope-headed comrades were squatting on the frequency for the
express purpose of preventing the net from operating there. I've
heard your diseased colleague K5BLB say, innumerable times, "There
ain't gonna be no Liberty Net this Saturday night," and you know it.

As far as your attacks on the legitimate operators on the Liberty Net for being "haters," you know you are being hypocritical. People of many different political opinions check into the net. Sometimes the views expressed are controversial. Often I don't agree with them myself.

But I have never heard anything from the legitimate operators on 3950 even remotely like your co-jammer K5BLB's call to murder all homosexuals (archived at my web site) and his statements that Jews are "rats" who should be "punished for all eternity" (tape soon to be archived at my web site).

Yet you support K5BLB, instead of condemning him as a "hater," and, oddly enough hyper-ethnocentric Jews like AF2Y seem to endorse this. Hypocrisy of this magnitude is simply breathtaking.

By the way, I'm surprised you haven't checked, but your "pollination" tape 2 doesn't work -- it cuts off after only 87 kb. Undoubtedly it's a fraud like your other tapes, but I'd like to hear the whole thing so it can be thoroughly debunked.

Honor bright,

--

Kevin Alfred Strom.

As I stated in context, I had been promised that certain problem
cases were about to be acted upon -- months ago -- and they have not
been acted upon; and all the regular jammers of 3950 have not only
gone scot free but are still active, several of them well into their
eighth year of malicious interference activities.

The only exception that might be claimed is the case of Walter
Miller, W2YEE, whose alcoholic antics on _another frequency_
resulted in his suspension; though I do acknowledge the salutary
effect that had on 3950.

> >and questions
> >are now being raised in official channels about the _victims_ of the
> >jamming
>
> Is paranoia prudent? If one violates the regs, one is subject to being charged

> misconduct.
>

The situation is analogous to a beating victim being cited, falsely,
for "assault" because he held up his arms to protect his face; while
the thug who did most of the beating is allowed to get away with his
crime because a fellow thug vouches for his "good character" -- even
though the police officer not only witnessed the beating himself,
but was actually struck a few times by the gang of thugs!

To pass that off as normal or reasonable enforcement procedure, or
to excuse it because appeal channels are available, is, in my view,
disingenuous.

> I have heard W1WCR in QSO with perhaps two others repeatedly announce an email
> address for a web site, perhaps a half dozen times in thirty minutes. Was he
> directing that information to the other he was in contact with? Of course not.

> He was directing same to the listening public at large.
> By definition, one-way broadcasting and hence unlawful.

In order to know his intent, one would either have to ask him and
receive an answer -- or be a skilled practitioner of telepathy.

Better check the definition of broadcasting at 97.3(a)(10). From the
context, I don't think that Vic was addressing the general public.
Hams who might have been listening but not yet checked in, perhaps;
but Aunt Mabel, definitely not.

Lastly, the web site in question is certainly of general amateur
interest, at least as much as most of the "bulletins" transmitted by
W1AW, K1MAN, and WA0RCR.

> If I were the CIB would I write him up for that? As a judgement call, I
> probably would not. It happens elsewhere, too. Is doing same a provocative
> course of conduct? Definitely.
>

The giving out of one's email address is hardly provocative.

> Let's be straight here, Kevin. The several times I've heard the net in

> under statute, are considered an assault, and are an affirmative defense for
> being involved in a physical altercation. Yes, the law is a 19th century
> anachronism yet I believe you would not disagree with the rationale behind it.
>

The most inflammatory statements I've heard on frequency come from
the jammers of the Liberty Net -- not the net itself.

For example, K5ZU accuses net participants of dismembering human
beings while they are still alive (and similar equally bizarre and
bloody fantasies), and has also openly called for the murder of a
net participant's children.

For another example, K5BLB (a close friend and associate of KK7HO)
uses the "n-word" regularly, even last night; and he has also openly
called for the murder of homosexuals. K5BLB has also stated his
intention to assault and kill several legitimate users of the
frequency. K5BLB makes the crudest imaginable references, with names
and callsigns of his perceived "enemies" attached, to the
inappropriate ingestion of bodily fluids and male genitalia and
excretory organs -- some nights at a rate of several times per
minute.

And you're complaining about an _email address_?

The controversial views that are sometimes expressed in free
discussions by the legitimate participants are not even _remotely_
comparable to the malicious lies and gross obscenities excreted by
the jammers during their malicious interference on an almost daily

basis.

> On one occasion, I heard a W6 on the frequency lambasting "lazy, drug dealing
> bastard Mexicans". Making that sort of public statement would be unlawful
> under the statutes of many locales. It is not a defense to prove, one way or
> another, that someone might indeed be a bastard, true or not, calling someone
> a bastard in a public place is unlawful. This is something you need to
> understand.
>

Thanks for caring about my needs; but even if such a statute
existed, and even if such a statement was made on the net, it would
have no bearing on the fact that the opinions expressed by net
participants violate no regulation, and the actions of those who jam
the net do violate the regulations.

(In addition, many will testify that I have urged moderate and
respectful language among participants on frequency when dealing
with sensitive issues.)

> Once could also say inciting a riot is clearly unlawful without passing
> judgement on the conduct of the rioters. This is exactly what's occurring on
> 3950, and probably the thinking behind whatever course of action the CIB is
> taking. It is indeed a riot and you are reveling in inciting it. Be honest.
> Cut the crap.
>

The Liberty Net has existed for some thirty years in much the same
format as today. Then, as now, controversial opinions were sometimes
expressed ranging from those of leftist "progressives" to hard-right
"separatists" and "constitutionalists," and almost everything
imaginable in between.

Why were their opinions not "inflammatory" for more than two
decades, during which time jamming was almost nonexistent?

For many of those years, other free-thinking nets, like W9OAG's
Freeman's Net, the Christian Identity Net, the Heritage Net, and
NR9Q's excellent Amateur Radio Forum, flourished on 3950 on other
evenings.

All were driven off the air by the jammers, who started their
cretinous crusade full-time in 1992. The Liberty Net is the last
3950 net left standing.

The "inflammatory net" argument doesn't fit the facts. The net users
didn't suddenly change their behavior in 1992. Certain individuals
began purposely interfering at around that time, and recruiting
others for the same purpose -- and _they alone_ are responsible for
their illegal acts.

[...]
> I'd bet it's entirely within the power of the Liberty Net to have the jammers

> greatly decrease in number. No hi-tech DFing, no cops, no busts required..
[...]

For a few weeks that actually happened, though a "bust" was
required. When one of the most egregious of the jammers, WA9KJI, had
his HF privileges suspended for two years, most of the other jammers
were intimidated into silence. It worked. But since KJI's
reinstatement, the chaos-makers have returned in force.

I've officially and openly broached the idea of a partially mediated
settlement of the jamming problem, even though no fault exists on
the part of the legitimate participants.

The idea would be to voluntarily separate the parties in frequency
in return for strict and swift enforcement actions against all who
persist in jamming, identified or unidentified. Recent events are
enough to persuade me that certain elements have an agenda not
compatible with an end to the jamming -- but I stand ready to back
up my proposal with action at any time.

With all good wishes,

Kevin, WB4AIO.

I find it very good, but it does need the right amount of light to work
well. To much and it "whites" out.
Only problem I have. I live in the UK and I cant buy another lead for it. I
have a lead to fit a hand held, but I'd like to connect it to my TS450.
Nobody in the UK seems to stock accessories yet, is there anywhere
(world-wide) who would be willing to send me a lead in the UK?
cheers all

Gee's Jeff. Why did you stop co-posting to the CB Newsgroup. Apparently a "one-way" debate is easily won eh? I guess it is one way of satisfying ones ego.

>Jeff KH6O writes with poly-syllabic heinous hyperbole (I bought a new dictionary):
> I was told that you claimed to have been a long-time licensed ham who
> turned in his license in the 70s due to some dispute with the ARRL.

Sorry, but your email pals (or your comprehension of my posts) are sadly mistaken. No-one ever said I was ever a "long time" Ham (unless one considers 3 years or so a long time). I actually discovered what assholes *many* Hams were early in the hobby and I had the sense to abandon it because my personality would have me arguing with them every moment (hmmmmm, is it 1977?). Pomposity and self-rightousness are two traits that I really didnt/dont need to acquire, especially from many of these emotionally stagnant, and societally naive group of individuals.

In addition, at that time, I saw the ARRL as an "ill progressive" and "self serving" organization dedicated to the interests of a vocal minority who spent the majority of their time looking backwards as compared to forwards (Im told things haven't changed much; I guess there is something to be said for consistency). And finally, running home everyday to eat a meal, then to give my wife a peck on the cheek, and to finally retreat to a radio shack until 2 AM every night wasn't really what I considered as "having a life".

Actually the biggest reason is because I don't look good wearing a "Pocket Protector".

>Jeff KH6O writes even more heinous hyperbolae (oops):
>If that were true, then you would certainly know the licensing procedures of
> the period in question. (No Saturday testing, no General exam given
> outside an FCC office, not possible to upgrade from General to Extra
> in two weeks.)

Sorry Jeff, but if you did comprehend my posts, you would have noticed that I did say that I took the General Test at the Customs House located in Boston, MA which was a FCC branch office in 1975. We disagree about the test being taken on a Saturday, which if you do some investigative work on your own, (I don't consider this conversation worthy of the effort), you will find
that Saturday tests were given at this location quite frequently. I'm sure there are some "still living" Amateurs up here in New England that can drag their hemorrhoids over to a computer to verify this for you, if you are that concerned. Or perhaps the illustrious ARRL can provide you with an old

testing schedule.

As far as the Extra Class ticket was/is concerned, I repeated in my posting what I was told (which I am assuming by the responses was incorrect). Unlike those who become physically and sexually stimulated by Ham nomenclature, I really don't consider the Amateur License structure worth remembering. I was never an Extra Class ticket holder nor would I ever consider wasting time on such an endeavor, again, "A life is a terrible thing to waste".

Now, if you want to debate Constitutional Law with regards to Telecommunication Issues, Ill by more than happy to engage you in such because I wouldn't be citing second hand information.

4407. Where's Porkbutt?

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-14 00:00:00 UTC
From: tdavidson@my-deja.com
Message-ID: <7p3r33lgr1@nnrp1.deja.com>
Source record: 133874

There used to be a fellow on the air continually who called himself "Porkbutt" that I have not heard in a while...he has suddenly vanished.

The conversations used to be weird but entertaining at the same time. He appeared to have a core group of followers who loved to listen all day to him talk about himself and his expertise in a variety of areas as well as his personal and professional successes, financial and otherwise.

It was entertaining because at the same time he was doing this, another group was on the air giving information about him that contradicted his claims. (I do have to admit that it seems a bit odd that a multi-millionaire" would live in a rented house in the woods in the middle of South Carolina or North Carolina or whatever)

There was actually a web page with some fat guy next to a radio desk and in various tennis outfits, etc. that the opposition (the "Goodfellas", I think) apparently put up, claiming that these were pictures of "Porkbutt". They also had something on the page in a bathing suit that they claimed was his "wife" (personally I think that's going a bit far)

Does this ring a bell? I have seen all these postings that talk about "Porkbutt Gone". What happened to him?

Tom

You simple minded idiot. The Jamming has been coming from the East for quite sometime. The net did not try to TAKE 3950 and went to 53 instead, then when it was clear on 50 they moved back. I suspect that thier decision to Act Like Normal Hams had something to do with the fact that they weren't jammed, but that's just speculation on my part. LOL

hemallloyd has plenty of time, since he can't get any woman to even
acknowledge his existence. That, and the fact that he can't hold a job
any longer than a week plays a key role with how much time he spends in
his welfare apartment.

4420. IPS Daily Report - 15 August 99

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-15 00:00:00 UTC
From: rwc@ips.oz.au
Message-ID: <7p7jtt$kus@flare.syd.ips.gov.au>
Source record: 133687
Cross-posted to: aus.radio.amateur.misc,ips.solar.activity,rec.radio.amateur.misc,rec.radio.info

SUBJ: IPS DAILY SOLAR AND GEOPHYSICAL REPORT
ISSUED AT 15/2330Z AUGUST 1999 BY IPS RADIO AND SPACE SERVICES
FROM THE AUSTRALIAN SPACE FORECAST CENTRE
SUMMARY FOR 15 AUGUST AND FORECAST FOR 16 AUGUST - 18 AUGUST
STATUS INDICATORS SOL:GREEN MAG:** YELLOW ** ION: ** YELLOW **

1A. SOLAR SUMMARY
Activity 15 Aug: Low

Flares: none.

Observed 10.7 cm flux/Equivalent Sunspot Number for 15 Aug: 131/85

GOES satellite data for 14 Aug
Daily Proton Fluence >1 MeV: 7.7E+04
Daily Proton Fluence >10 MeV: 1.5E+04
Daily Electron Fluence >2 MeV: 9.10E+05 (normal)
X-ray background: B3.7
Fluence (flux accumulation over 24hrs)/ cm2-ster-day.

1B. SOLAR FORECAST
16 Aug 17 Aug 18 Aug
Activity Low Low Low
Fadeouts None expected None expected None expected
10.7cm/SSN 132/86 134/88 136/90

COMMENT: A jump in solar wind speed was observed at around 0948UT,
from 300 to 400 km/sec. Solar wind speed is currently mildly
elevated at 450km/sec.

2A. MAGNETIC SUMMARY
Geomagnetic field for Australian Region 15 Aug: Quiet to Active

Estimated Indices 15 Aug : A K
Australian Region 16 2223 4443
Townsville 17 1233 4443
Hobart 14 1223 4433
Learmonth 16 2223 4443
Canberra 17 2323 4443

Observed Regional daily pc3 Indices 14 AUG :
Townsville 3
Hobart 0
Canberra 36
Pc3 pulsations are high frequency (10-45 second period) variations of the

Earths magnetic field. Daily pc3 indices are the daily sum of 20 minute
pc3 indices for that station.

Estimated AFr/Ap Indices 15 Aug : A
Fredericksburg 12
Planetary 10

Observed AFr/Ap Indices 14 Aug : A K
Fredericksburg 5
Planetary 5 2112 1222

2B. MAGNETIC FORECAST
Date Ap Conditions
16 Aug 12 Unsettled
17 Aug 9 Unsettled
18 Aug 16 Unsettled to active
COMMENT: A impulse was observed in the field around 1048UT, active
conditions observed after this time. Recurrence suggests that
active periods are probable during interval 19-21 August.

3A. GLOBAL HF PROPAGATION SUMMARY
Latitude Band
Date Low Middle High
15 Aug Normal Normal Normal-fair
PCA Event : No Proton/PCA Event In progress

3B. GLOBAL HF PROPAGATION FORECAST
Latitude Band
Date Low Middle High
16 Aug Normal Fair-normal Fair-normal
17 Aug Normal Fair-normal Fair-normal
18 Aug Fair-normal Normal Fair-normal

4A. AUSTRALIAN REGION IONOSPHERIC SUMMARY
Date T index
15 Aug 83

Observed Australian Regional MUFs
Equatorial Australian Region:
Enhanced by 20% during local day
Near predicted monthly values during local night.
Northern Australian Region:
15-20% Depressed to near predicted monthly values.
Southern Australian and New Zealand Region:
Near predicted monthly values
Antarctic Region (Casey/Scott Base):
Near predicted monthly values.

Predicted Monthly T index for August: 124

4B. AUSTRALIAN REGION IONOSPHERIC FORECAST
Date T index MUFs

16 Aug 90 depressed 10 to 15%/near predicted monthly values

Disregard and disdain for the laws as written...
Capricious "interpretations" of the laws to fit a political agenda...
Railroading of the innocent as well as the guilty...
Squashing of constitutional liberties for the politically "incorrect."
Winking and back-turning for the politically connected...
People selling their birthrights so they can spite each other...
Lynch Mob mentality promoted by central authority...
False charges based on incompetent witness...
Citizens encouraged- nay, coerced to inform on each other...
Hidden motives...immoral information leaks...back room deals...
Selective enforcement...Chaotic enforcement..
Nonsensical enforcement...

I told you long ago that getting the federal government
involved in taking care of our little problems would be a huge mistake.
You're about to see how right I was.

Enjoy it.

Sincerely,
Dave Stinson AB5S

Steve, Steve, your killing me with this one. "My wife never used it. non smoker" ? O.K so are you saying the rig is used, but your wife never used it and you don't smoke, or did you buy the rig for your wife she decided not to use it and doesn't smoke? In which case, if she never used it, why does it matter if she smokes?

I often wonder why, when Jesus was asked "Which is the greatest commandant?"
that He ignored the ten that folks today want to post everywhere. And why
no one wants to post the TWO that He laid down.

Broadcast and your telegraphy are two completely separate licenses. You needed the telegraphy ticket to operate on a ship but the chief engineer for WABC in NYC never needed one for his broadcasting.

I don't care much for ILP (Wexelbaum) and his snide comments about Barry Goldwater. Sen. Goldwater and his fellow hams ran thousands of phone patches for servicemen in the late 60s, early 70s. These phone patches were appreciated greatly by the servicemen and by their families. This was often the only way for a soldier, sailor, or airman to speak to family. Sen. Goldwater did not do this to curry political favors, as his political career and influence were pretty much over by then. He did it out of a love of country and a sense of civic duty. It makes me sick to see lesser men, like Wexelbaum, deride and politicize Sen. Goldwater's selfless service when they themselves are unfit to even breath the same air as this patriot.

Wexelbaum said:

> >A government that is big enough to
> >give you all you want is big enough
> >to take it away.
> >--Barry Goldwater (Oct 21, 1964)--
> >Does that make sense? No wonder he
> >didn't get elected. Now-a-days the
> >politicians on the right want to
> >GIVE out tax breaks to get elected.

I love muddy non-thinking like this. Put simply, Wexelbaum is saying that when the Government decides to let people keep a little bit more of their own hard-earned money, this is a "gift" from the Government. You gotta love Leftists like ILP and the way they twist things around. Any excuse to grow Government and make it bigger.

> >They don't want to remind folks that
> >that the government may TAKE AWAY
> >their future social security.

Put another way, the Government created the social security fiasco, and no matter how prosperous the country is, and no matter how much tax revenues grow as a consequence, Social Security will always be there to provide an excuse for Leftist politicians to insist that taxes be raised, not lowered. There is no way to satisfy Social Security's voracious appetite for taxes.

As if a Government hand-out like Social Security was really a substitute for saving one's money on one's own. Personal responsibility is the only true "social security." But Leftists like ILP would like us all to have to crawl on our bellies to the Government in order to get a crust, in our old age.

Wow...what a bizarre "customer service / public relations" error THAt
customer service rep made with you!

Their product - designed to measure wind speed - BROKE IN THE WIND, and
they won't IMMEDIATELY tell you to please return it and let them examine
it and replace it...at no cost to you, or at very minimal cost.

Any company that is truly interested in seeing how their products FAIL
IN THEIR DESIGNED TASK would, in my humble opinion, immediately try to
assist you.

After the Soviet Union fell, researchers have been granted access to the KGB
archives.

Guess what?

The KGB archives prove that most, if not all, of the people that Joe McCarthy
claimed were communists, were, in fact,
communists!

Your fellow tribesmen in the news media
have censored this story. I wonder why?
Could it be that many of those communists were/are Jews?

This is the same news media that lied about and persecuted Joe McCarthy for
daring to speak the truth about so many of your fellow tribesmen, Doc.

As K5ZU says .. "You people make me sick".

: >Hollingsworth has taken the liberty to ask W1WCR to "justify" his Net.
W1WCR
: >does not have to justify his net, he has his rights.
:
: And what rights (on amateur radio) might those be? Can you specify exactly
: what those transmitting rights are?
: Jeff KH6O

We have so many years of the Left preaching "rights" that it is now
coming back to haunt them. Amateur radio is an earned privilege
just as driving is a privilege.

Freedom of speech is a right. So is the freedom to travel unrestricted.
However, there are other means to "broadcasting" your opinions than
amateur radio as there are other means to travel besides driving a
personally
owned vechicle.

Don't be such a paranoid ass. What you are really bitching about
is that the elite are pushing laws down on us. That the Liberals
no longer seem concerned about what the workers feel. This is
not the "end of the world". Rather it is a normal correction for the
excesses of the '60s and '70s.

Power is returning to the elite, like it was in the south before civil
rights. Also the Liberals now realize that the masses are not as
able to deal with freedom. Thus many of the advances in civil liberties
from the '60s are now being retracted by the liberals in the Clinton
administration.

Remember, Clinton still is a southern democrat.

Don't be fooled by the screen name. CBRambo1 is nothing more than one of
Lloyd Davies' alias'. Poor, poor N0VFP just can't seem to accept the fact that
his mentor Drew Durigan (a/k/a CBRAMBO)
is gone from this newsgroup for good. And if Lloyd keeps spamming this NG with
his obnoxious, foul-mouthed posts which are sent under several different
guises, chances are good that Lloyd will be booted off of
rec.radio.amateur.misc as well.
We're not talking about rocket science here. All one has to do is read
the posts from N0VFP, Porkkbutt, CBRambo1, etc. to realize that it's Lloyd
Davies who is posting under many different screen names, often talking to
himself on the same thread.
You've lost your flippin' marbles, Lloyd.

"Where's all the RADIO CRYBABIES?"
"I wanna hear 'em TALK TOUGH!"

>Get a life. Please?

Sorry to burst your bubble OM, but Drew Durigan hasn't posted in this newsgroup for months now. (He also got canned from his DJ job in Kansas, in case you haven't heard.) As I recall, Drew was run off of rec.radio.amateur.misc by a group of hams who were mighty upset with ol' CBRAMBO for promoting illegal activities (i.e. out of band operation) on the amateur bands. And you can bet that Drewsy's protege Lloyd Davies N0VFP will be out of this newsgroup like poop through a goose if he doesn't settle down a bit. AOL does cancel accounts for TOS violations from time to time, you see, and the evidence against Mr. Davies is mounting. All one needs to do is look up his posts in Dejanews to verify that fact.
You've lost your flippin' marbles, Lloyd.

After the Soviet Union fell, researchers have been granted access to the KGB
archives.

Guess what?

The KGB archives prove that most, if not all, of the people that Joe McCarthy
claimed were communists, were, in fact,
communists!

Your fellow tribesmen in the news media
have censored this story. I wonder why?
This is the same news media that lied about and persecuted Joe McCarthy for
daring to speak the truth about so many of your fellow tribesmen, Doc.

I don't know how many of you know of this, but I think you should consider joining this project with SETI (the SETI@home project). Major COOL!

What is the SETI@home project?

SETI@home is a scientific experiment that harnesses the power of hundreds of thousands of Internet-connected computers in the Search for Extraterrestrial Intelligence (SETI). You can participate by running a free program that downloads and analyzes radio telescope data. There's a small but captivating possibility that your computer will detect the faint murmur of a civilization beyond Earth.

http://setiathome.ssl.berkeley.edu/ is the URL - check it out.

Also, if you are interested, once you install the software, you might wish to join our group, the NW7US Radio Group -- you'll find us under the groups section.

73 de NW7US, Tomas.

Jerry
I'll bet that there is more here than what meets the eye. I will bet money that this guy has something hiding in the coax or in a
closet that nobody has looked into. I know for a fact in 1975 that when I ran a legal station I didn't bother anyone's TV, phones or
stereos. You can bet somethings up with that D-104 as far as over modulation. I wonder if the neighbors ever heard him say how about it
skipland or how about it skipland.
Just my opinion I could be wrong

Mike,

I guessed it right :-) but I just gave the shorcuts. Tips :

Go to : http://www.f8air.org
In the pop-up menu on the upper right of the screen "Cliquez ici pour la visite" = Clic here to visit
Select "Les annuaires" = The call books. Then you got "Menu annuaires" in the pop-up menu = Call book Menu
Select "Les radioamateurs" = Ham's or Radioamateurs
In this page you can enter any french callsign. You can search by callsign, first name, last name, address...with joker characters

I translate the following terms in order for people to use the full possibilites :

Indicatif = Callsign
Nom = Last Name
Pr�nom = First Name
Adresse = Address
Code Postal = Zip Code
Ville = City
Infos = Informations
Champ partiel = Partial field
Champ entier = Full or Entire Field
D�but de champ = Beginning or Start of field

(you can use jokers for the search : underscore is for one character; percentage for a group of characters)

Les �couteurs = SWL, listeners litteraly
Les radios clubs = Radio Clubs
Les Relais et Balises = Relays and Beacons
Les soci�taires IARU = IARU members
Liste des DXCC : DXCC list (you can search in the database or download the file. It is a formated text file to be opened in a worksheet separated by tabs or commas)
Buckmaster and QRZ are links to these databases
Retour Acceuil = Home

All the other items in the home pop-up menu are french related informatiosn regarding the association.

Note : The Ref-Union is the french amateur association and IARU member. AIR and other "sister" associations like CFRR, URC are frecnh amateurs

associations but not IARU members.

Hope this helps you all folks to visit pour french amateur sites (a lot
are in french but you will find some in english or both languages.

You will find many links on the http://www.ref.tm.fr site. You may have
a look also at http://www.radioamateur.net : no blabla only links to french
sites and associations.

I have a Peet Ultimeter 2000. The display unit started malfunctioning
(some of the LCD segments would get dim, or not activated at all). I
sent the display back to them and in less than a week, I had a brand new
display unit.

I would recommend e-mailing them. Chances are likely, you will get Mr. Peet himself and not a customer rep. He might be inclinded to handle things differently.

FWIW, when I ordered my unit, the person who took my order wrote down what I wanted. An hour later, she called back and said she was packing my order and found they were out of a particular length of cable and would the next longer length be OK. I had the entire system in 2 days.

Andy

Although I do not own any of their equipment, I did email them to see what their defective parts/spare parts policies were.

Glad to see that they took care of you. Your experience is more what "excellent customer service" is all about - and coincides with other folks I know who own Peet Bros. equipment.

Yes, Timmy did fix the file after I pointed out that it was
defective -- and he didn't even thank me.

The fact that he had been promoting the drivel for months while the
file wasn't working, and mine was evidently the first complaint,
does say something about the popularity of his crudely done site.

The tape was made some years ago, when Time Warner were selling
jungle "music" exhorting listeners to kill police officers, about
which they were quite unapologetic.

As for felonies, I hear none on the recording, and certainly not
even the slightest infraction of the amateur regulations. All of the
context has been removed by KK7HO or his alter ego.

Time Warner offered free trial subscriptions to some of their
bird-cage liners, and Vic thought it amusing and worth repeating
that some people, outraged at the company's endorsement of the
cop-killing [c]rap, were taking advantage of this by signing up as
many people as possible for free gift subscriptions, which would of
course never be renewed beyond the trial period.

It reminds me of an acquaintance of mine, who, for some reason or
other, had been put on the mailing list of an organization devoted
to taking away our Second Amendment rights. He would always use
their "postage paid" reply envelopes to send them, at their expense,
a piece of his mind and a request that they send no more of their
alien filth, which request was of course always ignored. That is, it
was ignored until he decided to attach the "postage paid" return
envelope to a large package containing some rather heavy objects for
which he had no more use around the house, and which probably cost
the subversives the equivalent of thirty dollars in today's
depreciated trading stamps.

Unless the free subscription cards specified that the gift recipient had to agree in writing in advance, I think the deserving folks at Time Warner left themselves open on that one.

Pip pip,

Ok, but you should call me something other than Timmy, since you use that nic for
KK7HO :)
Timbo, Big Tim, Tim-o-rama?

> The fact that he had been promoting the drivel for months while the

Well, I agree that one post every couple months for those who may have missed it is
ok, but yes, this was posted way too many times.

> The tape was made some years ago, when Time Warner were selling
> jungle "music" exhorting listeners to kill police officers, about
> which they were quite unapologetic.
>
> As for felonies, I hear none on the recording, and certainly not
> even the slightest infraction of the amateur regulations. All of the

No, no felony is being commited on the air, I said he was suggesting that others
commit a felony, that is to say he suggests that this is the only way we can fight
them and it should be done by many. Yes, I paraphrased I suppose we could quote the
speicifics but I'm not sure how the context was removed WCR seemed to go into enough
detail to make it clear what he was suggesting.

> Time Warner offered free trial subscriptions to some of their
> bird-cage liners, and Vic thought it amusing and worth repeating
> that some people, outraged at the company's endorsement of the
> cop-killing [c]rap, were taking advantage of this by signing up as

> many people as possible for free gift subscriptions, which would of
> course never be renewed beyond the trial period.

That's fine but in the end after describing in detail how it's done he specifically says "I believe it's the only way to attack them, right now, and it should be done on a wide spread scale. Everybody oughta be out there doing it" That goes a bit beyond just talking about what someone else has done. Do you agree?

I'm no expert here but everyone of these postage paid subscription forms I've ever seen require a signature, but even if they didn't your falisifying information and using the USPS in the process. I'll be willing to bet there is felony in there somewhere. :)

It's all really is silly though, any of these subscriptions that are not paid for are all written off at the end of the year as advertising expenses, you really not hurting Time Warner in the least, they just pay fewer taxes at the end of the year. Anyone who got a free copy who wasn't interested is more likely to pass it to a friend or neighbor which is all Time really wanted anyway.

But what I REALLY want to know is, and I don't expect you to speak for Vic, but since the Liberty net discussions seem to revolve around articles of our constitution, free speech, etc. Why would Vic suggest such a move toward Time Warner? Do they not have the same right to free speech as you or Vic? While I may not agree with their support or publishing of the type of music you describe I believe they share in the same luxury of free speech as you and I. What is your take on this point?

Yeah, I know what you mean. Yeah I made contacts to Missouri and to Louisiana. Not bad work. I agree, if they'd spend more time on their theory and such, they wouldn't have time on their hands to qrm and post idiotic messages to the internet. My Advanced studies are going along well, and hopefully, I'll be sitting for that exam before the restructuring takes place, whenever that will be.

SB DX @ WW $OPDX.422
Ohio/Penn DX Bulletin No. 422

The Ohio/Penn DX PacketCluster
DX Bulletin No. 422
BID: $OPDX.422
August 16, 1999
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, KA2D, K2JXW, N2WB, W0CG, W0YG, I1JQJ/IK1ADH & 425 DX News, CE6TBN, DJ5AV & DX News Letter, EC1BXI, EW2EO, G0PSE, HA0HKW, IK4MTF, JA1WSX, PA3BIZ, PS7AB, PS7KM, SP6ECA, TF3AO and 9M2TO for the following DX information.

9H0, MALTA. Wim (Bill) Visch, PA3BIZ, PR Manager V.R.Z.A. (Dutch Amateur Radio Society), informs OPDX that on September 17th a large group of Dutch amateurs will leave for a combination holiday/DXpedition to the island of Malta (EU-023). A total of 26 operators, all with their own 9H3 callsigns, will join the party of 45 participants. Four of the ops are female operators. The whole team has been granted the special 9H0VRZ callsign. They plan to be active between September 18th and October 10th. Operations will be on 80-6 meters both SSB and CW. They will be active daily on the international DX frequencies +/- QRM. They also plan to run a daily updated log on InterNet. QSL Manager for 9H0VRZ is PA0JR, Andre van den Bos, Olof Palmelaan 5, 9649 BH MUNTENDAM, The Netherlands. For more details on the participants and operation, please check out the Web site: http//www.vrza.org

BELARUS WEB SITE. Larry, EW2EO, reports that he has set up a Web site which contains: first callbook of Belarus (EU-EW) stations; amateur radio map of regions of Belarus; photos of the EW52BO and EW2EO QSL cards and other information. Check out the Web page at: http://www.qsl.net/ew2eo

CHARLIE, W0YG, IS HEADING TO AFRICA AGAIN! Charlie, W0YG, informs OPDX that he will be off again on September 1st for South Africa (ZS), Namibia (V5), Botswana (A2) and Zimbabwe (Z2). He will be active on CW only, mostly on the WARC bands. Charlie has asked us to remind everyone to "ONLY ONLY" QSL direct to W0YG. Even if he uses his ZS6YG callsign, cards must still be sent direct to W0YG. Cards sent to the ZS bureau cannot be answered. If a bureau card must be used, cards must go through the WF5E bureau system and not the ARRL Bureau.

DXCC FAQ #6 by Bill, Moore, NC1L, will be sent to all OPDX InterNet Subscribers as an additional bulletin.

E4, PALESTINE. The "425 DX News" reports that Alessio/IZ0CKJ, Simon/IZ7ATN and Max/IW0FQZ will be active from here August 19-26th. No callsigns were mentioned, but there will be some 6 meters activity.

IOTA NEWS AND INFO......
AS-073. Tex, 9M2TO, will be active from Redang Island August 28-31st. Activity will be mainly CW on all bands (no 6 meters) on the normal DX frequencies. He will use a IC-736 w/100w and a G5RV antenna. QSL to JA0DMV via the bureau or direct to 9M2TO on Penang Island. NOTE: All the QSLs will be sent out via the Bureau at the end of September AUTOMATICALLY.

EU-016. Pietro, IK4MTF, will be active from the Croatian Island Brac starting August 17th for about a week. The island is located in the Adriatic Sea Coast South Group. He will be on holiday but will be active on 40-10 meters (WARC included) with an Icom 706 and R-7000 antenna.

EU-052. Look for the Hungarian team Laci, Zsolt and Tibor on holiday to sign SV8/HA6NL/P, SV8/HA6PS/P and SV8/HA6ZV/P, respectively, from Island of Korfu between September 1-8th. They will be active on all the bands CW/SSB/RTTY. Suggested frequencies:
CW - 1831, 3511, 7006, 10104, 14026, 18071, 21026, 24891, 28026
SSB - 1841, 3621, 7051, 14151, 18151, 21251, 24941, 28451
RTTY - 3591, 7036, 14081, 21081, 28081.
Please QSL to home callsigns.

EU-080. Dr. Jorge Fernandez Devesa, EC1BXI, will be in Monteagudo Island (Cies Islands archipielago, Pontevedra Islands group, Spanish Island Award IDEA Reference number EA1-1-1) from August 15-30th. He will be going to the island as the M.D. for the natural park, taking care of guards and visitors. Some of the operators that will be going along with him will be: EA1APA, EA1APS, EA1BPS, EA1CSI, EA1FBU, and possibly some other. The callsigns to be used are ED1OTA and EF1OTA. Their activity will be CW/SSB and possibly some PSK31 and other digital modes. Dr. Jorge is currently looking for sponsors (any Spanish association or company) for this DXpedition so they can print a colored QSL with an aerial view of the islands. QSL via direct ONLY with a SASE to ED1OTA/EF1OTA, P.O. Box 54, 36980 O GROVE, (Pontevedra) SPAIN.

OC-135. Steve, VK4EMS, is now active from Bougainville Island (Papua New Guinea) as P29BI. He will be working on the island until late December, 1999. He will be active during his spare time on weekdays and will be active mostly on Sundays. QSNs show activity between 0645 and 0730z and between 1130 and 1200z on 20 meters (14260 kHz). Also, check 15 meters (21260 kHz) around 2330z. His operations will be on CW and SSB. QSL via VK4EJ.

SA-018. CE6TBN, Editor de TBNoticias, will be active from Quinchao Island between August 27-31st. Operations will be on 20/17/15/12/10 meters CW/SSB/RTTY. QSL via CE6TC or CE6TBN, Box 1234, Temuco, Chile. For more details, check the Web site: http://www.qsl.net/ce6tbn

J3, GRENADA. The "DX News Letter" reports that Bill, J3/G0STR, is active working QRP CW on 7030 and 14060 kHz from 0000-0500z until August 25th. QSL via G0STR.

LIGHTHOUSE/LIGHTSHIP ACTIVITY NEXT WEEKEND (August 21-22nd). Over 1200 stations and over 150 lighthouses/lightships will be active. QSL info is on page 93 of August's QST and details of the event are on page 91. Also, more information about the International Lighthouse Weekend can be found at: http://www.waterw.com/~weidner/ld.htm

Look for ZW7ZZ to be active on 80-10 meters, CW/SSB, from the Natal Lighthouse in Natal City, Brazil (Grid HI24jf - DFB RN 07). QSL via the bureau, or PS7ZZ, Francisco de Freitas, Av. Sao Miguel dos Caribes 31, Conj. Jiqu0, 59086-500, Natal/RN/Brasil.

The NATAL DX GROUP will be operating from the Farol do Calcanhar, in Touros, RN, Brazil, commemorating the International Lighthouse Weekend. The callsign for the weekend will be ZW7FC. You are invited to contact them on SSB and CW. Operators will be: Karl/PS7KM, Joao/PS7KT and Janduir/PS7BX. QSL info: PS7KM, via bureau or direct via CBA.

UPDATE! The Florida DXPedition Group will be operating from the Amelia Island Lighthouse as W4A. The operations will be conducted from 0001z, August 21st to 2359z August 22nd. Club members will be operating SSB, CW, and RTTY during the Amelia Island Lighthouse event. QSL via N5VL (bureau or direct) for this event. Please include a SASE or sufficient funds for postage if you QSL direct!

Look for Jim Weidner, K2JXW, to be active as W2L aboard the "Sandy Claws" at Thimble Shoals Light, Chesapeake Bay. He will be operating mostly on 14265 and 7265 kHz.

As part of Lighthouse/Lightship Activity Weekend, members of the Great South Bay ARC, Islip ARES Group and Suffolk County Radio Club will operate from Fire Island Lighthouse, Fire Island National Seashore in New York, ref #670, IOTA NA-026, USIA NY-013-S, signing W2GSB/Light-house. This operation is dedicated to the memory of Rich Tygar, AC2P <SK>. QSL direct to W2GSB, PO Box 1356, West Babylon, NY 11704. SASE Please. Additional information can be found on the Web Page: http://www.gsbarc.org/FI0899.htm

Look for the following Polish lighthouses stations (in order from Poland's west to east coast) during International Lighthouse Weekend.

Name of lighthouse	Callsign	QRA loc	QSL to
1 Swinoujscie	SP5PB/1	JO73DW	SP5PB
2 Kikut	SN6F/1	JO73GX	SP6ECA
3 Niechorze	SP1EUS/1	JO74MC

5 Gaski SQ1DNJ/1 JO84EK
6 Jaroslawiec SP1KIZ/p JO84GM
7 Ustka SP1JX/p JO84KO
8 Czolpino SP2POL/p JO84OR
9 Krynica Morska SN2KM JO94RJ SP2BIK
10 Stilo SP1ZZ/p JO84US
*** Actvities are expected from other Polish Lighthouses in
Darlowo, Rozewie, Jastarnia, Hel and Gdansk Port Polnocny, but there
is no detailed info at the moment. Look for SP stations with callsigns
SP1.../p, SP2.../p, .../1 or .../2 working this weekend.

TF1IRA will be active during this special weekend August 21-23rd. The
operators will operate from a lighthouse on the south coast of Iceland
near Stokkseyri. The name of the Lighthouse is: Knarrarosviti (viti
lighthouse). The location is: 63,49,25 N and 20,58,34 W. QSL is via TF
bureau.

PJ9, CURACAO (Ops Needed). Geoff, W0CG, Coordinator, reports that operators
are needed for a plan mid-profile, Field Day style operation from Curacao,
operating as PJ9CW, for the CQ WW SSB Contest, October 29-31st. The planned
category is Multi/Single, but this is negotiable depending on how many
operators they can sign up. Operations will be from the Kadushi Cliffs
Resort, a beautiful luxury vacation spot on the northwest tip of the
island. Geoff states, "PLEASE SIGN ON VERY SOON, AS I NEED TO FINALIZE
THE VILLA BOOKINGS WITH THE MANAGER." If interested, view/visit the
following WEB site (All the information is there, including photos of
the operating location): http://asgard.kent.edu/ccc/pj9cw

QSL INFO AND NEWS.....
TOM, G0PSE, reports that IOTA EU011 logs of GB0SM (July 22-29th, 1999)
and G5M (July 24-25, 1999) are now available at: http://dx.qsl.net/logs

QSL EW52BO (1/05-12/05/97) via the bureau (before October, 1999). To
receive a QSL from EW52BO after October 1999, please send QSL to EW2EO
direct only + SASE.

RARE/NEW IOTA'S TO BE ACTIVATED (Update, Please Refer to OPDX.421). Stuie,
VK8NSB, reports that this week things are on track for the November
operations to Melville Island (OC-173) and Croker Island (New IOTA). Two
new operators have been added (Zoli/HA1AG and Allan/VK2NNN) to the team of
Stuie/VK8NSB and Peter/VK8PDG. The team will operate 6 days on each island.
They plan to have 4 HF stations active, 2 on 24 hours, on CW/SSB/RTTY/SSTV.
Plans are in the works (hopefully) to be online with a chat line open for
amateurs around the world to speak to the children on both islands. OPDX
InterNet Subscribers will receive Stuie's complete press release as an
additional bulletin. Also, please visit the following Web page for more
details: http://www.rustman.com/IOTA/

T31 & ZK3, CENTRAL KIRIBATI AND TOKELAU (Update). The planned operations
by Mats/SM7PKK and Nils/SM6CAS is continuing to progress. The announcement
of operators now include Erik/SM0AGD, Steve/G4EDG, Ulrika/SM6WYN (YL) and

Lech/LA7MFA. The scheduled DXpeditions are slated for Central Kiribati between September 23rd and October 3rd and for Tokelau from October 7-12th. The callsigns to be used will be T31T, T31K, T31YL, ZK3DX, ZK3CW and ZK3YL.

T8, PALAU. Hiroo, JA1WSX, will be traveling here for a summertime vacation, but indicates that he will have time to operate. He will be active here August 13-18th. His callsign will be T88WX. Operations will be mostly 17 and 12 meters using a beam antenna with 500 watt amp. There will also be some 6 meters operations. QSL to his home callsign JA1WSX (OK in American call book).

V2, ANTIGUA & BARBUDA (An excerpt from a press release, but all OPDX InterNet Subscribers will receive the complete release as an additional bulletin). Team Antigua will once again activate V26B on the Beautiful Island Nation of Antigua and Barbuda in the upcoming CQWW SSB Contest on October 30-31th. Their plans are to enter the contest as a Multioperator/ Multi-transmitter catagory. Members of Team Antigua will also make special attempts to be active on RTTY, PSK31, 160 meters and the WARC Bands a few days both before and after the contest. There is also a possibility of some 6 meter and Satellite operations with conditions permitting. The following is a list of members of Team Antigua and their Callsigns:

V26A Dale, N3BNA QSL via WB3DNA Special certificates
V26AK Tony, N2TK QSL via N2TK and "Top Gun" plaque
V26B Sam, WT3Q QSL via WT3Q will be available for
V26DX Doug, W3CF QSL via KU9C working V26B during
V26E Darrell, AB2E QSL via AB2E the contest. For more
V26J Jay, WX0B QSL via WX0B details, visit Team
V26O Bob, N5NJ QSL via N5NJ Antigua V26B Web site at:
V26OC Brian, N3OC QSL via N3OC http://www.frc-contest.org
V26R Mike, KA2AEV QSL via KA2AEV
V26SZ Sharon, KM5SZ QSL via KM5SZ
V26TZ Tom, ZP5AZL QSL via W3HNK
V26U Bill, W2UDT QSL via W2UDT
V26YR John, W2YR QSL via W2YR

XX9, MACAU. Just a quick reminder. Look for Ed, K8EP, to be active later this week as XX9TEP from August 18-23rd. Operations will be on CW/SSB on 80-10 meters. QSL via K8EP.

It's simply difficult to believe that Marty Chittum a.k.a. Martin a.k.a.The Wheezer a.k.a. Wheezie could write something this crude and disgusting. An educated man? Seemingly but somehow while being raised, an element of trashiness crept in which is now manifested by such ugly filthy rhetoric. How can a man like The Wheezer stoop so low as to come up with something like this? AF2Y, Doc

Listen Ass-Wipe,

I don't send unsolicited, anonymous mail to anyone, not even to a slime-covered maggot like you. You chose to be my enemy. Fine, fuck-nuts - live with it! Keep your unsolicited crap out of my USPO Box. If you do not, you are going to receive a visit from a USPS Postal Inspector. That Inspector will have the power to place you under arrest on the spot. I have no intention of fucking around with a clown like you. You are a deranged sociopath who does not merit one ounce of consideration from me.

Don't you believe any of those e-mails you are receiving from AOL? You have been identified as a hate-mailer and a demented lunatic. They don't believe your fairy tales about Nazi's and Anti-Semites. Nobody believes you. Do you think the little men in white coats will believe you when they come to strap you into a straightjacket?

You don't have the balls, the talent, the education, or the skill to debate any of the real issues with me. All you can do is name-call and make vicious attacks upon innocent family members. So kiss my ass! I have given you every benefit of the doubt and, in return, you have done nothing but shit on me.

Now I am going to deal with you in a different way. I am going to deal with you using methods that you don't expect from the guy you say is wheezing with one lung. You know the same guy you say is a hypochondriac, never mind the scars from the surgeon's knife. Keep chugging on that oil-less treadmill, dumb shit! People like you, who fear The Grim Reaper, are a joke to me. I see great humor in a miserable slug like you grasping for life's meaning in a worthless homebound existence. But, alas, I've run out of pity for you.

You couldn't make it as a dentist you couldn't make it as a son, husband or father and you sure as hell couldn't make it as anyone's friend. Your attempts to poison my friendship with Rich are laughable. There's no friendship to poison, you hate-filled troll! However, you shouldn't think that I am unaware of the role you played in destroying Rich's relationships with people who really cared about him. You have not fooled me in the least. And you had better believe that Big Al knows the real circumstances surrounding Rich's departure from our 75-meter group. He knows all about your sick demands and your perverted ultimatums. I wonder how well you sleep at

night knowing that, someday, Rich and Al will be friends again and you'll still be on your treadmill of hate.

While you're at it, why don't you learn to read or get your eyes examined? Can you read at all? You were expelled from the Better Radio Discussion group for violating Deja's Policy and AOL's TOS. If you are ready to abide by those policies and your ISP's TOS then you are welcome to come back. Otherwise, play the victim for a few more weeks.

You couldn't convince anyone you were a victim if your life depended upon it. You are looking for any excuse possible to avoid debating the issues. You would rather pretend you are a TV wrestler and exchange insults with people who can't reach out and put their hands around your throat.

Don't write to me again. I don't want to hear from you until you are ready to re-join civilization and behave like a decent, respectful, educated human being. If you can ever bring yourself to the level of self-realization necessary to understand that 99% of the turmoil you face comes from within your own hateful heart, then I am willing to explore ways to have a dialogue with you. Until that time, you can take your false accusations, your lying tongue and your demented vexation letters and shove them straight up your fat ashkaNAZI ass!

Love to you and yours,

martin

4468. LIBERTY NET NOT JAMMED !!!!

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-15 00:00:00 UTC
From: rfoverdose@aol.comedy
Message-ID: <19990815165625.12645.00000139@ng-ci1.aol.com>
Source record: 133769

I listened in utter amazement last night as the Liberty Net conducted their fine
business without being jammed! No white noise jammers, no "Doofus" going "Duhhhh" all night, no W9ART making transparently false attempts at "checking in" to the net, no KK7HO and K5BLB having a QSO underneath the Liberty Net and acting like they didn't know it was there, no K5ZU ghost-talking about people going to jail, no N4SX from downtown Washington DC, etc, etc.

There was some guy going "weeee weeee weeeee" over K4GAR's hour-long monologues, but that was all.

Civility on 3950???? I don't believe it !!! Was I dreaming? Was this just a fluke?
Did all the jammers come down with diarreah at the same time, and were stuck on their toilets all night???

Lloyd I took a look at your updated web site, I had my doubts before but
you've convinced me your a few bricks shy.
What on earth is the Zoo and Vietnam Dan real audio files you created?
You must be completly wacked out my man.
How much time do you actually spend creating all this junk?

Sorry. But the liberals have made up their minds that folks like
you do not deserve freedom. Thus liberals, like Clinton, have been
quietly pulling back the gains made in civil liberties. That is
southern politics for you.

Well, many no-coders, like yourself, have said that the U.S. should
break the UN's ITU "treaty" of requiring knowledge of Morse code for HF
access. How do you feel about that, Lloyd? Should international agree-
ments be broken for the benefit of individuals? Should the ITU's code
treaty be "like pie crust, to be broken"?

Your right TIM, "THE JAMMING COMES FROM THE EAST" of you that is.
Makes it about INDIANA, TEXAS, ARKANSAS. All east of ya. And BTW, what
kind of HF DF'ing are you using? The famous HF DOPPLER ?

From William J. Peet II:

"The warranty is 1 year from date of purchase.

"If an anemometer is hit by flying debris or hale from a storm or high wind condition, it is not really a warranty problem.

"If any one calls with this type of problem we send out replacement cups free of charge. If the tabs are broken on the rotor, replacement with cups is only $20.00 and we also offer a recondition anemometers for $59.00 for replacement.

"I think that is about as much as one could ask in a non-warranty environment."

I recently, out of curiosity, went to the Barf board. You know, the one that is supposed to be "about" amateur radio. It's not, but IT IS a BARF board - PUKE would more accurately describe it.
Here's a sample of their amateur related messages.

Subject: Genocide in the Promised Land
Date: 1999/08/15
Author: w9xn <w9xn@JewishMail.com>
Posting History

Genocide in Jericho: Gen. Joshua Bar-Nunï¿½s Marauding Israelites

Jericho, Palestine (JPI) - After seven days of bloody fighting, marauding Israelites under the command of their charismatic leader, Gen. Joshua Bar-Nun, have overrun the city of Jericho. According to one of the few survivors, a local prostitute named Rehab, Joshuaï¿½s forces entered the city and proceeded to murder every man, woman and child. Even the cityï¿½s livestock was slaughtered, as carcasses of oxen, sheep and donkeys were strewn throughout the cityï¿½s streets alongside thousands of human corpses left behind by Joshuaï¿½s forces.

It is rumored that Joshuaï¿½s army, in open violation of the Geneva Convention, employed top-secret, psycho-acoustic weapons to shatter the walls of the city. Speaking on condition of anonymity, one of Joshuaï¿½s officers stated, ï¿½Joshua ordered us to kill everything that moves or breathes because thatï¿½s what G-d told him to do.ï¿½ The Israelites believe that Joshua is able to talk with their G-d and get precise orders concerning the extermination of their enemies. The cult leader has often been seen mumbling to himself and gesturing toward the heavens.

Widespread looting has been evident throughout Jericho and the surrounding area. Joshuaï¿½s troops have been observed carrying gold, silver, bronze and iron ore out of the city. The rioting troops claimed that the booty was to be turned over to the armyï¿½s treasury, per direct orders from Gen. Bar-Nun. Later, it was reported that an elite brigade (SS Gross VersprocheneLand), led by Lt. Col. Achen Carmi (known to be one of Bar-Nunï¿½s most ruthless henchmen) had refused to turn over their share of the spoils and fled to the north.

In a public statement, issued late last night by Gen. Bar-Nun, the commander warned, ï¿½If anyone tries to re-build this city, Jericho, they will be in for it. Weï¿½re going to kill the firstborn child of anyone who attempts to lay a new foundation for this city. If anyone tries to put up new gates, weï¿½re going to kill his youngest child.ï¿½ The mayors of other cities in the region are calling for UN intervention to prevent the genocide from spreading to their regions. It is reported that Gen. Bar-Nunï¿½s troops have already targeted the city of Ai and are now on the march towards that vicinity.

You hit the nail on the head,. The BARF board is no more than a vehicle for non-stop anti-semitism promulgated by that organization in collaboration with THE SPOTLIGHT and its puppets on 3.950. Martin "Bullchittum,"W9XN is not a tool but a necessary ingredient in the whole process to inflame hams, exacerbate problems on ham radio which emigrate here and vice versa and then pass himself off as a liberal minded patriot who knows of no evil. That fat slob from Tipton Indiana must be made to realize that we decent non-prejudiced hams will rebel against the hatred displayed by him and his concubines and ultimately shut him up and throw him out. There's no room in this country for anyone of W9XN's ilk as well as his venomous cohorts. Brotherhood and understanding should be our goals, not hatred and bigotry. If you want to see what that BARF really represents, go to their website and get ready to barf. That entire monstrosity is, as they produly boast, dedicated to the German Wehrmacht in WW2, the same s.o.b.s who killed and wounded hundreds of thousands of our boys. Furthermore it's also dedicated to the Waffen SS, Hitler's armed butchers of innocent men, women and children. Let's not take this ham radio and Internet injustice lying down. Riley Hollingsworth of the FCC is tracking down Internet sources of trouble which carries over to our ham bands. The BARF board and BARF website are TWO, therefore make your displeasure known to the gentleman. E-mail him at rholling@fcc.gov/ Remember the only way evil can destroy good is when the good let it happen. Spit in the eye of W9XN, that fat neo-Nazi Schweinhund who is most responsible for all this anti-American propaganda. HELP CRUSH BIGOTRY and one of the ways is to CRUSH W9XN AND HIS HATEMONGERS! AF2Y,Doc

Hola y gracias, Lloyd, you perfect idjit!

You are never even eligible to be on HF except as SWL,
yet you claim to be BARF member. You are just a lowly
suck-up wannabee in your blue jumpsuit with embroidery
on your cap saying "Chief of Miscommunications".

BARF and STUMPJUMPERS are calling you a "nobody" on
the air, yet you are to dense to catch on that they
laugh at your miserable attempt to "be one like them".

You should change your signature line to read:

B.A.R.F. Chief Suck-up Fool

4488. Sick TS 930 S AT FS

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-16 00:00:00 UTC
From: Oris <oris@dirtball.com>
Message-ID: <37B86089.49C6AD2@dirtball.com>
Source record: 133639

I have a sick TS 930 that I would like to sell. It has wide and narrow CW filters. It also has the new PIXX digital PLL board and a new powersupply X43 1430 00 from Pacific coast parts. the rig has 117 volt fans on the back of the power supply and on the back of the PA. The rig will not power up. It also has new power transistors. I can't find the problem.
It all started when L3 shorted against the cabnet of the rig. I burnt 33 ohm resistor that was in seires with L13 and L3. All these have been replaced The power transfomer and the rectifier are producing the 40 volts needed. but that is where is stops. I am lost!. I have over $400.00 in the rig in new parts and
still can't find the problem. So if you think that your a good tech (better one than me time in this rig is killing me) then its the rig for

you. On a scale of 1 to 10 I would say the rig is a 6. It has a small scaches on the top corner of the face of the rig and it has those big 117 volt radio shack fans on the back. I will also throw in service manual and owners manaul. Like I said I have over 400 bucks in the rig. So if one of you send me 425.00 I'll send it to you shipping included. Its worth that in parts. It does also have the automatic antenna tunner.

> Rattlesnake, You bet Herbie is still here, and he will be here for awhile. They can't take his license for an off amateur radio charge. Now, all PORKBUTTS and KE4TEWs violations were on ham radio on the amateur bands. There are hundreds of hams with criminal convictions still holding ham licenses, why pick on our Herbie?. Sorry suckboys, Herbie will be here, and David is back. Chew on that awhile you Grubworms.

>Porkkbutt
Oris ourta send you that Clipperton. He knows you are good for it and will pay him back some day in the sweet bye and bye,. That will be a snazzy item for you to sell at the Truckstops to them truckers.. I heard you were in training for the "Iron man" competition. Also that you have lost thirty pounds and are down to two hundred and ninety pounds, I hope an old fifty plus geezer fart like you can make a good showing. You have a lot of time to train now that you are off amateur radio.

Maybe Oris will forget that you swindled him, and will let bygones be bygones, and get back into the suckboy rotation. He needs to send that amp to you. It is up to him to be fair about it.

Does there ? I get a bit sick and tired of people trying to tell me that there is a god or something. Maybe they are just conceptualizing (sp?) their paranoia at the thought of a big brother NOT watching their every move or monitoring their every thought.

Well Mark, is there such a thing as love? Have you ever held a
pint of love in a bottle? Concepts don't require mass. There
certainly also exists the concept of Santa Claus.

In this news thread Clint Bradford commented:

>From William J. Peet II:
>
>"The warranty is 1 year from date of purchase.
>
>"If an anemometer is hit by flying debris or hale from a storm or high
>wind condition, it is not really a warranty problem.
I am almost positive that debris did hit the anemometer.

>"If any one calls with this type of problem we send out replacement cups
>free of charge. If the tabs are broken on the rotor, replacement with
>cups is only $20.00 and we also offer a recondition anemometers for
>$59.00 for replacement.
Mine has a broken tab and I believe the $20 is a fair replacement
charge. All I was told in THREE different e-mails to Peet was that a
replacement anemometer head would be required. Clint, your services as
an ombudsman is greatly appreciated. I will try to order a rotor/cup
assembly today.
>"I think that is about as much as one could ask in a non-warranty
>environment."
I agree wholeheartedly!! Thanks!

Source record: 133668

Dear Hambone: (Ham Psychoanylist at large - Booth 69 Dayton Hamvention)

I am facing a very serious problem. You see, I am a Vietnam-era
Section 8, and I have a cousin who works for Microsoft.
My mother peddles Neo-Nazi 3950 literature to Girl Scouts and my
father is on probation for credit card fraud purchases of new
radios from Icom and Yaesu. (it was those damm color QST ad's)

The sole supports of our large family, including myself and my
$500-a-week crack habit, are my uncle (master pick pocket, Benny "The
Finger" BoBo), my 70-year-old aunt Hester (runs a brothel), and my two kid
"sisters" who are well-known cross-dressing Transvestite streetwalkers.

My problem is this: I have just gotten engaged to the most
beautiful, sweetest girl in the world. She is just sweet sixteen, and
we are going to marry as soon as she can escape from reform school.
Met her at Dayton no less!

To support ourselves, we are going to move to Mexico and start a fake
Aztec souvenir factory staffed by child labor and run phone patches for green
stamps on 14.313. We are looking forward to bringing our kids into the
family business.

But I am worried that my family will not make a good impression on
hers. In your opinion, Should I, or shouldn't I, tell her about my
cousin who works for Microsoft?

4518. FS GEN. RADIO ADJ. AIR LINE

I seen it there also Lloyd.....
Lloyd, you can call it "uncalled for" if you like. Fact remains it's the truth.
This is on the BARF amateur radio disgusting board.
Explain me Lloyd how this is related to amateur radio will ya?
"Act Right On 3950"
I recently, out of curiosity, went to the Barf board. You know, the
one that is supposed to be "about" amateur radio. It's not, but IT IS a
BARF board - PUKE would more accurately describe it.
Here's a sample of their amateur related messages.

Subject: Genocide in the Promised Land
Date: 1999/08/15
Author: w9xn <w9xn@JewishMail.com>
Posting History

Genocide in Jericho: Gen. Joshua Bar-Nun’s Marauding Israelites

Jericho, Palestine (JPI) - After seven days of bloody fighting,
marauding Israelites under the command of their charismatic leader,
Gen. Joshua Bar-Nun, have overrun the city of Jericho. According to
one of the few survivors, a local prostitute named Rehab, Joshua’s
forces entered the city and proceeded to murder every man, woman and
child. Even the city’s livestock was slaughtered, as carcasses of
oxen, sheep and donkeys were strewn throughout the city’s streets
alongside thousands of human corpses left behind by Joshua’s forces.

It is rumored that Joshua’s army, in open violation of the Geneva
Convention, employed top-secret, psycho-acoustic weapons to shatter the
walls of the city. Speaking on condition of anonymity, one of
Joshua’s officers stated, “Joshua ordered us to kill everything that
moves or breathes because that’s what G-d told him to do.” The
Israelites believe that Joshua is able to talk with their G-d and get
precise orders concerning the extermination of their enemies. The cult
leader has often been seen mumbling to himself and gesturing toward the
heavens.

Widespread looting has been evident throughout Jericho and the
surrounding area. Joshua’s troops have been observed carrying gold,
silver, bronze and iron ore out of the city. The rioting troops
claimed that the booty was to be turned over to the army’s treasury,
per direct orders from Gen. Bar-Nun. Later, it was reported that an
elite brigade (SS Gross VersprocheneLand), led by Lt. Col. Achen Carmi
(known to be one of Bar-Nun’s most ruthless henchmen) had refused to
turn over their share of the spoils and fled to the north.

In a public statement, issued late last night by Gen. Bar-Nun, the commander warned, “If anyone tries to re-build this city, Jericho, they will be in for it. We’re going to kill the firstborn child of anyone who attempts to lay a new foundation for this city. If anyone tries to put up new gates, we’re going to kill his youngest child.” The mayors of other cities in the region are calling for UN intervention to prevent the genocide from spreading to their regions. It is reported that Gen. Bar-Nun’s troops have already targeted the city of Ai and are now on the march towards that vicinity.

I have three peices of radio gear for sale.

1) Yeasu FT 2400 50 watt 2-meter moblie $150.00 you pay shipping and insurance. This is a good little 2-meter rig apperance wise its a 7 on a

scale of 1 to 10. It comes with a keypad mic. Drope me a line if you are

interested.

2) A Kenwood TS 120 moblie HF rig. This rig is a very simple HF rig. It covers the convental HAM bands 80 thru 10. It does about 70 watts out and is a again a 7 on a scale of 1 to 10. I'm asking $300.00 for the radio mic and power cord.You pay for the shipping and the insurance.

3) Dentron Clipperton L HF amplifier. I have $550.00 in the amp, with all the work I have invested in this amp that is what I have in it. But in all farness the amp isn't worth what I have in it so my asking price is $400.00. You pay shipping and insurance. This amp has been redone inside. I replaced the caps last year. It now ask 220uF caps in the power supply in stead of the 100uF and it also has new 1N4007 diodes too. The band switch is also new. The 572bs have very low use. I put new

572bs in the amp back in Feburay. I think I have fired it up 3 times since then. This amp is my back up. I run a SB 220 and I have another amp coming from Maryland for a back up amp. Its a pair of 813s built in the 1960s by my grandpa. Fullwave bridge powersupply the whole nine yards. So I don't need the Clipperton L any more.

I'm looking to get another HF rig. My TS 930 power supply crapped on me.

I have ordered a new Power supply board for the rig and I just put a new

PLL board in the rig. I really will not know what the damage is until I get the new power supply board installed.
I will also listen to any trades that anyone might have to offer for all of the equipment above. Heck I'll swap it all for another WORKING TS-930S/AT with the AM filter or TS-940S/AT with the AM filter.
I also have the Narrow CW filter that I would trade for the 6 KHZ AM filter that goes in the TS-930S/AT.
Thanks for reading and 73 from Oris

Read on, and see what these Communist Pigs are up to....

SPOTLIGHT EMAIL NEWSLETTER #26

COMMENTARY

Civil War Heritage Under Siege Across The South

Cultural communists beware: When people are denied their rightful heritage, unrest and strife follows.

EXCLUSIVE TO THE SPOTLIGHT

By Mike Blair

A portrait of Confederate Gen. Robert E. Lee or the crossed stars and bars of the Southern states' battle flag could no doubt be included in a museum display depicting the bloody War Between the States in the North.

It would probably never cause much of a stir among the populace there.

But don't try putting up a mural of Lee, considered an icon by millions of southern whites, in Richmond, the capital of the Civil War-era Confederate States of America.
And don't try to raise the South's battle flag, around which hundreds of thousands of Southern men-many mere boys-rallied to the defend of the South.

SPOTLIGHT July 5, 1999, reported that Lee's portrait in Confederate uniform was placed among others connected with the history of Richmond along a flood wall at the city's new Canal Walk outdoor museum, established to give a boost to the economic status of downtown Richmond.

Black activists, joined by white liberals, gave the city fathers, who had spent years planning the museum to help revitalize the city, an ultimatum: Lee was a symbol of slavery and racism and must come down-or else.

Demonstrations were promised, with one black separatist vowing that if Lee remained on the Canal Walk wall, blacks would "jam," suggesting that violence could be possible.
Lee was immediately taken down and now, with a former president of B'nai B'rith International on the museum committee, a compromise is being sought in the form of a Matthew Brady photographic mural of the immortal general. The photograph was taken just after the war, without uniform.

Even black dancer, Bill "Bo Jangles" Robinson, who some objected to as being "a stereotype," is scheduled to come down off the flood wall.

On the other hand, the B'nai B'rith's interest in a solution to the controversy over the Canal Walk murals includes the addition of a mural of

Jewish sculptor Sir Moses Ezekial. Other Jewish representation on the wall is promised.
As far as the Confederate battle flag is concerned, it is difficult to find one flying in Richmond, the heart of the old Confederacy, or anywhere in Virginia, for that matter.

It is politically incorrect, like Gen. Lee, and few Southern whites dare risking the ire that might result from their displaying it in public.

In northern Virginia, you can't find it flying over Confederate General "Stonewall" Jackson's headquarters, now a national historic site and museum. It is not displayed at another historic site in southern Virginia, Appomattox Court House, where the Civil War came to an end with a Northern victory over the forces of Gen. Ulysses S. Grant over the remnants of Lee's once formidable army.

The U.S. Park Service, which maintains Southern historic sites, apparently considers it a taboo.

Elsewhere in the South, the politically correct are also marching ever forward. In South Carolina, as an example, an effort is underway, backed by such black luminaries as Martin Luther King III, to have the battle flag removed from where it flies atop the state capital building in Charleston.

A compromise is being sought, to fly both the battle flag and the so-called black liberation flag, which is composed of black, red and green vertical bars. Black stands for the black race, green for the land, and red for the blood that must be shed to gain a new all black nation, carved from the South. The states of Alabama, Mississippi, Georgia, Louisiana and South Carolina are the states targeted by the black racists, if you like.

Moving on to Louisiana, the picture is just as bleak for Southern heritage. In cities and villages across the state the names of well known American patriots are being removed from schools and other public buildings, patriots including George Washington, Thomas Jefferson, and, naturally, Robert E. Lee.

In place of these immortals of American history the names of often obscure black activists are being placed.

The simple truth is that throughout the South the history and heritage of millions of white Southerners is being erased from public view, with most who cherish the history being cowed into silence for fear of being accused of racism.

Just how long Southern white descendants will tolerate the slurs against their patriotic forefathers, who considered an invasion of their states from the North, in the interests of international bankers and speculators, a reason to take up arms, remains to be seen.

UN Troops Planning to Move on U.S.?

The Internet is notorious for spreading tall tales, but you can always count on The SPOTLIGHT to get to the bottom of these stories-fact or fiction-and only publish what is the truth.

EXCLUSIVE TO THE SPOTLIGHT

By Christopher J. Petherick

A federal prison in Texas fitting is government vehicles for a possible UN police force to occupy the United States, according to the Internet rumor mill. The SPOTLIGHT contacted prison officials at the purported location and found out the story was bogus.

Early August, a rumor was circulating over the Internet that a prison in Bastrop, Tex., was storing "nearly a thousand white buses and sport utility vehicles" fitted with shackles and cages on its grounds.

Assumptions ran wild that the vehicles were to be used by a UN police force to incarcerate American citizens.

A web site at www.alltexas.net/news/ stated the following:

Rumors have been floating in the area for months about a fleet of suspicious vehicles being outfitted with prisoner cages, shackles and insignia such as 'U.S. Police Force' and the UN roundel. None of the vehicles observed in the storage area appeared to have any markings at all other than window stickers with equipment data.

Soon others from opposite parts of the country posted pictures on the web, with descriptions such as: "One of many images sent to us showing many school buses being painted from the normal yellow color, to a white color and the words 'UN' in black painted on the sides of them."

The photograph was said to have been taken at a Chevy/Oldsmobile car dealership in Lafayette, Ga.

The purported "UN" painted on the side of the bus, appeared as though someone had scrambled into the car lot and hastily spray painted "UN" in black on the lower-right-hand side of the first bus in a row of five.

THE "OFFICIAL" STORY

The SPOTLIGHT spoke with Public Information Officer Timothy Stewart at the Federal Corrections Institute in Bastrop, Tex., who clarified the rumors regarding his prison.
"We made up a press release, because we received so many calls about the vehicles," Stewart told The SPOTLIGHT.

"Federal Prison Industries has obtained a contract with INS to retro-fit their vehicles with aftermarket items," an official release from the prison says. "Future plans call for remanufacturing of INS and Border Patrol buses and other INS vehicles."
Three hundred inmates would be employed to perform the work at the UNICOR factory, a government corporation.

Stewart said the vehicles were being held for Border Patrol agents, who would use them along the U.S.-Mexican border to apprehend illegals attempting to cross into the United States.

Stewart denied the vehicles were being repainted and fitted for a UN police force to serve on the border.

Where is Morris?

On July 22, SPOTLIGHT Editor Andrew Arnold wrote an open letter to Morris Dees, head of the Southern Poverty Law Center. Arnold's still waiting for an answer.

EXCLUSIVE TO THE SPOTLIGHT

By Andrew Arnold

I looked forward to reading Morris Dees' answers to the questions I mailed him. My open letter appeared in the Aug. 2 issue of The SPOTLIGHT.
After ruining so many on the political right, I wanted to know if Dees had the same in mind for The SPOTLIGHT.

Dees vowed to Jimmy Carter that he would "break the National Rifle Association." Last I checked, the NRA doesn't have $100 million in the bank like Morris Dees' Southern Poverty Law Center, however the NRA was going strong.
Morris has shown, during his not so illustrious career, there's lots of money in "poverty."

While the newspaper might not be the biggest in the nation, my staff and I make our living here. Someone, or group, is trying to run us out of business and it has Southern Poverty Law Center fingerprints on it. Maybe its not Dees at all, maybe its an impostor, I'm just trying to find out who it is I'm supposed to be fighting.
Dees is supposed to be an expert on the right, so I was hoping he would help me. I asked Dees four specific questions:

1) Have you made behind-the-scenes arrangements to supply the funding for the legal offensive that is now being conducted against LIBERTY LOBBY in court in California and in the U.S. Bankruptcy Court for the District of Columbia?

2) Are you now receiving, or have you ever received, financial backing from a wealthy Washington, D.C.-based office supplies company owner in return for your assistance in the effort to destroy LIBERTY LOBBY?

3) Have you ever received tactical support from (or provided legal assistance of any kind to a San Francisco-area attorney, Andrew E. Allen, who has provided legal support to the very conspirators who have filed legal action against The SPOTLIGHT?

4) It is known that the aforementioned Andrew Allen was "advising" Mr. Tom Metzger of the "White Aryan Resistance" at the very same time you were conducting your legal assault on Metzger that resulted in his bankruptcy, with the result that you are now opening Metzger's mail and seizing contributions in order to satisfy the judgment you obtained against Metzger. Is this also what you intend for The SPOTLIGHT?

Certainly Dees understands what it is like to have unanswered questions. After all, he has devoted his life to research. A couple of years ago, when he was in Washington, I sent a reporter out ask him specific questions. (See The SPOTLIGHT, July 27, 1997.)
All he would say to Jim Tucker was: "I have no interest in answering any questions for SPOTLIGHT."

I guess some things never change.

Right on Rick. Another person that thinks CW will die if we dont
force everyone to learn it before thay can have access to HF
frequencies. Well I got news for all of those folks:
as long as they keep using it, it will not die. Nor will lowering or
eliminating the code testing requirements allow Amateur Radio
to become any more like CB radio than it already is. especially if
ALL of the test question pools were changed, and not made public.
What has any of this to do with Shortwave? Not much except that some
SWLs listen to the Hams sometimes.

I don't know if you've pushed the usenet limits yet (the BI is still small), but I do know that the multiple, empty, and disruptive posts violate AOL's Terms of Service.

All someone has to do is to forward those posts, complete will full headers, to abuse@aol.com and your usenet posting priveleges will more than likely be suspended.

AOL has a very short fuse when it comes to TOS abuse.

It is NOT legal - any transmitter used for FRS purposes must be FCC type accepted for that use: Subpart D, 95.194 (a) "You may only use an FCC certified FRS unit..."

As to whether or not it is possible, that depends on the radio. Some can, others can't. I don't recommend it because ham radios use up to 5 KHz fm deviation, and FRS is only authorized 2.5 KHz deviation. Also, ham radios typically provide somewhat higher rf power levels than are authorized on FRS (0.5 watt maximum ERP). Related to deviation, FRS uses the newer "narrow band" 12.5 KHz channel specification, while ham radios use the older 25 KHz channel spec.

It's like this. N0VFP is too damned stupid to show any creativity. He lacks the basic ingredient-intelligence, therefore he must post white supremacist propaganda. I'll say this: if I were Black and on this board and I knew that N0VFP was representative of white extremism, I'd have nothing to worry about. Incidentally as an Independent voter who leans more to the Democrats because of the subversion in the ranks of the G.O.P. by way of the rightwing screwball Christian Coalition, there's only one Republican I'd vote for in 2000. Alan Keyes,who's as black as charcoal but has a mind brighter than all the Dems and Reps put together. AF2Y,Doc

Fact:

About two or three years ago when Dan Jeswald, W4NTI was living in as one of the hams in Alabama said, 'Near Poverty" conditions. His mother got sick in Ohio. Knowing that Dan had a cash flow problem, The StumpJumpers got a pot together. The money was earmarked to finance Dan's trip to Ohio to visit his mother. Dan accepted the moneys and did in fact visit his Mother who was very sick at the time. Later a Stumpjumper advised Dan who to cantact in the VA to get full disability payments started. All this was done for Dan because of the charity of the "Stumpjumpers"

Now Dan , after accepting the moneys to see his mother, and using the help about his disability, is on the air and this forum knocking and badmouthing the Stumpjumpers . The Stumpjumpers also paid for a rig that a amateur in Texas had bought from Dan and never paid for. The Stumpjumpers Sent a check to Dan for the amount that was due on the rig.

After all these good things that the Stumpjumpers did in the name of "Helping a down and outer" Dan comes on this forum and knocks the Stumpjumpers. He is a ingrate and will bite the hand that feeds him. Oh yes, the first goverment check he got, he bought a expensive Kenwood rig. First things first you know. The radio was worth mre than his house trailer. He knows all of this is true.

What you are saying is that moderates run both parties. You know
what a moderate is. The jocks and preppies in high school who become
frat boys in college. They have social skills and know how to get
power.

Those on the left are the folks who never got over being a loser
in high school. That is why Hollywood does so many "revenge of
the nerds" movies. Trying to relive, and rewrite, their high school
years.

The right gets over high school but never quite learn how to learn
to "play well with others" that is they don't understand social
relationships.
They tend to speak out more frankly, be extreme individualists, and
live to unreasonable standards.

The moderates are not as good at creating ideas. Thus they keep
a "pet" geek around to come up with ideas. Then they run the idea
thru focus groups and committees to mold into something that everyone
can live with. God forbid that a moderate would have an unpopular
idea.

:
: Mostly verry true with one important missing element.

news:Q%Ls3.31$7W6.3350@iad-read.news.verio.net...
: Don't you fall into the trap! Conservatives are full of crap.
: Why does the Republician party exist? It's simple, the racists,
: confederates, and tax-evaders have to go somewhere. Just remember.
: Rebublicians = white, Democrats = colorful.

First off you are jealous that the Democratic party split
in that the southern Democrats and workers are leaving
the party.

Second, it has been pointed out that the biggest form
of racism is the opposition to school choice. The rich
and the well educated, who are not the mainstream of
the Democrats, are fearful of having blacks in their suburban
schools. No one says anything because no one wants
to rock the boat. Not even Jesse Jackson.

Third, rich liberals are the biggest tax evaders of any
group.

Fourth, once you get away from the moderates at the
top of each party you have the more common man
in the ranks. It is the common people who are colorful.
Not the suits, like Gore and Bradley.

Fifth, that was the most racist, bigoted and stereotypical
comments that have been made in amateur radio for
sometime now.

Dear Hambone: (Ham Psychoanylist at large - Booth 69 Dayton Hamvention)

I am facing a very serious problem. You see, I am a Vietnam-era
Section 8, and I have a cousin who works for Microsoft.
My mother peddles Neo-Nazi 3950 literature to Girl Scouts and my
father is on probation for credit card fraud purchases of new
radios from Icom and Yaesu. (it was those damm color QST ad's)

The sole supports of our large family, including myself and my
$500-a-week crack habit, are my uncle (master pick pocket, Benny "The
Finger" BoBo), my 70-year-old aunt Hester (runs a brothel), and my two kid
"sisters" who are well-known cross-dressing Transvestite streetwalkers.

My problem is this: I have just gotten engaged to the most
beautiful, sweetest girl in the world. She is just sweet sixteen, and
we are going to marry as soon as she can escape from reform school.
Met her at Dayton no less!

To support ourselves, we are going to move to Mexico and start a fake
Aztec souvenir factory staffed by child labor and run phone patches for green
stamps on 14.313. We are looking forward to bringing our kids into the
family business.

But I am worried that my family will not make a good impression on
hers. In your opinion, Should I, or shouldn't I, tell her about my
cousin who works for Microsoft?

<<A GREAT POST. And I thought "Bowfinger" was funny.>>

Sorry to burst your bubble OM, but Drew Durigan hasn't posted in this
newsgroup for months now. (He also got canned from his DJ job in Kansas, in
case you haven't heard.) As I recall, Drew was run off of
rec.radio.amateur.misc by a group of hams who were mighty upset with ol'
CBRAMBO for promoting illegal activities (i.e. out of band operation) on the
amateur bands. And you can bet that Drewsy's protege Lloyd Davies N0VFP will
be out of this newsgroup like poop through a goose if he doesn't settle down a
bit. AOL does cancel accounts for TOS violations from time to time, you see,
and the evidence against Mr. Davies is mounting. All one needs to do is look
up his posts in Dejanews to verify that fact.
You've lost your flippin' marbles, Lloyd.

"Where's all the RADIO CRYBABIES?"
"I wanna hear 'em TALK TOUGH!"

>>>> Well, Frank (or who's dead man's call you're using this week) I think
you should show the proof. Proof that I'm CBRambo, proof that you ran Drew out
of this Newsgroup. I think we should also hear about your link with "Oye Boy"

My, My that would be nice reading! I also think I should see this "evidence against Mr. Davies is mounting" as well, Since it's my AOL acct.

Until you can prove the above, YOU ARE A COWARD! A coward for posing using a dead man's CB handle. Drew told me all about that escipade. Let's hear your story!

Remember, mess with the B.A.R.F and you will get burned!

You know that all sounds like good things being done by the stumpers. You guys did it, I guess, out of the kindness of your hearts. IT now sounds like you "Expect" something in return for some generosity. Is that what this is? Is he supposed to follow your party line or something in return?
It wasn't done out any kindness or goodness because if it was you wouldn't be trying to slap him in the face with the deed, emabarrss him, and NOW your asking for it back. Hypocites. LOL

Well
I wouldn't be so hard on Dan now. See Dan is undergoing some savear
changes right now. See Dan was always under the influence of the slime ball
of Easly South Carolina. Now with out that piece a trash on the airwaves
any more Dan knows not what to do. I have to wait and give the guy some
more time to undergo the harsh abandonment of the king slime ball himself
the know all see all and done all Richard Whiten AKA porkbut! So I think
while Dan goes through porkbut withdraw we should be a little kinder to this
sick addict. I mean we wouldn't treat a sick friend or family member that
way. I also have to be will to give Danny boy more time to beat his
addiction. After all he did try to warn me about porkbut's steeling ways
before I got burnt. Of course he will deny it. All addicts deny they have a
problem till its to late. I find it quite refreshing to know that the FCC
has taken Dan's addiction right off the airwaves and it will be just a
matter of time before he is back to being the right straitup member of the
amateur radio community. However these things take time and we all need to
have a little patience and tolerance in this post porkbut era as these poor
unfutionate amateur radio operators get back to their normal selves.

4595. My opinion on the FCC

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-17 00:00:00 UTC
From: Oris <oris@dirtball.com>
Message-ID: <37B8F0FF.E35D2C08@dirtball.com>
Source record: 133557

One thing the FCC should take Rich Whitens ticket Al Abernasty's ticket Hereby Solinbom's ticket and a few others but instead they did a so called modification. What's that they should of been on the ball years ago! Know pirate techs modifying radios and they know about it and who they are. FCC corruption with in their own ranks. So before the FCC does anymore restructuring I think they need to clean up their own mess! Look at this line of bull donk below!

Kennard was traveling in South Africa on business and was unavailable for
comment.

What is this about? What kind of business does the FCC chairman have in South Africa? As the chairman of a very powerful United States regulatory bureaucracy he should always be available to the American public not off on some unknown business trip in South Africa. What is that? What kind of business does he have in South Africa? I think that that should be looked into a little deeper! Its my opinion that he has NO BUSINESS in South Africa!

Under the plan, the FCC's core functions will be threefold. It will ensure universal service for all Americans, protect consumers from abuses and provide information. In addition, it will enforce the laws and promote competitive markets domestically and worldwide. The agency will retain its management of the electromagnetic spectrum ï¿½ the nation's airwaves ï¿½ to protect the public interest.

What enforcement of laws? I haven't seen any enforcement of any laws. All I have see is a buch of thieves cable companies asking for more money and one lone ranger playing judge and jury to the amateur radio community. This should read "The agency will continue to allow companies to continue to make faulty telephones televisions and Stereos to increase the pressure on the amateur community to give up the ham bands to be bid away to the banana republics. The agency will retain its stealing of the eltromagnetic airwaves and saleing them to the highest bidder. Continue to tell people to apply for licenses that aren't there and continue to give out information on some and with hold other info on others. To protect the highest bidders interest and smash out the amateur community!"

One of the FCC's most vocal critics in Congress, Rep. W.J. "Billy" Tauzin (R-La.), chairman of the House telecommunications subcommittee, calls the plan "a good first step." But he plans to introduce reform

legislation
designed to rein in the FCC's authority over such areas
as
telecommunications mergers, mandating free airtime for
political candidates and establishing micro radio
stations.
This all fine and well I just hope that don't forget the Bill of Rights
in all this regulation. One thing that I have seen in the past when they
say deregulation to promote commutation prices do one thing and that's
go UP!
To me this is a bunch of hog wash just to give the FCC more power over
the american public! KEEP THE GOVERNMENT OUT OF THE INTERNET!
That's just my opinion I could be wrong!

Source record: 133558

Again, I ask the question. Who is this famous college professor? What
are his credentials? Is this professor a pro-homosexual communist? What are his
politics? Is he against freedom?
Does he hate the Constitution? I bet he does!
How can anyone say this person has any credability if they don't know
who this guy is?
Remember, the Boy scouts have been listed as a hate group by Nambla and
the pro-sodomite groups. The US government must agree that the Boy Scouts are
a hate group because the federal court has ruled that the Boy scouts cannot
keep homos out, thus agreeing with Nambla and the homosexual organizations.
. So if Tim is so pre-disposed to believe anyone who posts that
they are an expert in hate groups, then it stands to reason that he believes
that the Boy Scouts are a hate group becaust the Government says so by its
ruling in the courts. Then it is logical to deduct that Tim supports
homosexuals and their predatory activity in the Boy Scouts.
And remember, No I will not visit the 3950 opinion page and no, I will
not leave a comment

<snip>

I took the liberty of examining one of these units, and the included documentation, at John's booth at the Bay Area's Foothill swap meet back in July.

Although I can see that the boards are clearly useful for some applications, be aware that they do NOT put out NMEA-compliant data bursts. The output format is most definitely proprietary (though it is thoroughly documented in the links referenced on John's web page).

In any case, this means that the receivers cannot be directly used with some popular mapping software packages, such as Chicago Map's 'Precision' CD, or with DeLorme's Street Atlas, that expect NMEA-compliant data streams. I suppose it's possible to construct some sort of format converter if one wanted to go to all the effort.

Caveat GPS...

Every commercial radio-telegraph shore station did in fact conduct
broadcasts, including weather and traffic lists. (See the FCC's
definition of "broadcast" -- I believe Part 1 or Part 2 contains
all telecommunication definitions.)

Source record: 133564
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

Archive-name: radio/personal-intro

This message describes the rec.radio.amateur.*, rec.radio.cb, rec.radio.info, and rec.radio.swap newsgroups, as well as their Internet mailing list counterparts and complements. It is intended to serve as a guide for the new reader on what to find where. Questions and comments may be directed to Jeffrey Herman, KH6O, jeffreyh@hawaii.edu, or Paul Schleck, K3FU, pschleck@novia.net.

This message was last changed on 14 March, 1998.

History
=======

Way back when, before there was a Usenet, the Internet hosted a mailing list for hams, called (appropriately enough) INFO-HAMS. Ham radio discussions were held on the mailing list, and sent to the mailboxes of those who had signed up for it. When the Usenet software was created, and net news as we now know it was developed, a newsgroup was created for hams: net.ham-radio. The mailing list and the newsgroup were gatewayed together, eventually.

Over the years, as the net grew, the volume of discussion became progressively higher. First one by one, and then as part of two reorganizations, what was once one group became many. In the process, developments elsewhere on the net were reflected in the groups as they were created, most notably the change to place all of the ham radio groups in one hierarchy.

The collection of newsgroups continues to grow as more people join the net, and as more topics of discussion gain volume, I expect to see more groups be created as well. This follows what is happening on the rest of the net.

Nearly all of the radio newsgroups have corresponding mailing lists, the notable exception being rec.radio.swap. There are also a few mailing lists that don't have newsgroups.

The Current Groups
==================

It's important to post messages to the group that's appropriate for them, and not to the groups that aren't. The whole idea of having different newsgroups is so that folks who aren't interested in, say, homebrewing, don't have to wade through messages about homebrewing on the way to read about Field Day. Posting appropriately is just good etiquette.

The rec.radio.amateur.misc group is the catchall. It is what rec.ham-radio was renamed to during the first major reorganization. Any message that's not more appropriate in one of the other groups belongs here, from contesting to DX to ragchewing on VHF to information on becoming a ham.

The group rec.radio.amateur.digital.misc is for discussions related to (surprise!) digital amateur radio. This doesn't have to be the common two-meter AX.25 variety of packet radio, either; some of the most knowledgeable folks in radio digital communications can be found here, and anything in the general area is welcome. The name was changed to emphasize this, and to encourage discussion not only of other text-based digital modes, such as AMTOR, RTTY, and Clover, but things like digital voice and video as well. The former group, rec.radio.amateur.packet, was removed on September 21st, 1993. It is obsolete, and you should use .digital.misc instead (or the appropriate new mailing list, mentioned below). The group has .misc as part of the name to allow further specialization if the users wish it, such as .digital.tcp-ip.

The swap group is rec.radio.swap. This recognizes a fact that became evident shortly after the original group was formed: Hams don't just swap ham radio gear, and other folks besides hams swap ham equipment. If you have radio equipment, or test gear, or computer stuff that hams would be interested in, here's the place. Equipment wanted postings belong here too. Discussions about the equipment generally don't; if you wish to discuss a particular posting with the buyer, email is a much better way to do it, and the other groups, especially .equipment and .homebrew, are the place for public discussions. There is now a regular posting with information on how to go about buying and selling items in rec.radio.swap; please refer to it before you post there. To answer a frequently asked question: No, there is no mailing list that goes along with this group. If you can't read Usenet news directly, you're out of luck.

The group rec.radio.amateur.policy was created as a place for all the discussions that seem to drag on interminably about the many rules, regulations, legalities, and policies that surround amateur radio, both existing and proposed. Recent changes to the Amateur Radio Rules (FCC Part 97) have finally laid to rest the Great Usenet Pizza Autopatch Debate - it's now legal to order a pizza on the autopatch, if you're not in the pizza business - as well as complaints about now-preempted local scanner laws hostile to amateurs, but plenty of discussion about what a bunch of rotten no-goodniks the local frequency coordinating body is, as well as the neverending no-code debate, may still be found here.

The group rec.radio.cb is the place for all discussion about the Citizens' Band radio service. Such discussions have been very inflammatory in rec.ham-radio in the past; please do not cross-post to both rec.radio.cb and rec.radio.amateur.* unless the topic is genuinely of interest to both hams and CBers - and very few topics are.

The rec.radio.info group is just what its name implies: it's the place where informational messages from across rec.radio.* may be found, regardless of where else they're posted. As of this writing, information posted to the group includes Cary Oler's daily solar progagation bulletins, ARRL

bulletins, the Frequently Asked Questions files for the various groups, and radio modification instructions. This group is moderated, so you cannot post to it directly; if you try, even if your message is crossposted to one of the other groups, your message will be mailed to the moderator, who is currently David Dodell, WB7TPY. The email address for submissions to the group is rec.radio.info-moderator@primenet.com. Inquires and other adminis-trivia should be directed to rec.radio.info-request@primenet.com. For more information about rec.radio.info, consult the introduction and posting guidelines that are regularly posted to that newsgroup.

The groups r.r.amateur.antenna, .boatanchors, .dx, .equipment, .homebrew, and .space are for more specialized areas of ham radio: discussions about antennas, the older tube based amateur, military, and commercial gear, commercially-made equipment, homebrewing, and amateur radio space operations. The .equipment group is not the place for buying or selling equipment; that's what rec.radio.swap is for. Similarly, the .space group is specifically about amateur radio in space, such as the OSCAR program and SAREX, the Shuttle Amateur Radio EXperiment; other groups cover other aspects of satellites and space. Homebrewing isn't about making your own alcoholic beverages at home (that's rec.crafts.brewing), but rather construction of radio and electronic equipment by the amateur experimenter. The .dx group is devoted to long distance amateur communications. Each of these subgroups has its own charter and FAQ; please refer to the archives to find these documents.

Except for rec.radio.swap and rec.radio.cb, all of these newsgroups are available by Internet electronic mail in digest format; send a mail message containing "help" on a line by itself to listserv@ucsd.edu for instructions on how to use the mail server.

All of the groups can be posted to by electronic mail, though, by using a gateway at the University of Texas at Austin. To post a message this way, change the name of the group you wish to post to by replacing all of the '.'s with '-'s - for example, rec.radio.swap becomes rec-radio-swap - and send to that name@cs.utexas.edu (rec-radio-swap@cs.utexas.edu, for example). You may crosspost by including multiple addresses as Cc: entries (but see below). This gateway's continued availability is at the pleasure of the admins at UT-Austin, and is subject to going away at any time - and especially if forgeries and other net.abuses become a problem. You have been warned.

Mailing Lists

In addition to the mailing lists that mirror the Usenet newsgroups, there also are a few that stand alone. These cover specific areas of ham radio, and discussion is focused on just those areas. PLEASE BE SURE TO SAVE THE WELCOME MESSAGE YOU RECEIVE AFTER SUBSCRIBING -- IT WILL CONTAIN IMPORTANT INFO REGARDING UNSUBSCRIBING!

The cq-contest mailing list is for discussions of contesting in ham radio. To join, send an email to cq-contesting-request@contesting.com.

The DX mailing list covers the finer points of DXing. This one is also joined by mailing "subscribe" on a line by itself, this time to dx-request@unbc.edu.

There's also a VHF mailing list, for VHF operators of the weak signal persuasion. You can join this one be sending "subscribe vhf" on a line by itself to vhf-request@w6yx.stanford.edu.

The QRP-L list is devoted to building and operating gear at low-power outputs. To subscribe, send an email to listproc@lehigh.edu and only write: subscribe qrp-l Your Name.

The TopBand e-list is devoted to all areas of operation on 160m. To subscribe, send an email to majordomo@contesting.com and only write: subscribe topband and follow the instructions you'll be sent.
This site, contesting.com, also hosts a couple dozen other ham-related e-lists. Use the above address, and only write: lists to get the entire index.

The Boatanchors e-list is devoted to the older tube-based ham, military, and commercial communications gear. To subscribe, send an email to: listserv@listserv.tempe.gov and only write: subscribe boatanchors

For homebuilding transmitters and receivers using tube technology, there is the Glowbugs e-list; send an email to: majordomo@piobaire.mines.uidaho.edu and only write: subscribe glowbugs <your@address.here>

The VHF DX discussion list can be accessed by sending an email to: majordomo@blacksheep.org and only writing: subscribe VHF-DX-discuss.

We now have a list devoted to amateur radio history. To subscribe, send an email to: ham-radio-history-subscribe@egroups.com - leave the body of the message blank.

Qth.net hosts over 100 ham-related e-lists, including lists devoted to each state, manufacturer, mode, band - too many to state here. Send an email to majordomo@qth.net and only write: lists to get the complete index.

For one of the most complete indexes of email lists, see the excellent web site http://pw2.netcom.com/~ac6v/pageae.html

Please do NOT send subscription requests to the mailing lists themselves; that doesn't work very often, and is very annoying to those on the list. Also, please keep your electronic mail address current with any mailing lists you subscribe to, as dealing with returned email is a nuisance for the person maintaining the mailing list.

A Few Words on Crossposting
==========

Please do not crosspost messages to two or more groups unless there is genuine interest in both groups in the topic being discussed, and when you do, please include a header line of the form "Followup-To: group.name" in your article's

headers (before the first blank line). This will cause followups to your article to go to the group listed in the Followup-To: line. If you wish to have replies to go to you by email, rather than be posted, use the word "poster" instead of the name of a group. Such a line appears in the headers of this article.

One of the few examples of productive cross-posting is with the rec.radio.info newsgroup. To provide a filtered presentation of information articles, while still maintaining visibility in their home newsgroups, the moderator strongly encourages cross-posting. All information articles should be submitted to the rec.radio.info moderator so that he may simultaneously cross-post your information to the appropriate newsgroups. Most newsreaders will only present the article once, and network bandwidth is conserved since only one article is propagated. If you make regular informational postings, and have made arrangements with the moderator to post directly to the group, please cross-post as appropriate.

God, you wanna make me vomit with your bullsh-t!!!!

First, I see NO Liberty Net mentioned on this so-called "Hate List". Second, even if there was, so what??? They've got nice little Christian groups listed on this thing!! One of the groups is a watchdog against the filth we see on TV! If these are examples of so-called "Hate Groups", the world needs MANY more of them!!

And mailing in magazine subscription cards IS NOT mail fraud!! Mail fraud is when you accept a mail order, and don't fulfill it, or send something fraudulent in its place. (Example: sending a paper clip, instead of the tie clip you advertised.) ANYONE can fill out these magazine subscription cards and give them as "gifts"!! However, since magazines are having problems with unwanted subscriptions, they often only send one "sample", or ask for payment before mailing. Vic's purpose was to add extra WORK to Time-Warner, and we all know that WORK costs the company MONEY. But you know what? Sometimes one has to break the law in order to stop immoral activity. Tell me, Timmy, how do you feel about Rosa Parks breaking the law?????

Willie

I have three peices of radio gear for sale.

1) Yeasu FT 2400 50 watt 2-meter moblie $150.00 you pay shipping and insurance. This is a good little 2-meter rig apperance wise its a 7 on a

scale of 1 to 10. It comes with a keypad mic. Drope me a line if you are

interested.

2) A Kenwood TS 120 moblie HF rig. This rig is a very simple HF rig. It covers the convental HAM bands 80 thru 10. It does about 70 watts out and is a again a 7 on a scale of 1 to 10. I'm asking $300.00 for the radio mic and power cord.You pay for the shipping and the insurance.

I DO BELEIVE THAT THIS AMPLIFIER IS SOLD!
3) Dentron Clipperton L HF amplifier. I have $550.00 in the amp, with all the work I have invested in this amp that is what I have in it. But in all farness the amp isn't worth what I have in it so my asking price is $400.00. You pay shipping and insurance. This amp has been redone inside. I replaced the caps last year. It now ask 220uF caps in the power supply in stead of the 100uF and it also has new 1N4007 diodes too. The band switch is also new. The 572bs have very low use. I put new

572bs in the amp back in Feburay. I think I have fired it up 3 times since then. This amp is my back up. I run a SB 220 and I have another amp coming from Maryland for a back up amp. Its a pair of 813s built in the 1960s by my grandpa. Fullwave bridge powersupply the whole nine yards. So I don't need the Clipperton L any more.

4620. HELP !!! Ford Expedition power problem

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-17 00:00:00 UTC
From: Randy Biesel -N5ISV <rrb5@flash.net>
Message-ID: <37B977CF.16D53DD@flash.net>
Source record: 133582
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur,alt.ham-radio.hf,alt.ham-radio.vhf-uhf

Anyone have a Ford Expedition with radio gear installed ? Where do you run power through the firewall to get to the battery ? I find no grommet of any kind. All wiring harnesses go through a connector on the firewall.

Any help would be appreciated

N5ISV
Randy

Hi Randy,

Follow the hood release cable and you should be able to pass a
stiff rod past the grommet at that point to route your power cables.

The STUMPJUMPERS NEVER GAVE ME A THING. This just goes to show you how un-informed and ignorant of the facts these wannabee Johnny come latelies really are.

The FACTS ARE AS FOLLOWS: I received enough money to buy a round-trip bus ticket to Ohio from the ABERNATHY RADIO GROUP. This group operated on 3894.5. Several of the members of that group later formed the STUMPJUMPERS.

Why did I accept this donation? Because Cpt. Charlie talked me into it. Now you wannabee's can research who he is. I was told this was a gift, a donation and no repayment was required. Only because it was the ONLY WAY I had to see my mother did I accept it.

The radio that is claimed to have been bought by the STUMPJUMPERS and monies given to me is also another BS story.

FACTS: Butch (WB5UZS) purchased a TS-820S from me on time payments. He tore it up, went into another of his crazy spells, told me he was sending it back and that's what he did. Randy Best (WA7CPA) came up with a tongue and cheek method of getting me payed and at the same time messing with Butchy Baby a bit. He sold "shares" and issued certificates at the Dayton Hamfest. I was told to keep the money, and the radio, or send the radio to W4WKS. I sent the radio to W4WKS. I don't know if it was repaired or not. This deal by Randy, was his own idea. I, at no time, requested this to be done.

A year or so later another jerk shows up from the swamps. One KT4TR, Bob Youngblood of Vero Beach Fla. He begins harassing me about repaying the "gift". I contacted Al Abernathy, who flat refused to tell me who donated what. I contacted Cpt. Charlie, who said he did not know. Marty and others suggested I send it back at a Herby fund donation. I refused. It was suggested I make a contribution to a veteran's organization in the name of the BARF/Stumpers. Again I refused. I wanted to send the money back to those that contributed. All this can be verified by W4FQF, W4LLI and W9XN, assuming they tell the truth, of course. I found out about several folk's that admitted to contributing. Only Polly and Billy Jack wanted repaid. I did so at the Huntsville Hamfest.

My VA Disability information: Once and for all I'm going to set this straight.

I am a combat disabled veteran of Vietnam. I was blasted by a Chicom rocket at Bien Hoa AB, SVN in Dec of 1967. I did not receive a scratch and all injuries were a result of concussion and trauma to my back and

neck. I did not seek medical attention at that time, because my military duties required my attention. I was the ONLY communications we had from TRAIN compound to the BIEN HOA AB during the VC attack.

Three years later, while in the ARMY in Germany I developed a severe back problem. It was determined I had a severe injury to my bottom three vertabrae, two in the middle of my back, and neck twisting similar to whip lash. After 8 more years of military service I had to be discharged because the problem had worsened. In 1979 I got out and received my initial VA disability rating of 40%. This was about 1981.

After working in the electronics technician field for several years I was terminated by the Anniston Army Depot (Bynum) because they could no longer accomidate my disability. Retirement was refused, and I lost everything I owned. It also contributed to my marriage breakup. I spent the next several years working as I could in radio repair. I ended up in a field owned by a friend in the woods, with only a power pole and a creek, and my little 1972 Ford camper.

After a couple more years of fighting with the VA, I received my upgrade to 100%. This is based on my back, PTSD and other medical problems that are a direct result of Vietnam service. If you can't deal with that, then get over it.

The change from 400 dollars a month to nearly 2000 makes it much easier to provide a decent home for my lady, who is soon to become my wife. I received a lump sum back pay settlement and paid off my back bills, bought furniture, bought her a decent car, and me a van. (all used of course). Helped her daughter start nurseing school. (Soon to graduate now). Rented a nice trailor and bought me a FT1000MP. Why did I buy me a spanking new radio? Because my wonderfull lady told me to get something for myself,for once. Sorry if that breaks your bubble too. But you'll get over it.

So, there is your reply, wannabee's. And I'll leave you with this to ponder....If you think Riley is stupid enough to believe you folk's are the goodguys in this radio war...Then you are truely ignorant. Now take your best shot, losers. Charlie couln't put me down and you sure as hell won't either.

I for one am done with this stupid war. All your doing is trying to keep it going. Anyone with any sence can see what "group" is the real troublemakers. Just look at the post's and who they support.

And to you ORIS, remember when I said I wanted to keep you as a friend? Well forget it. You are showing your true colors. Just join up with the Stumpers/Barf/ARG crowd. It's exactly where you belong. Tow that line, boy , tow that party line.

And as I used to say on 3901....Leave me alone, and I'll leave you alone. Otherwise get ready because this little gimped up Sicilain blooded veteran is sick of your crap. Take that as a promise.

The BARF was created by John Dellinger, K4GFM (now a SK). In it's heyday it was most famous for being self appointed, self annointed policemen of the ham bands. It especially enjoyed jamming and harassing the INTERCON net on 14.313, who they claimed was a Jewish front organization to cheat the phone company out of revenue.

The BARF name was modified some years later by Douglass Gerry, NR5T. Who called it the "Bigoted Ayrian Racist Federation". They are now, and have been for several years, in a defensive posture. The purpose of which is to distract from their hero's (KV4FZ, Herb Shoenbohm) problems with the FCC.

In recent history, a sister group known as the STUMPJUMPERS, were created. Most, but not all, of their members are also BARFies. Their apparant purpose is to create hate and discontent, spread vicious lies and rumors, and disrupt not only amateur communications, but internet amateur related subjects also. Since they can't actually "JAM" out someone here on usenet. They resort to slander, libel and harassment as their main tactic.

Hope this helps some.

>
>--
>73 de KC8JBO

Of course Lloyd is living in a dream world. His lack of reading comprehension skills are ample evidence of that fact.
Lloyd: go read my post again. Where, preytel, did I EVER say that I ran your buddy Drew Durigan off this newsgroup? I didn't. All I said was that a group of hams who were upset with Drew for using this newsgroup as a forum for promoting illegal activities, such as out of band operation on 10 meters by unlicensed operators, ran Drew off the newsgroup. Strike one, Mr. Davies.
Also, I did not state that you were CBRAMBO, a/k/a Drew Durigan. I stated that CBRambo1 is one of the screen names which you have used in your ongoing spamming of this newsgroup. Strike 2, Mr. Davies.
It doesn't take a rocket scientist to determine that CBRambo1, Porkkbutt, N0VFP, SWL002, DX302MAN, etc. are all one in the same, Lloyd. You have a writing style which is easily recognized, and anyone with a reasonable degree of intelligence can tell when you are posting under an "assumed" screen name.
As far as proof is concerned, all that needs to be done to verify that CBRambo1 is one of your many AOL screen names is to send copies of your posts to AOL TOS. I'm sure they could verify the fact that most of the spam which clogs this newsgroup is originating from your account.
Further proof that Lloyd Davies is living in a dream world: N0VFP constantly claims that I am bootlegging the callsign of the recently deceased Frank E. Burns of Phoenix, Arizona. In only ONE post have I ever made reference to Frank's callsign, so only Lloyd knows how I am bootlegging another amateur's callsign by using "FRNKBURNZ" as my screen name.
Lloyd, trying to carry on an intelligent conversation with you is like trying to talk to a spoiled brat who always wants his own way. Therefore, it's pointless to try and debate with you, so I won't even attempt that feat. If and when you ever develop some reading comprehension skills, you may no longer be the laughingstock of this newsgroup.

"Where's all the RADIO CRYBABIES?"
"I wanna hear 'em TALK TOUGH!"

4637. Lloyd, Please Post BARF Officers

The stumjumpers and the barf are neo-nazi groups, whose "good work"
includes jamming and interference, badmouthing anybody that opooses
them, and fostering racist, bigoted and anti-semetic remarks on the
internet and on the air.
And I've heard Polly, Billy Jerk and the rest make those kinds of
remarks.

The blame lies with the original author, Sirhan Indigo Ranjan, who
didn't state his claim too clearly:

sir@sir.com wrote:
>There never was or is a code requirement for commercial broadcast.

Sirhan should have said that there is/was no code was requirement for
commercial radiotelephone broadcast.

When confronted with the truth the stupid stumper crawls out of the
light, as would a vampire hiding from the cross. You pitiful excuse
for a man. You don't have the ball's to even use a real name or call.
You and your ilk come on this newsgroup professing to tell the "truth".
You would'nt know the truth if it bit you on the ass. Do yourself a
favor, wannnnaaaabee. Pull the TRIGGER. As Admiral Yamamoto said
after the attack on Pearl Harbor. "I fear all we have done is to
awaken the sleeping giant, and fill him with resolve". I warned you,
now pay the concequences.

Willie Boy LOOK again the Liberty Net IS listed on the HATE DIRECTORY
right along with many other nefarious HATE GROUPS, you have to be blind.

Also LID, sending FALSE magazine subsciptions IS mail FRAUD and doing
so to cause economic loss IS ILLEGAL. LIE about it however you please!
The TRUTH is out there for all to see.
ALSO have you heard that W1WCR, the leader of the Libnet Gang, has
accused Pres. Clinton of having incest with his daughter. Well he did
it's on Tape. Wait till you hear this one! Just when you think that
this guy and group has hit rock bottom, they find a new LOW. Granted it
was hard to beat the Mail Fraud and Economic Terrorism scheme but he
did it.

With all this hype from the oxygen bandits known as BARF and Stumpjumpers, I just thought I'd let you know who you could contact and express your appreciation to, for all this wonderful stumpjumper jamming music that was/is on our beloved ham bands.

It comes from that itinerant John Ochipenti (sp), KC3AU. Late of Scranton Pa, and now in Atlanta Ga. God help the South now. Go ahead ask him about it...and if he denies it, he is a damn liar and going to hell. And if he admits to it, ask him why he sent it around to folks like K4OKA, W4FQF, WA4KBX and SEVERAL others? Hell, I'll beat you to it...his reply will be. "I have no control of what they did with my tapes".

Another Stumper caught in another lie. BTW his SJ number is 5. What a hypocrite. Spreading his faith in Jesus and supporting a neo-nazi bunch of radio criminals. What's wrong with that picture folks?

That's right asshole, I'm not in the RADIO WAR ANYMORE. Im not stupid
like Abernathy, who in a drunken stuper jammed a innocent public
service net. The Alabama section net. Not for any reason in
particular, just because I operate on it. He got his due, actually not
even close to what he deserved.

And since you have chosen to NOT LEAVE ME ALONE, then I assure you sir,
you will rue the day you did. I'm going to cut you idiot's up like so
much swiss cheese in a meat grinder. My statements are historical
FACTS, your's are just so much hogwash. And we both know it. Now pack
up your blivit bag (10 lbs of crap in a 5 lb sack) and crawl back under
the rock you came from.

>Bring It Back

ARRL makes getting started in ham radio easy. New and prospective
hams may
call 1-800-32-NEW HAM (800-326-3942).]

HOW TO GET STARTED IN AMATEUR RADIO

Getting started in Amateur Radio has never been easier! You can
usually find a ham radio class in your area sponsored by friendly
volunteers who will help you learn the "ropes."

Two Entry-Level Licenses To Choose From

The Novice Class license lets you talk by radio using voice, Morse
code or computers. You'll take a relatively easy exam on radio
operating practices, FCC rules and basic electrical theory. You'll
also pass a 5 words-per-minute Morse code test. Novice Class
operating privileges include FM voice, digital packet,
single-sideband voice and Morse code. Novice operators can use
many of the popular shortwave frequencies (below 30 Megahertz) to
communicate worldwide using Morse code, and on one shortwave
frequency band they can even use voice.

The Technician Class license NO LONGER REQUIRES A MORSE CODE
EXAMINATION, and gives you all ham radio privileges above 30
Megahertz. You'll pass a relatively easy exam on radio operating
practices, FCC rules and basic electrical theory. Technician Class
operating privileges include FM voice, digital packet, satellite,
television, single-sideband voice and several other interesting
modes. You can make international radio contacts via satellites,
using relatively simple equipment.

Where Do I Start?

The American Radio Relay League (ARRL) and others publish ham radio
license study guides to help you learn the things you'll need to
pass your exam and have fun with Amateur Radio. ARRL can also
assist you in finding ham operators in your area who'd like to help
you get started.

The ARRL Educational Activities Department (EAD) distributes a "Prospective Ham Package" that is sent at no cost to you. The material describes Amateur Radio, popular ARRL study guides, and includes a list of your local ham radio clubs, ham radio classes and volunteer examiners in your area. Contact us for a "Prospective Ham Package", today!:

TOLL-FREE -- 1-800-32-NEW HAM (our New Prospect "Hot Line")
mail -- ARRL EAD, 225 Main St, Newington CT 06111
phone -- (203) 666-1541
fax -- (203) 665-7531
e-mail -- pbudnik@arrl.org

(Make sure to include a specific request for the "Prospective Ham Package" and include your postal address because there is too much material to send via e-mail or fax.)

Added Notes from KB2SMS:

Radio Shack (as well as ham radio stores of coarse!) sell the EXCELLENT ARRL book called "Now your talking" which will teach you everything you need to know to get your Technician class license.

Call the toll free number above to get the "Prospective ham package" however.

Visit the ARRL web site at http://www.arrl.org for more info as well.

Good luck!

Tom

I'm so thankful that HAM's are an odd little group of misfits with backward thinking and always
willing to make something very small and insignificant(decscribes HAM's in general)into something
supposedly universe changing like code.
I can't wait when your little code is dropped and your sad little pathetic faces frown, with tears
running from your eyes as us modern, normal people come on the bands and stomp all you old nostalgic
argumentive types a new asshole!

| On that we can agree, i.e. pretty useful for some people.
| I would hate to search for a calf in 500 wooded acres
| without a horse.

That's right, the majority of the offenders are old time hams. I don't
know if it is because of restriction of blood flow to the brain,
excesive alcohol, or too much 75 meter RF, or a combination of it all.

This, by the way included me until I wised up. 75 has always been a
band of the "big boys". Back in the AM/SSB wars it was hell. You
should have heard it. This current flap has basically nothing to do
with lowering license standards. It has to do with childish,
uncontrolled behavior by people that should know better.

To give everyone a better insight into the real BARF organization. One day on 20 meters two stations were having a heated discussion of the "jewish situation" It was suggested by one of the individuals that some "Microwave Crematoria" should be built, because it would be cheaper and more efficient. Who were these fine gentlemen???
None other that John Dellinger, K4GFM and the well known jammer, Walter Miller, W2YEE. Both card carrying members of the BARF for years.

Please state where in my post did I reference the "no-code" Tech, or any
other class of license. And we have had the "dumbed down" testing
procedure for quite a number of years now. There are a lot of Extra
Class cb operators on the band also.

Sure. The modes which take the least amount of skill draw the most amount
of trouble-makers. You're listening to the wrong end of the band. Tune
down to 80m -- say, from 3500 to 3600 kHz -- you'll hear nothing but
friendly amateur conversations.

Hope that helps.

4695. Prices Reduced Amateur radio gear FS

Newsgroup: rec.radio.amateur.misc
Date: 1999-08-18 00:00:00 UTC
From: Oris <oris@dirtball.com>
Message-ID: <37BB4E1F.FB2D2D90@dirtball.com>
Source record: 133300

I have four peices of radio gear for sale.
1) ICOM 740 with optional power supply. This rig can be both moblie
and base unit. This rig covers 160 thru 10 with the WARC bands
included. It output is 100 watts. It has digital read out and on a scale

of 1 to 10 I put this radio a 8. Its in 100% good working order and I'm
asking $400.00 you ship.

2) A Kenwood TS 120 moblie HF rig. This rig is a very simple HF rig. It
covers the convental HAM bands 80 thru 10. It does about 70 watts out
and is a again a 7 on a scale of 1 to 10. I'm asking $275.00 for the
radio mic and power cord.You pay for the shipping and the insurance.

3) Yeasu FT 2400 50 watt 2-meter moblie $150.00 you pay shipping and
insurance. This is a good little 2-meter rig apperance wise its a 7 on a

scale of 1 to 10. It comes with a keypad mic.

4) ICOM 27 H 2-meter mobli rig 45 watts out mounting bracket and keypad
mic. This is a good little 2-meter rig apperance wise its a 7 on a scale

of 1 to 10. $125 you ship.Drope me a line if you are interested in any
of
this gear.

Thanks for reading and 73 from Oris

Why don't you people just give up CW and join the modern age instead of wasting hundreds of posts
trying to defend your nostalgic hobby?
Maybe your mode will be standard, but your language differences will be completely non-understandable, thus
mode is mute.

| You need to step back so as to get a global view of why the code require-
| ment exists for HF privileges. RF at HF respects no boundaries, and as
| communicators first and foremost, hams the world over should have at
| least one mode in common.

75 has sounded like that for at least 25 years. That's why I stay off of it. I much prefer 40 and 15 CW.

My theory on it is that the only guys that spend a lot of time on 75 are those that have the space for large antennas. They tend to live in the sticks and since they live in the sticks, they follow the stereo type of a typical back asswards hick. I maybe wrong, but that's why they call it an opinion!

Welcome to the Auxiliary Communications Service Newsletter, developed by the ACS Training Unit of the State of California Governor's Office of Emergency Services. Please visit our ACS Home Page at http://acs.oes.ca.gov

The purpose of this weekly newsletter is to bring those of us in emergency communications closer together by sharing common ideas, and by introducing new technology into the emergency services community. All individuals with an interest in emergency communications, disaster preparedness or helping the community at large are encouraged to participate here in an open forum.

You will find a virtual community here, with representatives from many different organizations with the same common goal: emergency response. We encourage everyone, from whatever organization you represent (or just yourself!) to bring us your ideas, suggestions, concerns, manuals, handbooks, or opinions so that we may share them with the group. To those of you who have just joined us, welcome aboard!
.....

>From the Editor's Desk:

Congratulations to Steve Williams, on his appointment as Southern Region ACS Training Officer. We're looking forward to good things from you, Steve, and welcome!

A web page for October's PACIFICON '99 conference is included below.

Stay safe, everybody - see you next week! Dave Larton, Editor

>From the Mailbag:

From: Jeff Hannon <kd6pct@juno.com>

A question has come up regarding the "approved" RACES power
connectors for radios, amplifiers, and other associated
equipment using 12 Volt DC power. We have been using the
polarized connectors for a few years now, and they have worked
pretty well. The question came up if these were still the
approved RACES connectors when one of our group checked out the
Southern Region ACS web site. There, the Anderson Power Pole
type connectors are described, along with a diagram. It is also
stated in the text descriptions that these are the approved
connectors. Since I was not made aware of any changes in what
is approved or not approved, I cannot give an answer to this
question. Also, I find no mention of these connectors in the
Northern Calif. web pages, nor have I seen any other mention of
them over the past couple of years.

Could you please help clarify this, or pass it along to somebody
who would know the answer? Thanks.

Jeff Hannon
KD6PCT
Radio Officer
City of Manteca, CA RACES

(Jeff: I've looked all over and I don't know of an established nationally 'approved' connector. Different groups have recommended several different connectors over the years, with the two most popular being the Anderson PowerPole and the 2-pin MOLEX connector. Both connectors work well; I personally favor having the provision to have 2 bare wires to twist the leads on to. Why? Murphy's Law... If you take your radio on a Mutual Aid assignment, (as I have on quite a few occaisions) chances are the people you will be working with will have a different connector. (And, I've wound up cutting off my leads more than once!) Use what's common in your area, and have a toolkit available to make a possible change to someone else's system. - Dave Larton)

.....

Current Events:

Washington August 16, 1999 - The head of the Federal Emergency Management Agency (FEMA) announced that federal disaster aid for Utah was ordered by President Clinton today to supplement tornado recovery efforts Salt Lake City.

FEMA Director James Lee Witt said President Clinton authorized the assistance this afternoon under a major disaster declaration issued for the state at the request of Gov. Michael O. Leavitt. The declaration covers damage from last Wednesday's tornado that barreled through downtown Salt Lake City.

Witt said the President's action makes federal funding available to help meet the recovery needs of affected residents and business owners in Salt Lake County, including Salt Lake City. Witt designated the area eligible for federal assistance following the declaration.

The assistance, to be coordinated by FEMA, can include grants to help pay for temporary housing, minor home repairs and other serious disaster-related expenses. Low-interest loans from the U.S. Small Business Administration also will be available to cover residential and business losses not fully compensated by insurance.

Additionally, Witt said federal funds will be provided for the state and affected local government agencies to pay 75 percent of the eligible cost for debris removal, emergency services related to the tornado, and restoring damaged public facilities. The declaration also makes cost-shared funding available to the state for approved projects that reduce future disaster risks.

Steve L. Olsen of FEMA's regional office in Denver, was named by Witt to coordinate the federal relief effort. Olsen said affected residents and business owners can begin the disaster application process by calling 1-800-462-9029, or 1-800-462-7585 (TTY) for the hearing and speech impaired. The toll-free telephone numbers will be available starting Tuesday, August 17 from 8 a.m. to 6 p.m. (CT) seven days a week until further notice.

Office of Public Affairs --- Washington, D.C.

From: CTRAILER@aol.com

Dear Dave,

This is just to let you know that an emergency drill will be held throughout the Riverside County in California on the 20th of October. The American Red Cross will be opening at least 6 shelters along with helping to staff some of the E.O.Cs.

More information will follow as I get it.
Andy Trautner
Logistics Officer
American Red Cross. Riverside County.

>From the ARRL's Jim Maxwell:

ULS Looms Large for Amateurs:-

Say hello to the ULS! Monday, August 16, the FCC's Universal Licensing System becomes a reality for the Amateur Service. The FCC said August 13 that the ULS would be out of service until then to prepare for implementation. This means amateurs will have to wait until the ULS is back up to register.

The ULS ushers in an era of electronic, interactive filing and handling of Amateur Radio applications and marks a major change in the way Amateur Radio applicants will deal with the FCC. It also means the demise of the familiar paper FCC Form 610 series in favor of the "universal" Form 605 - primarily designed for electronic use but also available on paper. Once registered, amateurs filing applications with the FCC under the ULS will use Form 605 for all purposes except--at least for now--club station applications.

The FCC began a weeklong ULS phase-in period for the Amateur Service August 8 and has been converting existing Amateur Radio licensing data into the ULS database. Electronic Amateur Radio license renewal using FCC Form 900 was scheduled to end August 9. Electronic vanity call sign application using Form 610V was to terminate August 13 at 5:30 PM Eastern Time. Hams should not file renewal or vanity applications until the ULS comes up August 16.

Before using the ULS to file an application, renew or modify a license, or apply for a vanity call sign, all amateurs must register. When registering, individuals eligible to hold a Social Security Number must provide this number--which the FCC refers to as a Taxpayer Information Number or TIN. This requirement is a mandate of Congress, not of the FCC. All hams must be registered in the ULS to do business with the FCC.

Applicants use TIN Registration Form 606 for electronic or manual registration. To register electronically, visit http://www.fcc.gov/wtb/uls/ and click on "TIN/Call Sign Registration." A paper Form 606 is available at http://www.fcc.gov/formpage.html or by calling 800-418-FORM (3676). One big advantage only to on-line registrants is that the ULS application system checks for errors before data are submitted.

Applicants first register their Social Security Number (or TIN), then enter a call sign. Applicants also must select a password to identify themselves in future, private transactions with the FCC database. A valid password can be from 5 to 30 alphanumeric characters and is case-sensitive. For additional security, applicants also specify a personal identifier. The FCC and ARRL recommend that applicants not use their Amateur Radio call sign as a password or identifier.

Registrants receive a nine-character Licensee Identification Number. Amateurs may use this number in place of a Social Security Number in future dealings with the FCC. Those filing a paper ULS Form 606 by mail will not receive an acknowledgement from the FCC. Paper filers can obtain their FCC-generated Licensee ID Number from ULS Technical Support at 202-414-1250.

For now, applications for club, military recreation, and RACES licenses should be filed on the "old" FCC Form 610B. Trustees and custodians of these licenses should not use their personal Social Security Number as the TIN for these applications but should contact ULS Technical Support (202-414-1250) to obtain a FCC- generated identification number for Form 610B. Applications that do not include this number are subject to dismissal.

Applications for new licenses or upgrades will continue to be filed through a Volunteer Examiner Coordinator. VECs will use a special NCVEC Form 605 - a variation of Form 605--to file with the FCC for test sessions.

Starting August 16, hams already registered in the ULS may file applications using the new FCC Form 605 electronically at any time of day, seven days a week. FCC Form 605 will be used for license renewals, modifications, cancellations, application withdrawals and amendments, as well as requests for a vanity call sign, duplicate license, change of address or other

clerical license modification. Visit the WTB ULS page, http://www.fcc.gov/wtb/uls and click "Connecting to ULS" for information on accessing the ULS system. Accessing the ULS database requires a telephone modem. A toll-free number, 800-844-2784, connects users to the FCC's Wide Area Network.

Among other things, the ULS features a renewal reminder sent 90 days prior to a license's expiration date. The ULS also simplifies the process of submitting fees to the FCC. The FCC said it also anticipates that the ULS will be capable of accepting credit card payments on-line "in the near future."

For more information, visit the FCC's ULS page, http://www.fcc.gov/wtb/uls.

September QST will carry information on ULS in the Washington Mailbox column on page 85. (The ARRL Letter)

This week's EMCOMM Bulletin:

EMC197 EMERGENCY COMMUNICATION 2/2
To: Emergency Communications Units - Information Bulletin
To: Emergency Management Agencies via Internet and Radio
By: Auxiliary Communications Service (ACS) of the
California Governor's Office of Emergency Services

EMC197 EMERGENCY COMMUNICATION 2/2 Release 8/16/99

Continuation of Ben J. Green's response to the Rick Palm article in the May QST and distributed in bulletins 184-187.

"First and foremost is the need to convey the message that 'volunteer communications is not free'. The salaried aspect is all that should separate our volunteers from the paid staff. That is why we prefer to identify 'volunteers' as 'unpaid professionals'. The program does cost, whether it be full-blown Amateur Radio repeater systems and radios at each station or pencils & paper, it all must be supported by the government or private agency using volunteers. This must include an intensive training program not only to provide guidance and coverage of liability but also to expand the volunteer knowledge-base of the ever-changing world of telecommunications. An example is of one County in California that has its own Amateur Repeaters and is maintained by paid professional technicians (some of whom are licensed Amateurs). Its day-to-day use is by the County's unpaid

professionals as well as Amateurs passing through needing information. But it is a valuable second or third line of communications backup that makes it worth the expense to that government. That same County has the latest in 800 MHz trunked radios and has provided training and the radios to the volunteers so they are part of the Government served and not an outside group. The common Amateur frequencies put coordination of multiple agencies in arms reach of the Integrated Emergency Management of the County."

"California is not perfect, we haven't 'arrived' yet, but we are moving in a direction that I feel is the trend that this Nation is moving towards with regards to Emergency Management. Emergency Management's greatest technological natural resource is the Amateur Radio volunteer. That individual, shown to have accomplished a basic radio knowledge, can be continually re-trained in new technologies as the industry expands its diverse field of products. Our own State OES and many County's and City's volunteers operate and maintain a plethora of hi-tech items which all contribute to the overall mission. No one system be it Amateur, cellular, trunk radio or satellite can stand on its own during a major telecommunications emergency. Working together all the diverse systems can if used by a trained individual such as an Amateur Radio Operator."

s/s Ben J. Green, WD8CZP, Telecommunications Coordinator

LOOK sighs of the truth of the post porkbut era. Its just a matter of time before this guy joins the human race. As porkbut gets further from Ham radio the more guys like this one become real humans. I think it will just be a little more time!

I have four peices of radio gear for sale.

1) ICOM 740 with optional power supply. This rig can be both moblie
and base unit. This rig covers 160 thru 10 with the WARC bands
included. It output is 100 watts. It has digital read out and on a scale

of 1 to 10 I put this radio a 8. Its in 100% good working order and I'm
asking $450.00 you ship.

2) A Kenwood TS 120 moblie HF rig. This rig is a very simple HF rig. It
covers the convental HAM bands 80 thru 10. It does about 70 watts out
and is a again a 7 on a scale of 1 to 10. I'm asking $275.00 for the
radio mic and power cord.You pay for the shipping and the insurance.

3) Yeasu FT 2400 50 watt 2-meter moblie $150.00 you pay shipping and
insurance. This is a good little 2-meter rig apperance wise its a 7 on a

scale of 1 to 10. It comes with a keypad mic.

4) ICOM 27 H 2-meter mobli rig 45 watts out mounting bracket and keypad
mic. This is a good little 2-meter rig apperance wise its a 7 on a scale

of 1 to 10. $125 you ship.Drope me a line if you are interested in any
of
this gear.

Thanks for reading and 73 from Oris

> > heads up their ASS.

Gees Rick you're just finding this out now? I knew that 25 years ago by attending 2-3 ARRL local meetings. In the mid 70's if you mentioned the word "computer" to these guys, they'd laugh in your face. I never saw such a group of technologically stagnant people in one place who were stuck in one mindset. All these guys wanted to is talk about "Skywarn" and the fact that "The Russians might be coming". When certain people recognized the potential for the diminishment of Amateur Licenses, they took a "wait and see" attitude. This "wait and see" attitude lasted in excess of 20 years and now they realize they are in trouble.

Who's laughing now? The ARRL membership is down drastically from 10 years ago. They don't have the political clout they had 20 years ago and with the decrease in the total number of Hams, they cant justify the use of the current allotted bands with the FCC. There are now more Technician Class license holders than all other license classes combined. What does this tell you?

Its called Dummying Down. When the ARRL had some major political clout 10-15 years ago they could have made some drastic changes, however now like always, their actions are too little too late.

I am a retired Army colonel. There is an old story that has been around for years. It goes like this:

Q: Where did such a stupid colonel come from?
A: He started out as a stupid lieutenant.

Where do all these rude amateur radio operators come from?

They are rude people. Amateur radio does not draw its members from a select set of applicants who are pre-screened for manners, good sense, wisdom, and common courtesy. We draw from the general public who, sadly, are becoming less and less concerned about relationships with others -- courtesy and good manners -- and more and more concerned with their own "rights."

Have you dined in a restaurant lately? Go into a restaurant -- especially one with a younger clientele-- and count the number of young men, women, too, who are sitting around eating wearing their baseball caps. Had I even thought about sitting down at a table to eat with a hat on, my old granddaddy would have snatched off my head and the cap. Today, when you mention manners to many folks, they will let you know right away that they consider "manners" and "etiquette" to be intrusions on their rights.

Sad, but that's the way it is.

I don't think this has anything to do with rude amateurs but the manners of
the 50's are long gone...unless you are in the military, seldom does the cap
leave your head when you enter a building anymore. Sadder yet is when you
don't remove your cap to show respect to the flag of this country when it
passes by in a parade. It's the ambient morality thing...and it sucks.

Why am I having a hard time believing this? Isn't the Code Quick the method where you use little sayings with each character? I don't know I never used any of those schemes...I just got on the air and learned it after I passed my 5 wpm exam. It's near impossible to copy code at 23 wpm having to translate each character into "a shave and a haircut" type thing. Also I have met several hams who learned code the Code Quick way and could not get beyond 5 to 7 wpm because they could not drop the translation process.

| I won't be a member of an organization where the people at the top have their
| heads up their ASS.

You are the one who has a CW keyer up his ass, squeezing your sphincter in a frenzy to save code.
CW is nostalgia, it is already dead, there is no saving it.
HAM will be dead if people like you don't get their keyers out of their asses, unless you really like
beeping to a bunch of old narrow minded, biggoted farts for the rest of your life.

| Save Ham radio, Save CW, Quit the ARRL and STOP their Restructuring plan !!!

I have monitored the citizen radio band and the 75 meter ham band for a while. I can't seem to tell the difference between the two bands because the language and the type of operation seems to be the same, except the stations are further apart. Can someone please explain this. Thanks DC.

tip pilots with 12 years experience declined.
: >
: Why is Junior's death bothering you so much? It seems you have an ax to
: grind with the Kennedys. The major sentiment in this newsgroup is that
: people don't achieve certain goals because their stupid or lazy, i.e.
: learning Morse Code. To extrapolate from that sentiment I guess your
: parents--and you--were stupid and/or lazy to achieve the status and
: wealth of the Kennedys, Rockefellers, Vanderbilts, etc. Quit begrudging
: these people their status.
:

No, what pisses folks off is how the Kennedys preach that the wealthy
should be taxed, that wealth is bad. It is their being hypocrits that is
the problem. More of the rich not wanting competition..

Mr Rattlesnake. glad you are back, Dan won"t give the Stumpjumpers
credit for making it possible to visit his sick Mom. Oh well the Stump
Jumpers did it out of their love for humanity. Been kicking Wisemans
ass too, gets tiresome, he is so easy to get going, notice the posts he
makes, all the same old crap I guess, I never read over one of his
posts, they are all alike. He is going to get kicked off the server he
is on now, its just a matter of time.

Don't try to be friends with Wiseman, he is a Momma's boy. He still lives with his mother, he can't turn loose of the sugar tittys, He is a overgrown slob, who sponges off his parents. I understand he was caught playing on the internet whil he was on the job by one of the StumpJumpers. They rightly fired his ass. He likes to sponge off people and hates work. If he does get a job, it is timekeeper in a thirty minute hot pillow motel or something of that sort. He cqn't even hold that kind of job. I guess MOMS tittys will always be there for the overgrown slob. His daddy is still in the "Big House".

>them.

How about looking-up the callsign of the person who was so unbelievably fortunate to be afforded the opportunity to have you speak to him/her through the Callbook, Buckmaster, or whatever and send them a bill? Another option that immediately comes to mind is to simply not buy any amateur radio equipment, sell-off what you already have and talk to yourself. Just a thought. :)

I have also noticed this mysterious phenomenon. Maybe there is a tear in
the radio frequency spectrum and somehow CB transmissions are
overlapping into the 75 meter band. I have also listened to both, and
found striking similarities. Cursing, slandering, abusive name calling
and worthless wasting of electricity to make it all possible. It is
quite disturbing.
This problem also seems to be spreading into the newsgroups......
Maybe a new type of a hobby radio service can be formed for those who do
not want to be associated with this rednecked phenomenon.....

hour
> to "repair" a rig I barely used.
Whats wrong with your rig? Maybe you can get some ham to help you
repair it at lower cost. There is a Kenwood NG where people with
Kenwood problems often get help or advice.
> Thus, I will say again with, as Lincoln said, my "feet firmly
planted":
Lincoln was asked "How long should a man's legs be?" because he was a
tall awkward man. His answer..."Long enough to reach the ground".
> HELL WILL SERVE KLONDIKE BARS BEFORE I GIVE FCC MY SSN, as long as
said
> data can be accessed by hackers via the web.

I'm sorry to hear of the misfortune above. Don't let anyone get
away with using credit card numbers falsely.
If you want to renew as a Ham, you will have to send your SS number
to the FCC data base. It is not up to the FCC. It is not up to the
ARRL or the ham radio community. The regulation comes down to all
agencies of the federal government from the federal government.
Yep...death...taxes...and now SS numbers.

> Share what you know. Learn what you don't.

One good thing about being a Wexelbaum is that although some people
might be able to hack my credit card or social security number;
...Nobody is going to show up claiming to be a Wexelbaum who is not a
Wexelbaum. Who would claim that name for an ID? Obviously Smith or
Jones would be better.
Maybe for security purposes you could change your name to a name
that might be considered distasteful by many people [who are dumb enough
to judge people by their names alone]. It should be a long name and
perhaps something that the hate bigots might hate...or that some idjits
might link to communism, socialism or some other objectionable ism in
their weak pedjudiced minds.

When I was in the US Army...They told us that if we were captured we
should give only our name, rank, and serial number to the enemy. Now as
a ham I am ordered to give my name, call, license class and social
security number to the FCC. Heck it is a good thing that they found a
new use for the SS Number because some pessimists think that Social
Security will become bankrupt in the far future and cease to exist.
IMHO ham radio, as nebulous as it seems to be, might survive longer than
Social Security ...So in that case the SS number's new useage may be all
it is good for.

Hams need more license classes,
I never met a ham I didn't like regardless of his name or number,
Bob Wex w2ilp (Intended Logical Paranoia?)

What hath G-d wrought?
--NUMBERS 23:23--

Hmmm...Maybe avid hams would feel safer if
they sent their SS numbers or credit card numbers
using Morse code rather than via the Internet.
If we were sure all Hams are honest that could
become a unique secret secure code in the future!
--w2ilp-- .-.-. -.-

Especially since the mode of choice is encrypted satellite data
communications. Ever heard of the tactical internet? This is what
the U.S. military will be using in the very near future. Voice
communications will still go on, but most of the communications will
be data from PDU's to central data servers.

Because of his Hoodlum ways, Roger Wiseman KC8JBO has been kicked off of another server, this time WVNET, they wanted no part of this THUG!! Now he is on MSN, bets are being taken as to how long he will be with this server til they give him the old heave ho, Roger larded idjit, no server is going to put up with your outlaw ways, Wise up, Wiseass,(if possible)act right soon, are you will have no server. No one in West Virginia will have you now, soon you will have no place to run.
Getback.

-- Herrbie is using the same server, still here.

hear hear!! ;-)

there are a couple of threads on this newsgroup I could stand to see the end of ..
I'm sure many other folks here know which ones I mean ..

Apparently this character is one of Porkbutt's undercover operatives
(am I correct, "Legba", as you are in fact reading this?)

Don't pay any attention to him. He is just trying to keep the heat off
of Porkbutt just as he is finally being brought to justice.

In fact, "Legba", was the producer and sole distributor of the famous
"Porkbutt Passes Gaaasssssssss" tape. It is funny how somehow Porkbutt
is now his Master.

Tom

Well, STUPID, I was never really on, WVNet. Oh, maybe the public access
point I went to was, but they have no record of your letter. Too bad,
Polly. I'll seee you from WVnet.
